Why

THE MONETARY TIMES OF CANADA IS ONE OF THE BEST ADVERTISING MEDIUMS

1.—Reputation. "*The Monetary Times*" is conducted upon lines which have gained for it the highest reputation for integrity and independence of judgment, and its opinions and pronouncements as regards new issues offered for public subscription, and other like matters with which it essentially deals, are respected accordingly.

2.—Circulation. "*The Monetary Times*" circulates extensively not only throughout Canada but also in the United Kingdom and in every financial center throughout the world. Circulation statement, showing distribution, available to bona-fide advertisers.

3.—Readers. "*The Monetary Times*" by the nature of its contents is of interest to all classes of investors. It appeals to a vast and constantly increasing number of readers, including Government and Municipal Authorities, Bankers, Insurance Officials, Directors, Managers and Secretaries of Companies and members of the various Stock Exchanges—by the great majority of whom the paper is not only read, but carefully filed for reference.

4.—Prominence of Advertisements. The space available for advertisements being strictly limited, announcements appearing therein secure very marked prominence.

5.—Advertising Policy. Advertisements which are apparently designed to entrap the unwary, to induce people to part with hard-earned savings, and to tempt necessitous debtors to take almost the only step which could possibly make their financial troubles greater, are consistently declined by "*The Monetary Times*" The business of newspaper publishing is not in the opinion of the owners of "*The Monetary Times*," one which is free from moral responsibility.

For these reasons "*The Monetary Times*" offers an excellent, if not absolutely unique, medium for the announcements of all who desire to cultivate business with a clientèle of the highest class.

Sample copies and advertising rates cheerfully supplied.

Canadian Banks' Position Strengthened in May

Volume of Loans is Lower—Demand Deposits Also Fall, Though Savings Deposits Increase—More Funds Kept on Call in New York—Circulation Reduced

	May, 1919.	April, 1920.	May, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 568,730,118	$ 652,918,760	$645,957,229	- 13.1	— 1
Deposits after notice	1,107,983,072	1,209,573,990	1,229,073,515	— 11	— 1.6
Current loans in Canada	1,071,447,686	1,347,238,230	1,319,079,981	- 21	— .11
Current loans elsewhere	127,490,932	185,085,021	183,986,222	— 14	— 1.08
Loans to municipalities	50,356,227	72,281,019	73,904,635	— 16	— 1.3
Call loans in Canada	89,187,032	125,641,859	119,111,193	33.7	— 1
Call loans elsewhere	157,176,325	206,229,151	213,961,182	— 35.6	— 3.3
Circulation	219,287,788	213,226,193	235,085,179	- 7.3	— 2.2

THE above are the principal changes shown in the summary of statements of chartered banks to the Dominion government, as at May 31st, compared with the statements for May, 1919, and for April, 1920. Current loans in Canada are practically unchanged, while current loans outside of Canada, and call loans in Canada, are reduced. The increase in the call loans elsewhere indicates that stronger reserves are being kept in New York. Apart from this the upward changes for the month are negligible. The comparison for the year, however, shows that a great deal of expansion has taken place, chiefly in increased credits, circulation and deposits.

The only changes recorded in the liabilities to shareholders are as follows:—

Banks.	Capital subscribed.	Capital paid-up	Reserve
Bank of Montreal	$2,000,000	$2,000,000	$2,000,000
Union Bank	....	220	....
Home Bank			100,000
Sterling Bank		[illegible]	

The balance due to the Dominion government is reduced from $261,041,115 at the end of April to $216,098,[illegible]21 at the end of May. Balances due to provincial governments are slightly increased. The upward movement of savings deposits continues, while demand deposits are falling off, as illustrated by the following table:—

	Deposits payable on demand	Deposits payable after notice
1919—May	$568,730,118	$1,107,983,072
June	60[illegible],027	1[illegible]
July	584,17[illegible]	1[illegible]
August	581,[illegible]	1[illegible]
September	650,74[illegible]	1[illegible]
October	70[illegible]	1[illegible]
November	72[illegible]	1[illegible]
December	70[illegible]	1[illegible]
1920—January	621,4[illegible]	1[illegible]
February	[illegible]	1[illegible]
March	657,[illegible]	1[illegible]
April	652,91[illegible]	1[illegible]
May	645,[illegible]	1[illegible]

A comparison of th[illegible] as at April 30th, shows [illegible]

and notes held. The changes for the month were as follows:—

Gold and sub-coin in Canada	—	$1,0[illegible]
Gold and sub-coin elsewhere	—	115,976
Total	—	$1,14[illegible]
Dominion notes in Canada	—	$9,[illegible]
Dominion notes elsewhere	—	9,17[illegible]
Total	—	$9,740,017

Call loans outside of Canada have reached a new high record, as shown in the following comparison:—

	$ 1917	$ 1918	$ 1919	$ 1920
January	175,747,470	1[illegible]	140,819,[illegible]	170,[illegible]
February	162,[illegible]	1[illegible]	1[illegible]	184,[illegible]
March	161,616,7[illegible]	167,206,701	150,116,[illegible]	[illegible]
April	1[illegible]	1[illegible]	1[illegible]	20[illegible]
May	168,632,0[illegible]	1[illegible]	157,176,325	213,961,182
June	1[illegible]	17[illegible]	1[illegible]	
July	151,877,[illegible]	1[illegible]	[illegible]	
August	[illegible]	1[illegible]	17[illegible]	
September	160,180,011	1[illegible]	1[illegible]	
October	1[illegible]	1[illegible]	[illegible]	
November	[illegible]	1[illegible]	1[illegible]	
December	[illegible]	1[illegible]	[illegible]	

Loans in Canada for the [illegible] as follows:

[illegible]	[illegible]	[illegible]

WEST SHINING TREE GOLD AREA

A report on the West Shining Tree gold district, prepared by Percy E. Hopkins, has been issued by the Ontario Department of Mines. Summarizing the economic possibilities, Mr. Hopkins points out that freighting in summer is still expensive, and this and war conditions have resulted in very little underground work being accomplished. He states that gold occurs in numerous deposits, but in many the gold is not concentrated enough to pay for working, while in others it is irregularly distributed. A few small, high-grade pockets have been found on half a dozen properties, but he points out that this does not signify that they will make mines, as other portions of the same vein may contain little or no gold. A few properties in the area are reported by him to have promise, but they are still in the prospect stage, and whether they will become mines or not will only be determined by further underground development and sampling. The balance of the report is largely technical.

Dealing briefly with properties, Mr Hopkins merely states that the Herrick's manager reports ore shoots of considerable size, indicated by surface sampling, the diamond drill and sampling in a 50-foot shaft. He further states that the Ribble vein, which outcrops on the Wasapika, has been exposed on the Miller-Adair, and has been traced a quarter mile on the Foisey, being in all over a mile long and of satisfactory width. He quotes Manager Rogers, of the Wasapika, to the effect that the outcrop on Wasapika gives $9 ore across four feet for a distance of 800 feet, and a cross-cut at 100 feet showed 2½ feet giving $7.20. The Ribble also carries indications of ore on the Miller-Adair and visible gold on the Foisey. Mr. Hopkins points out that ore shoots may occur along the Ribble vein, but will not necessarily all be ore.

J. M. Robinson and Sons, stock brokers, have opened an office at Moncton, N.B., and George J. Ross, of Shediac, has been appointed manager. This makes three offices of this firm of stock brokers now open in New Brunswick.

Of the deposit in Central Gold Reserves $10 500,000 is in gold [illegible] the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance*

HOME BANK ANNUAL REPORT

Progress in keeping with that recorded by other banks is shown in the report of the Home Bank of Canada for the year ended May 31st, 1920, submitted to the shareholders at their annual meeting, held on Tuesday. Net profits are $268,894, compared with $238,753 for the previous year.

There had been brought forward $17[illegible],[illegible]48, and there was also $3,787 received from premium on capital stock, making $431,031 available for distribution. With the increase in dividend, the payments to shareholders amounted to $117,236, as compared with $97,378. Other appropriations included a reservation of $25,000 for adjustment of exchange rates on British and foreign balances and securities, a new item, and an unchanged sum of $100,000 for rest account. The balance carried forward is $146,87[illegible].

The following are the principal items in the report, with comparisons:—

	[illegible]	[illegible]
Profits	$ [illegible]	$ [illegible]
Dividends	[illegible]	[illegible]
Rest account	[illegible]	[illegible]
Premium on capital stock	[illegible]	[illegible]
Deposits bearing interest	[illegible]	14 [illegible]
Deposits not bearing interest	[illegible]	[illegible]
Liquid assets	[illegible]	[illegible]
Liabilities to public	[illegible]	[illegible]
Total assets	[illegible]	[illegible]

Last year [illegible] was raised from [illegible] per cent., and at the meeting [illegible] the president, H. J. Daly, stated that [illegible] per cent. The former directorate was re-elected.

Parliamentary Business Rushed at Close

Session Ended on June 30—Followed by Unionist Caucus—Premier Presents Resignation—"National Liberal and Conservative Party" Will be New Name for "Unionist Party"

(Special to *The Monetary Times.*)

Ottawa, July 1, 1920.

PARLIAMENT prorogued on Wednesday after a great deal of business had been rushed through with the utmost speed. The close of the session was followed immediately by an important caucus of the Unionist party. As forecasted in these columns, the premier submitted his resignation, and the name "National Liberal and Conservative Party" was elected to take the place of the "Unionist Party." A new leader has not yet been chosen.

Members of parliament this week all took a keen interest in the proposal of the government to raise the sessional indemnity from the present figure of $2,500 to $4,000, and to make corresponding increases in the salaries of the cabinet ministers. Such increases have been strongly urged this year by the members, but the government had maintained an attitude of opposition right up to last week. Though a large majority in the house are in favor, criticism has nevertheless been keen, it is pointed out that when the war veterans applied for a second gratuity the government answered that the financial position of the country did not permit of any more being paid.

The resignation of James Murdoch, the last member of the Board of Commerce, now makes it necessary for the government to do something if the work of the board is to be continued. More amendments to the luxury taxes have been passed, and the other business of the government will, it is expected, be carried through as soon as possible.

Supplementary Estimates

Supplementary estimates totalling $62,002,182 were tabled on June 28th. The principal item is a vote of $25,000,000 for a loan to the Grand Trunk. The loan is to be used in "meeting expenditures made, or indebtedness incurred or payable in respect of deficits in operating expenses, interest on securities, maturing loans, construction, equipment, renewals and betterments" and for the purpose "of retiring maturing secured loans or other funded indebtedness and interest thereon." The funded indebtedness to which reference is made is such as was in existence before March [illegible], 1920, the date of the agreement between the Crown and the Grand Trunk. It is provided that the minister of finance instead of applying towards loan retirement portions of the $25,000,000 loan may, with the approval of the governor-in-council, guarantee the principal and interest of securities of the Grand Trunk or any of the companies comprised in the G.T.R. system. There is also a further vote of $100,000 to provide for expenses in connection with the acquisition of the Grand Trunk.

After the Grand Trunk loan, the next largest vote is one of $[illegible] to meet the additional pension charges as provided in the revised scale of pensions which passed the House a few days ago. Other items are:

Maintenance of Canadian navy	$1,[illegible]
Public works (harbors, wharves, etc.)	1,[illegible]
Air Board	1,[illegible]
Soldiers' Civil Re-establishment	6,[illegible],064
Increases in salary due to application of reclassification of civil service for years 1919-20 and 1920-21	6,000,000
Canadian Government Railways, additional amount required to pay off deficit of working expenditure for year ending March 31st, 1920	1,000,000

Canadian Pensions Now High

[illegible] provision for increased pensions, and for [illegible] the returned soldiers, as recommended by the committee on soldiers' civil re-establishment, have been passed. In comparison with the pensions in other countries, the new Canadian scale, for the totally disabled private soldier, is as follows:—

	Single man.	Man and wife.	Man, wife and child.
Canada	$ 900	$1,200	$1,380
Great Britain	506	632	727
Australia	379	569	695
New Zealand	506	759	885
South Africa	379	506	601
United States	1,200	1,200	1,200
France	480	480	540
Italy	243	291	318

Higher pensions are provided where there are two or three children, after which the allowance is to be $120, per annum for each additional child. This will increase the annual pensions' bill by about $8,000,000, to $34,000,000, when it comes into force next September.

Interest Rate on Deposits

In the Senate on June 21st, a motion by Senator Power to increase the rate to depositors in government banks from three to four per cent. was discussed at some length, but was finally lost on division. In supporting his motion, Senator Power pointed out that the rate had once been four per cent., and could be changed now by order-in-council. Today the government was paying six per cent. for outside loans and only three to its own people. The Canadian banks were enabled, as a result of this, to keep their rate down to three per cent., so that the government was really preventing the people from receiving adequate interest on their deposits. Senator Bostock supported Senator Power, but called attention to the fact that savings certificates, through which the people could secure five per cent., were issued. In the opinion of Senator Turriff, the banks could pay four per cent. without inconvenience. Senator Beique argued against the motion, saying that in England and France no interest was paid on deposits, and that the interest rate was less in the United States than in Canada.

Sir James Lougheed claimed that the Dominion government savings banks were merely a convenience for the people and were not intended to rival chartered private banks. If the government raised its rates the result would be an increase in the bank rates, which might seriously disturb business conditions.

CANADIAN FIRE UNDERWRITERS' ANNUAL

Routine business was transacted at the annual meeting of the Canadian Fire Underwriters' Association, held in St. Andrews, N.B., on June 2[illegible]th. The officers elected for 1920-21 are: President, Lyman Root, manager of the Sun Fire Insurance Co., Toronto; vice-president, John Jenkyns, fire manager of the Employers' Liability Assurance Corporation, Montreal, and Alfred Wright, manager of the London and Lancashire Fire Insurance Co., Toronto.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended June 25th: McKinley-Darragh, [illegible]; Timiskaming Mine, 66,919; Nipissing Mine, 111,[illegible]; Mining Corporation of Canada, 125,350. Total, 720,72[illegible]. The total since January 1 is 11,681,901 pounds, or 5,840.9 tons.

CANADA'S REVENUE FROM THE WHEAT CROP

PROSPECTS for the 1920 wheat crop in Canada are uniformly good, and world conditions assure a good price for our exportable surplus. The 1920 crop in Australia has been a failure, and that of Argentina is scarcely normal. Quantities available for export in other countries in the southern hemisphere will be negligible. At this early stage it is not possible to estimate the exportable surpluses of those in the northern hemisphere, but Russia and the Balkans cannot be counted on for very large amounts, while the Swedish crop is not large in proportion to the European demand. A good market for the Canadian and United States wheat can, therefore, be confidently anticipated and though Great Britain will buy cautiously through its national organization, the wheat market is of such a world-wide character as to ensure that it will be governed by fundamental economic conditions. While a bountiful supply would have helped to bring lower prices, Canada is fully justified in exacting such terms as conditions warrant.

Canadian wheat crops for the past five years have been as follows:—

Year.	Yield in bushels.	Acres under cultivation
1919	193,206,400	19,125,968
1918	189,075,350	17,353,902
1917	233,742,850	14,755,850
1916	262,781,000	15,370,000
1915	393,542,600	15,110,000

There is a striking discrepancy between 1915 and 1919. With 4,015,968 fewer acres under cultivation, the former year produced 200,336,200 more bushels than did the latter. In fact the two years with the greatest acreage are those which have the smallest yield. These variations are, of course, occasioned by climatic differences during the years. It is the weather, not the number of acres broken up, that determines whether or not Canada is to have a bumper harvest.

The principal countries, other than Canada, on which the world has relied for its wheat and flour during the past few years are the United States, Argentina, and Australia. Below is given the estimate made by the president of the British Board of Trade on March 11th last of production of wheat during the grain year of 1919, in the main wheat growing countries of the world (excepting Russia):—

	Estimated Production Wheat bus.	Rye bus.	Exportable Surplus Wheat & Rye bus.
Canada	193,206,000	10,744,000	120,872,000
United States	941,259,000	84,539,000	330,600,000
Argentina & Uruguay	195,491,000	....	165,500,000
Australia & New Zealand	81,217,000	.	*99,180,000
Algeria & Tunis	32,913,000	.. ..	9,182,000
Rumania & Jugo Slavia	141,123,000	17,710,000	[illegible]
India	279,981,000	....	. .
	1,865,493,000	112,993,000	715,518,000

*Includes carry over from previous crop.

The present position of the world as regards wheat cannot be looked on as entirely due to the war. Even before 1914 the world demand for the primary foods and materials was tending to outrun the supply. A clever recent analysis of the world's wheat situation pointed out that the great increase in population of the United States in the last [illegible] years had by 1911 resulted in the fact that their domestic requirements for wheat were approaching their production and the date was evidently near when there would be an exportable surplus only in years of exceptionally favorable harvest. The present domestic requirements of the United States are estimated at more than 90 per cent of the average yield of the five years 1909-13. The importance of this will be appreciated on consideration of the wheat production figures given above. It seems probable that even considerably larger production in the world would for some time do no more than satisfy the increasing demand.

PRICE REDUCTIONS HAVE BEEN EXAGGERATED

WHILE the reports of price reductions which were sweeping the United States were largely exaggerated, there are nevertheless forces at work which must lead to lower prices. In its July letter, the Royal Bank of Canada says:—

"The distinctive feature of the last two months has been the retail sales at reduced prices which have taken place through the United States and sections of this country. They have been given great publicity, with the probable net result of leaving in the minds of many people an exaggerated idea of their importance. The financial and industrial situation at the present time is complicated by so many warring factors that any clear survey is difficult to give. It is possible, however, to trace cause and effect to a certain extent, and in doing so it is necessary to consider the United States and Canada as a whole. So related are the two countries' business activities that any severe depression in the former has a strong effect on the latter.

"The governing influence in the decline was the shortage of credit and this must continue to be an extremely important factor. Prices rose so sharply, and legitimate and speculative activities were carried on on such a scale, that credit resources were strained to supply a demand which showed every sign of increasing tremendously unless a check were applied to it. Add to this the steadily increasing cost of labor, and it can be seen that the situation was becoming an impossible one. Over six months ago the banks were forced to commence scrutinizing old accounts and declining new business. From that date until April, money became dearer and scarcer in North America and indeed all over the world. Into this situation was injected in April the news of the Japanese debacle, itself due to over speculation. There followed heavy liquidation in stocks and bonds, and a fall in the price of raw cotton. Concerns that had not been able to have their loans extended, speculators holding raw material, and manufacturers holding finished goods were in many cases forced to seek buyers at lower prices.

"Early in May a great New York departmental store started a 20 per cent. deduction sale with the avowed object of commencing the reconstruction of business on a peace time basis and a lower scale of prices. Retail stores all over the continent followed suit. In many cases the actual reductions were probably small, and the sales no different from those in January of each year which attract no special attention. Their psychological effect was, however, considerable, rising prices were said to be a thing of the past, and a collapse of all prices was freely predicted. Further [illegible] in the [illegible] commodity markets followed.

"So far as the decline discouraged speculation or forced sellers who had been making large profits to accept less [illegible], its effects have been beneficial. It seems probable that continued restriction of credit will prevent a [illegible] upward movement of prices which have [illegible] [illegible]

CAUTION THE MUNICIPAL WATCHWORD

RATEPAYERS of Canadian municipalities are not being stampeded into approving of so-called "necessary" capital expenditures. An unusually large number of money by-laws have been defeated during the first six months of the present year. In the last three months alone by-laws to authorize expenditures totalling about $5,000,000 have been turned down, some of the more important cases being the following:—

April, Edmonton, local improvements	$ 1,500,000
April, Chatham, water works	370,000
April, West Kildonan, municipal hall	20,000
May, Sturgeon Creek, schools	55,000
June, Edmonton, (2nd vote) local improvement	1,500,000
June, Winnipeg, bridge	300,000
June, Sherbrooke, local improvement	566,000
June, Vancouver, local improvement	1,495,000

These municipalities are located in both east and west, and small towns and villages are also insisting on a more conservative policy in fianancial administration. The difficulties of Canadian municipalities have been largely due to over-borrowing and to laxity in the imposition of taxes. Just at present revenues are buoyant, but it is recognized that business depression will bring reduced property values and increased difficulty in the collection of taxes. Public works at present construction costs are a luxury which most Canadian municipalities cannot afford.

The Dominion Bankruptcy Act, which went into force on July 1st, has been heralded as a piece of excellent legislation. The proof depends upon the experience of the next few years.

* * * * *

United States motorists have written to Montreal asking about the best road to Hudson's Bay. The best so far is the old-fashioned water route, at least until the railroad from Le Pas to the bay is completed.

* * * * *

When prices were being increased, manufacturers pleaded the excuse of the increased cost of materials; now that prices of raw materials are falling, they point out raw materials are only a small factor in production costs. These are the arguments of an opportunist.

* * * * *

Schools are a good fire risk, according to Administrator Pearse of the Toronto Board of Education. They may be for an insurance company, but certainly not for a municipality. London, Ont., has been severely criticized for carrying only $60,000 of insurance on its collegiate institute, which was burned on April 22 with a loss of $440,000.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. Horace G. Vincent, formerly of St. John, N.B., has been appointed manager of the newly established provincial savings bank at Winnipeg, Man.

Mr. J. K. MacDonald, who for the past fifty-four years has been treasurer for York County, Ont., has retired, and Mr. D. J. MacDonald has been appointed to succeed him.

Mr. T. S. English, manager of the Vancouver branch of the Great West Permanent Loan Company, has been promoted to the position of assistant general manager, with headquarters at Winnipeg. Mr. English is succeeded by Mr. F. B. Heath, formerly manager at Saskatoon.

Mr. Arthur Dunbar, manager of the Union Bank of Canada at Lethbridge, Alta., whose appointment as inspector of branch returns, at Toronto, has already been announced in *The Monetary Times*, arrived in the east recently to take over the duties of his new office. Mr. Dunbar, who has been in the service of Union Bank of Canada for a period of 23 years, returns to the eastern division after 20 years banking experience in the west. He entered the Union Bank of Canada as junior clerk at Wiarton, Ont., in 1898 and after a brief term there and at Smith's Falls, was transferred to Winnipeg. In the interim he has filled various posts at Oxbow, Sask., Dauphin, Man., Brandon, Man., Moosomin, Sask., Okotoks, Alta., High River, Alta., and lately at Lethbridge, Alta. His managership of the Lethbridge branch held especial interest, because this was the pioneer branch of the Union Bank of Canada to be established west of the city of Winnipeg.

Mr. H. F. Harman has been appointed to the position of land commissioner of the Hudson's Bay Company with headquarters at Winnipeg, Man., Mr. James Thomson having resigned. Mr. Harman has been in the service of the company for the past eighteen years, during which time he has served in various capacities in the department of which he is now head.

Major M. Ross Gooderham has been appointed to the directorate of the Union Trust Company, Limited. Major Gooderham is a member of the law firm of Blackstock, Galt, Gooderham and McCann, Toronto, having been called to the bar in 1900. He has specialized in the insurance business and is a director of several companies, including the Manufacturers' Life, of which company he has been a director since 1907.

Mr. H. B. G. Austin, of Barbados, was a visitor in Montreal, Que., recently. "Canadian manufacturers are missing a splendid trade opportunity by neglecting [illegible] in Barbados," he said. He is of the opinion that the trade [illegible] should be [illegible] by Canada is [illegible] by the United States [illegible] only wish to [illegible] for the [illegible] of [illegible].

Mr. Fred S. Lawrason, [illegible] of London, Ont., has just completed a four-months' tour of the West Indies and South America. "There is enormous possibilities with these countries," said Mr. Lawrason. "They prefer to trade with Great Britain and Canada than with the United States. Travellers there now, from the United States, are not placing orders, and the travellers from Canada and Great Britain are having difficulty in satisfying the demands of their customers."

Mr. Mark Workman, former president of the Dominion Steel Corporation, and later chairman of the board and a member of the London advisory committee, who retired from any executive connection with the corporation when the new board was elected at the annual meeting, has arrived in Montreal from England. Mr. Workman states that he had only a slight idea of the developments in connection with the merger, having been unable to get much news on the way over owing to the strike of the wireless operators.

BOND DEALERS IMPRESSED WITH WINNIPEG WORK

Fifty bond dealers, representing the leading bond firms of Canada, personally inspected the power developments located on the Winnipeg River when attending the annual convention of the Bond Dealers' Association of Canada in Winnipeg, June 17-19. The work was explained to them by prominent officials of the companies. Reading from left to right, those in the accompanying photograph are: J. D. Glassco, manager of the Winnipeg Municipal Light and Power Department; Sir Augustus Nanton, president of the Winnipeg River Power Company and of the Winnipeg Electric Railway Company; and A. W. McLimont, general manager of the Winnipeg River Power Company, and vice-president and general manager of the Winnipeg Electric Railway Company. New developments have taken place during the past few years, and the Winnipeg Electric Railway Company is now arranging to place an issue of preferred stock on the market to redeem floating liabilities incurred in this way.

OBITUARY

Mr. Henry Morris Watson, former assistant general manager of the Bank of Hamilton, died in Toronto on June [illegible] at his home, [illegible] 80 Madison Ave., after a prolonged illness. Mr. Watson was born [illegible] years ago in Jamaica, [illegible] came to Canada at an early age and received his education in Hamilton, Ont. He served for a time with the Royal [illegible] Bank of Commerce, and then [illegible] Bank of Hamilton and was stationed in Mitchell, [illegible] and Hamilton. For twelve years he was assistant general manager of the bank, which position he held until he retired from active work six years ago [illegible] Toronto.

PROVINCIAL FINANCES

Revenues Increased by $6,000,000 in 1919, But Failed to Keep Up With Growth of Expenditure—Comparison for Six Years

In its commercial letter for June, the Bank of Commerce summarizes the financial position of the provinces as revealed by latest public accounts. The article says:—

"For the fiscal year ending in 1919, the provincial governments in Canada had a combined revenue of $76,306,041, or $6,000,000 greater than for the previous year. Their expenditures, however, increased by $11,000,000, the aggregate being $76,625,211. There was a general increase in revenues as a result of improved business conditions. Licenses for automobiles, land title fees, stumpage charges and corporation taxes yielded sums in excess of the estimates, but this larger revenue was absorbed by increases granted to civil servants and by the higher level of other expenses. More liberal provision has also been made for educational requirements. The general tendency towards increased expenditures and the corresponding demand for more revenue is shown by the following comparisons:—

	1914	1915	1916
Revenue	$51,150,919	$49,910,743	$19,644,541
Expenditure	56,415,287	55,617,537	53,241,866

	1917.	1918.	1919.
Revenue	$57,962,979	$70,569,840	$76,306,044
Expenditures	59,710,660	65,809,165	76,625,211

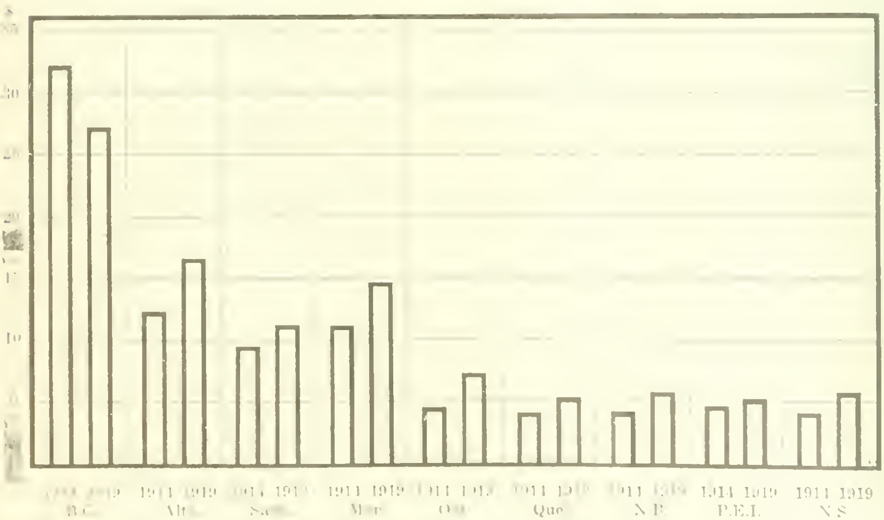
"The estimates for the current year provide for ordinary expenditures of $81,000,000 and for revenues aggregating $86,500,000. Each province anticipates still larger revenues from motor licenses. Prince Edward Island is providing for a part deficit by an increase in the land tax. New Brunswick, British Columbia and Ontario hope for substantial increases in stumpage and other charges paid by those engaged in cutting timber. Mines also in some provinces are to be subjected to heavier royalties.

"A feature of the policy of all the provinces is the evident intention to keep ordinary expenditures well within the limits of revenue. Fixed charges generally show an increase, but this is not out of proportion to the growth of revenue from ordinary services. Much capital expenditure authorized in recent years has not been incurred, doubtless owing to the restraining influence of high interest rates, but from ministerial statements and budget speeches there is a disposition now to enter upon capital expenditures of considerable amount, as is evidenced by the authorizations given by the legislatures. The conditions which deterred such expenditures last year—that is, the high cost of labor and material, as well as of capital—are even less favorable at the present time and do not promise to improve for some time to come. The marked disinclination to add to fixed charges by borrowing under present conditions, and at the same time the effort to keep expenditures well within the revenue will, if adhered to, prepare the way for borrowing on advantageous terms when financial conditions become more stable."

"Discussions of financial conditions in some of the provincial legislatures, notably those of British Columbia and Alberta, show a desire to protect the credit of the provinces by more effective control of municipal finances, as it has become quite clear that excessive borrowing by such bodies impairs the credit of a province. In addition to more adequate control of municipal borrowings, some provinces are exercising greater care in guaranteeing and authorizing capital expenditures for enterprises of a public character."

The per capita revenue obtained by each province in the years 1914 to 1919 is shown by the accompanying graph.

ORDINARY PROVINCIAL REVENUE PER CAPITA 1914 AND 1919



SASKATCHEWAN MUNICIPAL HAIL INSURANCE

Directors of the Saskatchewan Municipal Hail Insurance Association, meeting at Regina on June 8th, resolved to de- [illegible] regarding the rebate which is to be allowed for damage from causes other than hail early in the season.

The remuneration for municipalities in connection with services rendered by their officials for hail insurance assessments and collections of rates was decided on as follows: First.—To cover the cost of compiling returns at the rate of $1 a township, to be paid on receipt of the returns. Second.—Where farmers have not made crop reports to the municipalities and it is necessary for the municipalities to send out officials to get the information, the association will pay expenses when supported by vouchers up to a maximum of $5 a day and in addition will pay 15 cents per mile for mileage actually covered. Third.—When the fall returns have been received by the association from the municipalities showing the assessments and collections, etc., remuneration will be made at the rate of [illegible] cents per quarter section, payable when the full assessments have been remitted to the association.

BANK BRANCH NOTES

Forty-Eight New Branches Opened and Eight Closed in May—Many New Buildings to be Erected—Bankers Being Imported From Scotland

FORTY-EIGHT branches of Canadian Banks were opened in May, distributed among the various banks as follows:—Montreal, 1; Nova Scotia, 2; Royal, 10; Commerce, 4; Dominion, 2; Toronto, 1; Nationale, 2; Merchants, 5; Provinciale, 4; Molsons, 1; Hochelaga, 2; Standard, 2; Home, 1; Imperial, 4; Hamilton, 1.

The following eight branches were closed in May:—Bristow, Sask., Standard; Calumet, Que., Nova Scotia; Eskbank, Sask., Merchants; Huberdean, Que., Merchants; Lake Valley, Sask., Hamilton; Philipsville, Ont., Merchants; Westerham, Sask., Standard; White Bear, Sask., Standard.

The following is a list of branches of Canadian banks which were opened in May and have not already been mentioned in *The Monetary Times*:—Angus, Ont., Home Bank; Ashby, N.S., Merchants Bank; Cap St. Martin, Que., Provinciale; Edrans, Man., Merchants Bank; Estcourt, Que., Hochelaga; Fortune, Nfld., Nova Scotia; Grande Anse, N.B., Provinciale; Cornley, Ont., Imperial; Griffin Creek, Alta., Imperial; Hatchley, Ont., Royal; Hilton, Ont., Imperial; Hull, Que., City Hall Square, Montreal; Hull, Que., Boulvd. St. Joseph, Nationale; Melrose, Ont., Standard; Miscouche, P.E.I., Royal; Morpeth, Ont., Molsons; Petite Cote, Que., Provinciale; Providence Bay, Ont., Merchants; Quebec, Que., Molsons; Ridgeway, Ont., Molsons; Rustico, P.E.I., Royal; St. Ambrose de Kildaire, Que., Hochelaga; St. Eugene de Guigues, Que., Nationale; St. Faustin, Que., Provinciale; Toronto, Ont., (Broadview and Danforth), Merchants; Trinite, Martinique, Royal; Union, Ont., Imperial; West Hamilton, Ont., Hamilton; Winnipeg., Man. (Selkirk and Arlington), Merchants; Winnipeg, Man. (St. James), Royal.

Personal Appointments

The Bank of Hamilton is establishing a branch at Enderby under the management of B. W. Cocks, formerly attached to the main office staff at Vancouver.

F. A. Macrae has been appointed manager of the new branch of the Bank of Montreal, which was opened in June at the corner of Granville and Nelson Sts., Vancouver.

Branch Buildings to be Erected

The Bank of Hochelaga has been given a permit to build on Ontario St. East, Montreal, a building with two dwellings, costing $17,500.

The Royal Bank of Canada have permission to erect a $50,000 building on Bernard St., Montreal.

The Bank of Montreal is to build on the corner of Notre Dame and Second Avenue, Maisonneuve, Montreal, a $25,000 building.

The main office of the Royal Bank of Canada, Victoria, will be extended by the acquisition of the property directly in the rear of the present building, and extending through from Government St., to Langley St. A. R. Heiter, local manager, announced that the extensions will be commenced immediately, and will be ready for occupancy by the summer of next year.

The Bank of Nova Scotia have a permit to build a branch in New Toronto. The bank will cost $20,000.

The Royal Bank of Canada will erect a new building at Taber, Alta.

The Bank Nationale at Bourget, Que., was robbed on June 9th, and lost about $9,000. Thus far the robbers have not been captured.

New Branches Opened

The following branches have been reported as opened this week:

Alice Arm, B.C.	Royal Bank of Canada
Walkerville, Ont.	Royal Bank of Canada

SHOWERS HELP ALONG WESTERN CROPS

Dryness Reported in Only a Few Places—Fight Against Grasshopper is Successful—Wind Damage Small

(Special to *The Monetary Times.*)

Winnipeg, July 1, 1920.

REPORTS as to the present appearance of the crop are universally optimisitic. Though sown late, it has grown wonderfully fast, and a great deal of wheat is in the shot blade. The past month has brought liberal and frequent rains in most districts, and in the extreme southwestern corner of Manitoba, where there has been dry conditions for the past three or four years, a soaking rain has fallen. Likewise the report comes from the Swan River Valley in the north that there was a six-hours' rain last Sunday. At this time of year, however, the warmth and rapid growth absorb moisture quickly, and a few places report the ground drying up somewhat. Everywhere a continuation of the present showery weather for the next three or four weeks would be welcomed. Wind damage this year has been negligible; there have been no late spring or summer frosts; and the cutworm damage is less than usual.

Grasshoppers are widely distributed, and are extremely thick in some places, serious outbreaks having occurred from Saskatchewan as far east as Pilot Mound and Lake Manitoba, and as far north as Hamiota and Langruth. A fair-sized army of men—government, municipal and private—are fighting them with carloads of poison mixtures, the materials being supplied free by the provincial government, and though the fight is not yet over, and the outcome depends somewhat on the rapidity of vegetative growth, it is fairly sure that if farmers will continue to spread the poison mixture without cessation wherever a "shoal" of grasshoppers appears, the scourge will be subdued. The prescription works all right, and millions upon millions of hoppers have been killed by it.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended June 30th, 1920, compared with the corresponding week last year:—

	Week ended *June 30, '20.	Week ended July 3, '19.	Changes.
Montreal	$103,213,539	$106,761,149	—$3,547,610

Canadian Opportunities in Foreign Trade

Real Effort to Secure Business Would be Productive, Says Bank of Commerce—Friendly Feeling Towards Canada in Most Countries—Warehouses Would Make Prompt Deliveries Possible—The Currency Problem

MUCH foreign business could be secured by Canadians if they would send competent representatives abroad to secure it, says the Canadian Bank of Commerce in a supplement to its commercial letter for June. The article says:—

"In connection with our policy of doing all in our power to develop the foreign trade of Canada, our representatives have recently visited Portugal, Spain, Italy, Switzerland, France, Belgium, Holland, Norway and Sweden, and they are much impressed with the trade possibilities awaiting Canada in these countries, if our exporters will only make the necessary effort to secure the business. As we have pointed out before, the only satisfactory way to secure foreign trade is to send representatives abroad to study the peculiar requirements of each line of business, and to establish first-class foreign connections. Only a representative of the highest class should be sent on a mission of this kind and he should thoroughly understand his business and know his goods. He should also be prepared to supply samples free of charge—not ask the European house to pay for them, as has been done in some cases—so that others may call and inspect what they are asked to buy.

"If a system of warehouses can be established at leading distributing centres, so that prompt deliveries can be made, it will be a most efficacious means of developing trade and ensuring its continuance. Numerous instances have come to the attention of our representatives in which prompt delivery was the deciding factor in securing business, and while this is particularly important at present owing to the scarcity of many kinds of goods, it is always an important factor in any selling campaign and should be given special attention.

Price Quotations

"Where goods are sold from samples, shippers must get away from the parochial method of quoting 'f.o.b. Hamilton,' 'Sherbrooke,' 'St. John, N.B.,' or as the case may be. Such a quotation means that the importer must ascertain the freight charges to the sea-board and across the ocean, not always an easy matter for him, whereas if he is quoted, say, 'c.i.f. Christiania,' 'Antwerp,' 'Genoa,' or as the case may be—which can easily be done—he knows exactly what the goods will cost laid down at his own seaport and will be much more likely to favor the Canadian firm with an order. It must be remembered that in order to place goods in new markets the seller must aim at simplifying the transaction from the importer's point of view—otherwise the business will go elsewhere.

"Canada to-day occupies a unique position in the matter of foreign trade, and in this connection we refer particularly to the very friendly feeling which exists abroad towards this country. When our representatives returned from Australia, New Zealand, China and Japan last year they laid particular stress on this (see the supplement to our Monthly Commercial Letter for August, 1919), and apparently the same friendly feeling exists towards Canada in the countries which have just been visited on the continent of Europe. Usually it takes a long time to attain such an attitude, but in our case it has come to us spontaneously, doubtless on account of the efforts made by Canada in the great war. Her soldiers and their heroic deeds have made the name of Canada famous throughout the world and this, with her natural resources, makes other countries expect great things of Canada in the [illegible] [illegible] future trade of the world. This [illegible] [illegible] [illegible] [illegible] in business, [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

"Our representatives report that [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] the fact that [illegible] [illegible] of [illegible] of firms from the United States [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] a Canadian.

Canadian manufacturers may argue that domestic trade is booming, that their plants are fully occupied and that it will be time enough to look for foreign trade when the home market is fully supplied, but by that time the foreign markets may also have been supplied by other countries, thus the market for the goods they would have liked to introduce will be taken away from them and years of energetic work may not suffice to give them a foothold. It is, therefore, important that Canadian manufacturers and dealers in raw materials should devote a portion of their organization to foreign trade and should either collectively or individually have representatives studying the peculiar requirements of each market in which their goods might be sold. If such action is taken and the greatest of care exercised in packing, shipping, and supplying only the finest quality of goods, it seems to us that Canada cannot but be successful in her efforts to secure foreign trade.

Direct and Permanent Connection

"What should be aimed at is the formation of connections abroad which will be both direct and permanent. Canadian exporters are inclined to ship to the United States to obtain the benefit of the existing premium on exchange, entirely overlooking the fact that this same premium gives them an advantage over United States exporters in foreign markets by enabling them, price and quality being equal, to undersell their United States competitiors, if so desired, to the extent of the premium. By thus dealing direct with foreign firms they would be building up their foreign connections and will make Canadian firms and brands of goods known as such in foreign markets, an object which it is highly desirable to attain.

"The argument is put forward: 'Why ship abroad when we can ship at once to the United States and know exactly what premium we will receive on our sales, while on the other hand, if we ship abroad, it may be three months before the relative payment arrives in New York, and we are in the meantime subject to the vagaries of the exchange market?' Our answer to this is that some day the premium on United States funds will disappear and if Canadians have not established their position they will then be dependent on the United States and that country will have the connections abroad, so that when business slackens and there is not much demand for Canadian products across the border, they will be left out in the cold. We are not in any way unfriendly to the United States, in fact, we believe in selling that country everything possible in order to offset the $2,280,000,000 worth of goods purchased from them during the past three years, but we have in mind the similarity of the exports of the two countries and the fact that the time may come, as already intimated, when they will have a sufficient surplus to dispose of to enable them to fill the foreign demand, and we are merely pointing out that Canada, as a nation, should aim to do her business direct rather than through an intermediary.

Dollars or Sterling

"If it seems desirable to sell on a c.i.f. basis in the currency of the country to which the goods are destined, they can be sold either on the basis of Canadian dollars, United States dollars, or pounds sterling. If sold in Canadian dollars, [illegible] [illegible] [illegible] [illegible] made, as it has in some cases, [illegible] [illegible] [illegible] [illegible] to compensate for the [illegible] [illegible] [illegible] [illegible] [illegible] United States dollars. [illegible] [illegible] [illegible] foreign merchants are much more [illegible] [illegible] [illegible] [illegible] than are our own exporters [illegible] [illegible] [illegible] [illegible] [illegible] in the matter of price, as [illegible] [illegible] [illegible] [illegible] [illegible] to a lasting business."

WORKMEN'S COMPENSATION IN ONTARIO

1919 Report Reviews Work Accomplished—Amount Paid Out Last Year Was $4,192,859—Higher Wage Scales Increase Payments

FIVE years' experience under the Workmen's Compensation Act in Ontario are reviewed in the annual report of the Ontario Workmen's Compensation Board for 1919, just issued. It is also pointed out that workmen's compensation legislation in other provinces has been to a large degree modelled after that of Ontario. Payments have increased substantially during these five years. The report says in part:—

"During the year, 1919, $4,192,859, or an average of $14,000 per day, was awarded in benefits to workmen and their dependants, the total number of accidents reported being 44,260, of which 429 were fatal. About 3,000 pieces of mail, in and out, were handled each day by the board, the number of cheques issued daily being 408. More than 100,000 people (including workmen's families) were more or less dependent upon these payments for their support. It is estimated that 500,000 workmen in all are under the protection of the act.

"There has been now five years' experience of the present workmen's compensation law. Since it came into operation laws similar in principle have been adopted in nearly all the other provinces of Canada. Its outstanding features are the simplicity of its provisions and procedure, the extension of the benefits to all injuries by accident arising out of and in the course of the employment, the elimination of litigation and expense, and the expeditious payment of compensation directly into the hands of the injured workmen or their dependents.

Administration

"The administration in what may now be called the Canadian type of compensation law is a complete change from the old system. The administering board is a trustee and an arbitrator rather than a court. The powers and responsibilities vested in it are very great, and upon their proper exercise must depend the successful working of the act. The welfare of those whose interests are entrusted to its care must be the only guiding principle, and there must be absolute impartiality and firmness of purpose in doing what is felt to be right and in resisting the improper and indirect influences which too often assail an administration of this kind. If the purposes of the act are to be fully attained the administering body must actively and even aggressively see that its provisions are effectively carried out.

"The many requests to be brought within the scope of the act made by classes of employees not already covered and the rapid increase during the past year of applications from employers to bring their industries under, emphasize the popularity of the present law with both of the classes directly concerned. Workmen from the commencement generally regarded the act with favor, and their sympathetic attitude has been a great assistance in its administration. The great majority of employers are now also in hearty co-operation with the workings of the act, though doubts were at first entertained among them as to its merits and workability.

Contrast With Other Laws

"The collective liability principle of the Ontario law is in contrast with the individual liability law of Great Britain and with the [illegible] individual liability [illegible] of the United States. In Great Britain the system of individual liability with court procedure and [illegible] has [illegible] satisfactory, [illegible] In the United States where the [illegible] employers are allowed to deal with the workmen [illegible] settlements and other abuses which [illegible] Statistics [illegible] show that under the old employers' liability insurance, after [illegible] expenses, less than [illegible] of the premiums paid by employers actually reached the workmen or their widows and children. In Ontario last year only 1.71 per cent. of the assessments paid by employers went toward expenses. Probably under no other law does so nearly the whole of what employers pay for accidents go for the benefit of the injured workmen and their families.

Benefits and Assessments

"Though the benefits under the Ontario Act are already liberal as compared with most other places, the assessments upon employers are not high. The factors conributing to the low rates of assessment are the comparatively good accident experience, the absence, under the collective liability system, of unnecessary costs and expenses, and the fact that the province pays the larger portion of the administration expenses. The average rate of assessment actually paid by employers for each year since the commencement of the act was $1.27 (reduced from $1.64) per $100 of pay roll for 1915, $1.09 for 1916, $.99 for 1917, $1.09 for 1918, and $1.22 for 1919.

"One of the objections raised to the enactment of the present law was the danger of malingering. A compensation law or administration that did not recognize and guard against this danger could not be satisfactory, but it is felt that there has been little cause for complaints of this kind in Ontario up to the present time. Such difficulty as has been experienced has been chiefly with claimants having no one depending upon them for support, largely the low wage earner, and occasionally the high earner who gets a high rate of compensation, but rarely the average worker with not only himself but a family depending upon him for support.

1919 and Prior Years

"Though the number of accidents in 1919 was less than in 1918 the total amount of benefits awarded was greater. There were 47,848 accidents reported in 1918 as against 44,260 in 1919, but the benefits awarded in 1918 were only $3,883,994, as against $4,192,859 in 1919. The increase was because of higher wages, which automatically increase the compensation, and because of the increase in widows' and children's allowances and in medical aid under the amendment made in the early part of 1919. The average weekly wage of injured workmen increased from $13.27 in 1915 to $24.80 in 1919, the figures for the intervening years being $15.63, $19.06, and $21.93, respectively.

"A very gratifying fact shewn by the returns for 1919 is the comparatively small falling-off in the general volume of industry after the close of the war. The earlier months of 1919 showed much less industrial activity than the corresponding months of the prior year, but the latter half of the year showed a large and steady increase.

Accident Statistics

"The information obtained in dealing with cases affords the opportunity of tabulating much exceedingly interesting and useful information in relation to accidents and workmen. As the extent of the disability that an accident may cause cannot, in many of the cases, be ascertained until long after the accident has happened, this data is not complete after the close of the second year. In this report the statistics are for the accidents which happened in 1918. As it is only [illegible] that the Board pays for medical aid the [illegible] Schedule [illegible] es only.

"Of the accidents in which compensation or medical aid was paid, less than [illegible] per cent. resulted in death, less than [illegible] of one per cent. in permanent total disability, and about 6 [illegible] per cent. in permanent partial disability; 57 per cent. [illegible] temporary disability and about 36 per cent. [illegible], causing less than seven days loss of time.

"The total time loss for the year, exclusive of loss of [illegible] by death and permanent disability, was 573,653 [illegible]. The average time loss in temporary disability [illegible]. In [illegible] per cent. of the temporary disability [illegible] exceed two weeks; in 68 per cent. [illegible]; and in 90 per cent. not [illegible]

Helping the Operator

We suggest that subscribers practise the following :—

1. Always consult [illegible] latest directory because numbers are frequently changed
2. In a moderate tone, speak slowly and distinctly directly into the mouthpiece with your lips not more than an inch away.
3. Answer promptly when your bell rings. It saves "Central" ringing again ; saves the calling party's time and speeds up business generally.
4. When you answer give your name or the name of your firm instead of the old-fashioned "Hello," thus allowing the conversation to begin without waste of time.

Co-operation with the operator, as above, cannot but help your service.

Ontario Assessment and Population Increased

Population at End of 1919 was 2,621,785, Compared With 2,579,177 at End of 1918—Assessments for 1918 Higher Than for 1917—Increase of $6,000,000 in Municipal Taxes Levied

RURAL communities of Ontario increased their population in 1919, as well as cities, according to figures just issued by the department of municipal affairs of the province. In 1918 the towns, villages and townships showed actual decreases in population. The comparative figures are as follows:—

Population.

	Townships.	Villages and towns.	Cities.	Total.
1919	998,597	528,326	1,094,862	2,621,785
1918	996,228	520,791	1,062,158	2,579,177
1917	1,003,664	524,005	1,032,784	2,560,453

In the townships the increase in population for 1919 over 1918 is 2,369 and a decrease over 1917 of 5,067. In the villages and towns the increase for 1919 over 1918 is 7,535 and the increase over 1917 is 4,321. In the cities the increase for 1919 over 1918 is 32,704 and an increase over 1917 of 62,078. This will leave an increase for the province of 42,608 for 1919 over the year 1918 and an increase of 61,332 for 1919 from the year 1917.

Assessments

	Townships.	Villages and towns.	Cities.	Total.
1918	$706,635,799	$265,795,177	$1,096,917,539	$2,069,378,515
1917	698,000,181	264,301,104	1,065,260,575	2,027,561,860
1916	692,560,277	252,225,366	1,059,892,904	2,001,678,547

The total assessment in the townships in 1918 includes $697,037,497 real property, $5,821,669 business assessment, and $3,776,633 income. There is also included $10,619,969 in the real property and $1,297,554 in the business assessment that pays school rates only.

The total assessment in the villages and towns is made up of $231,919,879 real property, $21,539,975 business assessment, and $12,335,323 income. In the villages and towns there is $9,892,919 and $2,311,795 included in the real property and business assessment that pays school rates only.

The total assessment in the cities is made up of $919,148,691 real property, $105,956,087 business and $71,812,761 income. In the cities there is $28,151,992 and $4,709,218 included in the real property and business assessment that pays school rates only.

The total assessment of the province is made up of $1,848,[illegible] real property, $133,320,731 business assessment and $87,924,717 income. The total assessment of the province will include $48,674,880 real property and $8,321,565 business assessment making a total of $57,996,445 that pays school rates only for 1918.

The assessment in the townships show an increase for 1918 over 1917 of $8,635,618 and over 1916 of $14,075,522. In the villages and towns the increase for 1918 over 1917 is $1,494,073 and over 1916 of $13,569,811. The increase in the cities for 1918 over 1917 is $31,656,964 and over 1916 is $37,024,635. The total increase for the province 1918 over 1917 is $41,816,655 and over 1916 of $67,699,968.

Areas Assessed

The total area assessed in the townships for 1918 is made up of 21,201,524 acres resident and 877,531 non-resident land, making a total of [illegible] acres. This is divided into 11,867,[illegible] cleared, 1,811,711 woodland, 1,706,247 slash land and [illegible] swamp, marsh or waste land. The area in the villages and towns for 1918 is [illegible] acres. The area in the cities for 1918 is [illegible] acres.

In 1918 there were [illegible] townships organized, [illegible] villages, [illegible] towns, 11 cities and [illegible] separated towns, making a total of [illegible]. In [illegible] there are [illegible] townships, [illegible] villages, [illegible] towns, [illegible] cities and 38 counties, making a total of 903 organized municipalities, besides 10 districts that have no organization similar to the county councils.

Municipal Taxes

	Townships.	Villages and towns.	Cities.	Total.
1918	$11,223,811	$6,146,674	$26,931,590	$44,302,075
1917	9,462,175	5,589,415	23,082,427	38,134,017
1916	8,275,353	5,164,817	20,854,540	34,294,710

The townships for 1918 show an increase in municipal taxes imposed of $1,761,636 over the year 1917 and an increase of $2,948,458 over the year 1916. The villages and towns show an increase for 1918 over 1917 of $557,259 and over 1916 of $981,857. The cities show an increase for 1918 over 1917 of $3,849,163, and over 1916 of $6,077,050.

School Taxes

	Townships.	Villages and towns.	Cities.	Total.
1918	$5,093,924	$2,870,136	$8,474,337	$16,438,397
1917	4,672,057	2,606,282	7,547,463	14,825,802
1916	4,418,670	2,401,023	7,187,694	14,007,387

The increase in townships for 1918 over 1917 for school taxes imposed is $421,867 and over 1916, $675,254. The increase in villages and towns for 1918 is $263,854 over the year 1917 and an increase over 1916 of $469,113. In the cities the increase for 1918 over 1917 is $926,874 and over 1916 is $1,286,643.

Debenture Debt

The debenture debt is as follows:—

	Townships.	Villages and towns.	Cities.	Total.
Municipal	$6,839,044	$29,310,482	$166,435,955	$202,585,481
School	2,899,461	3,960,077	23,829,955	30,689,493
Total.				
1918	9,738,505	33,270,559	190,265,910	233,274,974
1917	9,242,292	33,390,732	184,121,866	226,754,890
1916	8,955,926	32,042,660	184,701,426	225,698,012
Sinking fund:				
1918	171,588	2,628,214	43,152,328	45,955,130
1917	147,836	2,300,248	40,881,536	43,329,620
1916	159,348	2,140,073	36,885,289	39,184,710

County Debts

In addition to the foregoing debts the county municipalities have the following debenture debts and sinking funds:—

	Municipal.	School.	Total.	Sinking fund.
1918	$6,725,457	$7,411	$6,732,868	$448,761
1917	6,110,010	8,207	6,118,217	396,039
1916	5,282,821	8,953	5,291,774	305,652

Taxable and Exempt Property

	Taxable real property Land.	Buildings.	Statutory and other exemptions. Land.	Buildings.
Townships	$600,497,170	$191,640,273	$ 5,644,464	$ 22,834,529
Villages and towns	257,87[illegible]	[illegible]	5,900,025	36,760,430
Cities	4[illegible],155,151	[illegible]	78,129,126	114,695,006
Totals:				
1918	$1,[illegible]	$[illegible]	$87,673,615	$174,289,965

CAPITAL ISSUES IN THE UNITED KINGDOM

There has been a distinct falling off in the volume of capital issues in the United Kingdom, according to information furnished to *The Monetary Times* by F. W. Field, British Trade Commissioner at Toronto, based on notes forwarded by the Department of Overseas Trade in London. The slackening tendency noted toward the end of March proved to be the first indication of a period of, relatively, considerable reserve, and the total new capital applied for is, comparative with recent applications, of modest volume. The public have been increasingly reluctant to support the continued flow of applications, and the conditions are now such that many flotations are being withheld until the situation appears more propitious, and the majority of new issues have been on behalf of county and municipal undertakings, only a little over £1,000,000 being applied for by industrial and shipping concerns during the first week of the month. The effect of dearer money is evident, but, unfortunately, the check appears to operate more severely upon some industrial securities than upon the speculative stocks, and industry seems likely to suffer thereby.

Registration of new companies continues on a fairly extensive scale, the aggregate capital of recently announced registrations up to the end of the third week of April amounting to nearly £68,000,000. Of this total, shipping accounts for the largest quota with about £21,000,000, and of this sum, £20,000,000 forms the nominal capital of one registration, namely, the Shipbuilding and Associated Industries, Ltd.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

DOMINION government demand deposits show a reduction of $97,000 in the May report of the Montreal City and District Savings Bank, as compared with the previous month, while the Caisse d'Economie de Notre Dame de Quebec shows an increase of $20,000 in this respect. Total liabilities of the two institutions were reduced during the month to $55,252,06[illegible], from $[illegible]81,805. Liquid assets, cash in hand and on deposit was lower by some $9[illegible],000, while holdings of Canadian municipal securities were reduced $20,000. In the case of the former bank, loans on bank stocks were about $5,000 lower, while in the latter case an increase of $24,788 was shown in that department. Loans on other securities were higher in both cases. Total assets of the two institutions amounted to $60,316,945, as compared with $60,528,300 at the end of April. The complete returns as at May 31st, 1920, are as follows:—

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labor reports that returns from the Dominion and provincial offices of the Employment Service of Canada for the week ended June 12th, show an increase in placements when compared with the returns for the preceding week. The offices reported that they had made 7,810 references to regular positions, and that 6,967 placements were affected. This is an increase of [illegible] when compared with returns for the previous week, when [illegible],202 applicants were placed. In addition, 1,870 casual jobs were supplied, as compared with 1,674 during the week ended June 5th.

During the week 9,048 applicants were registered, of whom 7,994 were men and 1,054 were women. This is an increase of 1,[illegible]48 in registration when compared with the figures for the preceding week. The number of vacancies notified by employers to the service during the week totalled 9,569, of which 7,805 were for men and 1,764 for women. This represents an increase of 1,417 vacancies over the preceding week, when 8,152 were reported. Of the placements in regular employment, 6,404 were men and 563 were women. The number of ex-service men reported as placed was 1,560.

MUTILATED BANK NOTES

C. A. Bogert, president of the Canadian Bankers' Association, has issued the following warning with reference to fraudulent bank notes:—

"The public is warned against a form of fraudulent mutilation of bank notes which recently came to light in Toronto, Hamilton and St. Catharines. Any bank note with a band of adhesive tape about half an inch wide running across the note must be viewed with suspicion, and should not be accepted in making change. Send the person who presents it to the bank whose note it purports to be and put upon him the burden of getting it redeemed. It will be found on examination that the note is made up of parts of two notes, the numbers on either end being different instead of alike, or one of the numbers will be obliterated so as to prevent the difference being noticed. Occasionally the mutilation will consist of the removal of one end of the note, and there will be no adhesive tape. The fraudulent manipulation consists of cutting up a number of notes and pasting the pieces together so as to make more notes than were originally cut in two.

"It is a petty form of fraud with small results to the [illegible], and once the public is on the lookout for these 'notes,' the fraudulent manipulator's occupation will be gone."

The Path of Progress

MANY successful business men and concerns now known throughout the Dominion began building on small foundations.

Many of these notably successful Canadians have been lifelong customers of the Bank of Montreal, and they have been kind enough to say that their progress has been due in part to the satisfactory banking service they have obtained from us.

We are glad to admit that much of our progress has been due to the progress of these customers.

We are desirous of co-operating with other persons and firms for the upbuilding of every part of the Dominion. Our service extends to all parts of the world.

Direct wire service maintained between Montreal, Toronto, Winnipeg, Vancouver, New York, Chicago and San Francisco.

Development of Alberta Oil Fields

Very Few of Developments Were Successful—Speculation of 1914 Not Likely to be Repeated—One Group Particularly Successful in Southern Alberta—Refineries in the Province—Imperial Oil Developments

By ANGUS LYELL

VERY little has been accomplished during the past year in the development of the oil fields of Alberta. The few companies operating in the Calgary-Okotoks district have not materially strengthened their position and little definite has been achieved in the Peace River field. It is true that the Imperial Oil Co. has acquired considerable holdings in several parts of the province, but only at Czar has it begun to drill and operations are not yet sufficiently developed to warrant conclusions. There has been little, if any, increase in the market value of the shares of the capital of the companies which have been more or less successful in their drilling operations and the financial position of these has not been materially strengthened.

Southern Field

In the Calgary-Okotoks field, one new well was reported late in the year. This is the well of the Illinois-Alberta Co. Oil was struck, according to report, at a depth of some 2,300 ft., but there has been no adequate bailing test as yet. It is stated, however, that the oil rises to about 650 ft. in the well.

Other concerns operating in this field are the Alberta Southern and the Southern Alberta, controlled by the same promoters, Alberta Petroleum Consolidated and the Calgary Petroleum Products or Dingman, as the company is popularly termed.

Handling the output of these wells are two refineries, the Southern Alberta Refineries, Ltd., which handles the production of the Southern Alberta and the Alberta Southern companies, and the refinery of the Calgary Petroleum Products Co., which handles its own output and that of the Alberta Petroleum Consolidated. The sales for the month of October, which will give some idea of the production, were 2[illegible],982 gallons of gasoline and 12,434 gallons of kerosene.

Other concerns, such as Alberta Pacific Consolidated, Canada Southern, Midwest and Record, are drilling in the field but have not yet reached the production stage.

Perhaps the most successful combination and that on the best organized and strongest financial basis is the Southern Alberta group. The first company promoted by this group was the Southern Alberta Oil Co., Ltd., which had a well producing some forty or fifty barrels a day as far back as September, 1916. The market quotation of shares of the company is now $[illegible] bid and $3.50 asked. There are some features of its organization and capitalization which may be open to criticism but it has, in any event, reached a cash dividend paying stage. The Alberta Southern Oil Co., Ltd., is a sister concern, organized later, but giving indications of equally good success. Few shares of its capital are offered on the market but recently shares were selling round sixty or seventy cents. Both companies dispose of their crude product to the Southern Alberta Refineries, Ltd., which of the three may become the most valuable to the promoters. This is indicated even in the market quotation of the stock which is $1 bid and $[illegible] asked. Cash dividends of about 10 per cent. per annum are being paid.

Over-Capitalization Keeps Down Quotations

The market quotation of the stock of Alberta Petroleum Consolidated and Calgary Petroleum Products remains comparatively low, largely because of over-capitalization due, in a large measure, to stock watering. The latter, for example, carries its oil lands and leases at a valuation of $[illegible], which, on the face of it, is excessive. The issued capital is $[illegible],287.50 and the market quotation of the shares is [illegible] bid and [illegible] cents asked. The company has been endeavoring to raise half a million dollars from the issue of debentures, but, while the purchase of these might be a fairly good gamble, such could hardly be regarded as an investment. Some other method of financing will likely have to be adopted.

While the second well drilled by Alberta Petroleum Consolidated is on a producing basis, the value of the company's shares remains very low—only a little better than one cent bid. This concern was formed through an amalgamation of several companies, including Heron-Elder, and there is a considerable amount of water in its capital stock. Financially it cannot be said to be strong, that is, in respect to working capital.

Peace River District

Strong hopes were entertained some months ago of important developments in the Peace River district. Back in July, 1916, the Peace River Oil Co. struck oil at a depth of 980 ft. On continuing operations, however, salt water was encountered. The company then drilled another well and is reported to have found oil at a depth of less than one thousand feet. Later, salt water was encountered but drilling was continued and the flow was overcome. A proper test of the well has not yet been made, the necessary machinery not being available.

It is expected that at least ten companies will be operating in the Peace River district in the spring. Some of these are already in the field and have done considerable work. Some of the oil obtained gives an analysis 15 per cent. of gasoline, 50 per cent. of kerosene, 30 per cent. lubricating and 5 per cent. asphalt.

Imperial Oil Co.

But the most hopeful sign is the fact that the Imperial Oil Co. has undertaken, or is about to undertake, extensive exploration work. So far it has commenced to drill but one well, that at Czar, between Wetaskiwin and the Saskatchewan border, but it has acquired extensive lease holdings in other parts of the province, south of Calgary, near the Lesser Slave Lake and the McKenzie Basin—and development will follow. Believing that the best way to make money in the oil game is to follow the trail of the big concerns, many local people have been filing on the mineral rights of lands near Czar and other points favored by the Imperial Oil Co., and if that company is successful in its operations in Alberta these speculators may, and likely will, turn over their leases to material advantage.

Should oil be found in commercial quantities in new localities, however, it is hardly possible that speculation similar to that which prevailed during the summer of 1914 will recur. Then companies were usually formed by men without capital and there were no restrictions on the sale of the shares to the public. Now shares cannot be offered to the public until the consent of the Public Utility Commissioners is obtained. Even if a boom developed, this would mean the killing off, before they could do much harm, of a number of budding concerns.

Alberta is rich in natural gas, richer so far as present development is concerned than any of the other provinces, in the four important gas fields—Medicine Hat, Bow River, Viking and Pelican Rapids. In Medicine Hat, there are 33 wells, in Bow River, 21 and in Viking, 8. In 1918, the production was [illegible] million cubic feet and the value $1,[illegible], taken at [illegible] cents a thousand feet. Coal gas costs

AUDITOR'S REPORT TO THE SHAREHOLDERS

In accordance with sub-sections 19 and 20 of section 56 of the Bank Act, 1913, I beg to report as follows: The foregoing balance sheet has been examined with the books and vouchers at the Head Office and with the certified returns from the Branches, and is in accordance therewith. I have obtained all needed information from the officers of the Bank, and in my opinion the transactions coming under my notice have been within the powers of the Bank. I have checked the cash and verified the securities of the Bank at its chief office, both on the 31st of May, 1920, and also at another time during the year; the cash and securities of one of the Branches have also been checked, and in each case found to agree with the entries in the books of the Bank with regard thereto. In my opinion, the above balance sheet is properly drawn up so as to show a true and correct view of the state of the Bank's affairs, according to the best of my information and the explanations given to me, and as shown by the books of the Bank.

SYDNEY H. JONES, Auditor

Dominion Steel Corporation, Limited and Constituent Companies

ANNUAL MEETING, 1920

Report of Board of Directors and Address of R. M. Wolvin, President

To the Shareholders:

Your directors have submitted the Consolidated Profit and Loss Account for the year ending 31st March, 1920, and the Balance Sheet of the Corporation and its constituent companies as at that date.

Profit and Loss Account

The earnings for the year after deducting all expenses incident to operations, current repairs, taxes, administrative and selling expenses amounted to $5,532,529.43. After setting aside the sum of $1,266,855.86 for Sinking Funds, the depreciation of plant and properties, and $1,004,059.85 for bond interest, there remained a balance of $3,261,613.72 as net profits for the year.

During the year the regular dividends were paid on the preference shares of the corporation and the preferred stocks of the Dominion Coal Company and Dominion Iron and Steel Company, amounting in all to $980,000.00. The balance of the year's earnings, $2,281,613.72, was transferred to Profit and Loss Account. Four quarterly dividends, aggregating six per cent., were paid upon the common shares outstanding 1st April, 1919, and a proportional amount upon the new shares issued in November, making a total disbursement of $2,029,629.12. The balance at credit of Profit and Loss Account on 31st March was $8,241,236.58, an increase of $251,-984.60 over the balance at the beginning of the year.

Output and Shipments

Although every possible effort was made by your directors and the officers of the Dominion Coal Company to maintain the output of the collieries, it was somewhat less than that of last year.

The total production from all collieries for the past five years was as follows:

	Gross tons
Year ending March 31, 1920	3,502,069
Year ending March 31, 1919	3,622,644
Year ending March 31, 1918	3,781,615
Year ending March 31, 1917	4,279,772
Year ending March 31, 1916	5,261,198

On account of trade conditions, operation of the Steel Company's works was greatly restricted during the months of August, September, October and November, and in consequence the year's output of steel was correspondingly reduced. During the last quarter of the fiscal year operations were gradually increased and are now upon a more satisfactory basis.

It will be noted that a new item has been added to the list of materials produced and that steel plates are now being made in quantity. The following table gives the annual production of the principal classes of iron and steel in the last two years:

	Yr. ending 31st Mar., 1919 tons	Yr. ending 31st Mar., 1920 tons
Pig iron	107,863	84,229
Steel ingots	[illegible]	[illegible]
Blooms and billets for sale	[illegible]	2,036
Standard rails	63,472	[illegible]
Light rails	------	3,319
Wire rods for sale	26,746	44,436
Bars	1,459	1,245
*Wire	6,043	15,542
Nails	5,508	12,386
Plates	------	3,252

*This includes wire used in the manufacture of nails, shown on next line.

Staff

Your directors have pleasure in expressing their appreciation of the services rendered by its officers and by the officers and employees of the constituent companies.

All of which is respectfully submitted.

For the Board of Directors:

R. M. WOLVIN, President.

PRESIDENT'S ADDRESS

To the Shareholders:

As president of the company, there devolves upon me the duty and privilege of moving the adoption of the report of the Board of Directors on the operations of your properties during the fiscal year ending March 31st, 1920, copies of which are now before you.

Upon preliminary examination, it is probable that from a financial standpoint the year's results will be somewhat disappointing to you. You must, however, temper this judgment by a consideration of the conditions existing during the period with which the report in question deals.

The period covered by the present report followed almost upon the termination of the war. A period of adjustment had been generally expected, and although of shorter duration than anticipated, it seriously affected the results of practically the entire year. The prevalent uncertainty resulted in very greatly retarding the operations of our coal mines, and for the first six months of the fiscal year our sales were only sufficient to warrant operating some of our collieries three and four days per week. Similar conditions prevailed in the steel trade, and the steel plant was closed down from August 26th to the end of October.

We were unfortunate also during the navigation season in that we were unable to secure the return of most of the steamships which we had under long-term charters. In the season, however, we were successful in having delivered to us all of these boats except one, but the dates on which we were able to secure these vessels were such that your company's earnings were very slightly augmented from this source.

Competition from States

Our strongest competition will come from the large steel companies of the United States. During the first three years of the war, and prior to the time when the United States came in as one of the Allies, the American steel companies accumulated large surpluses, which were not at that time subject to abnormal taxation. This enabled them to write down the cost of existing plants, to build large extensions, thus increasing their output, and to install every known improvement and labor-saving device tending towards increased output and lower cost. We in our company have great advantages in our properties which I will mention later, but I wish to draw your attention to the conditions which I have just described, as they constituted one of the most potent factors which influenced your directors upon what I consider to be the most important step taken by your company in many years.

I refer to the sale of 50,000 common shares of the Dominion Steel Corporation, and to the appointment of a London Advisory Committee. The sale of these common shares was a most desirable transaction, as the funds were required for the current needs of the company, and the price obtained was a satisfactory one, in view of the conditions.

The London Advisory Committee is composed of the following gentlemen:

Colonel W. Grant Morden, M.P., Chairman.
Right Hon. Viscount Furness, Vice-Chairman.
Sir William Beardmore, Bart.
Major-Gen. Hon. Sir Newton Moore, K.C.M.G., M.P.
Mr. Henry Steel.
Mr. Benjamin Talbot.
Mr. Mark Workman.

The names of these gentlemen are, no doubt, well known to you, and little comment is required. I might state, however, that Colonel Morden's financial connections in Great Britain are such that excellent facilities for future financing are made available through his co-operation. Viscount Furness is the chairman of the extensive Furness group of English Steel industrials; Mr. Benjamin Talbot is managing director of these companies; Sir William Beardmore is chairman of William Beardmore & Company, shipbuilders, of Glasgow; Major-Gen. Sir Newton Moore is a former Prime Minister of Western Australia, director of the General Electric Company of England, and associated closely with the Australian steel industry; Mr. Henry Steel is chairman of the United Steel Companies of Great Britain, and the Bengal Iron and Steel Company of India.

These gentlemen bring to us long experience in the steel trade of the world. They provide also in the plants which they control, a large potential consumer of your company's ore, and as events progress, a purchaser of considerable quantities of pig iron and billets which will become available from the new furnaces which the future will undoubtedly see installed at Sydney.

Resources of Company

If we briefly inventory our resources, we find that our steel plant to-day consists of a new by-product coke oven plant, consisting of 120 of the most modern apparatus in existence. We possess also a 110-inch plate mill which has just been completed and put into operation, and is equal to any mill of this character either on this continent or in Europe. Our rolling facilities also include a 28-inch rail mill, billet mill, wire rod mill and merchant bar mills, and in addition we own plant for the production of various forms of wire products, including nails, barb and galvanizing wire, and so forth. We have sufficient blast furnace capacity, but are very short of open hearth furnace capacity, and the situation to-day is that your company finds itself with the greatest known deposits of coal and iron ore, splendidly situated, but possessing a plant with an economical output of only 25,000 tons of ingots per month, with, however, more generous capacity for pig iron production and of finishing mills.

While many valuable additions have been made during the past few years, and numerous judicious improvements have been carried out, much remains to be done in order to place the plant in condition for meeting world competition. Our position as regards the possession of [illegible] is, however, unequalled, and given adequate [illegible] there is nothing to prevent the growth of your company [illegible] world position.

Our most pressing need is for a new [illegible] furnace plant and for other extensions, which [illegible] coke [illegible] will entail a large expenditure. [illegible] your company will be enabled [illegible] world commerce, and to make [illegible]

tenders. These [illegible] ng forces [illegible] ment now available, thus affording a larger [illegible] ators, but will ensure such profits as to enable the company to give a fitting return to shareholders. Without these additions and improvements you must realize that your large coal and ore deposits are able to contribute a small part of what they should to the earnings of the company.

More Favorable Conditions

We commenced the current year under much more favorable auspices than had been. While our coal properties are not producing as much coal as we have the right to expect, we are fortunate in the possession of an unlimited market. Similar conditions prevail in the steel industry, and we have no difficulty in disposing of every ton we are able to produce. At the present time, three blast furnaces are in operation at Sydney, and we expect that a fourth unit will be put in blast in August. The entire output of our steel works is sold for the balance of this calendar year at attractive figures, and we have every reason to feel optimistic with regard to our company's prospects.

As previously mentioned four of our five long-term chartered steamers were delivered to us late in the season of 1919. Two of these four vessels have already entered our service for the present season, and we anticipate the return of two further steamships very shortly. We have made arrangements to purchase a controlling interest in the remaining vessel, in addition to which we have an option on the services of the boat for the full term of the original charter at an attractive rate.

A short time ago a proposal was submitted to your directors to become associated with various other enterprises in the recently organized British Empire Steel Corporation, Limited.

The object is to unite under single control the largest known single deposits of ore and coal, operating coal and ore mines, steel works, steamships, shipbuilding and repair yards, and other complementary enterprises. It would be the greatest industrial enterprise in Canada, and promises greater economy and efficiency in the production of coal and steel, the much needed shipping facilities and organization for the transportation of the companies' raw materials and finished products, and an outlet for its ship plates.

In addition there must be many economies to be effected in uniting the various enterprises under one management. I only mention this because of the publicity it has been given. Your directors have been carefully investigating the proposals and as it is an important matter for the consideration of our shareholders I hope it will soon be in shape to present to you, and when the directors so decide a special meeting of shareholders must be called to pass thereon.

R. M. WOLVIN, President

BOARD OF DIRECTORS

The Board of Directors and officers were elected as follows:

Roy M. Wolvin, president.
Hon. Frederic Nicholls, vice-president.
Sir Henry M. Pellatt, vice-president.
J. N. Norcross, vice-president.

Viscount Furness, Hon. Sir Clifford Sifton, Sir [illegible] Mackenzie, Sir William D. Reid, Major-General Sir Newton Moore, Benjamin Talbot, Hon. C. P. Beaubien, [illegible] tel, K.C., M.P., Stanley F. Elkin, M.P.; H. L. [illegible], J. N. Stewart.

The Executive Committee [illegible] shareholders' meeting [illegible] vice-presidents, Stanley F. Elkin, M.P., [illegible] and J. N. Stewart. [illegible] secretary and treasurer [illegible] treasurer.

The London Advisory Committee [illegible] Col. W. Grant Morden [illegible] Viscount Furness, Sir William Beardmore, Bart., [illegible] M.P. [illegible] Henry Steel [illegible] A. Tr[illegible] [illegible]

MONTREAL INSURANCE EMPLOYEES' ASSOCIATION

The Montreal Insurance Employees' Association a few days ago asked the Department of Labor, Ottawa, to have the question of their wages submitted to a board of conciliation and investigation. The department pointed out, however, that insurance does not fall within the direct scope of the Industrial Disputes Investigation Act, and a board of conciliation could, therefore, be established only in the event of both parties to the dispute being agreeable to this course. The association represents clerks employed by about seventy-four companies. These companies have not consented to make application for a board.

TO SELL BRITISH COLUMBIA GOODS

Manufacturers of British Columbia have had outlined to them a scheme for promoting the sale of products of the province. J. H. Falconer, president of the B.C. Manufacturers' Association, is the father of the plan. Briefly the idea is to organize an incorporated company to be known as the B.C. Sales Agency, Limited, in which each of the manufacturing concerns would take one or two shares of stock. Three hundred manufacturers each taking two $50 shares would raise a capital of $30,000, and to this might be added, if advisable, the value of a number of shares issued to commercial travellers, the suggestion being that the travellers take just one share.

SASKATCHEWAN RURAL MUNICIPALITIES

On June 23rd, Hon. C. M. Hamilton, minister of agriculture in the Saskatchewan government, resigned from the position of president of the Saskatchewan Association of Rural Municipalities, a position he has occupied for six years. He assured the executive, however, that he would retain his interest in the association. Murdo Cameron, M.L.A., for Saskatoon, who is vice-president, will continue the work until the next annual convention. The executive interviewed the government on the same day, presenting some forty resolutions passed at the last annual convention, asking for amending legislation to the various municipal acts, the principal one being a request for equalization of assessment between the urban and rural municipalities for the purposes of the public revenue tax. The necessity for this was strongly urged.

CALCULATING SUCCESSION DUTY RATE

In fixing the rate of succession duties on large estates, where part of the estate lies outside the province, a province is allowed to take into account the total value of the estate, according to the judgment of the Supreme Court of Canada, handed down on June 22nd in Ottawa.

At present, some twenty large estates in British Columbia are held up in the parliament buildings awaiting this decision. The case on which the decision has just been reached relates to the estate of Sir William Van Horne, former president of the Canadian Pacific Railway. When he died a few years ago his total estate was valued at $6,000,000, of which $300,000 was in British Columbia. Hon. John Hart, minister of finance, claimed that in fixing the rate of succession duty he could strike the rate for the $300,000 in this province on the basis of the rate for a $6,000,000 estate. He argued that in assessing the succession duty he could take into account the property of the deceased, both within and outside the province, both as to the liability of the estate to pay duty and as to the rate. The case went to various courts, with the result that the minister's contention has been upheld.

Agents of the Northern Life Insurance Co. held a convention at Calgary on June 21st.

DEBENTURES FOR SALE

RURAL MUNICIPALITY OF SWAN RIVER

Tenders will be received by the undersigned for the purchase of Fifty-eight Thousand ($58,000.00) Dollars of Debentures of the Rural Municipality of Swan River, being the second and final issue on authorized Debenture issue of $108,000.00 under the Good Roads Act. The Debentures bear interest at six per cent. per annum, are payable in thirty years from the date of the Debentures in equal annual amounts, made up of the aggregate sum due each year on account of Principal and Interest, and are guaranteed by the Province of Manitoba.

Tenders must be marked, "Tenders for Debentures," and received by the undersignd not later than Noon on Tuesday, the 6th day of July, A.D. 1920.

The highest or any tender not necessarily accepted.

JOSEPH ARMSTRONG,
Clerk of the Rural Municipality of Swan River.
Box 153, Swan River, Manitoba, Canada.

Swan River, Man., June 4th, 1920. 160

$5,000.00

TOWN OF CAPREOL, ONTARIO

6% FIRE PROTECTION EQUIPMENT

Sealed bids will be received by the undersigned up to and including July 24th, for the purchase of $5,000.00 Fire protection equipment bonds, to be issued by the Town of Capreol, bearing 6% interest and due from one to ten years.

W. H. MATHEWS,
182 Clerk & Treasurer.

$12,000.00

TOWN OF CAPREOL, ONTARIO

6% ELECTRIC LIGHT BONDS

Sealed bids will be received by the undersigned up to and including July 24th, for the purchase of $12,000.00 Electric light bonds to be issued by the Town of Capreol, bearing 6% interest and due from one to twenty years.

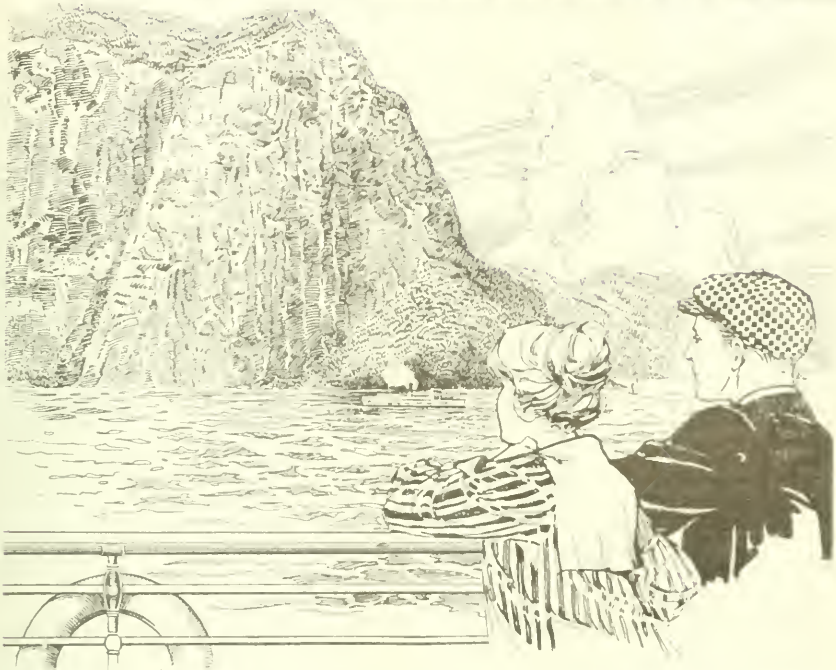
W. H. MATHEWS,
181 Clerk & Treasurer.

CITY OF TRAIL, BRITISH COLUMBIA

Sealed tenders will be received by the undersigned up to 7:00 p.m. on Monday, July 26th, 1920, at the City Hall, Trail, B.C., for $9,000.00 Local Improvement Cement Sidewalk Debentures bearing 7 per cent. interest, payable semi-annually. Principal payable in 1930. Principal and interest payable at Trail, Toronto or New York. Denomination of bonds $500.00.

WM. F. B. MONYPENNY,
179 City Clerk.

The Union Trust Co., Toronto, has purchased a three-storey building on the corner of Richmond and Victoria Streets, and will convert it into suitable office premises, with safety deposit vaults. The ground floor will be occupied by the trust company.



A World-Famed Trip Through Canada's Finest River Scenery

A GLORIOUS boat trip—through a wealth of magnificent scenery that even the wonderful beauties of the old world cannot excel, is the trip called

"Niagara to the Sea."

You may satisfy your every desire for beauty, thrills, and interesting sights and supreme comfort.

The trip down the Upper St. Lawrence will never be forgotten by anyone who has once seen those green clad Thousand Islands that Nature has strewn like a necklet of jewels over the broad channel of this mighty river.

Would you thrill to a new experience? Come "shoot" the tossing, tumbling waters of the St. Lawrence Rapids—it will exhilarate and charm you.

Are you interested in historic Romance? Then quaint old Quebec will furnish you boundless enjoyment.

Finally, the boat steams slowly up through the impressive canyon of the Saguenay, where those mighty Capes—Trinity and Eternity—tower higher than the Rock of Gibraltar.

DIVISION OF ESTATE BY TRUSTEE

Nova Scotia Supreme Court Orders New Apportionment—Trustee Himself a Beneficiary

ON January 13th, 1920, the Supreme Court of Nova Scotia, in the case of Ingraham vs. Hill, decided that it would set aside the sale of a portion of the residue of an estate by a trustee where it is clear from the will that the testator intended the beneficiary to have a vested interest in such residue on certain conditions, which had been fulfilled.

The facts of the case, as reported in the Dominion Law Reports, are that Charles W. Hill, of Sydney, died on February 10th, 1911, having made a will, dated June 9th, 1909, which contained a clause that, on the death of his wife, "all the rest and residue of my estate and property . . . upon the trust that he (his brother, Arthur E. Hill), do and divide and apportion the same between himself and the said Alfred Harrison and the said Emily Ingraham in such proportions as to my said brother shall seem equitable and prudent; but should either the said Alfred Harrison or the said Emily Ingraham die leaving no heirs of their bodies, then my said brother, Arthur E. Hill, and his heirs shall take the same absolutely."

Trustee Apportioned Estate

By an instrument in writing, dated December 4th, 1917, Arthur E. Hill purported to apportion and divide the residue of the estate of the late C. W. Hill, pursuant to the power conferred by his will, and he thereby gave to Alfred Harrison the sum of $60 yearly during his life and a like sum to Emily Ingraham (the plaintiff) during her life; and he declared that he held certain of the real estate belonging to the deceased "in trust for securing the payment out of the rents and profits or income arising therefrom of the said yearly payments." The balance of the property he allotted to himself.

A property valued at $7,900 in the inventory of the estate, and said to be worth $12,000, was claimed by Arthur E. Hill under a verbal agreement with his deceased brother. It was, however, considered as forming part of the estate. Hill did not include this property in making the division and apportionment of the residue of the estate, and the court decided that Hill had not divided and apportioned the whole of the estate in his hands, and that the attempted distribution was manifestly in bad faith.

The judge, in deciding the case, said in part: "For these reasons I think the appeal should be allowed, and there should be a decree setting aside the instrument dated December 4th 1917, and an order for a reference to determine the particulars and the value of the residuary estate, and that Hill shall divide and apportion the whole of the estate between himself and the said Alfred Harrison and Emily Ingraham in such proportions as to him shall seem equitable and prudent in accordance with the terms of the will."

MUTUAL FIRE INSURANCE CONFERENCE

The Western Mutual Fire Insurance Association held a conference in Calgary on May 27, going to Didsbury, Alta., on May 28 and to Banff on May 29. Among the companies represented were: Royal Victoria Mutual Fire Insurance Co., of Beulah, Man., A. Van R. Schermerhorn, F. J. [illegible], J. H. [illegible] and C. W. Chilton; Minota Farmers' Mutual Life Insurance Co., also of Beulah, Murray G. Doyle and J. E. Lynch; Milk River Mutual Fire Insurance, of Milk River, Alta., Paul Mudge and Dr. G. W. Giles; Portage la Prairie Mutual Fire Insurance, Messrs. Stratton, Whittemore and A. H. Thorpe; Farmers' Mutual Fire Insurance of Regina; R. H. Cook; Saskatchewan Farmers' Mutual Fire Insurance, Saskatoon, H. R. Lundy and John Evans; Western Mutual Fire Insurance, of Didsbury, Alta., R. R. Reed, H. F. [illegible], H. B. Adams, R. J. Rollis, A. C. Fisher and J. R. [illegible].

Fire prevention and other subjects of general interest to the companies were discussed.

OUR FOREIGN TRADE FIGURES GROWING

Relations with British Colonies Also Improving—Imports from United Kingdom and America Continue to Advance on a Large Scale

EXPORTS to the United Kingdom fell off during the twelve months ended May, 1920, by more than $100,000,000, while imports have more than doubled. Imports from the United States continue to increase on a large scale, while exports to that country show comparatively small advances. Trade with the British colonies, on the whole, is improving, exports being considerably in excess of imports. Imports from New Zealand and Australia show a falling off, while, in the case of the latter country, exports also show a reduction. Foreign trade has made some big advances, particularly under exports, although there are some notable increases under imports. France is buying less from Canada, while, on the other hand, the Dominion is importng more from that country. Exports to Italy show a slight reduction, while appreciable increases are shown in Greece and Belgium.

The following table, prepared by the Dominion Bureau of Statistics, gives the trade of Canada by countries for the twelve months ended May, 1920, as compared with previous years:—

	Twelve Months ending May		
	1918	1919	1920
	$	$	$
IMPORTS FOR CONSUMPTION

News of Industrial Development in Canada

Many Difficulties Must Be Overcome Before Steel Industry Is Established on the Coast—To Develop Sulphate Deposits in Saskatchewan—Granby Company to Pursue More Progressive Policy in the Future

FURTHER details of the investigation into the steel industry on the British Columbia coast by Henry S. Fleming, of New York, of which brief mention was made in these columns last week, have been given out. Mr. Fleming, in discussing the problems, takes as the possible immediate market the whole of the western section of Canada, reaching probably to the longitude of Regina, where competition with the eastern producers would define the limits, and the west coast seaboard as far south as San Francisco. The Orient is recognized as a limited field only, for the reason that it is now well controlled by Japanese production save for the highly specialized products, and there is possible trade with South America and Australasia.

A survey of general conditions reveals many difficulties which must be overcome before Mr. Fleming's plans materialize. He considers the market very shaky at present, taking into consideration transportation facilities, both inland and marine. As regards the supply of raw materials, Mr. Fleming has no doubt that it is more than adequate.

Develop Sulphate Deposits

A joint stock company will be formed in Saskatchewan under the name of Ceylon Sodium Sulphate Co., Ltd., to develop the sodium sulphate deposits south of Ceylon, Sask., according to a memorandum received by the provincial registrar, Regina, signed by John W. Irwin, Estlin, Fred W. Whitworth and John D. Burns, Moose Jaw, all of Saskatchewan. The sulphate deposits are considered the most valuable in the world and can be used without going through any process, being 98 per cent. pure. There are said to be nine million tons available without very much expense.

Under advice from an expert who has made a thorough investigation of the deposits, the company which owns the property is not willing to sell its rights at less than $3,000,000. There are four or five by-products which can be obtained in the refining process and if the New Yorkers obtain possession of the same, it is their intention to erect a refining plant on the property and to develop extensively what is acknowledged to be the purest sodium sulphate mine in the world.

Manufacturing Notes

A company capitalized at about $25,000 is being organized at Sydney, N.S., with the purpose of erecting a brick manufacturing plant at Point Edward.

Lobster raising interests who own factories in Cumberland County, N.S., intend erecting a factory at Glace Bay, N.S., and have already chosen a site which is conveniently near the lobster fishing grounds. Piers will be constructed and other necessary work for that industry.

The Steel Co. of Canada has announced that its plant will have to stand idle for a short time owing to coal and fuel oil shortage. The close down at this time means considerable loss to the company as many orders are on hand to be filled. Every effort will be made to secure a supply of fuel, but if this fails the plant may have to be idle for a couple of weeks. In the neighborhood of 2,500 employees will be affected.

The output of the Ames-Holden Tire Company's plant at Kitchener, Ont., according to a statement made by the president, T. H. Rieder, is now [illegible] at 400 tires per day, and the output is expected to reach 800 tires per day by August 1st. The company is [illegible] its operations for [illegible] by 50 per cent. of [illegible]. The product is being distributed throughout the country by the selling organization of the Ames-Holden McCready Co., who report an encouraging reception by the trade.

Work on the reopening of the mines formerly operated by J. T. Burchell at Gardiner, N.S., has been commenced by the Dominion Coal Co. Operations at the old Lingan mines in Nova Scotia will also be resumed by the company.

According to the statement of H. S. Munroe, recently appointed manager of the Granby Consolidated Mining and Smelting Co., a more progressive policy, as far as the company's coal holdings at Cassidy, on Vancouver Island, B.C., and its copper mining operations at Anyox are concerned, will be pursued in the future. Changes made in the coke and by-product plant at Anyox makes Cassidy coal more available than ever for the purposes for which the plant was constructed, and the position of the company in becoming independent for its coke supply in smelting operations has become greatly strengthened. Mr. Munro is optimistic over the future of copper in British Columbia, and has announced also that the company will be in the market for all the cuperiferous and silicious ores possible to handle tributary to Anyox. If necessary, smelter equipment will be augmented to care for all tonnage that may present itself.

A large American pottery concern has purchased the Raymond Pottery in Montreal East, with the intention of enlargement. The property consists of two kilns in addition to a good-sized plant. About $100,000 was the purchase price.

Robertson and Bros., Montreal, have contracted to build a factory on St. Patrick Street, Montreal, for the Colonial Wire Manufacturing Co., at $7,500.

Salmon canners of Vancouver, B.C., are organizing a syndicate to build a salmon warehouse near the government dockyard at a cost of $100,000.

J. C. McLennan, professor of physics, Toronto University, is in London, Eng., arranging with the British admiralty for the installation of a plant in Canada for the production of helium gas, a substitute for the more expensive hydrogen, for inflating airships and balloons.

Work on the new mill of the Brompton Pulp and Paper Co. at East Angus, Que., has been commenced.

Chemical Products

Ontario Smelters and Refiners, Ltd., announce that they have revived the Welland, Ont., plant and completed the changes made necessary by their different processes, in the refinery and chemical way, so that their production of chemicals and mineral oxides would be very much stimulated from now on.

Lately the company purchased the modern plant of the Metals Chemical, Ltd., at Welland, Ont. The latter company has been specializing in the recovery of all the valuable elements already shown at present in the ores mined at Cobalt. Its plant, however, has since been altered and improved in several respects. The Chippawa plant of the Ontario Smelters and Refiners will also be kept in active operation at full capacity, and combined these plants will be able to fully meet the new conditions which have arisen in the smelting and refining industry. They will turn out large quantities of refined cobalt, also the oxides of cobalt and nickel, with antimony, copper, bismuth, arsenic, insecticides and weed killers. The company also controls and operates the [illegible] Silver Mines, which furnish much of the raw material treated in its two smelting plants.

Messrs. Watt and Watt, stock brokers, Dominion Bank Building, Toronto, have announced the opening of their Hamilton, Ont., office at 8 Main Street, under the management of C. H. Montizambert.

ORGANIZATION OF CENTRAL TRUST CO.

A general organization meeting of the Central Trust Co. of Canada was held at Moncton, N.B., on June 22. The company expects to have its office open in Moncton some time in August. At the meeting, H. M. Wood, of Sackville, N.B., was elected president; Hon. C. W. Robinson, of Moncton, J. D. Palmer, of Fredericton and R. C. Tait, of Shediac, N.B., vice-presidents. The following directors, all New Brunswick men, were also elected:—

A. E. Trites, Salisbury; C. W. Fawcett, Sackville, N.B.; W. F. Ferguson, E. A. Reilly, F. R. Sumner, J. A. Marven, Reid McManus, A. C. Chapman, Moncton; Fred. McGee, Port Elgin; Wm. L. Carr, Woodstock; E. H. Sinclair, New Castle; Angus McLean, Bathurst; William S. Richards, Campbellton; P. G. Mahoney, Melrose; Hon. J. E. Hetherington, Cody.

INCREASE IN TELEGRAPH RATES

Increased rates on commercial telegraph messages throughout Canada went into effect on June 14th, 1920. The order of the Canadian Railway Commission directing that tariffs become effective "not earlier than June 14" states that the new rates have been checked and scaled by the commission's traffic department and some slight changes made in the arbitrary scaling suggested in the board's recent judgment on the subject. That judgment granted increases which averaged thirty-two per cent. on traffic in eastern Canada and twenty per cent. in western Canada, with a special provision of an arbitrary twenty-five per cent. on the transcontinental $1 flat rates. The commission's current ruling states that the rates as finally checked and scaled "are not, in the average, in excess of the increased basis, as provided for under rule three" of the previous order.

TRUST AND LOAN COMPANY OF CANADA

The annual meeting of the Trust and Loan Co. of Canada was held in London, Eng., on June 24th, when the report for the twelve months ended March 31st and the financial statement at the end of that period were submitted to the shareholders. Net profits for the year amounted to £118,575, an increase over the 1919 showing of £8,513. Investments in Canada as at March 31st last, aggregated $13,757,832, a gain over the value of those shown in the previous statement of $170,951. At the end of the company's fiscal year in 1911, investments in the Dominion totalled $17,117,000, indicating that the prosperity in agricultural districts had resulted in considerable liquidaton of mortgages.

Although the increase in the demand for fresh money since the conclusion of hostilities has been substantial, exchange difficulties have, in all probability, affected the sending out of Canada of funds from England, the slight gain recorded in the company's statement would seem to point to the fact that money will be forthcoming from that quarter on the resumption of more normal conditions.

In its report to the shareholders, the president, Lieut.-Col. the Hon. Sidney Peel, D.S.O., M.P., referred to the recent [illegible] reorganization of the company, and to the fact that the Canadian commissioner, John Campbell, of Winnipeg, was elected a member of the board during the year.

News of Municipal Finance

Greater Winnipeg Water District Assets—Middlesex County Reduces Tax Rate—Bank Urges York County to Discontinue Road Construction Because of Stringent Money Market—Calgary Increases Street Railway Fares—Walkerville Tax Rate Increased

Harriston, Ont.—Tax rate for this year has been fixed at 46 mills.

Winnipeg, Man.—The city council has passed estimates totalling $6,190,461 and a tax rate of 22.5 mills, as compared with 23 mills last year.

Hamilton, Ont.—Appeals against the city's assessment resulted in the following reductions: Buildings, $21,360; incomes, $6,620; land, $1,550.

Lindsay, Ont.—Tax rate this year has been reduced from 41 mills to 38 mills. This reduced rate takes care of a $5,000 deficit, as well as increased school estimates and salaries.

Charlottetown, P.E.I.—Estimates of the city for the current year give a surplus of $404, expenditures being $138,532 and revenue $138,936. The municipal tax will contribute $115,886.

Walkerville, Ont.—Total tax rate for 1920 is 32 mills, an increase of 4½ mills, which advance is caused from the increased estimates for school purposes of practically 4 mills, and in the general rate, a ½ mill.

Fort William, Ont.—The city council has voted to increase the fares on the municipal street railway to seven cents from five cents. It is expected that the increase will help to overcome an annual deficit of $60,000.

Greater Winnipeg Water District, Man.—The auditor's report of the District for the year ended December 31st, 1919, shows assets as follows: Aqueduct proper, $13,604,452; railroad and equipment, $1,591,509; telephone system, $33,620; gravel pits and rock quarries, $97,185; picnic grounds, $1,184; sundry buildings and equipments, $116,828; original survey and charter, $125,912; outstanding water levy, 1918-19, $988,[illegible]61; outstanding water charges, $28,102.

Bonded indebtedness of the District is shown to be $14,[illegible]94,588. The total liabilities of the District, inclusive of the amount overdrawn on the District account, amounts to $16,[illegible]87,671. Land purchased by the District on which the aqueduct and railroad has been built has cost $311,932.

Calgary, Alta.—City commissioners have decided to increase fares to 10 cents, single fare, or two tickets for 15 cents, four tickets for a quarter and twenty tickets for $1. The present rate is 7 cents for a single ticket, or five tickets for 25 cents and twenty-two tickets for $1. The rate for children, which is now eight tickets for 25 cents, will not be changed. Increases in operation, including $125,000 for wages and $28,000 for depreciation fund, to be set aside for further depreciation on the basis that was used prior to the war, are the reasons for the advance in fare rate.

York County, Ont.—Treasurer D. J. MacDonald has submitted estimated expenditures as follows: For general purposes, $111,576; industrial home, $27,000; court house debentures and interest, $1,875; road improvement and interest, $20,812; road improvement and construction, $150,000; road improvement and maintenance, $16,000; reduction road improvement debentures, $32,000; road improvement interest charges, $18,000; total, [illegible].

The Canadian Bank of Commerce, in a letter to the [illegible] committee of the county, urges the discontinuance of all [illegible] construction which is not of vital necessity on account of the stringency in the money market. The letter points out that the county's borrowings amounted to $298,000 last year, but that the amount was $450,000 this year. The [illegible] was [illegible] by the treasurer, who stated that the government [illegible] toward the maintenance of [illegible] until the roads [illegible] inspected in the fall. The government will be asked [illegible].

Edmonton, Alta.—Tax arrears amounting to $408,000 [illegible] paid into the city treasury since January 1st, according to an announcement by Assessor Walker, and is apart from the $1,500,000 of current taxes paid during the May discount period.

The report shows that throughout the first six months of this year there has been a steady payment of arrears. These back payments were for 1919, as well as previous years. By months, the payments were as follows: January, $124,000; February, $62,000; March, $75,000; April, $46,000; May, $51,000; June 1st to 24th, $50,000. After July 1st all property in arrears at December 31st, 1919, will be placed in the tax sale list and the assessor's staff will commence the preparation of it. It is expected that the sale will not be held earlier than October, and possibly next November.

Middlesex County, Ont.—An amendment to a previous by-law cuts one mill off the tax rate this year, which has now been set at 6.83 mills. Councillor Grieve was the only one to voice an objection, the question being whether the rate should be based on the treasurer's estimates, which showed a deficit of $20,000, or struck on the auditor's report, which showed a balance of $24,000 on hand.

In speaking to the council, Mrs. T. E. Robson, county treasurer, reviewed the finances as far back as 1913, and pointed out that up until 1913 the county had been raising sufficient revenue each year to carry on the business of the county without resorting to borrowing. Since that time the estimates had been cut in various ways, with the result that it was necessary every year to borrow from the bank. She pointed out that by doing business in this way the county was every year paying out $7,000 in interest. In connection with the $20,000 deficit, Mrs. Robson declared that she could not say from where it originated as this had been lost track of in the necessary renewal of notes. The balance of $24,000 was actually in the bank when the audit was made, but she pointed out that there was $80,000 in notes against this at the time. She thought that the rate should be eight mills in order that the county might finance throughout the year without resorting to borrowing, and declared that if the estimates were to be cut so that borrowing was necessary, that in the next ten years, with the same tactics, the county would pay out $70,000 in interest on notes for current revenue.

Macleod, Alta.—At an informal meeting of the provincial finance commission, bondholders and town representatives at Calgary last week, the tax rate was discussed, and it is likely that a 66-mill rate will prevail this year. The matter of a current rate of taxation for the town was carefully gone into. The bondholders asked that a 75-mill rate be applied to Macleod, while Mr. Mercer, manager of the Bank of Commerce, in W. Macleod, who appeared on behalf of the bank, spoke of a 70-mill rate. Mr. J. L. Fawcett, mayor of Macleod, submitted that a 60 mill rate of taxation, without providing for the sinking fund, would be more applicable. After a long discussion a compromise was effected between the parties interested, and all agreed on the application of a 66-mill rate. This decision will be laid before the financial commission when it meets, and will in all probability be adopted. The view expressed by town officials and those best qualified to judge of local conditions is that the levying of the 66-mill rate will be in the best interests of both the town and the bondholders.

Both the bondholders' representatives and the commission were satisfied that there has been no mismanagement of town affairs, and that the present conditions were due wholly to unavoidable circumstances. The town of Macleod was well run in the past, and not only the commission, but the leading financial men who are interested in its municipal affairs, were satisfied that those affairs were being conducted in a safe and sane way, and that the creditors of the town would be fully protected under the new taxation.

Government and Municipal Bond Market

Good Volume of Municipal Securities Taken Up During Past Week—Irrigation Bonds Will Be Ready For Market Shortly—Vancouver Ratepayers Defeat Money By-Laws Totalling Nearly A Million and a Half—Financing Toronto Harbour Work

LISTS of July government and municipal offerings reflect in an accurate manner the position of the bond market at the present time. There does not appear to have been any material change during the past month, the trend of prices being neither up nor down, even though the volume of new issues has been considerable. It is interesting to note, however, the change since the beginning of the year. Ontario cities are now selling to yield from 6.10 to 6½ per cent., according to the grade of the security, as compared with 5¾ to 6 per cent., in January. Western municipal, school and telephone debentures are presently offered to yield from 6.60 to 7½ per cent., as compared with 6.40 to 6⅝ per cent., six months ago. The yield on provincial securities has also been raised considerably, being around 6 per cent. now, as compared with between 5½ and 5.80 at the beginning of the year.

Speaking of the prices at the present time, Messrs. Wood, Gundy and Co. say in their monthly pamphlet: "Low prices do not in any way reflect upon the security behind the bonds. On the contrary, owing to heavy interest rates, which it is now necessary to pay, Canadian provinces and municipalities are restricting their expenditures as far as possible. Consequently, there is a probability of a shortage of these bonds, which should result in a strengthening tendency in the market."

Irrigation Bonds

Premier Stewart, of Alberta, has promised prompt action in connection with the irrigation projects in the south to a delegation last week, as provided by legislation. He has stated that bonds of the Lethbridge Northern district would be prepared at once, and would be ready for the market in about thirty days.

"There will be no further delay in the matter," said Mr. Stewart. "The preparation of the bonds has been held up for a little because of the inclusion of new areas, but this has now been settled, and we shall proceed at once in strict accordance with the terms laid down by the legislation. The offer of the bonds will not be confined to the Warren Construction Co., but will be free from restrictions of all kinds. We shall in the meantime look around for likely investors. The market is tight, to be sure, but a good many people are interested in this kind of security, and we shall do our best to make a good sale."

Coming Offerings

The following is a list of debentures offered for sale of which mention has been made in this or previous issues:—

Borrower	Amount.	Rate %.	Maturity	Tenders close
Neelon and Garson Township, Ont.	$ 10,000	[illegible]	20-instal.	July [illegible]

Township of Emily, Ont.—Tenders will be received until [illegible] 1920, for the purchase of [illegible] instalment debentures, the proceeds to be used for the municipal telephone system. R. J. Grandy, clerk, Omemee, Ont.

Trail, B.C.—Tenders will be received until July 26th 1920, for the purchase of $9,000 7 per cent. 10-year debentures. (See announcement elsewhere in this issue.)

Capreol, Ont.—Tenders will be received until July 24th 1920, for the purchase of $5,000 6 per cent. 10-instalment fire equipment debentures and $12,000 6 per cent. 20-instalment electric light debentures. (See announcement elsewhere in this issue.)

Hawkesbury, Ont.—Tenders will be received until July 12, 1920, for the purchase of $95,000 6 per cent., 20-instalment road debentures, $65,000 6 per cent., waterworks and sewer extension 30-instalment debentures and $19,000 6 per cent. 6-instalment bonus debentures. Eug. Paquette.

North Sydney, N.S.—The town is receiving tenders until July 9, 1920, for $131,000 6 per cent. 20-year debentures as follows: $50,000 for town hall; $20,000 for fire equipment; $25,000 for streets; $3,000 for right-of-way loan; $12,500 for sewer extension; $12,500 for waterworks; $8,000 for retiring debentures. Town clerk.

Kenora, Ont.—Tenders are being asked on the following debentures: $10,000 7 per cent. 15-instalment, electric extension; $25,000 7 per cent. 20-instalment, public improvement; $7,755.38 7 per cent. 20-instalment, local improvement; $20,000 7 per cent. 20-year sinking fund debentures, for waterworks; $13,564.87 6½ per cent. sinking fund bonds, due 1953, for debt consolidation. No special date is set.

Debenture Notes

Islington, Ont.—Etobicoke Township intends to raise $30,000 for a new school.

Kitchener, Ont.—The Separate School Board plans the raising of $75,000 for a new school.

Louise, Man.—Voting at Crystal City, Man., was in favor of borrowing $8,000 for a skating rink at Louise.

Amherst, N.S.—At the cost of $40,000, the town council plans the erection of an addition to municipal hospital.

Moncton, N.B.—The city has practically decided upon a paving program this summer involving an expenditure of between $175,000 to $200,000.

Yorkton, S.D., Sask.—Messrs. Harris, Read and Co., Regina, were given on June 26, a 15-day option on $85,000 7 per cent. 20-instalment debentures.

East Kildonan, Man.—Messrs. Strang and Snowden, of Winnipeg, have secured an option on $150,000 6 per cent. 30-year serial bonds of the school board at 90.25.

Oshawa, Ont.—Ratepayers have voted in favor of issuing debentures to the amount of $250,000 for waterworks purposes. A bridge money by-law has also been passed.

Kingston, Ont.—No more permanent paving will be done this year after the present works are completed, in order to keep the increase in the debenture debt down to a minimum.

Sudbury, Ont.—A by-law has been passed by ratepayers authorizing the expenditure of $27,000 on new water mains.

Delta, B.C.—Municipal council proposes to expend $100,000 on [illegible] Delta Rd.

Melita, Man.—The hospital debenture by-law has been [illegible] except Melita. The proposed hospital area [illegible] covered the municipalities of [illegible], Edward, part of Albert and Melita.

Regina, Sask.—The city council will be asked to issue [illegible] school taxes assessed against [illegible] title under the ar-[illegible]

York Township, Ont.—Township council has passed by-laws authorizing the raising of $67,000 for school purposes.

York County, Ont.—The sums of $430,000 for construction of highways and $455,000 for the maintenance of roads and bridges in the county, are to be raised by debentures.

Essex Border Utilities, Ont.—All tenders on the $117,615 6 per cent. 28-instalment debenture issue were turned down. It is understood that the commission will change the act authorizing the issue and make another offering.

Vancouver, B.C.—Eight money by-laws totalling $1,425,000 have been defeated as follows: Street improvement, $150,000; waterworks, $120,000; maternity hospital, $500,000; isolation hospital, $350,000; new schools, $60,000; equipment, $15,000; repairs, $80,000; technical school, $150,000.

Niagara Falls, Ont.—Two by-laws will be voted on by the people of Niagara Falls, July 26, one to raise $28,000 for the purchase and equipment of a civic scheme of parks and playgrounds, and one to guarantee the bonds of a local company to the extent of $80,000, for the erection of a tenement factory building.

Bond Sales

North Battleford, Sask.—Citizens were recently invited for the first time to subscribe to an issue of $30,000 3-year 7 per cent. treasury notes, and the loan was oversubscribed by 10 per cent. The proceeds of the loan are for the purpose of installing new boilers in the power plant.

Three Rivers, Que.—The city has sold to Versailles, Vidricaire and Boulais $277,000 5½ per cent. bonds, dated November 1, 1919, and due in 10 years, at 93.26. The $80,000 6 per cent. 30-year bonds and $6,000 5 per cent. 10-year bonds have not been sold.

Brandon S.D., Man.—Messrs. A. E. Ames and Co. have purchased privately $50,000 5 per cent. 30-year debentures.

Pipestone, Man.—The municipality has sold to Harris, Read and Co., Regina, $80,000 5½ per cent. 20-year debentures at 86 and $13,000 5½ per cent. 30-instalment debentures at 89.

St. John, N.B.—It is understood that tenders on the $100,000 6 per cent. 10-year debentures, issued in payment for the nurses' home, were rejected, and that the bonds were sold to a local syndicate headed by J. M. Robinson and Sons at 98, at which price the city paid slightly more than 6¼ per cent. for its money.

Brantford, Ont.—During the past month or two, Brantford has successfully disposed of its bonds to the amount of more than $300,000 to local citizens, and on much more favorable terms than could have been secured through the usual channels. City Treasurer Bunnell informs *The Monetary Times* that there is still $250,000 undisposed and that he intends to try the local market with a further issue before making public offering.

Chatham, Ont.—Messrs. Wood, Gundy and Co. have purchased $90,000 6 per cent. 30-year hydro-electric debentures at 96.18, which is slightly above the 6¼ per cent. basis. Only three tenders were received and they are:

Wood, Gundy and Co.	96.18
A. E. Ames and Co.	94.33
R. C. Matthews and Co.	92.50

Toronto Harbor Finances

Members of the Harbor Board and the Toronto city council met this week to consider the work done by the former body. R. Home Smith, for the commission, reviewed the work completed and emphasized the financial conditions the board had to contend with, past, present and future. "Financial matters have been difficult during the war," he said, "and they have not got easier. In fact they have been harder."

Mr. Smith told the conference that the policy realized from selling the debentures earlier than required for actual work had worked out to the advantage of the board. "The money received," said he, "has been placed on deposit with a trust and loan company at 1¾ per cent. There has been since 1914 a lowered rate for bonds with a rising percentage [illegible] we would have made a loss on the [illegible] of our bonds."

CROP OUTLOOK CONTINUES GOOD

Ontario and Quebec Enjoy Fine Weather—Small Damage in West From Blowing and Grasshoppers

QUEBEC is promised good crops this year, according to reports secured from 40 correspondents of the Provincia Bureau of Statistics. The main difficulty is a shortage of labor, as many farm laborers have been drawn to the cities because of the high wages and short hours obtainable there.

The following is a summary issued by the Ontario Department of Agriculture on June 29th:—"All field crops have been more or less improved by the rains which have fallen at intervals during the last three weeks. Fall wheat has been lengthening in stalk with the recent rains, but is still decidedly below the average in height. The absence of great heat during the last week or so has helped the heads to fill out well, and several representatives express the hope of a generous yield. Essex, Kent, Elgin and Haldimand speak of the Hessian fly as causing some trouble. Spring grains are looking much better than they did earlier in the season. Essex and Kent report some oat fields as already beginning to head.

"All hay and pasture crops have picked up wonderfully with the soaked soil, but timothy and clover will be behind the average in yield. Norfolk reports some new hay already on the market. Alfalfa has received the first cut, and is giving satisfaction, and sweet clover is also said to be turning out well. Corn, taking the province over, never looked better at this date, even though it has been more affected by insects than in recent years. Potatoes are doing nicely now, early varieties being in blossom. All roots except mangels are looking well, but considerable of that crop had to be resown to turnips. Lanark reports that Canadian-grown root seed has given good results this season."

Western Situation Unchanged

Crop reports from the west received at Canadian National Railway headquarters continue to be favorable, and if conditions keep up at the present rate the west promises a record crop for this year. Prairie provinces report quite a bit of summer fallowing being done. In Manitoba showers come quite regularly, and the hailstorms of last week did little damage. Shelmouth reports that crops are ten days ahead of last year, and a twenty per cent. increase in the oat crop this year. In Athabasca 60 per cent. of the seeding has been done, while the Vermilion subdivision reports the grain standing 12 inches high, with an abundance of moisture.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13 7-16 pm	13⅝ pm	....

Quebec Railway Features Uninteresting Sessions on Canadian Exchanges—Noticable Easing in Prices of Many Stocks and Light Volume of Trading—Bond Market Also Quiet—Howard Smith Issue Sold—Riordon Offering Over-Subscribed

FOR the week ended June 29th, there was even less speculative interest in the New York stock market than previously, business being very dull, and price fluctuations uninteresting. Money ruled between 11 and 14 per cent., but eased to 9 and 7 per cent., because there was no demand for it at any price. A sharp reduction in the reserves of the last Federal reserve bank statement is pointed to as explaining the stringency in the money market. It does not appear as if there will be any decided change in the character of the market for some time, but, nevertheless, there is a general hopeful feeling in some circles.

Actions of Canadian stocks for the week ended June 29th, seem to indicate that the market is entering a period of summer quietness with a usual easing of some prices. In Montreal trading was light, with the exception of Quebec Railway, which furnished a turnover of 13,973 shares. Quebec Railway has attracted considerable attention during the past week or two, and the future developments of the company are being discussed with much interest in influential circles. It is the general belief that the stock will be placed on a dividend basis, although what the rate may be is not stated. There has also been considerable talk regarding the amalgamation of the company with the Quebec Public Service Corporation, which company is controlled by the Shawinigan Water and Power Company. Atlantic Sugar was a strong feature, gaining 9 points on sales of 5,280, while National Breweries was fairly active, the turnover for the week being 9,8[illegible] shares. Interest in paper stocks, which have dominated the market during the past few weeks, has entirely gone, leaving most of those issues weaker.

Business in Toronto was also dull, Brazilian being the only issue which furnished a turnover of more than 1,000 shares. While there were a few ordinary gains, there was a noticeable easing in prices of many stocks. Steel of Canada was a feature among the weak issues, selling as low as 7[illegible], a drop of 20 points as compared with the previous week.

New Issues Offered

Offering of 8 per cent. cumulative preferred participating shares of Chemical Products, Ltd., is being advertised elsewhere in this issue at par, with a bonus of one share of common stock, by Messrs. Graham, Sanson and Co., Toronto, and the Canada Industrial Bond Corporation, Montreal and Ottawa.

The total authorized issue of preferred is $2,000,000, of which $1,[illegible]0,000 is to be issued. Already large blocks of this stock have been disposed of privately and the balance is now being publicly offered.

R. McLelland, Hamilton and Toronto, is offering subject to prior sale, 20,000 shares of United Shoe Shops, Ltd., (par value $10), at par. Net profits of United Shoe Shops, Ltd., are more than sufficient to pay 12 per cent., on this present issue from the operation of the present stores. It is the intention of the company to extend its chain of stores throughout Canada.

Howard Smith Paper Mills, Ltd., have recently sold to Nesbitt, Thomson & Co., $450,000 6 per cent., first mortgage bonds, maturing 1934. These bonds form a part of an issue of $1,[illegible]00,000, of which there still remains $250,000 in the treasury.

Subscription lists on the $8,500,000 8 per cent. cumulative preferred shares of Riordon Co., Ltd., have been closed, and the issue has been substantially over-subscribed, to the extent of $1,300,000, it is stated. Of the total allotted, more than $8,000,000 was subscribed by Canadian investors. The Royal Securities Corp., were the underwriters. It is understood that the number of applications totalled over two thousand, a feature of the offering that indicates wide distribution with a resulting stable market for the new securities.

Capital Increases

Companies registered under Dominion charters have been authorized to increase their capital stock as follows:—

	Former capital stock	Increased to
Canadian Ammonia Co., Ltd.	$ 100,000	$ 250,000
Benedict Procter Mfg. Co., Ltd..	25,000	150,000
Nova Steel Corp., Ltd.	200,000	300,000

New shares in the two latter cases will have a par value of $100, while in the former case new shares will have a par value of $25.

Under provincial charters the changes are as follows, the name of the province being indicated:

	Former capital stock	Increased to
Bond Hardware Co., Ltd. (Ontario)	$ 100,000	$ 250,000
Beaver Wood Fibre Co., Ltd. (Ontario)	2,000,000	4,000,000
Treesprggs Co., Ltd. (Ontario)	20,000	150,000
Fairbanks Rattray, Ltd. (Manitoba)	10,000	45,000
Northland Knitting Co., Ltd. (Manitoba)	100,000	250,000

---

*New shares to have a par value of $25 each, others $100 each.

R. J. CLUFF, Esq., Toronto.
President, Chase Tractors Corporation, Limited.
President, Galt Brass Company, Limited.

From a letter from Mr. R. J. Copland, President of Chemical Products, Limited, we summarize the following [illegible] issue:—

Business

Chemical Products, Limited, was formerly known as Chemical Products of Canada, Limited, manufacturing a varied line of pharmaceutical chemicals. This Company has been a leader in the production of many fine medicinal and technical chemicals. Its products achieved a national distribution, and a world-wide trade connection was established.

To cope with the volume of business offered at home and abroad, expansion was necessary. Chemical Products, Limited, has taken over all the formulae, processes and rights of Chemical Products of Canada, Limited.

Property

The property, comprising 255 acres, is situated at Trenton, Ont., on the Trent River Valley Canal. The trunk lines of the Canadian Pacific, the Grand Trunk and Canadian National Railways bound the property and are connected with it by sidings. Rail and water transportation is thus assured.

Plant

The main plant at Trenton, Ont. will be divided into five distinct units:

1.—Acid Phosphate Plant annual capacity 75,000 to 100,000 tons. 2.—Sulphuric Acid Plant—with a capacity of 120 tons a day, 70 ton Nitric Acid Plant. 3. Refined Nitrate of Soda, Epsom Salts and General Chemicals. 4.—Salicylates of allied derivatives, viz Aspirin, Salicylic Acid, Sodium Salicylate, Oil of Wintergreen, Creosotinic Acid. 5. Ammonia and Coke Oven by-products, including Salammoniac, Ammonia Carbonate, Liquor Ammonia, Aromatic Hydro Carbons and Whiting.

Numerous allied industries will be located here, working in conjunction with the main plant.

Assets

The Company's properties, including Land, Plants, Railway System and working equipment, will have, after completion of present financing and construction programme, a replacement value of $2,729,907.50, in addition to net working capital of $500,000; which will be equivalent to $189.40 per share of Preferred Stock outstanding.

Although the Company is the successor of a business that has an established world wide trade connection, it carries on its books no value for goodwill.

Earnings

A conservative estimate of the net earnings, allowing for only four principal products and not taking into consideration any profit from surplus sulphuric acid or other product, would amount to $1,483,688 net per annum.

These earnings are equivalent to over eleven times Preferred Stock dividends, and leave a surplus equal to about $18 per share of outstanding Common Stock.

Application will be made [illegible] Shares [illegible]

An opportunity to realize the advance made in the chemical industry is afforded by our Descriptive Circular which will be gladly mailed upon request.

Judgment Reserved in Edmonton, Dunvegan and British Columbia Railway's Application For Increased Rates—Winnipeg Electric Railway Wins Fare Case—Shareholders of Nova Scotia Steel Ratify Agreement to Enter Merger—C.P.R. Net Earnings Improve in May

Abitibi Power and Paper Co.—Directors have declared a dividend of $1.50 per share on common stock, payable July 15th to shareholders of record July 5th.

Canada Steamship Lines, Ltd.—Without a dissenting voice, shareholders at a meeting in Montreal on June 26th ratified an agreement made by the directors for the purchase of the Montreal Transportation Co.

The Montreal Transportation Co. has an authorized capitalization of $4,000,000, of which $3,000,000 is outstanding. Payment for the issued shares will be made in four instalments, $1,000,000 in cash immediately and the balance in notes, $1,000,000 falling due in December next, $500,000 in April, 1921, and $500,000 in July of next year. Canada Steamship Lines several months ago disposed of its ships in the West Indian trade on exceptionally advantageous terms, and it is from the proceeds of this sale that the $3,000,000 involved in the acquisition of the Montreal Transportation Co. will be paid. The Montreal Transportation Co. is one of the oldest-established shipping concerns in the Dominion, operating a large number of modern steel cargo steamers, tugs and barges, in addition to a large grain elevator at Kingston, Ont. Holders of this company's stock are asked to deposit their securities with the Prudential Trust Co., which will issue negotiable certificates to the extent of their holdings until the stock is fully paid for through the retirement of the notes already referred to in July of next year.

Quebec Public Service Corporation.—A dividend of 1¼ per cent. for the quarter, payable July 15th to holders of June 30th, has been declared. The Shawinigan Water and Power Co. owns 51 per cent., or a controlling interest, in the corporation. The corporation takes a considerable quanitity of power from the Shawinigan development, and in addition has a steam plant of its own in Quebec.

Imperial Oil, Ltd.—Reports from New York indicate that net earnings, before taxes, for 1919, were approximately $8,530,000, of which the Standard Oil Co., of New Jersey, the parent organization, was credited with $6,824,158, representing its ownership of 80 per cent. of the Imperial stock. In 1918 the parent company was credited with $5,554,844 after taxes.

Canadian Connecticut Cotton Mills, Ltd.—From September 10th, 1919, to May 10th, 1920, sales of the company approximated $4,300,000 and profits $900,000, compared with sales of $2,250,000 and profits of $450,000 for the corresponding period previously. A special dividend of ½ of 1 per cent. on the outstanding $3,000,000 8 per cent. participating preferred shares has been declared, payable August 2nd next to holders of record July 15th. Work on the extension of the company's mills at Sherbrooke, Que., for which the issue of preferred stock was made early this year, is progressing satisfactorily.

Dominion Steel Corporation.—At the adjournment of the meeting of the board of directors of the corporation, which was held in Montreal on June 29th, it was announced that the special general meeting of the shareholders of the enterprise will be held at Halifax, N.S., on July 17th next in the board of trade rooms of that city.

It was further stated that the directors, after a two days' study of the report of the special committee named to go comprehensively into the details of the terms upon which the [illegible] constituent companies are to be taken into the British Empire Steel consolidation, had reached a unanimous decision to recommend the proposals to the Steel Corporation shareholders. Special circulars will be sent out to holders of the company's stock.

Canadian Pacific Railway Co.—Net earnings for May were $3,197,91[illegible], an increase of $164,181, as compared with the same month in 1919. Gross receipts amounted to $16,459,986, a gain of $2,890,574, as compared with last year. The May gross was the best reported by the company since last December.

Working expenses, on the other hand, however, continued to mount in the period, higher wages and other operating expenses reducing the gross receipts by $2,726,392, or by nearly 29 per cent., and standing in ratio to the latter at 80.5 per cent. in the month, as compared with 77.6 per cent. in 1919.

For the five months of this year receipts grew $12,432,018. This good showing was offset, however, by a larger increase of $12,830,706 in working costs. The ratio of expenses to gross earnings during the period were 88.3 per cent., as against 85.4 per cent. in 1919.

Whalen Pulp and Paper Mills, Ltd.—Preliminary figures of operations for the year ended February 29th, 1920, indicate an improved position in the finances of the company. Total pulp production is placed at about 48,000 tons, a large part of which was marketed in the Orient. Gross profits for the year's operations amount to $1,050,000, compared with the $900,000 estimated at the time of public issue of the company's 6 per cent. first mortgage bonds last July. Deducting administration and general expenses of $173,000, the amount available for interest, taxes and depreciation was about $877,000, compared with $497,000 for the year ending February 28th, 1919. After deduction of bank interest, the amount available for bonds and debentures was about two and one-half times their interest charges. Surplus for the year totalled $323,000, adding to this the amount of $32,000 brought forward at the end of the previous fiscal year, balance to the credit of profit and loss stands at about $355,000. In the matter of working capital, net current assets have increased by $1,600,000. Construction work to the extent of about $700,000 was completed at the company's various plants.

Niagara Falls Power Co.—Total operating revenue for the year ended December 31st, 1919, amounted to $5,098,100, as compared with $5,016,366 in 1918, an increase of $81,734. Net income for the year totalled $3,445,286, against $3,240,875 in 1918, an increase of $204,410. After subtracting interest on funded debt and other miscellaneous deductions, the surplus stood at $2,084,055, an advance of $182,372 over the previous year.

The balance sheet shows a reduction in investments of $2,838,529, but real estate, power-houses, transmission systems, etc., increased in value by $5,239,193, now amounting to $53,470,089. Current assets increased $32,996 to $5,760,459, while current liabilities advanced $1,991,050 to $3,427,019, leaving a working capital of $2,333,410. Total assets of the company at the end of the year were $60,636,874, an increase of $2,433,659, while total liabilities were $57,695,459, an increase of $1,411,022. Reserves were increased $277,545 to $2,252,870.

Marconi Wireless Telegraph Co. of Canada.—At the annual meeting of the company in Montreal on June 21, the statement presented revealed profits for the year ended December 31, 1919, of $170,[illegible], against $138,648 in the previous year. After the usual deductions, net profits before government taxes were $102,1[illegible], compared with $95,563 in 1918. The total surplus, after the balance for the previous year was added, was $295,918, as compared with $293,787.

Total assets at the end of the year amounted to $3,817,621, as compared with $3,024,[illegible] at the end of 1918, reflecting the reduction in the par value and readjustment of the company's capitalization at the previous annual meeting, when shareholders voted that the par value of outstanding shares be reduced from $5 to $2.00, and that [illegible] additional shares at that value be issued. Current assets amounted to $562,925, as against [illegible] in the previous year. Total liabilities are in excess of current assets, being $881,708, as compared with $770,549 in 1918. In the year a reduction was made in the item "property, organization, patents, titles, etc.," this being reduced to $2,401,881 from $4,001,881 in the previous year. Balances receivable $102,457 is a new item among the assets. Investments have increased from $9,860 to $55,600. Accounts payable are lower, being $121,085, against $770,528, but this is due largely to a change in the manner of presenting the accounts in the statement. The current liabilities include a bank loan of [illegible] and bank overdraft of $55,600.

Winnipeg Electric Railway Co.—In a decision handed down by Judge Curran on June 25th, the action of the city of Winnipeg for a final injunction to restrain the company from collecting a six-cent fare on the street cars was dismissed, with costs for the defendant company. This verdict upholds the interim order given the company by the Public Utilities Commission, authorizing the six-cent fare until such time as the fare increase applicaton now before the commission is decided upon.

The decision given concerns an argument made in the Court of King's Bench last December by T. A. Hunt, K.C., on behalf of the company. When the Mathers Conciliation Board last fall granted wage increases to the street car employees which necessitated an annual expenditure of $400,000 the company applied to the Public Utilities Commission for permission to charge a six-cent cash fare. An interim order granting this increase was issued by the commission and put into effect.

On the day the company started collecting the new fare Mr. Hunt applied to Judge Galt for an injunction restraining the company from increasing the fare, and his application was granted. Late that same day the company reverted to the old fares, and Mr. Hunt pledged the city to reimburse the company for the money lost by not being able to charge six cents if his application for a final injunction was not sustained. This has not been sustained, and in respect to the company's counterclaim for several thousand dollars lost, Judge Curran states that this is reserved, and the city's application is dismissed without prejudice to this claim, and the company may bring it up as they see fit

Nova Scotia Steel and Coal Co.—Shareholders of the company, without a dissenting voice, have ratified the agreements entered into with the British Empire Steel Corporation by the directors. After discussion of the proposals, D. H. Macdougall, president, stated that, while the resources of the Nova Scotia Steel and Coal Co. were very valuable, a large sum of money would be required to develop these properties, and this could be more easily raised by merging with other large steel and shipbuilding companies in Canada. If the company decided to continue on its own, it would not be an easy matter, he had been advised by eminent financial experts, to obtain this money without a substantial security on the part of the shareholders. A large organization, like the British Empire Steel Corporation, on the other hand, could obtain this money with less difficulty, and [illegible] a way out of the present situation facing the company [illegible] the agreement before the meeting. Discussing the objections raised to the entry of some of the smaller shipbuilding companies, Mr. Macdougall said that he had made it his business to investigate the shipping situation, and, while he had only personal knowledge of the Halifax plant, he was convinced that all the companies involved were [illegible] and compared favorably, barring size, with [illegible] plants of the other side.

W. D. Ross, vice-president, who also spoke, told of the probable elimination of Canada Foundries Co. and the Port Arthur shipbuilding companies from the merger, and stated that there might be some further changes which would be beneficial to the shareholders of Nova Scotia Steel.

Edmonton, Dunvegan and British Columbia Railway.—Application to increase rates on the [illegible]

Brompton Pulp & Paper 6% Bonds

Due 1939

The Brompton Company has an unusually small bonded debt.

Assets are five times total bonds outstanding.

Earnings averaged seven times bond interest for past five years.

The value in the open market of securities junior to the issue is over $11,000,000. Total bonded debt is only $2,375,000.

We own and offer a limited amount of this issue which we recommend as a conservative investment.

Montreal Ottawa

and British Columbia and Central Canada Railways, both freight and passenger, has been made through the Board of Railway Commissioners for Canada. The railways are asking for a freight rate that runs from 36 cents per hundred pounds for a five mile haul to 61 cents for a 460-mile haul, and to make the passenger fare six cents a mile, or ten cents for a return trip. This means that north-bound passengers will have to pay $10 for a return journey of 100 miles, as compared with $5 for a similar journey over any other railway, or compared with a little less than $7 on the E., D and B.C. under present rates.

In making the application the companies stated that the new tariffs are based on a 50 per cent. increase over existing standard tariffs, and that the increased revenue is absolutely necessary if the railways are to be operated. Financial statements submitted show a total corporate loss at the end of 1919 for the E., D. and B.C. of $1,201,093, and $263,956 for the Central Canada Railway Co. T. F. Phippen, K.C. of Montreal, counsel, and J. D. McArthur, president of the lines, represented the railways.

Some interesting figures were submitted at this hearing by Mr. Phippen. Total Dominion grants were $384,000 for the Grande Prairie branch, of which $292,000 had been paid and some $91,000 was still to come. Recently an additional $45,000 had been paid, he added. In addition, there had been a grant of $175,000 for the bridge at Peace River. The province of Alberta also had voted $175,000 for a traffic deck on this bridge, of which $110,000 had been paid. The following bond issues had been made, and had yielded the following sums:—

An issue of $7,000,000 at 4 per cent., made early in 1912 and sold in July, 1912, yielding $6,405,854. The province of Alberta concurred in this sale, it was stated.

A bond issue of $2,400,000 worth of 4½ per cent. bonds was made on December 17th 1916, and sold the same day. This was for the Grande Prairie branch. The price was 76.42, and the issue yielded $1,849,361, of which $1,794,000 had been paid to the company, $58,769 remaining in the hands of the provincial treasurer. The road, he added, had been guaranteed for $20,000 a mile.

A third bond issue, this time for the Central Canada Railway, was made on May 1st, 1915. This was for $2,000,000 at 5 per cent. The sale price was 93, the province making the deal. Receipts from the sale yielded $1,867,570, of which $[illegible]7,000 still remained in the provincial treasury.

The board, in reserving its decision, asked Mr. Phippen to have a statement prepared showing how the interest charges on the bond issues had been paid year by year since 1913, and to have this forwarded to the board in a few days.

RECENT FIRES

Village of Hafford, Sask., Suffers $125,000 Loss—C.P.R. Sheds and Cars in Joliette Destroyed with Loss of $100,000

Cayuga, Ont.—June 28—Bakeshop belonging to M. H. Yarrett destroyed. Loss, $1,[illegible]00, covered by insurance.

Chatham, N.B.—The report in [illegible] of June 18th was an error. There was no fire in Chatham, N.B., on June [illegible].

Chilton, Ont.—June 1—Two [illegible], owned by Hamilton and W[illegible], destroyed. Insurance is small.

Cornwall, Ont.—June [illegible]—Barn containing bales and wool valued at $8,[illegible], owned by Mr. Bottle at Alexandria, destroyed. Insurance, $1,[illegible].

Fernie, B.C.—June 2[illegible]—Residence belonging to Perry Brothers destroyed. Estimated loss, $2,000.

Guelph, Ont.—June [illegible]—[illegible], owned by [illegible] and Boyd, [illegible]. Estimated loss, $1[illegible].

Hafford, Sask.—June 2[illegible]—Hafford Hotel, [illegible], general store and barber shop destroyed. Estimated loss, $125,000. Insurance of $8,000 on the hotel.

Hamilton, Ont.—June 17—Truck owned by the Toronto Cartage Co. destroyed. Caused by a leak in the gasoline tank.

Joliette, Que.—June 28—C.P.R. sheds and cars destroyed. Estimated loss, $100,000.

Kingston, Ont.—June 23—Arden Sawmill, owned by Albert Marsh, destroyed.

Limoilou, Que.—June 19—Lumber mill belonging to Jos. LaFrancois Lumber Co., Ltd., and home of Leon Parent destroyed.

Lindsay, Ont.—June 18—Sawmill belonging to Thos. Brisbane destroyed. Fire started by a spark from the firebox.

Macleod, Alta.—June 22—Power-house destroyed. Loss partly covered by insurance.

McAdam, N.B.—June 19—Two dwellings and a restaurant, owned by Allan Budd, damaged. Estimated loss, $3,500.

Moncton, N.B.—June 26—House and barn, owned by P. L. Davis, destroyed. Loss, $50,000.

New Westminster, B.C.—June 20—Lumber Products Co. destroyed. The fire is thought to have started in the boiler-house.

Peterboro, Ont.—June 17—Peterboro Canoe Co., Ltd., damaged. Loss, $6,500. Insurance amounts to $116,500.

Prince Albert, Sask.—June 15—Home of Samuel Soles damaged. Fire caused by coal oil stove. One fatality.

Quebec, Que.—June 18—Francois lumber yards destroyed. Estimated loss, $100,000, partly covered by insurance.

Riverport, N.S.—June 19—Business section of this town destroyed by fire. Loss, $300,000.

Sarnia, Ont.—June 15—Sarnia General Hospital damaged. Fire caused by lightning. Residence owned by William Farr damaged. Fire caused by lightning. Estimated loss, $3,000.

Stratford, Ont.—June 23—Men's furnishing store, owned by Wally Hern, damaged. Fire was caused by a hot iron.

Toronto, Ont.—June 28—Shop belonging to W. Bruno damaged. Loss, $1,400. Building owned by W. J. Walker damaged. Loss, $1,500.

Streetsville, Ont.—June 22—Hardware store belonging to Robt. Greig destroyed.

Springhill,. N.S.—June 21—Business block, owned by Mrs. Sprague, destroyed. Estimated loss to the buildings, $4,000.

Vancouver, B.C.—June 20—Storage warehouse of the Wallace Shipyards and warehouses of the Brackman-Ker Milling Co. were destroyed. Estimated loss, $10,000.

Winnipeg, Man.—June 15—Warehouses of the Carnefac Stock Food Co., R. A. List Machinery Co. and the building belonging to the D. E. Adams Coal Co. were destroyed. Total loss, $20,000.

Woodstock, Ont.—June 25—Drysdale factory, now occupied by Fisher and Hammond as a woollen mill, damaged. Estimated loss, $5,000. Insurance, $2,500.

ADDITIONAL INFORMATION CONCERNING FIRES

St. Quentin, N.B.—The total loss in the fire on May 30th is estimated at $500,000. Property in the town was insured to the amount of $151,050 in St. John offices and for an additional amount in Quebec city offices. The insurance in St. John agencies is distributed as follows: Palatine, $11,000; Canadian Accident Insurance Co. (fire), $6,500; Hartford, $1[illegible],000; London and Lancashire Fire Insurance Co., Ltd., $7,500; North British and Mercantile Insurance Co., $1,000; Western, $2,500; Newark, $1,000; Commercial Union, $24,000; St. Lawrence, $4,100; Queen, $8,000; British Crown, $12,000; British Empire, $10,000; Eagle, $9,000; Lochart and Ritchie, $[illegible]0,000; Yorkshire, $4,1[illegible]; Hudson Bay, $1,000; Royal, $1,000.

Toronto, Ont.—Total fire losses in Toronto for the month of May are estimated at $128,439. The loss of contents of buildings included in this amount is placed at $105,010.

Walkerton, Ont.—May 2[illegible]—Stable belonging to R. Truax, Son and Co. destroyed. The fire was caused from exposure. Total loss $[illegible],192, with insurance of $49,000.

Parliamentary Legislation Was Not Remarkable

Session Just Completed Will Be Notable for Political Developments, However—Meighen Succeeds Borden As Premier—Franchise Bill Was Most Contentious Measure—Review of Legislation Affecting Industry and Finance

(Special to *The Monetary Times*.)

Ottawa, July 8th, 1920

THE session of parliament which has just drawn to a close may become memorable for its political developments, but it will not be noted for startling and outstanding legislation. Due doubtless to the absence of Sir Robert Borden, the natural hesitancy of his colleagues to launch out on new lines without a leader and the general air of political uncertainty which pervaded the capital, the government introduced no new, striking or original legislation. The political developments are important, however, as the Unionist party has been reorganized, and it has just been announced that the Hon. Arthur Meighen, M.P., for Portage la Prairie and minister of the interior in the Unionist cabinet, is to succeed Sir Robert Borden as premier.

Budget Was Biggest Change

The one exception might be regarded as the budget. Sir Henry Drayton struck out on new paths for Canada in his endeavor to tap fresh sources of revenue to meet the tremendous Canadian expenditures. For the first time a Dominion government has proceeded to impose direct taxation to secure revenue (aside from the income tax of the past couple of years). To review here the whole budget and the innumerable amendments which were later adopted, would take up too much space. The broad principles of the budget of this year were: (1) The imposition of direct taxes on the purchase of certain goods over a fixed value, called luxury taxes. (2) The imposition of a sales tax on the turnover of manufacturers and wholesalers. (3) The abolition of the 7½ per Customs Duty imposed as a war tax early in the struggle. (4) The renewal with modifications of the Business Profits Tax. (5) The tightening up of the Income Tax and the placing upon the [illegible] the duty of making the return, as to amount and [illegible].

However, while the session was [illegible] striking legislation, there were [illegible] many useful measures passed.

Fight Over Franchise Bill

From the standpoint of the [illegible] bill of the session was the new Franchise Act. [illegible] fought over this bill for months. It was the first bill introduced and almost the last to be passed. When the commoners ran out of business [illegible] Act. While it was of vital [illegible] the ordinary citizen took little interest in [illegible] the bill provides for suffrage to [illegible] 21, a British subject, who [illegible] riding and a year in Canada. [illegible] tention were first, who [illegible] should revise and prepare the [illegible]

Inspection of Companies

From the standpoint of the business world there were several measures passed which attracted at the time little attention. One was a measure introduced by Sir Henry Drayton, which places loan and trust companies on the same basis as insurance companies as far as inspection is concerned. Under the old law an inquiry could be directed on order of the Treasury Board, but it really amounted to no inspection. Now they will be subject to regular inspection the same as insurance companies.

Despite a certain amount of opposition from the dairy interests the act permitting the importation into and manufacture in Canada of oleomargarine was extended until March 1, 1922. At the same time the penalties for adulteration were made stricter. Another food act was that in regard to maple sugar. A bill was passed making it illegal to sell an article resembling or imitating maple sugar or maple syrup as the genuine article.

Appeals to Supreme Court

Another act which passed without any political [illegible] of interest to the legal and business fraternity [illegible] amending the Supreme Court Act. The purpose of the amendment was to bring about a simplification and to secure uniformity in the jurisdiction of the Supreme Court and also to prevent appeals being brought to it in matters of trifling importance on the plea that title to land or future rights are involved. The bill provides that appeals as of right to the Supreme Court should be restricted to cases in which the amount or value of the matter in controversy in the appeal, whatever the nature, exceeds the sum of [illegible] exclusive of costs, and in all other cases an appeal shall be ordinarily only by special leave of the [illegible] resort in the province.

Civil Service Measures

There were a number of [illegible]

abolition of patronage and proposed its own employees should be placed directly under [illegible]. However, the commissioners refused to accept this amendment, although consenting to the reduction of holidays. There is gloom in Ottawa.

Railway Questions Under Discussion

As usual railway matters were much to the fore. There has not been a session for years when transportation in some form or other was not one of the big issues of debate. It was found necessary for legal reasons to introduce a bill reaffirming the Grand Trunk agreement for the purchase of that road. This gave an opportunity to re-open the whole question. Second the annual railway statement, including the first statement of the operations of the Canadian National Railway as a public owned system was brought down by Hon. J. D. Reid. Despite a far from favorable statement the minister expressed confidence as to the future of the line. "If we imagine Canada" he declared in closing his statement to the house, "to have reached the maximum of development then we shall have planned foolishly, but I for one have the faith to feel and the vision to prophesy that this great transportation system is not being prepared to perform this splendid transportation in vain."

The Merchant Marine

There is now another side of our transportation system, the merchant marine, Hon. C. C. Ballantyne, who has been largely responsible for the policy of a construction of a public-owned mercantile marine, is naturally particularly proud of its success and is even touchy of criticism. When the vessels now under construction are completed Canada will have a fleet of no less than 63 vessels with a net tonnage of 380,000 tons to operate in conjunction with the National Railway system. To finish the vessels now under contract Mr. Ballantyne asked for $20,000,000.

Mr. Ballantyne said that the routes on which the Canadian Government Merchant marine have placed their vesesls now in commission are: Canada to Liverpool; Canada to Glasgow; Canada to London; Canada to Brazil and Buenos Aires, calling at Pernambuco, Santos and Rio; Canada direct to Havana, three sailings through the present month; Canada to Barbadoes, Trinidad and Demerara; Canada to Havana; Cuba and Kingston; Vancouver to New Zealand and Australia.

Aid to Shipbuilding

One of the problems which has given the government much worry all session has been the future of the shipbuilding industry. During the war a big industry was built up; it was sustained largely by government orders. However, it could not continue indefinitely on such contracts and the government was faced, without giving some of assistance, with a prospect of seeing this industry completely collapse. Bonuses were discussed, but it was found the policy was so unpopular it was abandoned. The shipyards claimed they could get orders and compete with the rest of the world, if only some system of international credit could be advised. Finally an unique plan was devised. Whether a wise one remains to be seen; it was much criticized by the opposition who strenuously opposed it. The plan can be best explained in the words of Sir Henry Drayton. He said in committee of the house when introducing the resolution: "The proposition which is now before the committee, and embodied in this resolution, is that twenty-five per cent in cash must be paid by the purchaser, that the shipbuilder has to look after twenty-five per cent and that the remaining twenty-five per cent has to be looked after by an issue of notes made by the purchaser and endorsed by the government but that the government's endorsation shall be secured by a first mortgage on the boat." The result, [illegible] it, was that the government takes the risk, [illegible] takes the [illegible] in Canadian [illegible] at [illegible] [illegible]. As [illegible] risk [illegible] [illegible] of [illegible] in [illegible] $17,000,000 has been [illegible] about 13,000 [illegible].

Increase in Pensions

During the session a committee on pensions and Soldiers' Re-establishment was appointed and carried on a most thorough inquiry. It was presided over by Mr. Hume Cronyn, of London, who has come to be recognized as one of the most promising private members in the house. This committee brought in a report in the closing days of the session, which was adopted without amendment. The committee decided against the principle of direct gratuities, but recommended a fifty per cent. increase in the pensions as a bonus. It also recommended the adoption of a system of state insurance for all returned men. This is for straight life insurance only and is to be granted without medical examination. These were the chief recommendations, although there were many minor important changes.

Wheat and Commerce Boards

Two government boards came under fire during the session. There was much difference of opinion as to the wisdom of continuing the Canada Wheat Board. After many conferences and caucuses the government brought in a bill giving power to recreate the board if it was felt conditions should arise to make it advisable. As for the Commerce Board it blew up with all the officers and crew and the wreckage somewhat disturbed the calm of the closing hours of the session.

These are the main features of what proved for the first three months a most stupid session and for the last three weeks a most interesting one. There were many other minor measures, but mostly amendments of a slight character to existing acts. The session will not go down in history as one marked by great progressive legislation. It will be chiefly remembered for seeing at its close the retirement of Sir Robert Borden and the voting in the dying days of an increased sessional indemnity.

ONTARIO WORKMEN'S COMPENSATION

According to figures reported by the Workmen's Compensation Board of Ontario, there was a large increase in the number of accidents for the first six months of 1920 over the same period last year. The number of accidents for the last six months was 25,940, as against 19,811 for the first six months of 1919.

The compensation and medical aid awarded during the first half of 1920 totalled $2,451,912.82. In the same period in 1919 the total was 1,846,509.11. Over 500 checks a day are now being issued by the board. June had the greatest number of accidents, 183 per day being reported. Thirty-six were fatal. The amendments to the act came into force on July 1, and anybody injured after that date is getting the increased compensation.

H. V. GREENE CO. OF CANADA

The H. V. Greene Co., investment bankers, with offices in Boston and other American cities, has secured a Canadian charter. W. F. O'Connor, formerly a member of the Board of Commerce, is to be counsel for the company in Canada and is also a director of the newly formed Bankers' Union for Foreign Commerce and Finance, Inc. Referring to their plans for Canada, H. V. Greene, president, said to [illegible] on June 30:—

"It is our plan to operate the H. V. Greene Co. of Canada as agents for the Bankers' Union for Foreign Commerce and Finance in the sale of the securities of the latter company. The Bankers' Union is founded for the purpose of conducting an international banking business, and to furnish the necessary financial facilities for the exchange of products between Europe and this country, for we realize that unless the productive forces of Europe are set in motion, it will be impossible for normal times to return."

Prospects for More Than Average Canadian Crop

Rainfall Has Been Good But Not Too Heavy—Quebec and Alberta Only Provinces to Experience Dry Weather—Cutworm and Grasshopper Outbreaks in the West Well Under Control—Despite Many Setbacks, Grain Prospects Favourable

CROP conditions are well above the average, judging from the reports wired to the Dominion Bureau of Statistics at the end of June. Rainfall has been good but not too heavy. Some parts of Quebec and Alberta have suffered from dry weather, however, but the damage was not large. Some setbacks have been encountered in various parts of the country, but these are being overcome. Generally speaking, the prospects are very favorable. The following reports summarize the conditions:—

Atlantic Provinces: Prince Edward Island—Season favourable for all crops. Cereals growing rapidly and showing good colour. Oats, corn and vegetables have germinated quickly. Strong growth of clover. Grasses not up to first estimates owing to dry May. Timothy heading out. Prospects for hay and pasture average. Large and small fruits have set well and promise a full crop. Nova Scotia—Frosts on the 20th and 24th, combined with lack of precipitation have been detrimental to good germination and growth. Wheat, oats and barley fair; potatoes and roots fair; small fruit below average; apples good; turnip seed good; hay slightly below average, with fair amount of clover in evidence. New Brunswick (Fredericton)—Following extremely dry May, June has given no rain to penetrate ground, but frequent light showers totalling 1½ inches for month, have germinated seed and helped cultivated crops. Grains, potatoes and corn looking well; hay crop not half average; pastures fair. All seeding except some turnips and buckwheat completed.

Quebec: Cap Rouge—Garden peas, gooseberries, currants excellent; field peas, oats, cherries, ornamental plants very good. Corn, wheat, potatoes, mangolds, hay, pasture, plums, strawberries, raspberries and squash good. Swedes, carrots, barley, apples, string beans, tomatoes and onions medium. Drought is main cause of trouble. Lennoxville—Excessively dry weather throughout the month of June has been detrimental to hay crop and late-sown grains. There is not the usual amount of clover on account of the [illegible] weather of the past winter and the high price of [illegible] this spring.

Ontario: From the Ontario Department of Agriculture—June rains greatly helped all field crops. Fall wheat [illegible] good yield; straw short. Spring grains fair. [illegible] and clover light. Alfalfa first cut good. Corn [illegible]. Sugar beets prospering, but mangolds [illegible]. Tomatoes and other canning crops promising. Strawberries good yield. Other fruit prospects excellent. Live stock thrifty.

Grains in Fine Shape

Manitoba: From the Manitoba Department of Agriculture—Crop outlook promising. Grains [illegible] rapidly. June showery and moderately [illegible]. Grasshoppers threaten many districts, but have been [illegible] and have been kept under control. [illegible] Animals thriving. Conditions [illegible]. Brandon—Rainfall has been [illegible] during June. Some grasshoppers [illegible] ures have prevented [illegible] are fairly good, but more rain [illegible] barley are late but vigorous. [illegible] Timely showers have improved [illegible] well; other crops average [illegible]. Potatoes and garden crops average. [illegible] worms prevalent. No grasshopper [illegible] and no injury from late frost.

Saskatchewan: From the Saskatchewan [illegible] Agriculture—Wheat is now in [illegible] of Saskatchewan. Generally [illegible] moisture in the ground, and [illegible] on [illegible] with good [illegible] and comparatively little damage has been sustained from this pest. Excellent reports received from Swift Current district. Wheat [illegible] at [illegible]. Pastures and hay promising [illegible] crop. Coarse grains making good growth. Cattle improving rapidly. Indian Head—Crop conditions generally slightly above average, although grain crops hardly so far advanced as usual. Hay crops are 10 to 20 per cent. above average. Hoed crops [illegible] per cent. above average, except corn, which requires more heat. Some damage reported from grasshoppers and cutworms, but all outbreaks under control. Scott—Rainfall recorded at Scott for June amounts to 2½ inches. Early sown wheat 18 in. high. Late sown crop short. Weeds unusually [illegible] particularly in stubble fields. Hay and pasture crops have made rapid growth, consequently livestock have [illegible] unusually well.

Alberta: Lacombe—During June [illegible] here. Weather has been favourable for crops with no damage from frost, cutworms or grasshoppers. Grain crops promising. Hay short. Rain needed from Olds south. [illegible] western part of province also dry. Fall rye good [illegible] over. Lethbridge—Weather conditions for crop development during June in Southern Alberta have only been fair. Some soil drifting took place west and north of Lethbridge. Showers that have occurred have been heavier in some localities than others, resulting in great irregularities in conditions. General rains are needed. Cutworms have done damage in some localities. Grasshoppers increasing, but [illegible] apparently well in hand.

Fruit Prospects Good

British Columbia: [illegible]—Although the season has been very backward, the crops are in good condition and growing rapidly. The hay crop is below the average, but [illegible] are only fair. Spring [illegible]

Canadian National Railways Report

[illegible]

winds, also in the prairie district, with but slight result and damage.

Generally speaking, the condition of the growing crops along the Canadian National may be set down as decidedly good. The moisture is said to be ample throughout the country served, with but very few exceptions, and the growing conditions excellent. The agents are evidently of the opinion that with the same conditions continuing the west will this season harvest a bountiful crop, not only in wheat, but in the coarser grains as well.

Alberta Agriculture Report

The fifth semi-monthly crop and live stock report of the Alberta Department of Agriculture states on a brief review of the season's progress, fine general moisture conditions over the province at the opening of spring; a later seeding than usual chiefly due to plentiful moisture; a fairly satisfactory conclusion of grain seeding owing to the supplementing of horse stock with handy tractors. The occurrence of limiting factors in Southern Alberta consisting of the partial blowing of 60,000 acres north of Lethbridge, some damage by cutworms in the same area, some threatened damage by grasshoppers south of Lethbridge and slight droughts on the Calgary Saskatoon line.

In the Track of the Windstorm, June 8th, 1920.

Illustrating Soil Drifting Near Lethbridge, Alta.

Moisture conditions continue to be wholly favourable, the crop is well rooted, the wheat and oats having been getting well established for heavy fruitage. Following the establishment of the crop warm weather has now set in and the growth is extremely rapid. Some of the spring wheat fields in Central and Southern Alberta have reached a height of 20 inches. Oats are in all stages of growth from grain crop covering the ground heavily to greenfeed just standing through the soil. At the beginning of the season conditions were reported as the best for five years and subject to very slight discount the progress of the crop carries on the same promise.

The Peace River country, which appeared to be unduly slow early in the season is now favored with warm weather and crops are coming along well. Live stock every place is doing well.

BURGLARY UNDERWRITERS' ASSOCIATION

The annual meeting of the Burglary Underwriters' Association of Canada was held on June 18, and the following officers for the ensuing year were elected: President, A. E. Kirkpatrick; vice-presidents, R. Welch, Montreal, and W. H. Buscombe, Toronto; treasurer, John Good; Montreal secretary, T. D. Higgins; Toronto secretary, H. G. Humphreys.

The association was organized last fall and a tariff has now been passed. There are a few companies writing burglary insurance which are not members, but they write in accordance with the tariff. Losses during the present year are reported to be rather heavy, and the volume of business is greatly increased.

New Head Office Building

Pacific Coast Fire Insurance Co., Vancouver, B.C.

CANADIAN SAVINGS

The approximate amount of savings deposits in Canadian banks, loan associations, credit unions, etc., as compiled by E. D. Woodworth, secretary of the savings bank section of the American Bankers' Association, from unofficial sources, is as follows:—

Post Office savings banks	$43,000,000
Government savings banks	13,600,000
Quebec savings banks	50,000,000
Loan and savings companies	65,000,000
Provincial rural credit associations	1,700,000
Trust deposits with trust companies	30,000,000
Chartered banks	1,300,000,000
	$1,503,300,000

UNIFORMITY IN LIFE UNDERWRITING

Greater uniformity in methods of underwriting, particularly of sub-standard risks, was discussed at a meeting of medical directors and actuaries, held in Toronto on June 17th and 18th. Among the companies represented were the Canada, Sun, North American, Great West, Mutual of Canada, Excelsior, Imperial and Dominion. The meeting was organized by the Canadian Life Officers' Association. A similar meeting was held last year, and during the year a committee of actuaries and medical directors have met from time to time to consider various classes of sub-standard risks. The committee, the chairman of which was Dr. Scadding, of the Canada Life, presented reports on the following: Amputation cases, history of asthma, history of goitre, history of pleurisy, history of articular rheumatism and history of heart impairments. The committee also dealt with the subject of build, and recommended the ratings adopted by the Actuaries' Club of Toronto.

A NEW NAME AND AN OLD PLATFORM

WHEN the Unionist members of parliament held their caucus on July 1, they decided to adopt the name "National Liberal and Conservative" for their party. But the platform announced is not new; it is rather a summary of measures which have already been placed upon the statute books. It is an outgrowth of the platform of the old Conservative party, and this may account for the lack of enthusiasm among Liberal Unionists over the reorganization.

First of all, the new platform is distinctly imperialistic in tone, although "the maintenance of the autonomy of Canada and its existing rights and powers of self-government" is one of the clauses. Another clause aims at the Canadianizing of alien immigrants and the fostering of a national rather than a sectional spirit. The tariff is dealt with at length, and although a thorough revision is mentioned it is obvious that any drastic reductions are not anticipated. The rapid growth of the national debt and fixed charges is emphasized to show the necessity for tariff revenue, as well as for excise duties and direct taxation. Mention is made of "the fixing of a proper capitalization for the national railway system," which may mean that the government does not expect to be able to so adjust railway rates as to yield a return on all the present liabilities.

Good relations between employer and employee are to be encouraged, and the labour provisions of the peace treaty carried out, "regard being had, as contemplated by the treaty, to the time and character of similar legislation enacted by other nations." Attention is to be given to a national [illegible] system and air force, and the present policy of soldiers' civil re-establishment is to be continued. Immigration and foreign trade are to be encouraged, and railroad and inland water transportation improved. Another subject for consideration is "the transfer under fair terms and conditions of the remainder of the public domain held by the Dominion to any province of Canada in which such domain is situated, subject to such reserves as may be deemed essential in the public interest."

THE MAMMOTH IN THE STEEL INDUSTRY

JUDGING by the criticisms being directed against the British Empire Steel Corporation, it is feared that the public will suffer from the inclusion of water in the new corporation's liabilities. The element of water, however, is not being introduced in the new financing, but was included when the Dominion Steel, the Nova Scotia Steel and other constituent companies were being organized many years ago. The promoters of the merger have given evidence which shows that the assets exceed the liabilities. This is the result of the appreciation in the value of the assets during the past few years. The dollar has depreciated on a balance sheet as well as elsewhere, and a $100 share which may at one time have represented only $50 of assets may now represent assets worth $100. The dividends on an investment of $100 have not now as great a purchasing power as had the dividends on the investment of $50 in 1911.

But assuming that the price of steel can be affected by the capitalization of the new corporation, and supposing that a certain amount of water is being introduced, the public can scarcely be expected to be able to calculate what would be a fair price for steel, based upon production costs and a return on the actual investment. To a controlling body with a staff competent to figure such a price, on the other hand, watered stock should add very little to the difficulty of the calculation. Capitalization is the concern of the investor. What is to be considered when it comes to price control is the value of the actual assets invested.

BOND VS. STOCK INVESTMENTS

THE [illegible] for investments in bonds [illegible] considerably different from that [illegible] investments in stocks, because of the [illegible] which has been [illegible] al conditions. The [illegible] of bonds [illegible] speaking, be paid regardless of whether profits are earned. Dividends on stocks, on the other hand, depend directly upon the earning of profits, and profits are high when commodity prices are rising, but are low as prices fall and business is dull. The latter condition is now anticipated and as prices fall the purchasing power of the fixed return from bonds increases, while it is quite likely that dividends will be cut down substantially. This is the reverse of the movement which has taken place during the last four years.

Discussing this point in "Investment Suggestions" for June, Burdick Bros., of Vancouver, say:

"The bond market is in a totally different position from the stock market. If the present situation is relieved by a voluntary reduction of loans, there is no doubt but they will act quite differently. For instance, a real drop in commodity prices while a good point for bonds, is a derogatory point for stocks. It depresses stocks by reducing profits and earning power, and at the same time it tends to increase bond prices by increasing the purchasing power of fixed incomes. Before the war a family could maintain a luxurious standard of living on the income from $150,000 par value of 4 per cent. bonds. To-day the same standard of living would require at least $200,000 5 per cent. bonds.

"Recent shading of prices has been unmistakably marked by a rally in bonds, and if the deflation between the present time and December 1st goes far enough to enable the banks to finance the crop movement without a general money stringency there will be little probability of seeing as low bond prices in 1921 as in 1920."

MANITOBA'S ELECTION

ANOTHER provincial government has just suffered a setback at the polls. The war-time governments of Ontario and of Prince Edward Island have already been defeated, and the Liberal administration in Manitoba, at the election held last week, secured only 21 seats out of a total of 55. It is still the strongest party in the house, however, as the remaining seats are divided among the other parties as follows: Labor, 11; farmers and independents, 11; Conservatives, 10. The elections in the remaining two ridings, including that of The Pas, in which Hon. Edward Brown, provincial treasurer, is the Liberal candidate for re-election, were deferred. As in Ontario, this is a pronounced step in the direction of group representation rather than the old two-party system, and the Liberals must form a coalition with one of the other parties if they are to have even a working majority. Out of 47 seats in the former Manitoba Legislature, the Liberals had 40, labor 1, the Conservatives 2, and one member was classed as an independent.

The results in the city of Winnipeg are especially interesting because of the fact that proportional representation was the system of voting adopted for the city at this election. Out of 10 seats in Winnipeg, 4 were secured by the government, 4 by labor and 2 by the Conservatives. Four cities of the Dominion, viz., Vancouver, Victoria, Calgary and Winnipeg already use the method for their municipal elections. The movement for proportional representation was started in 1885. At first it did not make much progress, but since 1918 it has been adopted in several countries, including Italy, France, Germany, Greece, Sweden, Armenia, as well as in the British universities. It has been adopted in three cities of the United States, the largest of which was Kalamazoo, Mich., where it formed only a part of the city government.

The United States Brotherhood of Locomotive Engineers has accumulated such a large amount of money that it is organizing a bank for greater convenience in handling it.

To accept 4½ per cent. bonds of the province of Ontario in return for radial lines purchased at an interest charge of 5½ per cent. would be poor business on the part of the Dominion government. But most agree that the sale would be a good one.

"There is a good deal of common sense in everyone no matter to what political party he belongs," said Hon. Peter Smith, treasurer of Ontario, in addressing the Life Underwriters' Association of Toronto on June 17. This confirms a suspicion which has been harboured by some citizens for a long time past.

The production of the Dominion Steel Company, per man, during the past four years has been as follows: 1916, 590 tons; 1917, 550 tons; 1918, 500 tons; 1919, 460 tons. If individual production is going to be less, how can the individual have more to consume.

Street railwaymen of London, Ont., will be paid in proportion to the financial results of operation, with a guaranteed minimum. This plan has been in operation for just about three weeks, but already an improved service has resulted, as the employees are anxious to do a maximum business at the lowest cost. Profit sharing is a partial solution of the industrial problem, and offers great opportunities.

The early days of fire insurance are recalled in a bicentennary volume just issued by the London Assurance Corporation, on the completion of two hundred years of business, from 1720 to 1920. Fire fighting was at that time undertaken by the insurance companies, not by the municipal corporations. Early forms of insurance contracts and other methods of doing business are illustrated, and the book is also made interesting by scenes of old London.

A warning to the effect that capitalism, if it tries to impose monopoly, is committing suicide, is given by Hartley Withers in a new book entitled "The Case for Capitalism." Frightened by the threats directed against it, capital has sometimes been stampeded into abusing its power; such abuse of power is not necessary, for the accumulation and investment of capital is a service which must always command a reward.

Arguments presented in favor of an increase in rates for the Edmonton, Dunvegan and British Columbia Railway, are equally applicable to the other railways in Canada, according to Frank Ford, K.C., who appeared before the Railway Board in Edmonton in opposition to the railway. The Edmonton-Dunvegan is a good line for a test case, from the railroads' point of view, but the other companies, and especially the Canadian National, could also present some effective arguments.

"Political alliance with labor is all right, just so long as labor does not attempt to impose its views on the farmers of Canada," says "Farm and Ranch Review," of Calgary, in its issue of June 5. "When that time comes, their ways must part radically. They dwell in opposite camps and have few interests in common." The farmer-labor government in Ontario are able to carry on only by a policy of mutual compromise. Meanwhile the farmers are looking forward to the time when they as a party will be powerful enough to govern alone.

Almost every day finds the price of some raw material moving downward. A forecast of low wool prices is contained in a statement issued a few days ago by the Canadian Co-operative Wool Growers, Ltd., reading in part as follows: "Everything at the present time points to a lower level of prices as compared with those obtained on the 1919 clip. Just where that new level will be, however, is a point upon which there is much speculation and very little agreement. No one really knows what to expect in the market for the next two or three months, and consequently very little is being done except 'playing safe' in the matter of consignment on a sufficiently low basis of advance, or, in the few instances where buying has occurred, giving a price in keeping with the feeling of the trade."

Australia and New Zealand

Every effort is being put forth to foster and increase trade between Canada and Australasia. The correspondents of this Bank include the principal banks of both Australia and New Zealand, and on the Pacific coast of both Canada and the United States it has branches in all the principal sea-ports. With many years' experience gained in transacting a foreign business, its services are at the disposal of Canadian exporters and importers.

PERSONAL NOTES

Charles MacNab, who has for the past forty-eight years been clerk of Carleton County, Ont., has retired.

Sir Thomas White has been elected to the directorate of the Brazilian Traction, Light and Power Company, to fill the vacancy caused by the death of Z. A. Lash, K.C.

N. R. Poussette has been appointed to the office of commissioner of commerce in the Department of Trade, Ottawa, to fill the vacancy caused by the death of R. Griggs.

Major John A. Rudland, a former chief of police of Halifax, N.S., was appointed fire warden of the province at a meeting of the provincial commission for the prevention of fires in Nova Scotia.

Hon. Arthur Meighen, K.C., who has just been selected to succeed Sir. Robert Borden as premier of Canada, was born in Anderson, Perth County, Ont., in 1874. He was educated at St. Mary's collegiate institute and graduated from the University of Toronto in 1896. After teaching school for two years he went to Winnipeg in 1898 and to Portage la Prairie in 1902. He was called to the Manitoba bar in 1903, and became a partner in Meighen and McPherson, 1904, in Meighen and Hogg, 1907, and in Cooper and Meighen, 1909-13. In 1908 he was elected member of the federal house for Portage la Prairie, became solicitor general in 1913, and now holds the portfolio of minister of the interior. He has always been a pronounced Conservative, and is a keen debater and party leader.

K. Hilooka, president of the Japanese government bank at Osaka, Japan, in company with M. Matsui, a prominent Japanese industrial man are making a tour of Canadian cities to study business methods, and will proceed to the United Kingdom afterward.

Col. S. R. Heakes, mining engineer, of London, England, has just completed a survey of mining prospects in western Canada and the United States. It is his opinion that a great deal of British capital will be invested in Canadian mining developments in the near future.

Harry M. Agnew, manager of Crane, Limited, Winnipeg, Man., was elected president of the Winnipeg Board of Trade at the first meeting of the 1920-21 council, held on June 28. Geo. Munroe, western superintendent of the Merchants Bank of Canada, was elected treasurer, and W. E. Milner was re-appointed managing secretary of the board.

E. H. Talbot, special representative of the "New York Commercial," New York, which is the oldest commercial paper on the North American continent, will tour Canada from Quebec to the Pacific. It is Mr. Talbot's intention to establish a Canadian department of the paper which will be entirely devoted to industrial and commercial news of the Dominion.

George W. Yates, who since the formation of the Union government has been private secretary to Sir Robert Borden, has been appointed assistant deputy minister of railways. Mr. Yates was previously private secretary to Hon. Frank Cochrane, at the time minister of railways and canals. When the Union government was formed, however, Mr. Yates, while still technically remaining an officer of the railway department, temporarily took over the duties of private secretary to the prime minister.

Ronald R. Martin has been appointed branch manager for Canada of the Atlas Assurance Company. Prior to joining the Atlas, Mr. Martin was with the Norwich Union Fire Insurance Society. He left the latter company to become inspector for Ontario for the Atlas Assurance Company, and after a few years service in that capacity, he was called to head office in Montreal as assistant to the former branch manager, the late Matthew C. Hinshaw, whom he now succeeds.

Geo. H. Ross has been appointed treasurer of the city of Toronto, upon the unanimous decision of the city council on July 5th. Mr. Ross has had considerable experience as a financier, having served in various capacities with the Bank of Ottawa from the beginning of his business career until a year or so ago, when he joined J. G. Beaty and Company, stock brokers, Toronto. At the time he left the Bank of Ottawa (now the Bank of Nova Scotia), he was manager of the King Edward Hotel branch, Toronto. He will retire from J. G. Beaty and Company upon taking up his new duties as city treasurer.

A. E. Phipps, who was recently appointed assistant general manager of the Imperial Bank of Canada, has a successful banking record extending over a period of twenty-nine years. Mr. Phipps joined the Imperial Bank as a junior clerk at Brandon, Man., in 1891, and served in various capacities up to the position of western superintendent. Upon the retirement of Mr. Edward Hay, as general manager, and the appointment of Mr. William Moffat as his successor, Mr. Phipps was transferred to the head office as superintendent of branches. During its financial year ended April 30th last, the bank made good progress, deposits increasing by 17 per cent., and current loans in Canada by 25 per cent. Its expansion is also indicated by the fact that 76 new branches have been opened since November 11, 1918.

OBITUARIES

James M. Young, a director of the Copp-Clark Publishing Company, Toronto, died very suddenly at his home, [illegible] Sorauren Avenue, this week, in his 58th year.

Richard L. Gaunt, one of Canada's leaders in the woollen trade, died suddenly in Montreal, at his home, at 4263 Dorchester Street, on July 4th. He was born near Leeds, Yorkshire, England, a little over 67 years ago, and early went into the woollen industry at Huddersfield, one of the great woollen centres of England. He came to Canada 44 years ago to take charge of the business of Mark Fisher Sons and Company, assuming the managership of this business on arrival, and later becoming partner.

JUNE FIRE LOSSES LIGHTER

Month's Total is $1,424,319, and Total for Half-Year is Less Than in 1919—Fatalities are Rather Heavy

PROPERTY destroyed by fire in Canada during the month of June totalled $1,424,319, according to *The Monetary Times'* estimate. This is the smallest loss since last October, and is a distinct improvement over the loss for June, 1919, which was $3,337,530, and the figure of $3,080,982 for June, 1918. The loss for the month is summarized as follows:—

Fires exceeding $10,000	$ 866,000
Small fires reported	58,319
Estimate of unreported fires	500,000
	$1,424,319

The Monetary Times' record of the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February . .	2,009,955	2,243,762	1,091,831	1,895,575
March . . .	2,050,650	1,682,286	2,154,095	1,793,200
April . .	1,317,714	3,240,187	1,080,070	3,229,500
May . .	1,163,110	3,570,014	1,785,130	2,001,819
June	1,184,627	3,080,982	3,337,530	1,424,319
July	1,101,734	3,369,684	1,118,377	. . . .
August	1,230,183	3,110,445	1,374,495	. . . .
September	1,301,700	917,286	1,940,272	. .
October . . .	704,605	5,119,145	1,023,288	. . . .
November . .	959,019	1,059,580	2,339,870	. . . . .
December . . .	5,141,100	1,733,917	2,047,496	. . . . . .
Totals . . .	$20,086,085	$31,815,841	$23,207,647	$12,982,263

The total for the first six months of 1920 is $12,982,263, compared with $13,363,949 for the first six months of 1919.

List of Large Fires

The following is a list of fires in which the loss was $10,000 or over:—

Toronto, Ont., June [illegible], Hortop milling plant, $21,000.
Erindale, Ont., June 12, Price Bros., $50,000.
Montmagny, Que., June 10, Price Bros.' sawmill, $75,000.
Ottawa, Ont., June 1[illegible], Moyneur, Ltd., $150,000.
Sault Ste. Marie, Ont., Bishop Lumber Co., $200,000.
Ayr, Ont., June 16, John Watson Co., $200,000.
Montreal, Que., June 20, Black Diamond Realty Co., Ltd., $70,000.
Vancouver, B.C., June 20, Balmoral Apartments, $100,000.

Analysis of Causes

Among the causes reported were: Sparks, 2; oil lamp, 1; rubbish heap, 1; explosions, [illegible]; cigar butt, 1; stove, 1; electrical storms, [illegible]; spontaneous combustion, 1; furnace, 1; [illegible] of gas, 1.

The following structures were destroyed or damaged last month: Residences, 8; business blocks, 2; stores, [illegible]; hotel, 1; school, 1; mill, 7; garages, 2; barns, 5; creamery, 1; apartments, [illegible]; brewery, 1; town hall, 1; canoe club, 1.

Deaths from Fire

[illegible] deaths during the month were directly due to fires, the following [illegible] the circumstances:—

Regina, Sask., [illegible], burned from explosion	1
[illegible], Alta., June 7, [illegible]	1
Regina, Sask., June [illegible], burnt from explosion	[illegible]
Prince Albert, Sask., June 11, [illegible] in her hand	1
Vancouver, B.C., June 20, [illegible]	[illegible]
[illegible], Sask., [illegible] in bed	1
Total	1[illegible]

Fatalities from fires for the first six months of the year total 123, compared with 118 for the first six months of 1919, and 206 for the whole year. Over eight years *The Monetary Times'* estimate is as follows:—

Month.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
January . .	14	26	3	10	21	28	13	22
February	21	18	11	23	19	87	26	30
March	22	27	23	23	20	34	9	35
April	11	22	14	6	15	7	27	8
May	33	8	5	14	12	10	15	13
June . .	18	12	2	6	9	9	28	15
July . . .	9	8	15	268	19	6	11	. .
August . . .	29	3	14	30	12	7	24	. .
September .	27	9	27	6	21	13	23	. .
October	15	9	7	[illegible]	23	11	16	. .
November . . .	24	14	12	12	21	3	14	. .
December . . .	13	19	11	94	15	26	. .	. .
Totals . . .	236	175	142	551	207	241	206	123

CANADIAN TOWN PLANNING INSTITUTE

The first annual meeting of the Canadian Town Planning Institute opened in Ottawa on July 5. The following officers were elected: President, Thomas Adams, Ottawa; vice-presidents, Dr. E. Deville, R. H. Millson and Noulan Cauchon, of Ottawa; council, J. B. Challies, of Ottawa, H. B. Dunnington-Grubb, of Toronto, J. P. Hynes, of Toronto, Dr. Otto Klotz, of Ottawa, James Ewing, of Montreal, T. McQuesten, of Hamilton, Dr. E. Nadeau, of Quebec, J. P. Anglin, of Montreal, F. G. Todd, of Montreal, and Prof. Nobbs, of Montreal; librarian, W. D. Cromarty, of Ottawa; secretary-treasurer, F. D. Henderson, Ottawa.

Chairmen were named for four committees as follows: Public Education on Town Planning, Brig.-Gen. Mitchell, Dean of the Faculty of Applied Science, Toronto; Legislation Committee, J. P. Hynes, Toronto; Publicity and Literature, A. Buckley, Ottawa; Ways and Means, James Ewing, Montreal.

The chief business before the institute was the formulating of the constitution and the consideration of the policy of the organization. The institute was organized in Toronto last year, and has as its main object the synchronizing of the work of the different sections of membership, so that the most chaste and artistic results may be obtained in the erection of buildings, construction of parks, boulevards, etc.

SILVER PRODUCTION OF COBALT

According to preliminary estimates, the silver mines of the Cobalt-Gowganda districts produced approximately [illegible] ounces of silver during the six months ended June 30. The quotations for silver averaged about $1.18 an ounce, thus lending a value of $[illegible]72,000 to the output. This does not include the Cobalt metallics and Cobalt oxide which is recovered as a by-product.

From the date of the discovery of silver in Cobalt in [illegible] up to the middle of 1920, a total of 309,010,836 ounces of silver has been produced, valued at $188,411,972. Of this total [illegible] $82,000,000 has been paid in dividends, in addition to which is between $15,000,000 and $18,000,000 in the treasuries of the various companies. Ore reserves in [illegible] of the [illegible] silver mines of Northern Ontario [illegible] the amount contained in the [illegible] majority of the mines have [illegible] way which in the aggregate [illegible] ore which will ultimately be mined. [illegible] the past record and the [illegible] of Northern Ontario.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

391 Branches in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents
London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager.
Bankers in Great Britain: The London Joint City & Midland Bank, Limited. The Royal Bank of Scotland

BANK BRANCH NOTES

Three New Branches Announced This Week—Experienced Bank Clerks Come From England and Scotland

The following is a list of branches of Canadian banks which have been opened recently:—

Winnipeg, Man. (Stafford and Grosvenor)	Bank of Commerce
Saskatoon, Sask. (west side branch)	Union Bank of Canada
Santo Domingo, West Indies	Bank of Nova Scotia

The Bank of Montreal are erecting a new building in Galt, on the site of the Galt Hotel.

The Bank of Montreal are putting up a new building at the corner of Main and Ainslie Streets, Montreal.

The Union Bank are constructing a new building at the corner of Portage and Arlington Ave., Winnipeg. The building will cost in the neighborhood of $65,000.

The Merchants Bank of Canada are building a new branch at the corner of Portage Ave. and Goulding St., Winnipeg.

British Bankers Come Here

Many experienced bankers from the United Kingdom, and especially Scotland, are coming to enter the services of Canadian banks. One party of 20 arrived in Toronto recently, and practically all of them are now with the Dominion Bank. From their experience so far the banks are highly pleased with this class of assistance. Bankers in the old country, are of course, not overjoyed at the loss of trained help, but, as one prominent Scotch banker expressed it, they would rather see them emigrate within the empire than elsewhere.

Personal Appointments

E. W. Lamprey, manager of the Bank of Toronto in Kitchener, Ont., for the past eight years, has been promoted to the position of manager of the Vancouver office and superintendent of branches for British Columbia.

The Union Bank of Canada announces the following appointments:—

F. J. Willis, inspector, Regina; F. C. Bell, manager, McAuley; C. A. Gigot, manager, Birtle; W. V. Jones, manager, Macklin; A. D. W. McKnight, manager, Oakburn; A. C. MacLean, manager, Watrous; P. J. Thomson, manager, Saskatoon, West Side; H. P. Filleul, acting manager, Sunnybrook; W. H. Neville, acting manager, Rosebank; L. D. G. Strutt, acting manager, Lang; R. L. Thompson, acting sub-manager, Toronto, Woodbine and Gerrard; H. C. Samis, assistant manager, Vancouver; Chas McNeil, accountant-in-charge, Clearwater; R. H. Powell, accountant-in-charge, Calgary, Stock Yards; R. J. Waite, accountant-in-charge, Toronto, Dawes and Danforth

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter
N.Y. funds	13 15-16	14 [illegible]	[illegible]
Mont. funds	Par.	10c. pm.	¼ to ½
Sterling—			
Demand	$4 4[illegible]50	$4.50	
Cable transfers	4.5025	4.5075	

New York quotations of exchange on European centres, furnished by the National City Co., Ltd., as at July 8, 1920, are as follows (all in cents per unit of foreign currency): Cable, London, 3.95[illegible]; cheque, 3.94[illegible]; cable, Paris, 8.[illegible]; cheque, 8.[illegible]2; cable, Italy, 6.0[illegible]; cheque, 6.01; cheque, Belgium, [illegible]; cheque, Swiss, 18.00; cheque, Spain, 16.[illegible]; cheque, Holland, [illegible]; cheque, Denmark, 16.30; cheque, Norway, 16.70; cheque, Sweden, 22.00; cheque, Berlin, 2.6[illegible]; cheque, Greece, 12.80; cheque, Finland, 4.75; cheque, Roumania, 2.80.

JUNE BANK CLEARINGS

The following are the Bank Clearings for the month of June, 1920, compared with the same month last year:—

Cities.	June, 1920.	June, 1919.		Changes.
Montreal	$612,304,115	$ 549,038,173	+	$ 63,265,942

INSURANCE COMPANIES BUILD UP PROVINCE

Better Feeling Would Result from Better Understanding, Says J. J. Shallcross—Balmoral Fire Reveals Defective Conditions

(Special to The Monetary Times.)

Vancouver, July 2, 1920.

LAST week all the insurance organizations in the city met under the auspices of the "Blue Goose" and were addressed by Mr. Shallcross, insurance adjuster, and past president of the Board of Trade. Mr. Shallcross gave some figures as to the immense amount of money out on mortgage and invested in real estate in British Columbia by the insurance companies doing business in the province. He thought if the public could be properly informed of these conditions it would remove some of the unfriendliness which seemed to exist with some insurers in their attitude towards the companies.

Other speakers followed, and as a result of the meeting an arrangement was made to hold joint monthly meetings of all the insurance associations in the Canadian coast cities to be addressed by men of outstanding prominence in the insurance world, to the end that insurance men may by this means be more generally informed in matters pertaining to their own business.

Many Serious Fires

During this month several serious fires have already taken place, one with fatal results. In this case the blaze originated in the boiler room of an apartment house, the "Balmoral," an eight-storey building. The boiler room was not composed of concrete, and contained no metal doors. It appeared, in evidence, that the janitor attempted to give the alarm by telephone, but apparently failed. He rushed to alarm the tenants. He could not take the elevator, as the flames were before him; he ran up the stairs followed by the fire. There was no fire alarm system, and he shouted out the alarm at each landing as he reached it, pounding on each door. When he reached the fifth floor the smoke and flames headed him off, and he died doing his duty. Those who first escaped gave the alarm and citizens, assisted by the firemen, rescued most of the inmates, but there was great difficulty in getting them through the narrow apertures (the dimensions of which were contrary to law) to the fire-escapes. Seven lost their lives and many were injured. Numerous investigations are being held in an attempt to find out who was to blame. Insurance on building $60,000, contents $10,000.

In the month of May there were seven fires reported, and these occurred at Esquimault, Hammond, Port Coquitlam and Vancouver, with a total loss of about $20,000.

Turn to the Right

The rule of the road is being changed to correspond with the rule of the road in the Pacific coast American cities. In Seattle and other coast cities the traffic turns to the right. In British Columbia the traffic turns to the left causing confusion to Canadians in the states and Americans in Canada who use the road.

On July 15th, in all parts of the province with the exception of Vancouver Island and that section within which on the mainland the B. C. Electric operates, those using the road "turn to the right." As the B. C. Electric railroad will have very expensive and serious alterations to make along the right of way to accommodate the change, the new rule will not be applied at present to streets upon which they are operating, thus the insurance collision hazard will not be seriously affected in the meantime.

Loss of Eyesight

Judgment for the plaintiff has been given by Justice Gregory at the sitting of the Supreme Court of Vancouver, B.C., in an accident insurance case, which is interesting to insurance companies. According to the policy of John J. Shaw, a [illegible], he would receive $1,000 from the [illegible] Indemnity Company if he should lose the entire sight of one eye, if the sight was irrecoverably lost. Shaw did lose the sight of one eye, but the company said that the sight of the eye was not irrevocably lost. It was found by the judge that the plaintiff could discern the difference between light and dark and could tell when an object was in front of his eye, but could not identify it. The company claimed that by an operation the lens of the injured eye could be removed and a glass lens put in its place. Justice Gregory in giving judgment for the plaintiff said that the law was not so absurd as to hold that sight is not irrevocably lost because by removing the good eye, an operation might be performed which, if successful, would restore a certain amount of sight to the injured eye. The judge said, however, that in fairness to the company, he would say that he realized that the action was defended only to obtain an interpretation of the language of the policy.

ONTARIO WILL INVESTIGATE RURAL CREDITS

Commission of Three Just Appointed — Report Expected by Fall — Short and Long-Term Credits to Be Considered

FOLLOWING the announcement made recently by Hon. Manning Doherty, Minister of Agriculture in Ontario, the provincial government has appointed a commission of three to investigate and report on rural credits. The commission consists of W. T. Jackman of the political economy department, Toronto University; Thomas McMillan, a farmer, of Seaforth, Ont.; and Melville W. Staples, a farmer of Millbrook, Ont. In announcing this commission the minister said:—

"I have long felt that some system of rural credits would be of much advantage to agriculture in Ontario, but I am convinced that any system adopted should be safe and sound, and should be provided to meet the peculiar needs of this province. Conditions here differ from the conditions in the newer provinces in the west where rural credit plans have been carried out.

"The committee will be expected to inquire into the different plans adopted, both in the different provinces in Canada and across the line. They will do this both by a study of the legislation, and, to some extent probably, a personal investigation among those farmers who have taken advantage of these schemes. They will also later on probably arrange to meet farmers in various parts of the province of Ontario so as to get not only full knowledge of the needs, but a complete understanding of the views and desires of the farmers on this subject.

"The inquiry will, of course, include both short-term credits and long-term credits, and will endeavor to work out a system which will provide the facilities for sound agricultural development, and will take into account the banking system and other institutions of the province which may be affected. The committee will be expected to complete this work this fall, so as to give an opportunity of adopting legislation at the next session of the legislature as found desirable. It is my desire that any legislation which may be adopted in this province shall be the most up-to-date available, and I trust the committee will have the co-operation of the farmers and all other parties interested to accomplish this end."

TO FORM MANITOBA SAFETY LEAGUE

Decision to form a Manitoba Safety League was made at an organization meeting held in Winnipeg on June 11th. The selection of temporary officers and executive will be made by a committee of five appointed by the meeting for this purpose.

R. B. Morley, of the Canadian National Safety League, explained the method adopted by the Ontario Safety League in preventing accidents in the province and to educate the public in means of safety. Accidents did not happen, Mr. Morley said; they were caused by carelessness in some form, and prevention of them was largely a matter of education and co-operation.

COLONIZATION INCREASES NATIONAL WEALTH

Settlements Planned by Western Canada Colonization Association Would Mean Hundreds of Millions of Dollars

"IF the Western Canada Colonization Association settles 20,000,000 acres of idle arable land, it is probable that another 10,000,000 acres, suitable only for pasture, will be used for raising livestock. The value of such settlement will exceed the entire national debt of the Dominion." So said Mr. M. A. Brown, provisional chairman of the Western Canada Colonization Association, in a recent interview. Mr. Brown, who is mayor of Medicine Hat, added:—

"In 1918 the farm production of Alberta, Manitoba and Saskatchewan was valued at $1,322,804,190, from some 30,397,416 acres under field crops and other lands suitable only for livestock. On the same basis, the idle acres which the association aims to bring into use have a potential value of $870,000,000 per annum. Divided into 93,750 half-section farms, each of 320 acres, these lands would provide an opportunity for almost 100,000 more farmers, and for a total of at least 400,000 immigrants, counting men, women and children.

Settlers Bring Wealth

"Settlers from the United States have been bringing in $600 for every man, woman and child. The average for immigrants from the British Isles and elsewhere would be considerably lower, but even before the war British immigrants averaged at least $100, and the amount now would be much higher. The immigrants sought by the association will be 'hand-picked' and will be from the United States and the British Isles principally. Their average wealth may be placed conservatively at $300 each. This in itself means a total initial accession to national wealth of something like $100,000,000. Such an influx of agricultural settlers would be accompanied by heavy immigration of artisans and other non-agriculturists, with wealth of probably $50,000,000 more.

Each Farm Means Large Income

"The annual gross income per farm in Western Canada is now close to $4,500, including the value of products consumed by the farmers themselves. Allowing for a possible decrease in prices, the annual gross income per farm may safely be placed at not less than $3,500 for many years to come. Of this amount at least $1,500 is expended annually in purchase of goods, largely in local stores. One thousand dollars represents the value of products of the farm consumed by the farmer and his household, expenditures on vacations, etc., taxes and payments for personal services. Most of the remaining $1,000 is saved or invested. If the farm, equipment or livestock be mortgaged, or if money is owing otherwise on loan, part of the income may be expended as interest or in reduction of the principal amount of such mortgage or loan. But even such payments mean, for the most part, an addition to national wealth. Depreciation of machinery will be offset largely, if not entirely, by the purchase of new equipment or by farm betterments.

More Business for Merchants

"At a conservative estimate, $1,000 probably would represent the average net production per farm, after deducting from the gross income expenditures of all kinds except those properly chargeable to capital account. Then, too, of the $1,500 or more expended for goods, probably $200 would be saved by the producers, merchants or transportation interests, and would go to increase the total national capital. In this way each farm would contribute $1,200 every year to increase the national wealth of the Dominion. For all the 93,750 new farms the increase would amount to $112,500,000. But this would be the gain from the project in a single year. Canada would in effect receive from the settlement of these lands [illegible] a potential increase in national wealth of $112,500,000. The present value of such perpetuity, reckoned at 6 per cent., is no less than $1,875,000,000.

"The $1,500 or more expended by each farm household annually for goods would be distributed among retailers, wholesalers, bankers and manufacturers. Ultimately much of it would go to the workers. It would provide more employment and attract new capital to supply the additional wants.

Farmers Spend Much Money

"A recent survey among its subscribers, made by one of the largest farm papers in Western Canada, showed that 50 per cent. of the farmers carried life insurance; 46.3 per cent. had telephones; 47.2 per cent. owned automobiles; 36 per cent. had gasoline engines; 34 per cent. had pianos; 30 per cent. owned threshing outfits; 30 per cent. had talking machines; 20.4 per cent. owned tractors. These figures indicate the tremendous demand for goods and services which would result from the successful utilization of nearly 100,000 new farms. That demand would mean increased prosperity for every interest in the Dominion.

"The settlers and their families would spend at least $140,750,000 annually, principally for manufactured goods. To meet this demand not less than $125,000,000 would be needed for industrial undertakings. The opportunity would attract new capital from the United States and elsewhere, and it would be safe to count on an accession of at least $75,000,000 in this way.

Importance to National Railways

"The problem of the Canadian National Railways would be solved. The average settler in Western Canada means $763 per year in railroad earnings on freight and passenger business. From the 93,750 farms there would come a yearly increase of $71,531,250 in the gross income of the railroads.

"In addition to the items of increase in national wealth already enumerated, there would be the handling of between $3,000 and $4,000 worth of produce annually from each new farm. Besides the transportation services, grain dealers, commission merchants, millers, meat packers, cold storages, creameries, and many other interests would share in such new business. On the average, the products would be turned over three times before reaching the consumer. This would mean a turnover of more than $10,000 for each farm, or probably $1,000,000,000 in all. Such business would provide employment for many more persons, and the actual net profits or savings would not be less than 3 per cent. This would represent an addition to the national wealth of $30,000,000 per annum in perpetuity. The present value of such perpetuity at 6 per cent. is $500,000,000.

Value Would Exceed Debt

"The increase in national wealth which would result from the accomplishment of the aim of the Western Canada Colonization Association may, then, be summarized as follows:—

"New wealth brought by settlers	$150,000,000
Present net worth of new farm production in perpetuity	1,875,000,000
New capital attracted from abroad for industrial undertakings	75,000,000
Present worth of new wealth resulting from profits on handling new farm production	500,000,000
Total	$2,600,000,000

"Besides, there would be the wealth created by the thousands of new non-agricultural immigrants who would accompany the influx of farm settlers. In comparison, Canada's gross national debt is less than $3,100,000,000, and the net debt about $2,000,000,000. Utilization of the idle lands of Western Canada in its value to Canada not only would offset the entire net debt of the Dominion but would leave a surplus of more than half a billion dollars for development of the Dominion's natural resources."

The Northwestern Life Assurance Company will open its new head office building on Donald St., Winnipeg, on July 1st.

GENERAL PRICE MOVEMENT STILL UPWARD

Steep Advance in Potatoes and Onions — Index Numbers Register Decreases in Dairy Products, Textiles, Hides and Raw Furs

PRICES movement continued upward in May, 1920, according to figures of the Department of Labour, the feature of the movement being the steep advance in potatoes and onions. Butter recovered slightly from the decrease usual in the spring, but had been fluctuating for some weeks. The same condition appeared in the egg market. Beef advanced appreciably toward the end of the month.

In wholesale prices the departmental index number rose to 356.6 for May as compared with 353.1 for April, 284.1 in May, 1919, and 136.3 in May, 1914. The chief increases for the month were in the groups: Fruits and vegetables, miscellaneous foods, lumber, grains and fodder, animals and meats, fish, fuel, paints, oils and glass, and chief decreases in dairy products, textiles, hides and in raw furs.

Index numbers of wholesale prices by groups of commodities for May, as compiled by the Department of Labour, are as follows:—

BUILDING PERMITS SHOW BIG ADVANCE

April Total for Fifty-five Cities Is More Than Double That of Year Ago — Alberta Shows a Decrease for the Month, While New Brunswick Shows a Decline as Compared With 1919

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in fifty-five cities, according to the Labour Gazette for June, showed an increase during April, 1920, as compared with the preceding month, the total value of building permits rising from $8,258,150 in March to $16,382,543 in April, an increase of $8,124,393, or 98.4 per cent. With the exception of Alberta, all provinces showed large increases in this comparison, that of $3,194,175 registered in Quebec being particularly substantial. As compared with the corresponding month in 1919, there was an increase of $9,322,902, or 132.1 per cent., the value for April, 1919, having been $7,059,641. In this comparison New Brunswick only reported a reduction, and in all other provinces the increases were large.

Forty Millions of New Preferred Stock This Year

Total for Last Quarter Reaches Nearly $20,000,000—Good Volume of New Bank Shares—Other Important Changes in Capitalization of Canadian Industrial Concerns

OFFERINGS of preferred stock which have come on the market during the first six months of this year total nearly $40,000,000. For the second quarter, as given below, the total is $19,522,000, while the total for the first quarter (details of which appeared in these columns about three months ago) was $20,110,000.

During the past three months the volume of new bank stocks has also been considerable, totalling $9,500,000. These issues are made to shareholders, however, and judging from the favorable rate at which they are being allotted and the high dividends which are now being paid by Canadian banks, it is not expected that the balance left for the public will be very large.

Besides the above mentioned Canadian industrial concerns, since the beginning of the year, have announced other capitalization changes. The Dominion Steel Corporation has issued $5,902,000 additional common stock, while the Dominion Iron and Steel Co. has also issued $4,200,000 additional common stock. Laurentide, Limited, have issued $28,800,000 new stock, allotted at the rate of three new for one old share, while National Breweries also issued new capital, giving four $25 shares for one $100 share. Riordon Pulp and Paper Company issued $1,500,000 common shares, which were allotted to shareholders at $125. Brompton Pulp and Paper Co recently announced the intention of giving two new shares, of no par value, for old shares of $100. Spanish River Pulp and Paper Co. also announced the issuance of new preferred stock to wipe out arrears on old preferred.

CONTROL OF SECURITY OFFERINGS

Suggestion Made that British Columbia Industrial Council Pass on Offerings of Securities

IT HAS been suggested in British Columbia by J. A. Cunningham that provincial legislation be enacted making it compulsory for any proposed industry to obtain the approval of the industrial advisory council of the province before taking steps to interest the investing public. This suggestion is being considered by the executive council of the British Columbia Manufacturers' Association; it was made at a meeting on June 29, following an address given by D. B. Martyn, industrial commissioner.

Mr. Martyn said that some 600 applications had been considered during the one year his department had been in existence, the amount applied for being about $1,000,000. In all about 75 new industries had started up following the granting of loans totalling about $900,000, and had given employment to between 800 and 900 men. He enumerated the various lines of industry approved by the council and mentioned that one particular one that had been given assistance had been an industry for the manufacture of "cut to fit" houses, this industry having also received the support of the banks. As indicating the success already attending this industry, he said orders for 120 houses had already been received, and that 500 more would be required by the Canadian National over a term of years. In addition, numerous inquiries were being received from Japan, and there was every possibility that a large market for these houses would be secured on the other side of the Pacific. He expressed the opinion that the system of standardization followed out in this industry could be adapted to other lines in the wood products industries.

In regard to mining, fifty prospectors had been sent out by his department during the year. In connection with the possible future of the steel-making industry he said prospects were of the very brightest and that the immediate future should show something real. Dealing with the fishing industry, he declared that with 70 to 80 per cent. of the fishermen on this coast Japanese, and with so many returned men anxious to engage in the industry, the department was giving its attention to assisting the returned men. The co-operation of Col. Cy Peck, M.P., had been obtained, and he was doing good work in that connection.

Assistance had been given in the establishment of a cordage factory and boat building, woollen mills, shoe factory, and other proposed lines of industry would receive the support of the department, which was not so concerned in starting up a large number of industries as it was in bringing about a steady, permanent development in the province.

CARAQUET AND GULF SHORE RAILWAY

The Dominion government has taken over the Caraquet and Gulf Shore Railway, a line of over 100 miles in Gloucester County, N.B. It will be operated as a branch of the Canadian National Railways. The government now owns all the branch lines in New Brunswick not owned by the Canadian Pacific, except a small coal line between Beersville and Adamsville, and the Temiscouata extension in Madawaska County.

Volume of Canadian Bond Sales Reduced Last Month

CANADIAN bond sales reached a total of $13,758,711 in June, 1920, as compared with $33,853,302 in May, and $18,292,335 in June a year ago. The following is the summary:—

Provincial	$5,000,000
Corporation	5,000,000
Municipal	3,758,711
	$13,758,711

Last month's total was small as compared with the three previous months, provincial loans showing a reduction, while there were no railway flotations at all. Only one corporation issue of any importance was made, namely, Shawinigan Water and Power Company, $4,000,000. Provincial bond sales for the first six months of this year total slightly more than the total for the whole of last year.

The volume of municipal financing last month, notwithstanding the low prices, was good, although it was not as heavy as is usual at this time of the year. Municipal sales in June a year ago amounted to $4,455,335, while the total this year is $3,758,711. The summary by provinces is as follows: Ontario, $2,554,061; New Brunswick, $493,500; Nova Scotia, $50,000; Quebec, $277,000; Manitoba, $143,000; Saskatchewan, $186,150; British Columbia, $55,000; total, $3,758,711.

The British Canadian and General Investment Company, Limited

Report of the proceedings at the Ninth Annual General Meeting of the Company held at the Registered Offices, 4 Moorgate Street, London, E.C.2, on Tuesday, the 15th day of June, 1920, at 12 o'clock noon, Mr. Charles P. Johnson, Chairman of the Company, Presiding

The Notice convening the Meeting and the Report of the Auditors having been read.

THE CHAIRMAN said: Gentlemen,—I presume it will be your pleasure to take the Report and Accounts as read.

The Accounts show an increased profit of nearly 50 per cent. over last year, about £1,500 of which is accounted for by the abnormal rate of exchange which prevailed during the latter part of 1919. I may perhaps say that in addition to the profit shown in the Balance Sheet we have credited the Reserve Account with about £3,[illegible], being the balance of profit upon the sale of securities held prior to 1915. The only item in the Accounts to which I need draw special attention is the amount appearing as Trustees Fees. In the past, such fees as we have received have appeared as part of the general receipts under the heading of "Interest, Commission, etc.," but this part of our business is now becoming sufficiently important to warrant our putting it in as a separate item. The amount will, I hope, be substantially increased during the current year. The prospects for 1920 are favorable, and I shall be disappointed if the figures do not show an improvement upon those in the Balance Sheet now before you. Mr. Mytton was able to pay us a visit in the early part of this year, and gave a very encouraging account of the position of our affiliated Companies, and since his return to Canada he has written to us saying that things look even better than he had hoped would be the case. Our friends who distinguished themselves so much in France during the war have now returned to their work in Canada, and are very hopeful as to the future of the Companies which they direct, and in which we are so largely interested.

It will interest you to know that whilst Mr. Mytton was over here we went very carefully into the value of our investments and that my estimate of their value as at the 31st December last is about £17,000 in excess of the figure at which they stand in the Balance Sheet, and if we add our carry forward and appropriation for reserve, the surplus is increased to over £23,000, which would make the intrinsic value of our Ordinary Stock about 115%. You will understand that this is largely an estimate as a considerable proportion of our securities have no Stock Exchange quotation, but we believe that our valuation has been made upon conservative lines. There has probably been some depreciation since the end of last year as many securities have diminished in value during the last few months, but I think I may say the surplus still remains at a substantial figure.

You will notice that we recommend that the sum of £4,000 should be placed to a special reserve for taxation, which is perhaps a somewhat unusual thing to do. Our reasons for doing this are, first, the imposition of the Corporation tax by the Chancellor of the Exchequer. We do not know yet if this tax will be levied upon Companies such as ours, but we feel it is wise to make provision for it. In addition to this, the amount we shall have to pay for Income Tax is bound to be substantially increased in future years as we shall soon lose the benefit we at present enjoy of bringing the lean war years into average, and it seems to us to be in your best interests to set aside part of our profits during years when we have special sources of profit which may not recur, to meet the increased charge under this head, which is bound to appear in our future accounts. The charge for Income Tax will be somewhat heavier [illegible] I [illegible] we shall not feel the full effect of the increase until [illegible], and that we shall be able to add a substantial [illegible] to this particular reserve during the current year. [illegible] the nature of a reserve for the equalisation of [illegible], and we hope the provision of a fund of [illegible] will commend itself to you as a wise and prudent [illegible] will enure to your benefit in years to come.

I do not propose to say much on this vexed question of taxation, but I feel I must say that if the Corporation tax is levied upon such Companies as ours which have necessarily had to pass through a very difficult time during the War, it will be a little hard upon us, especially as we have not taken into account during the past few years any interest which was unpaid owing to the difficulties created by the War, and we may now hope to recover some of these arrears which I am afraid may be considered income for the year in which they are received and will be subject to taxation which would not have been incurred if they had been punctually paid. Consequently, we shall suffer doubly, first by the delay in payment of this interest and secondly by its being taxed when received to a considerably greater extent than would have been the case had we received payment when it was due. The cost of the War must, of course, be paid in some way and we have no desire to shirk our fair share of this cost, but we who are not profiteers but sufferers from the War, do not feel we ought to be asked to pay more than our fair share and you may rely upon us to use every effort to avoid doing so. But this question of taxation is one over which we obviously can have little, if any, control, and as I have already said, we think it wise to make such provision as we can for eventualities in this direction.

We are not ashamed of what we have done during the War as we have subscribed in all well over £100,000 towards various War Loans and have generally lost money by doing so. I may perhaps tell you that our profits for 1919 would have been some £1,300 larger had we not, in response to the Chancellor's appeal, borrowed a considerable sum for the purpose of taking up £20,000 of the Victory Loan.

I do not think I need detain you any longer. I will only repeat that the prospects for the immediate future are not unfavorable, although our expenses must inevitably increase, and that our advices from the Great Dominion in which we are so largely interested are of an encouraging nature. I hope at the end of next month to be able to pay a visit to Canada and to spend some time there in order to see for myself how things are going, and I trust I shall be able to bring back a favorable report.

I think you will agree with me that we are much indebted to Mr. Mytton for the very able way in which he has looked after our affairs on the other side, and I feel sure I shall be carrying out your wishes if I tell him that you appreciate his efforts during a very difficult and trying time.

We are very glad Mr. Bury is able once more to be with us after some years spent on active service.

I should like to express our thanks to our Staff who have done really excellent work. I am very fortunate in having such admirable assistants, and I am particularly glad that our Secretary, Mr. Ashton, is again with us after several trying years in Egypt and Palestine. [illegible] that his return is very welcome [illegible]

Mr. T. G. Scott, the Vice-Chairman, in seconding the motion for the adoption of the Report and Accounts, [illegible] that the Board had been able to [illegible] with the Managing Director [illegible] Agreements with the Company [illegible] for a further period of [illegible] years on terms which the [illegible] Directors considered very satisfactory.

After the Chairman had [illegible] the Accounts and Balance Sheet and the Directors' Report thereon were adopted, and a dividend at the rate of [illegible] per cent. per annum for the year [illegible]

Mr. H. J. [illegible] was re-elected a Director of the Company, the Auditors were re-appointed, and the proceedings terminated with a [illegible] vote of thanks to the Directors and Staff.

Ontario May Purchase National Electric Lines

Option Secured from Minister of Railways and Canals, and Ontario Hydro Commission Recommends Purchase—Government Decides to Make Thorough Investigation First—Some Strong Objections are Presented

ELECTRIC lines owned by the Canadian National Railways in Ontario may be purchased by the Ontario Hydro-Electric Power Commission, if the terms proposed are approved by the provincial government. The negotiations have been carried on for some time, and Sir Adam Beck, chairman of the commission, submitted a report of the results at a meeting of the commission on June 29. The sum of $6,878,374 is involved, but the province would not have to do any financing, as the Dominion government has agreed to accept Hydro Commission 4½% 50 year bonds, guaranteed by the province.

Report of Hydro Chairman

The report made by Sir Adam Beck to the commission reads in part as follows: "Subsequent to the Dominion government acquiring the Canadian Northern Railways and the various electric lines, the chairman of the commission approached the Minister of Railways and Canals to determine what arrangement might be made to acquire these electric railway lines from the Dominion government, thus avoiding the duplicating and paralleling of electric railways in the districts in which the municipalities had already voted in favor of radial railways, as well as in those districts in which the municipalities contemplated constructing electric railways. The Minister of Railways and Canals was in full accord with such a policy, and gave an option to the commission for the sale of the Toronto Eastern Railway, partly constructed, in the district between Toronto and Bowmanville, upon which the municipalities subsequently voted and carried by large majorities.

"At a subsequent conference with the Minister of Railways and Canals and the sub-committee of the Privy Council appointed for this purpose, an agreement was reached which the chairman of the Hydro-Electric Power Commission was prepared to recommend to the commission, that the municipalities submit by-laws and agreements for the acquiring and operation of the properties known as the Toronto-Eastern, the Toronto Suburban and the Niagara, St. Catharines and Toronto Railways, which recommendation and agreement was subsequently approved by the Dominion Cabinet.

Valuations Placed on Lines

"The offer agreed upon was as follows: Toronto Eastern Railway—Price, $706,000, payable by Hydro Power Commission, 4½% fifty year bonds guaranteed by the province of Ontario. Toronto Suburban Railway—On this railway there are $2,628,000 of outstanding 4½% bonds due 1961. This is to be taken over by the Hydro Power Commission, and the Hydro Power Commission to assume the bonds. Niagara, St. Catharines and Toronto Railway—Price for this railway to be $3,511,571.10. On this road there are $1,098,000 5% bonds due 1929. The Hydro Power Commission will assume these bonds and give Hydro Power Commission bonds guaranteed by the province of Ontario, 4½% fifty year bonds for the difference between $1,098,000 and $3,511,571.

"It was understood in the discussion with the sub-committee of the Dominion Cabinet that the Toronto Suburban Railway and the Niagara, St. Catharines and Toronto Railways must be taken together.

"It is understood, if the Hydro Power Commission take over these radial railways on behalf of the municipalities, it is one of the conditions, in view of the above arrangement, will be made for all traffic as to price, that an exclusive traffic agreement will be made for all traffic between above electric railways and the Canadian National Government owned railways."

The commission at its meeting approved the negotiations and offer of the Dominion government, and issued instructions that application to the Ontario government for an order-in-Council authorizing the submission of agreements and by-laws by the municipalities interested in the districts covered by the above-mentioned lines. The municipalities interested are as follows: Toronto Suburban Railway—Townships of Etobicoke, Vaughan, Toronto, Chinguacousy, Esquesing, Nassagawaya, Eramosa, Puslinch, Guelph. Villages of Woodbridge, Georgetown, Acton. Towns of Weston, Brampton. Cities of Toronto, Guelph. Niagara, St. Catharines and Toronto Railway—Townships of Niagara, Grantham, Stamford, Louth, Thorold, Pelham, Crowland, Humberstone. Villages of Port Dalhousie, Humberstone. Towns of Niagara, Merritton, Thorold, Port Colborne. Cities of St. Catharines, Niagara Falls, Welland.

Government's Announcement

After giving these proposals careful consideration, the government issued a statement on July 6, reading in part as follows:—

"While the government realizes the importance of rapid and economic transportation and is much impressed by the case presented by Sir Adam Beck and the municipalities, it cannot disregard the many and serious problems involved in the proposals now presented for the purchase and construction of hydro-radial railways under government guarantees, and having now reached a conclusion as to the action it ought to take in the matter, it conceives it to be its duty to give reasons for the course it proposes to follow.

"Under the provisions of the Hydro-Electric Railway Act, 1914, and amendments thereto, the commission is authorized to enter upon the construction (or purchase) and operation of electric railway lines when the municipalities interested shall, in respect of any proposed line, have signed agreements containing terms and conditions laid down by the act, and deposited with the commission debentures to the amount of their respective shares of the costs of construction and equipment of the line. The commission then issues its own bonds guaranteed by the lieutenant-governor-in-council. The bonds thus issued and sold are, to all intents and purposes, the bonds of the province."

A review of the radial situation in Ontario, insofar as it relates to the present negotiations is then given. The government will appoint a commission to make a thorough investigation before taking action. Sir Adam Beck, upon being informed of the government's attitude, issued a statement pointing out the commitments which had already been made on behalf of the government.

Objections to Acquisition

Many arguments against the acquisition of the lines have been placed before the cabinet. In a letter addressed to the attorney-general a few days ago, A. T. Drummond, LL.D., who has taken an active interest in this question, summarized them as follows:—

"(1) Development of hydro-electric power for light, heat and farm and manufacturers' purposes is to be encouraged, provided that the capital cost per horsepower developed is kept within definite limits. No comparative investigation into both the capital and operating cost of the commission with those of the large private companies has ever been made by the Legislature, and its need is suggestive.

"(2) The industrial expansion in Ontario has been, during and since the war, and still continues, so large that all the hydro-electric power to be developed during the next few years will be needed for our manufacturing plants, which, with the increasing requirements of the export trade, added to those of the home trade, are growing largely both in size and number. Their needs are vastly more important for our

Chemical Products, Limited
—An Expanding Industry

A world shortage of chemical products, coupled with an established and favorable market, have necessitated the expansion of Chemical Products, Limited, to its present size. Organization on a big scale enables the investor to secure an interest, and to profit by the growth of the chemical industry in Canada, through the

prosperity than electric railway lines [illegible] sity and will only give accommodation [illegible] local freight, and in nearly every [illegible] competitive with the existing steam lines.

"(3) Except in the rare districts [illegible] and where pleasure travel can be secured [illegible] interurban electric railways, although [illegible] cost per mile, have in the past failed [illegible] railway statistics annually published at [illegible] the enormous estimated cost of these projected [illegible] railways—from three to five times [illegible] Ontario originally cost—will have the [illegible] to bear annually of several millions of [illegible] sinking fund, and of the always needed [illegible]

"(4) Many hundreds of miles of railway [illegible] surveyed by the Hydro-Electric Commission [illegible] eastern and south-western Ontario [illegible]

[illegible] miles of intended road [illegible] Ontario government [illegible] $[illegible] and [illegible] Ontario, [illegible] and [illegible] poor.

Financing Would be Difficult

[illegible]

possible at any price to float with New York bankers, bonds for these projected roads, unless with the direct guarantee of the Ontario government to provide the interest and principal.

"(6) The increasing experience of the United States government and of the general public there, is that the day of the electric railway of the past is gone, and that for all medium and short distances up to, even over, one hundred miles, the 5-10 motor truck for freight and the large motor 'bus for passengers will, with good roads, serve the public better, because the truck and 'bus are not limited to a fixed immovable track and definite stations for receiving and delivery, but can go wherever the business requires them. The United States Post Office has been experimenting for two years over many routes with trucks for parcel delivery. To illustrate—one route was 183 miles outside New York and the truck started at 4 a.m., arrived at New York post office at 1 p.m. the same day, and all of its farm produce and parcels from the towns were in consignees' hands by 5 p.m.

Municipalities Will Not be Liable

"(7) Under the agreement they are required to sign, the municipalities, if they ever had any rights, give up every right in these railways, even if the roads become bankrupt, and every Canadian banker knows that the Ontario government guarantee alone will float their bonds, and that in the event of deficits, that government will have to meet them, as the municipalities in most—perhaps all—cases will repudiate responsibility and allege that they were led into the loss through the representations of the government's hydro-electric commission which alone owns, built, operates and entirely controls these railways. The huge load of bonds which the municipalities, with careless indifference, are handing over to the hydro-electric commission for an alleged security which financiers do not recognize, will injure the financial standing of these municipalities when they come to borrow for other purposes. The legislature should place some restriction on such issues, for many municipalities could not pay them if called on.

"(8) Every railway's experience—and the Ontario government's own road in northern Ontario illustrates this—is that each year or two years, new bond issues have to be made, and, in this case, further guarantees given, to pay for additional rolling stock, new sidings, double tracks, and scores of other betterments. This means additional financing on a very considerable scale from time to time in the early future.

Losses Already Incurred

"(9) The only experience of the Hydro-Electric Commission in railways is in the London & Port Stanley Railway electrification, and as I have often, in the press and to the late government of Ontario and members of the commission, shown (see also London Advertiser of 10th inst. and The Globe of 22nd inst.), the statements given to the public are quite misleading as to its alleged surpluses, the actual results showing a large deficit every year

Not Good for Freight Business

"(10) The concentration in two or three central plants of all the coal consumed on as many railways, and its utilization in these plants in producing steam power to be transmitted electrically throughout these railway lines, and in replacing steam locomotives, means economy in coal and power, and can, and probably will, be adopted on short systems of the steam roads, but here the similarity to the electric road would end, as in other respects such roads must continue to operate on steam road principles. The electric road of the present day caters to frequent but slower trains with numerous convenient stops; to the people who are going short distances, and to very low fares to attract the multitudes where possible. As a rule, the freight business on electric lines has not been encouraged in the way it could have been, due in part to the frequent passenger traffic and the need of double tracks. Especially in the package freight and the farmers' produce, the motor truck is in the United States found now to be much more serviceable, and motor 'busses are coming into vogue with the improved roads."

PUBLICATIONS RECEIVED

English Public Finance, from the Revolution of 1688.—Bankers' Trust Co., New York.

After fighting the greatest war in her history, taxing herself to an unprecedented amount to pay the expense, and loaning billions of dollars to her allies, Great Britain is emerging from the first year of peace so little shaken financially that her recent outpouring of capital for development of private business exceeds all previous records. How has Britain achieved this prodigy of finance? The explanation appears in this study of English public finance, which has just been issued in book form by the Bankers' Trust Co., of New York.

Even allowing for universal knowledge of the tremendous cost of the world war it will, perhaps, surprise many people to learn that England's burden alone for the six years of war and its aftermath, exceeded her entire government expenditures for the previous 225 years. It should be remembered, too, the national spending during these 2½ centuries included costs of eight major wars which, in their time, were considered appalling. More significant still is the fact that during the world-war period, the British people actualy paid, in taxation and other forms of contribution to their war expense, more than one-third as much as they had been required to pay in support of their government during the preceding 225 years.

Handbook of Ontario.—Published by the Department of Agriculture of the province. Ontario's resources and opportunities are fully described in this book of 300 pages. Illustrations and a map of the province are also included. It will be an effective means of making the province known outside of Canada.

Toronto Municipal Year Book, 1920.—This book is published under the direction of Hubert Groves, and is issued by the Municipal Intelligence Bureau. It contains 144 pages of interesting facts and information about the city, and is handsomely illustrated. Besides information as to civic government, municipal finances, improvements, taxes, works and parks, the book is tastefully illustrated. An index of sections and also a general index is placed on the front page.

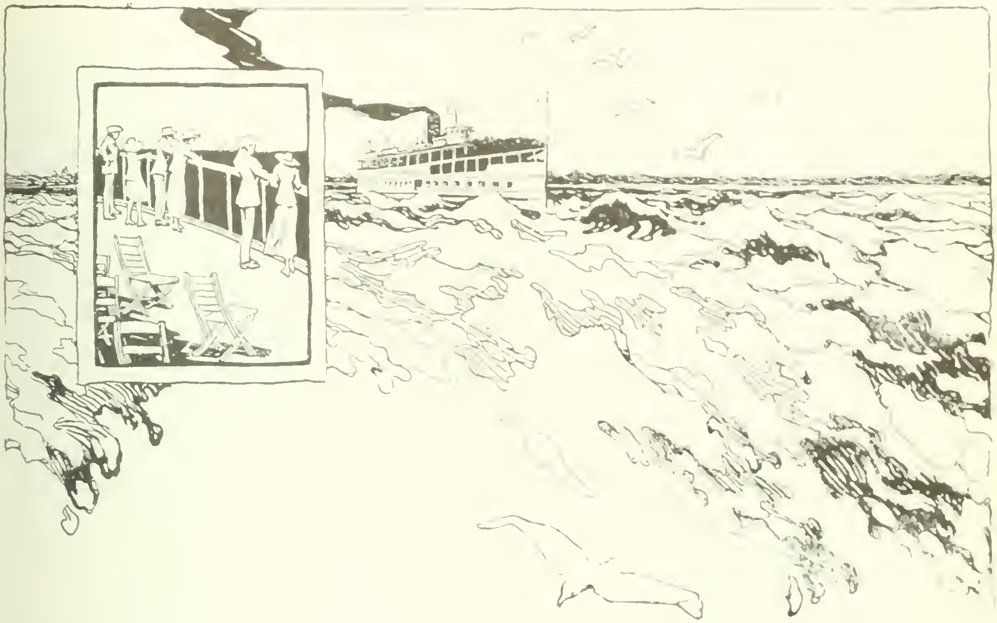
Crop Production in Western Canada.—By John Bracken, Professor of Field Husbandry, University of Saskatchewan. The Grain Growers' Guide, Winnipeg, Man. 423 pages; $3.

Profitable Grain Growing.—By Seager Wheeler. The Grain Growers' Guide, Winnipeg, Man. 351 pages; $3.

These two books are the first of a series on farming, published by the Grain Growers' Guide. Both the authors are well known in Canada, the one by reason of his contributions to the science of agriculture, and the other through his services in grain-growing in the west. The first-mentioned book is a comprehensive one, giving a brief history of the principal grains, and describing their adaptability to western conditions. The second describes the practical operations of farming, the various seasons and the marketing of grain.

Essays on Wheat.—By A. H. R. Buller, Professor of Botany at the University of Manitoba. The Grain Growers' Guide, Winnipeg. 339 pages, with index; $2.75.

Agriculture is now receiving considerable attention in the form of books, and it is fitting that Canada's achievements in wheat-growing should receive special treatment. In this book Mr. Buller tells the story of Marquis wheat, of which approximately 250,000,000 bushels were raised in North America in 1917 and 300,000,000 bushels in 1918. It is an interesting and unusual story, as may be seen from the fact that all the Marquis wheat in existence came from a single grain planted in an experimental plot in 1903. Among the other topics which Mr. Buller considers are the early history of wheat-growing in Manitoba, wheat in western Canada, the origin of "Red Bobs" and "Kitchener" and the wild wheat of Palestine.



The Call of the Rapids

I am the Rapids—A madcap Sprite,
I laugh and sing, I bound and splash;
My merriment comes in the whirling lines
Of the water's foam and crash.

I race the boats as they [illegible]
Through my maze of snow-white water;
I call to the mortals who [illegible]
And bid them come back each year.

NO one can experience the thrill of a trip through the Rapids of the St. Lawrence without then and there registering a vow to return again to that glorious River which is a part of the trip from

"Niagara to the Sea"

The boats that make this journey are luxury-ships, splendidly appointed, celebrated for their cuisine.

They take you from Lewiston across Lake Ontario to Toronto, thence through the Thousand Islands to Prescott. Then comes the descent of the Long Sault, the Lachine, and the other famous Rapids. Montreal is visited, then Quebec. Here the traveller does well to linger, taking the side trip to St. Anne de Beaupre. A few miles down the River are Murray Bay and Tadousac, beautiful summer resorts made doubly attractive by their splendid hotels. The canyon like scenery of the Saguenay forms a fitting climax to this Vacation Trip through Canada's fairyland. The supreme moment is reached when the boat approaches Capes Trinity and Eternity, those mightiest of all the promontories that tower above the dark waters of this majestic stream. Before making your vacation plans, you should obtain full information regarding this wonderful Boat Trip.

FIRE COMPANIES WIN BEFORE PRIVY COUNCIL

Quebec Railway, Light, Heat and Power Company Held Liable for Damage Caused by Wires, After Insurance Companies Had Pointed Out Defects

WHERE improvements for purposes of safety and fire prevention are advised by fire insurance companies, it is the duty of electric power supplying companies to install these improvements. This is the substance of an important legal case recently decided by the Privy Council of Great Britain, on appeal from the Supreme Court of Canada.

The case originally began in 1912, when, after numerous fires in Quebec City, the insurance companies interested appointed an investigator, who found that many of the fires were caused by improper conducting apparatus, and who recommended that conditions be improved by grounding all transformers at their neutral point, which promised to be the only remedy easily available to the operating company. Until the fire in the present case no steps were taken by the operating company to follow the advice given.

First Decision Against Company

In the present case the judge of the Superior Court of Quebec found the Quebec Light, Heat and Power Company responsible and they were ordered to pay $60,000, plus interest and costs. This decision was appealed to the Court of King's Bench, and the Quebec Light, Heat and Power Company was found not responsible. The insurance companies then appealed to the Supreme Court of Canada, which reaffirmed the decision of the Superior Court, and the Quebec Light Heat and Power Company was thus again held responsible by a majority of one.

But permission was given to the respondents (the Quebec Company) to appeal to the Privy Council, which, after careful consideration of the law applicable and of such facts as were admissible, decided that the Quebec Light, Heat and Power Company were responsible for the fires in that it had not attempted to relieve itself of responsibility by following the advice of the insurance companies.

Facts of the Case

The facts of the case and the pertinent parts of their Lordships' decision are as follows:

"The appellant company generates and distributes electricity in the City of Quebec and its neighborhood, and along the St. Foye Road the company had erected poles carrying two overhead cables, a primary cable charged with electricity at 2200 volts, and a secondary cable from which electricity was supplied to the houses at 108 volts. There were many trees along the roadside and in the adjacent enclosures, and at the time in question a violent wind had torn a branch, coated with frozen rain, from a poplar growing some distance from one of the enclosures and had driven it against these cables, though many feet away. They broke down in consequence, and thus the high tension electricity found its way along the secondary cable into the customers' houses and set them on fire. For the loss thus caused, the present action was brought against the appellant company.

"The powers under which the appellant company carries on its undertaking are statutory and are contained, some in private and some in public statutes. The powers which these statutes give are of a very familiar type. The undertakers are authorized to carry and distribute high tension electricity over cables which may be either overhead or underground, and the section expressly provides that the company may erect, equip and maintain poles in the streets for the purpose of working and maintaining its lines for the conveyance of electric power upon, along, across, over and under the same. It was contended by the respondents (the insurance companies) that sub-section (c) of the section, in the words, 'the company shall be responsible for all damage which its agents, servants or workmen cause to individuals or property in carrying out or maintaining any of its said works,' made the company absolutely liable for the damage sued for in the present case. Their Lordships think that, as an independent cause of action, the sub-section fails. The damage here is not, in any view of the construction of the sub-section, caused in carrying out or maintaining works.

Company's Rights Not Absolute

"The appellants, however, rely on the authority to carry their wires overhead which the statutes give. The application of enactments of this kind is familiar and well settled. Such powers are not in themselves charters to commit torts and to damage third persons at large, but that which is necessarily incidental to the exercise of the statutory authority is held to have been authorized by implication and therefore it is not the foundation of a cause of action in favour of strangers, since otherwise the application of the general law would defeat the purpose of the enactment. The legislature, which could have excepted the application of the general law in express terms, must be deemed to have done so by implication in such cases. Nor need a use of the power conferred, which is injurious to others, be excluded from the ambit of that which is necessarily incidental to their enjoyment merely because the progress of discovery or invention reveals some extraordinary means of preventing that injury to others which has previously been unavoidable. This point arose and was settled in connection with sparks falling from locomotive engines many years ago. It, therefore, becomes necessary to consider how far such an escape of electricity as took place in this case was incidental to the use of overhead cables and how far and by what reasonable precautions injurious consequences were preventable.

"The question whether it was necessary to hang the two sets of cables on the same poles or in such proximity to one another that the fall of the branch upon one would lead to the flow of the high-tension current into the other, hardly seems to have been examined at the trial. The main contention is this: That if the wires of the transformers, which are used at intervals along the line of cable, had been grounded, the escaping high-tension electricity would have found its way innocuously to earth instead of entering the houses and setting them on fire. The value of this precaution has been established by the experience of several years, but it was the view of some distributors of electricity and of the defendant company among them, that there was an offset to this advantage in the fact that, if the wiring of the customers' houses was defective, the grounding of the transformer wires would substitute new difficulties for the old. It was not, however, shown that the wiring of the plaintiffs' houses was defective to this extent, although it was 'demode,' nor did the evidence compare the one disadvantage with the other quantitatively. The company could have inspected the wiring and, if it was not safe, could have declined to supply current. It is plain that the company was quite willing to have carried out the grounding of the transformer wires if the representative of the fire insurance companies, who advised this course, had given an instruction instead of a recommendation. The latter naturally pointed out that they had no authority to issue instructions, but must confine themselves to advice, and as their Lordships are neither prepared to assume that this request on appellants' part for instructions was a mere quibble, designed to disguise their own reluctance to do anything, nor even to infer that they saw any objection to the proposal except the expense of it, they conclude that the grounding of the wires of the transformers would, some substantial time before the accident in question, have been a practicable and efficient safeguard against the injury which in fact was inflicted. If so, it is impossible to say that the escape of electricity into customers' houses and the consequent damage in time of storm was a necessary incident of the exercise of the power to distribute high-tension current by overhead cables along roads such as would by implication relieve the company from liability for the consequences."

"Their Lordships will humbly advise His Majesty that this appeal should be dismissed with costs."

Work on the new offices of the London and Western Trusts Co. in London, Ont., commenced on June 28. The William F. Sparling Co., of Toronto, and Brantford, have the contract, which will call for an expenditure of approximately $100,000. The building will be completed by December 1st.

News of Industrial Development in Canada

Kaministiquia Pulp and Paper Company to Locate At Port Arthur—Mill to be Producing by December—Americans Interested in Newfoundland Pulpwood—Baldwin's to Proceed With Construction of Front's Steel Plant—Power Difficulties Have Been Overcome

PORT ARTHUR is to have a pulp and paper mill in the near future, according to an announcement made by C. D. Howe, consulting engineer, Port Arthur, Ont. The Kaministiquia Pulp and Paper Co., with a capitalization of $1,000,000, and composed principally of Toronto people, has leased sixteen acres from the Port Arthur Parks Board in the north and industrial end of the city, and will proceed at once with the erection of the first unit, which will be a thirty ton pulp mill. It is expected that the mill will be producing by December.

The company has extensive timber limits east of Port Arthur, and intends expanding as fast as manufacturing machinery can be procured, with the ultimate production of 250 tons of newsprint paper a day. U. M. Waite, of New York, is the managing director. All the necessary machinery for the first unit of thirty tons has been obtained, and will be on the spot by the time the building is ready for operation.

The site of the new mill is immediately north of the Grain Grower's elevator at Current River. Thirty men will be employed at the first instance, it is stated. Although the names of the directorate have not yet been announced, it is understood that foremost men in the pulp and paper business in Canada and the United States are included.

Pulp and Paper Notes

Twelve hundred square miles of pulp lands, situated in Newfoundland, and held under option by S. Duncan McLean, of Sydney, N.S., are likely to be taken over by an American syndicate in the near future. The tract, which is valued at $500,000, will be cruised by surveyors sent to Newfoundland by the American syndicate. The syndicate has been formed in the United States to take over this property and work it, providing the report of the surveyors is a favorable one. This timberland is owned by Canadian and Newfoundland interests and is practically a virgin area. It is readily accessible for cutting.

A famine in fuel oil faces the paper making industry in British Columbia, and if the famine comes, there may be no newspapers in Vancouver and Victoria, Seattle and Tacoma and other Pacific coast cities, as far south as San Francisco and San Diego. Calgary and Edmonton, Alberta, are also affected.

For the most part all newspapers on the Pacific coast are dependent on the great manufacturing plants at Powell River and Ocean Falls, B.C., for their supplies of newsprint. These mills are run by steam generated by boilers heated with California fuel oil. The Standard Oil Co., in California, has decided that no more oil for export can be provided, owing, it is said, to the great demand for oil arising from the coming of many new steamers to the Pacific.

A lake of solid glauber salts, which is one mile long and 1,000 yards across, and estimated to contain 2,000,000 tons of sodium sulphate has been discovered near Fusilier, Saskatchewan. A syndicate has been formed under the name of Soda Deposits, Ltd., for the purpose of exploiting this lake. There is a great demand for this mineral in the pulp manufacturing industry and there is no doubt of a ready market.

The Fraser Companies have commenced operations at their tenth saw and shingle mill located in New Brunswick, situated at Magaguadavic. They will cut about six million feet annually, this year's cut being at the mill site. An eleventh mill will be opened at Campbellton next month and will have a capacity of 20 million feet annually.

Northern Planing Mill, Saskatoon, Sask., purchase of which was announced some months ago by the Warren Manufacturing Co., has now been renovated and machinery put in running order, while considerable new machinery has been added. The mill is now in working order, and operations have already been commenced. Among the products of Saskatoon's new industry will be doors, windows, frames and sashes, window and door screens, as well as a variety of smaller products.

Baldwin's to Proceed With Plant

For some time past it has been generally thought that Toronto would lose an important industry in Baldwin's Canadian Steel Corporation, because of the Hydro power shortage. It was announced this week, however, that all difficulties have been overcome, and construction work on the plant at Ashbridge's Bay, which was stopped two or three months ago, will be again proceeded with. Baldwin's already are receiving some 1,500 horsepower from the Hydro for their electric furnaces, but ten or fifteen thousand more will be required when the works are going at full capacity.

Manufacturing Notes

Incorporation of the Canada Fibre Products Co., of Winnipeg, Man., with an authorized capitalization of $1,000,000, has been announced. A plant will be constructed in Winnipeg. The originators of this venture are planning to utilize flax straw for commercial purposes.

The Steel Co. of Canada, Hamilton, Ont., has secured a supply of coal and oil again, and will start part of its plant immediately. It has not been able to get full supplies yet.

A by-law to grant a loan of $25,000 to the Dominion Construction Co., Ltd., and Fold Paper Boxes, Ltd., both under one management, has been passed by ratepayers.

An electric washing machine factory will be established at Owen Sound, Ont., shortly by the Shade Mfg. Co., Ltd., Edmonton, Alta. The promoters have an option on a large warehouse in Owen Sound, where they expect to be operating very soon.

Denial of the rumor that the plant of Ames-Holden-McCready Shoe Co., was closing, has been issued by President T. H. Reider. Mr. Reider stated that the company had temporarily suspended the manufacture of certain lines of which it has ample stock.

The Toronto City Dairy Co., has purchased a railway siding and factory site at the Air Line depot, Simcoe, Ont., and will at once erect a milk-cooling station. The structure will be put up with a view to expansion as the supply of milk produced there increases.

If satisfactory arrangements can be made, the Keystone Steel and Wire Co., of Puree, Ill., will make Winnipeg, Man., its western distributing centre for Canada. Wire farm fencing, which is one of the specialties manufactured by the company, is in heavy demand in the west, and the establishment of a branch there will relieve the situation.

Messrs. Beatty Bros., manufacturers of barn equipment, such as hay forks, carriers, pumps, and also distributors of farm machinery, who have their headquarters at Fergus, Ont., will erect a $60,000 plant at Regina, Sask. McColl Bros., of Toronto, manufacturers of lubricating oils, paint oils and paint, intend also to build a $150,000 warehouse in the city.

Nova Scotia Steel and Coal Co.'s coal output for June were satisfactory, being about 1,000 tons in advance of May. Colliery output was as follows: Princess 16,129 tons; Jubilee 14,513; Scotia 5,912; Florence 19,753. In the steel department an increase occurred of 1,700 tons. Steel output was 11,700 tons and pig iron 7,112.

Loomis & Sons, Ltd., $1,300,000; Dunn's Auto Markers, Ltd., $1,000,000; A. G. Mooney, Ltd., $250,000; Atlantic and St. Lawrence Stevedoring and Contracting Co., Ltd., $25,000; the Rose Castle Steamship Co. Ltd., $1,500,000; the North Eastern Drug and Chemical Co., Ltd., $100,000; Laurentian Graphite, Ltd., $500,000; Rosenbaum, Freeman Co., Ltd., $20,000; Birks Buildings, Ltd., $2,000,000.

TEMISKAMING BOARD OF TRADE

The Temiskaming Associated Board of Trade held a meeting on June 29 at Iroquois Falls, Ont. Among the resolutions passed was one which calls upon the government to open up at all well-established mining areas an assay office for the exclusive use of prospectors. A resolution was approved asking the Ontario legislators to visit the north in a body. The Canadian Passenger Association is to be urged to again put in force the week-end ticket which allowed a return trip on a single fare.

Hydro matters were discussed and a committee was named to gather information and report at the next meeting. The scheme of Mr. Smith, Timmins, to finance the building of a highway north was endorsed and a committee named to gather additional information before steps are taken to secure action on the proposal.

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labour reports that returns from the Dominion and Provincial Offices of the Employment Service for the week ending June 19, remain approximately the same as returns for the previous week. The offices reported that they had made 7,843 references to regular positions and that 6,965 placements were effected. This compares with 6,967 placements reported during the preceding week. In addition, 1,974 casual jobs were supplied, as compared with 1,870 during the week ended June 12.

During the week 8,730 applicants were registered, of whom 925 were women workers and 7,805 were men. This is a decrease of 318 in registration, when compared with the 9,048 applications of the preceding week. The number of vacancies notified by employers to the service during the week totalled 8,685 of which 1,356 were for men and 7,329 were for women. This represents a decrease of 884 when compared with the 9,569 vacancies of the preceding week. Of the placements in regular employment, 591 were women and 6,274 were men. The number of ex-service men reported as placed was 1,480.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt station for the week ended July 2nd: Timiskaming mine, 65,584; Nipissing mine, 86,058; Mining Corporation of Canada, 129,370; total, 281,012. The total since January is [illegible]962,9[illegible]3 pounds or 5,981.1 tons.

News of Municipal Finance

Record Bank Loans to Municipalities—Five New Townsites Laid Out in Saskatchewan--Cory Financial Statement for 1919 Shows Satisfactory Results—Fredericton Tax Rate Increases Ten Per Cent.

BANK loans to municipalities this year are 46 per cent. in advance of those last year, and are also considerably higher than in any year previous, indicating that there is still a considerable amount of permanent financing yet to be done. The peak appears to have been reached, however. As revealed in the last bank statement, there was an increase of only 1.5 per cent. for the month, as compared with an increase in the preceding period of 16.1 per cent. About this time of the year there is usually a slackening in bank credits, which continues while tax payments are being made. Tax collections so far this year have been exceptionally good. The following, table compiled by *The Monetary Times*, shows bank loans to municipalities since January, 1917:—

	1917.	1918.	1919.	1920.
January	$24,487,272	$40,015,466	$32,640,198	$46,147,388
February	26,121,324	43,535,628	36,830,183	52,690,790
March	29,877,911	50,652,061	41,993,305	62,992,675
April	35,931,996	55,685,350	47,911,199	72,281,019
May	39,700,191	57,728,226	50,356,227	73,904,635
June	42,757,673	58,000,424	52,349,353	....
July	43,989,207	56,589,173	54,455,738	....
August	43,940,176	56,662,931	57,536,867	....
September	42,721,563	47,977,172	57,033,309	......
October	41,204,781	46,275,106	56,116,897	....
November	36,459,598	40,865,358	52,703,363	......
December	36,353,039	30,684,052	42,635,290	....

St. Ubalde, Que.—A new municipality has been created in Portneuf County under the name of the village municipality of St. Ubalde.

Regina, Sask.—Total taxes collected during June, 1920, amounted to $710,000, as compared with $697,973 for the same month last year.

Fredericton, N.B.—The tax rate for 1920 has been fixed at $2.20, which is a 10 per cent. increase over that of 1919. Assessed value for taxation is $9,792,858, as compared with $7,175,708 last year.

Montreal, Que.—At a recent meeting of the administrative commission it was resolved to accept the offer of the Dominion Securities Corporation to sell to the city £200 sterling of obligations of the city of Montreal at [illegible] per cent., at a price bringing 6[illegible] per cent., the city to take care of the interest accruing from the date of purchase to the date of delivery.

Winnipeg, Man.—Tax receipts for the month of June this year amount to $236,520, as compared with $102,710 for the same period last year. For the statutory year commencing May 1, receipts exceed those of last year by $216,019.

Moncton, N.B.—Ratepayers have declined to endorse the agreement proposed to be entered into by the city council and the Moncton Tramways, Electric and Gas Co., for the taking over of the street railway and electric light works.

Brant County, Ont.—As finally adjusted, the following are the apportionments for the county assessment: Paris Tp., $1,800,000; Brantford Tp., $1,1[illegible],000; Burford Tp., $[illegible],100,[illegible]; S. Dumfries Tp., $2,797,200; Onondaga Tp., $1,[illegible]36,[illegible]00; Oakland Tp., $[illegible]07,856; total for county, $11,119,211.

Cory R.M., Sask.—A satisfactory statement is presented by the municipality for 1919, assets exceeding liabilities by $161,5[illegible]4. Total receipts for the year were $10[illegible], and expenditures, $[illegible]. There is a cash balance in the sum of $[illegible],9[illegible]2 and overdraft $1,986. Particulars of assessment show: total collections, $8[illegible]; cancellations, $2,029, and for taxes, $8,924, balance outstanding, $10[illegible]10.

Calgary, Alta.—Since the city took full control of the [illegible] the deficit in this department has [illegible] that [illegible] annually, as will be seen from the following: 1918, full control of old board, deficit for year, $103,000; 1919, control of old board for first five months, under control of city for last seven months, total deficit, $205,729; 1920, full control of city, estimated deficit for year, $271,274. Increased cost of living and wages is given as the reason for the enlargement of the deficit.

Saskatchewan.—Five new townsites have been laid out on the C.P.R. extension which is being constructed northeast from Lanigan crossing the C.N.R. at Watson. An inspection of the proposed sites has just been completed by W. O. Begg, town planning supervisor for the Saskatchewan government. The new towns are named: Unwin and Romance, between Lanigan and Watson, and north of Watson, Daphne, Magellan and Naicam. The last mentioned will likely be the terminus of the line for a period and it will probably be the most important town.

Guelph, Ont.—The 1919 hydro-electric report shows a net surplus after charging to revenue every expense incident to the year's business, including payments on debentures and sinking fund account and setting aside the required reserve of renewals. Total earnings were $107,438 and total expenses $90,081. The gross surplus was $17,356 and the depreciation charge $10,153, leaving a net surplus of $7,203. The Guelph system began operating in 1912, and during the whole period of seven years the yearly operations showed to such advantage that the Provincial Commission found it necessary to make several power rate reductions. The power rate to this municipality in 1912 was $25. This rate was reduced to $22 in 1913, to $21 in 1914, to $20 in 1916, and to $19 in 1918.

Toronto, Ont.—Revenue from the civic railway for the first six months of 1920 amounted to $258,169, as compared with $202,260 for the same period in 1919, an increase of $55,909.

The civic railway carried 15,353,846 passengers during this period, or 3,348,892 more than in the corresponding period of 1919. The percentage increase in the case of passengers carried was 27.89, and in the case of revenue 27.64. The following statement shows the number of passengers carried during the two respective half-years:—

	Passengers.	
	1919.	1920.
January	1,950,461	2,493,296
February	1,818,434	2,334,431
March	2,051,526	2,700,264
April	2,043,628	2,622,993
May	2,120,776	2,678,059
June	2,020,129	2,524,803

BRITISH CANADIAN AND GENERAL INVESTMENT

In presenting the annual report at the meeting of the British and General Investment Company, held in London, England, on June 15, the chairman made a reference to the fact that interest overdue, which it was now hoped might be collected, might be looked upon by the British government as income for the year and taxed as such. The management, he said, was not certain as to what taxation they would have to pay, but in any case a special reserve of £4,000 was being made for this purpose.

A good year's business in Canada was reported, and the profits show a substantial increase. A conservative estimate of the value of the company's assets found them to be £17,[illegible] in excess of the total shown in the balance sheet. This, added to the reserve and balance carried forward, would make a surplus of £2[illegible], and would give the shares a value of [illegible] per cent.

THE NEW DOMINION TAXES

"In amending the new taxation legislation in several minor points during its passage through the house," says July Investment Items, issued by the Royal Securities Corporation, "the finance minister shows a willingness to accept suggestions which is in pleasant contrast with the conviction of his predecessor that a budget proposal, once introduced, was something too sacred to be touched by the unhallowed fingers of amendment. It is a pity that the minister, while showing an open mind in these matters of detail, could not have been equally receptive to the very strong arguments put forward for the entire abolition of the excess profits tax. Taking the profits tax, the graduated income tax and the luxury taxes in combination, the present budget is class legislation of the most vicious kind, and is an attempt to make a small element of the population, and that the ablest and most progressive of its business men, bear practically the entire burden of the nation's expenditure. Such a policy of extreme class legislation if pursued much further will lead to the ultimate extinction of business ability and enterprise in the nation which adopts it.

"We repeat our opinion as expressed in the last number of Investment Items — the fundamental idea behind the sales and luxury taxes is sound, but the details of incidence and method of collection are further evidence of the unbusinesslike ideas attending the methods of collecting the great majority of Canadian taxes. A uniform percentage, and it could be a very small one, collected on the value of all commodities each time a change in ownership took place would have produced the necessary revenue and would have entirely removed the criticisms of discrimination which have been levelled against the new taxes. Collection would have been greatly simplified and equality of treatment would have been given to all classes of the community."

Government and Municipal Bond Market

Ontario Disposes of $3,000,000 Treasury Bills On Seven Per Cent. Basis—Municipalities Pay More Than Six and Half Per Cent For Loans—Numerous Money By-Laws Passed During Past Week

DEVELOPMENTS during the past week indicate that the bond market is entering a period of summer quietness. The announcement of the offering of $3,000,000 Ontario treasury bills was more or less of a surprise. The bills, however, which are being retailed at par and interest, are meeting with a good reception, according to the underwriters. Nearly all of the municipal issues are cleared off the market, and conditions at present, as indicated by the prices received during the past week, do not warrant the placing of any more than those which are absolutely necessary. There is still much new financing to be completed, both municipal and provincial, and should the market improve, it is certain that there will be a rush of new issues next fall.

Saskatchewan School and Telephone Debentures

Saskatchewan municipal telephone and school debentures sold in 1919, according to figures prepared by the Local Government Board, totalled $5,149,957, of which amount $230,506 was sold to local investors. Commenting upon the awakening interest in local investments, J. N. Bayne, commisiosner of the local government board, stated that this was an encouraging sign as the advantages of local sales are not wholly restricted to the financial aspect and the result of such sales is the increasing of community feeling and the awakening of an interest in local matters which makes for the general benefit of all the ratepayers.

During the year the Local Government Board received [illegible] applications for new schools, aggregating $1,8[illegible]5,175, including three city schools which totalled $429,000. The total school construction authorized by the board was $1,242,253, divided among the different classes of municipalities as follows: City schools, $139,000; village and town schools, $467,810; rural schools, $635,443. Rural telephone construction was responsible for the bulk of the municipal debenture issues floated last year. Out of the total no less than $3,574,160 was authorized for new telephone systems and extensions to existing lines. Authorizations for general municipal improvements for the year totalled $533,544, divided as follows: Cities, $401,320; towns, $58,328; villages, $[illegible]9,050; rural municipalities, $11,486.

Coming Offerings

The following is a list of debentures offered for sale of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate.	Maturity.	Tenders Close.
Emily Tp., Ont	$ 20,800	6	10-instal	July 10
Hawkesbury, Ont.	179,000	6	Various	July 12
Kenora, Ont	76,420.25	6½ & 7	Various	.
Renfrew, Ont	17,7[illegible]8	5 & 6	25 & 30-inst.	July 12
Capreol, Ont	17,000	6	10 & 20-inst.	July 21
Trail, B.C.	9,000	7	10-years	July 26

Renfrew, Ont.—The town is asking for tenders up till July 12, 1920, for the purchase of the following debentures: $[illegible],000 5 per cent. [illegible]-instalment, [illegible] 5 per cent. 30-instalment; $10,000 6 per cent. 30-instalment.

Debenture Notes

Regina, Sask.—The money by-laws totalling $102,150 will be submitted to the ratepayers on July 22.

Lancaster Tp., Ont.—The township has turned down all tenders for the [illegible] per cent. 10 and 20-instalment debentures.

Winnipeg, Man.—The Maryland bridge by-law calling for the raising of $[illegible],000, which was defeated recently, has [illegible] on the recount.

Niagara Falls, Ont.—A by-law to raise $33,000 for extensions and improvements to the city's hydro system, has been passed by the city council.

Courtenay, B.C.—The city will shortly authorize for the submission to ratepayers, a by-law calling for the raising of $50,000 of waterworks debentures.

Brandon, Man.—The city council has passed a by-law authorizing the temporary borrowing of $61,000 to meet debenture issues which are now falling due to that amount.

York Township, Ont.—The council has passed a by-law ratifying the issuing of debentures to the amount of $385,587 for the township's part of the Toronto-Bowmanville hydro radial.

Durham, Ont.—The municipality will guarantee bonds of Clark Metals, Ltd., to the extent of $15,000, and will also guarantee the bonds of the Reb Roy Mills, Ltd., to the extent of $25,000.

Wingham, Ont.—Ratepayers have given their approval of two money by-laws, one being for the raising of $18,500 for the construction of a concrete bridge and the other for the raising of $6,500 to extend water mains.

Montreal, Que.—On the recommendation of the assistant treasurer of the city the Administrative Commission has authorized the issue of $500,000 worth of treasury bonds in favor of the Bank of Montreal payable on demand, carrying interest of 6 per cent. per annum, payable monthly.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from May 17 to June 19:—

Villages: Balcarres, $6,500, grading, fire apparatus and hall; Hague, $1,400, concrete sidewalks.

Rural Municipality: Estevan, $2,000, furnishing municipal hall.

Town: Indian Head, $7,000, water works, electric light and sewers.

Cities: Prince Albert, $65,000, electric light plant; Saskatoon, $66,547, street railway and electric light; Regina, $[illegible]55,1[illegible]7, various local improvements.

Besides these a large number of school district and rural telephone debentures were also authorized.

Bond Sales

Township of Teck, Ont.—Messrs. Wood, Gundy and Co. have purchased $15,000 6 per cent. 15-instalment debentures at 96.54, at which price the township pays about 6.50 for its money. The debentures are guaranteed by the province of Ontario.

Ontario.—Messrs. A. Jarvis and Co. and the Home Bank of Canada purchased recently from the province, $3,000,000 6 per cent. treasury bills, dated June 15, 1920, and maturing in six months' time, at 99.50, at which price the province pays about 7 per cent. for its money. It is stated that the bills will be retired by a bond issue late in the fall.

Sudbury, Ont.—Messrs. Wood, Gundy and Co. have been granted an option on $107,004.75 5 and 6 per cent. 5, 10 and 20-year debentures, issued for various local improvement purposes, at 91.63, which is on about a 6⅝ basis. No offer was received to take the bonds outright, but four companies asked for options as follows:—

Wood, Gundy and Co.	91.63
Brent, Noxon and Co.	90.00 & int.
A. E. Ames and Co.	89.66 & int.
G. A. Stimson and Co.	No price stated.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from May 17 to June 19, 1920:—

Rural Municipality: Hillsborough, $6,000, Harris, Read and Co.

Victory Bond Owners

rightly congratulate themselves upon their choice of investment. The announcement that there will be no increase in the supply of Dominion Government Bonds assures them that the Victory Bond market will gradually strengthen, while owners of tax exempt bonds realize that the increased taxation upon income has added to the intrinsic value of their holdings.

Put your investment funds into Victory Loan Bonds.

Alliston, Ont.—Tenders will be received by the town until 8 p.m., July 19th, 1920, for the purchase of $15,707.39 6 per cent. 20-instalment local improvement debentures, which are guaranteed by the county of Simcoe. J. E. Addis, municipal clerk.

Quebec.—When the province offered $5,000,000 5½ per cent. 5 and 10-year bonds in April, no satisfactory tenders were received. Since then, however, the province has been carrying on private negotiations with a view of placing as much of the issue as possible. Bonds to the extent of 1,000,000 have been sold to the Montreal City and District Savings Bank, while another $1,000,000 is now being disposed of by the Bank of Montreal through local brokers. It is apparent that the interest rate has been changed, as the bonds are selling at 100 to yield 6 per cent.

SOME ALBERTA TOWNS AND THEIR PROBLEMS

Arrangements Just Made for Macleod and Bassano—Blairmore, Taber and Redcliff Informally Discussed—Outlook for Bondholders is Good

(Special to *The Monetary Times.*)

Calgary, July 3rd, 1920.

DURING the last few days some important conferences have taken place here between representatives of the towns of Macleod, Blairmore, Taber, Redcliff and Bassano and representatives of their bondholders. These conferences were of a private nature. Judging by the expressions of opinion of the local financial men, the outcome was of a satisfactory character. The towns named, as previously reported, have had difficulty in meeting their instalments of principal and interest falling due during the past year. Naturally, such difficulties created uneasiness. Towns which had securities to market found that the existence of trouble made it impossible to find purchasers. The presence in Calgary at the time of members of the government, and also local bank managers, indicated that general interest was taken in the discussions that were proceeding. E. G. Long, of Toronto, who is known to be in close touch with the market for municipal securities, and John Appleton, secretary of the Dominion Mortgage and Investments Association, which body includes in its membership the largest purchasers of municipal securities, represented eastern investors. The nature of the conferences which took place was disclosed at the sittings in the Appellate Court of the Alberta Municipality Finances Commission, which is composed of Chief Justice Harvey, Justices Beck and Hyndman, and H. M. E. Evans.

Macleod Readjustment

Mr. Long, in addressing the commission, intimated that he had, along with Mr. Appleton, met representatives of the town of Macleod and had arranged with them a readjustment of the budget of expenditures, which he thought would be quite satisfactory to the bondholders. This budget provided for an assessment of land and improvements, on which a rate of 66 mills on the dollar, estimated to yield sufficient in taxes to pay the current interest on the funded debt, as well as to provide for ordinary current expenditure. Mr. Long referred in complimentary terms to the apparent determination of the officials and citizens of Macleod to put the town's affairs in a better shape. Mistakes of the past were frankly admitted, and corrective measures were recognized as being absolutely necessary, and in order to carry out this arrangement, Mr. Long intimated that he would recommend to the bondholders the temporary cessation of assessment for sinking fund purposes.

Perhaps the brightest spot in the statement he made was a reference to the extraordinary measures taken with a view to more efficient and economical operation of the waterworks and electric light plants. He was very glad to know from the representatives of Macleod that the operation of these utilities was now on such a basis as would result in their carrying themselves in place of showing a very substantial deficit each year. This was regarded as an evidence of a determination on the part of the town council and the citizens behind it to rehabilitate their civic financial position. The carrying out of the arrangements made between the town's representatives and those of the bondholders required the co-operation of the town's bank, and it was hoped that this would be obtained. Up to the present time no word has been received as to what action the bank in question has determined upon. The commission, as well as the bondholders' representatives, have approved the plan, and it is anticipated that as a result the bank will be a party to the carrying out of the new arrangement, which will aid the town to overcome its temporary financial difficulties.

Bassano Arrears Funded

After dealing with Macleod the commission proceeded to enquire into the affairs of Bassano. The mayor of that town and its secretary-treasurer arranged with the bondholders' representatives to fund a small amount of arrears of interest and principal for a period of ten years, and also to adjust the town's assessment and the mill rate so as to provide sufficient funds to meet its current obligations and the services of its funded debt. The town has also received considerable credit from the bank, and its debt in this respect will be funded on a basis similar to that arranged with respect to debt appears. As in the case of Macleod, the bank will have to be a party to this arrangement in order to carry it through.

Other Towns Considered

These were the only towns which were dealt with officially by the commission. It is understood, however, that informal conferences were held with others. Blairmore was one of these and it finds itself in difficulties which can be rectified without much trouble. It was the general opinion that by an adjustment of the rateable assessment and of the charges for electricity and water services, that the town would be able to restore in two years its financial position to normal. At present it is prosperous and its people are employed at good wages. As a result of the interviews with the bondholders' representatives, the officials felt that within a short time they would have the financial affairs of the town on a good basis. It is understood, also, that the financial men interested in the enquiry are quite hopeful with regard to the future of this mining centre.

Representatives of the town of Redcliff fully explained the town's position to their bondholders' representatives and it is understood that a tentative arrangement was made so as to give the council of that town a further time in which to carry out certain plans they have in mind which will remove the difficulties they have been in for the past few months.

In the case of Taber, the officials undertook to deal with their arrears during the current year. Representatives intimated that they had certain plans in course of being carried out which would result in their financial needs being relieved very considerably. In the event of the failure of such plans in respect of both Taber and Redcliff, the com-

National Breweries and Quebec Railway Feature Interesting Session on Montreal Exchange—Slight Improvement in Toronto Market For the Week—L.R. Steel Company Establishing Canadian Business—Public Offering of Dominion Engineering Works Preferred Stock

ACTIONS of stocks on the New York market this week have been interpreted as indicating a fair advance during the next few weeks. There was a moderation in call rates, but not to any large extent. Money is expected to play an important part in the market situation in the future. The general feeling is that the rates will be lower than they have been for some time.

Following a week of comparative quietness, the Montreal market, for the eight-day period ended July 7th, broadened considerably, with some new high records in trading and higher prices established in some issues. National Breweries feature activities with sales of 57,673, and a gain of 13¾ points. There was a falling away of 5 points at the close, however. Quebec Railway which has been an interesting feature for some time, attracted even more attention with 39,535 shares changing hands and a gain of 3¼ points over the previous high. It is the belief that the talk of the amalgamation with the Quebec Public Service Corporation will develop into something definite shortly. Although the bulk of the demand was centred upon the above-named issues, public interest was fairly well distributed throughout the entire list. There appeared to be a revival in interest in the paper stocks, Spanish River and Laurentide being conspicuous among that group. Tight money continues to be a factor in the market, but brokers are co-operating with the exchange in the employment of funds which might be temporarily unemployed, in order to relieve the situation.

Business in Toronto showed a slight improvement over that of the preceding week, but with the exception of Quebec Railway, there were no new developments of any significance. Price fluctuations were of an ordinary nature. Canada Bread, Canada Steamships, C.P.R., and Spanish River, common, were stronger, while Spanish River, preferred, was notable among the weak issues. Steel Company of Canada and Toronto Railway also registered fractional declines.

There was slightly increased activity in the industrial bond market, Quebec Railway and Dominion Textile featuring that section. Some fractional price changes were also shown.

Canadian L. R. Steel Company

About $2,000,000 of stock in the L. R. Steel Company, Inc., which has been organized to operate a system of chain stores in the United States and Canada, has already been sold. The company is incorporated under the laws of the State of Delaware, but there is also a Canadian subsidiary, the L. R. Steel Company, Ltd., all the stock in which is owned by the American company. Seven per cent. cumulative preferred stock is authorized to the amount of $10,000,000; the common stock, of which 100,000 shares are authorized, has no par value. The preferred shares are being offered at par ($100), with a bonus of one share of common with each two shares of preferred.

Goods priced at 5 cents to $1 will be sold in the stores operated, and specialty lines priced up to $10 may also be carried in separate shops. Thirty-seven stores are now under lease or in actual operation. Properties have been purchased in Ottawa and Toronto, and leases secured in Montreal, Quebec and Sherbrooke. L. R. Steel, the president, has been engaged in the chain store business since before 1900, and until September, 1919, was vice-president and general manager of the Metropolitan Stores, Inc. Practically all the other directors are also experienced in the business. The head office is in Buffalo, with branches in Toronto and other cities.

Capital Increases

Companies registered under provincial charters have been authorized to increase their capital stock as follows, the name of the province being indicated:—

	Former capital	Increased to
St. Thomas Packing Co. (Ontario) ...	$250,000	$1,000,000
Premier Grain Elevator and Milling Co. (Manitoba)		400,000
Winnipeg Cold Storage Co., Ltd. (Manitoba)	100,000	200,000

In connection with the former company 7,500 shares of $100 each will be issued, of which 5,000 are to be preferred. Regarding the last-mentioned company 1,000 new shares of capital will be issued, having a par value of $100.

Notice is being mailed to shareholders of Provincial Paper Mills Company, requesting that outstanding certificates be sent in for the issue of new certificates on the basis of three shares for two. Fractions are to be adjusted on the basis of par.

Dominion Engineering Works Offering

Public offering is now being made of $1,400,000 8 per cent. cumulative redeemable preferred stock of the Dominion Engineering Works, Ltd., by Messrs. Hanson Bros., Aldred and Co., Ltd., and McDougall and Cowans, Montreal, at 98, with a bonus of 25 per cent. of common stock.

The Dominion Engineering Works, Ltd., has been formed for the purpose of producing in Canada machinery which comes largely into use in the development of the production of power and the manufacture of pulp and paper. The plant acquired by the company consists of the buildings which were constructed by the St. Lawrence Bridge Co., and which

CORPORATION SECURITIES MARKET

(Continued from page [illegible])

are located on a large block of land adjacent to the property of the Dominion Bridge Co., at Lachine, Que. The company has entered into an agreement with the firm of William Cramp and Sons, Ship and Engine Building Co. of Philadelphia, for the exclusive use in Canada and the British Empire of its designs for water wheels and other hydraulic machinery. Through this association and the company's acquisition of the paper machine business of the Dominion Engineering and Machinery Co., it will be in a position to supply the most recent designs of such equipment and of any size to meet Canadian requirements. Other lines of manufacture will include hydraulic valves, hydraulic governors, other accessories involved in hydraulic and paper mill installations and centrifugal and other pumps.

Directors of the company include: President, G. H. Duggan, president Dominion Bridge Co., Ltd.; vice-president, A. J. Brown, K.C., director of the Royal Bank; W. F. Angus, director of Canadian Car and Foundry Co.; Geo. Chahoon, Jr., president of Laurentide Co., Ltd.; Sir Herbert S. Holt, president of the Royal Bank of Canada; J. C. Smith, vice-president, Shawinigan Water and Power Co.

Mutual Finance Corporation

The Mutual Finance Corporation, Ltd., of Windsor, Ont., is offering direct to the public preferred shares having a par value of $10 and common shares having a par value of $10, at $10 and $11 per share, respectively. The company was incorporated under Dominion charter in May, 1919, with authorized capital of $300,000, which was increased in March, 1920, to $1,200,000, of which $400,000 is common and $800,000 is preferred. Half of the stock has already been sold. The cost of selling the stock is not to exceed 15 per cent., and no promotion stock is to be issued. The directors of the company include: President, A. F. Healy, past president of the Border Chamber of Commerce and secretary-treasurer of Healy-Page and Chappus, Ltd.; vice-president, E. B. Winter, mayor of Windsor; secretary-treasurer, W. D. Roach, Windsor; and J. L. Jones, Detroit. Mr. Jones is director of the company, and O. J. Brooks is [illegible] manager; the assistant treasurer is H. A. McEwen, formerly a manager of the Merchants Bank.

The company specializes in [illegible] of improved property, paying the builder in cash and obtaining from him a deed of warranty. These [illegible] are pledged with the Royal Trust Co., Montreal, and debentures issued to the amount of 60 per cent. of their value. A considerable amount of these debentures have already been sold, some of them in the Netherlands.

An issue of $500,000 10-year 6 per cent. [illegible] is contemplated by the Royal Montreal Golf Club, Montreal, Que., in connection with its improvement [illegible]. A meeting of shareholders has been called for [illegible] at the Windsor Hotel to vote on the proposal, [illegible] less than two-thirds of the members being required to sanction the issue.

Messrs. Tanner, Gates and Co., Toronto, report that the $250,000 7 per cent., first mortgage gold bonds of Ontario Smelters and Refiners, Ltd., maturing February [illegible] and serially thereafter until February, [illegible], have been practically disposed of at par, with a bonus of [illegible] per cent. common stock. The bonds are redeemable [illegible] on thirty days' notice at the option of the company at [illegible] and interest.

Good crops in the west are not without [illegible] difficulties, of which the labor problem is one of the most important. This year 50,000 extra farm hands are wanted, as follows: Manitoba, 15,000; [illegible] 20,000; Alberta, 15,000.

FIRE LOSSES IN ONTARIO

1919 Total was $10,511,232, of Which $6,977,778 was Covered by Insurance—Analysis of Causes and of Losses

THE fire [illegible] of Ontario has [illegible] its report for [illegible] 1919. The year is found to [illegible] most favorable [illegible] [illegible]. The losses and [illegible] by counties were as follows:—

Corporation Finance

Exclusion of Two Companies from Steel Merger Reduces Capitalization of New Consolidation—Other Important Changes Also Shown in Balance Sheet—Increased Profits For Tooke Bros.—Brazilian Traction Revenue Shows Big Improvement in 1919

Brazilian Traction Light and Power Co., Ltd.—Gross earnings of the company for the month of May, 1920, amounted to 10,985,000 milreis, an increase of 1,423,000 milreis, as compared with the same month last year. Net earnings, after operating expenses of 4,723,000 milreis, totalled 6,262,000, an increase of 1,045,000 milreis over last year. For the five months from January 1, net advanced 3,788,000 milreis over last year to 27,261,000.

Porto Rico Railways Co., Ltd.—The following is a comparative statement of earnings of the company for May, 1920:—

	1919.	1920.	Change.
For May:			
Gross	$103,225	$116,877	+ $13,652
Net	47,068	42,514	— 5,553
For five months:			
Gross	478,777	547,944	+ 69,166
Net	177,008	214,361	+ 37,352

Whalen Pulp and Paper Company.—In submitting the annual statement for the year ended February 29th, 1920, Sir Geo. Bury, president of the company, says: "Your directors, while optimistic as to the future, recognize mounting labor and material costs, and prudence demands conservative financing, looking possible falling markets." The following comparison of the principal figures, shows that the position of the company has been much improved:—

	1920.	1919.
Gross earnings	$4,619,734	$4,065,206
Expenses	3,741,185	3,952,892
Net earnings	878,549	112,311
Net profits	323,757	337,729
Current assets .	1,655,019	1,003,080
Current liabilities ..	1,012,890	2,184,424
Total assets	18,420,831	16,818,608
Pulp produced (tons)	47,962	41,814
Lumber pro. (m. ft.)	12,731	20,081
Shingles pro. (m.)	61,198	49,190

Deficit.

Western Power Co. of Canada, Ltd.—For the month of May, according to reports from Vancouver, operating revenues amounted to $44,945, an increase of 11.1 per cent., compared with May, 1919, and net earnings of $28,101, an increase of 6.7 per cent., compared with May, 1919. There was included in operating expenses for depreciation during the month of May, 1920, the sum of $2,525. For the 12 months ended May 31, 1920, the company shows operating revenues of $501,668, an increase of 9.5 per cent. over the same period in 1919, and net earnings of $303,845, an increase of 3.5 per cent., compared with the same period in 1919, after making allowance for depreciation of $25,657.

Dominion Flour Mills, Ltd.—A meeting of bondholders of the company is called for July 14 next, for the purpose of securing their approval to a resolution empowering the directors to dispose of all of their Ontario mills, should they deem it advisable. It is pointed out by the company that they are not entertaining any proposals to sell any of their mills in Ontario at the moment, but should such an offer be made at any time they would be in a better position to take advantage of it. The company operates two mills at Brantford, as well as a mill at Hamilton, Copetown and at St. George, making a total of five mills in the province of Ontario.

Dominion Steel Corporation.—Shareholders of the company are in receipt of a formal notice from the directors calling a meeting for July 15 next, to ratify the recommendations of the board in respect to the British Empire Steel Corporation proposals and to approve of the amended balance sheet. The previous balance sheet showed the total issued capital to be $213,750,000, this has been amended and reduced as will be seen from the following comparison:—

Issued capital stock:	Formerly proposed.	Presently planned.
Seven per cent. cumulative preferred	$ 37,000,000	$ 36,250,000
Eight per cent. cumulative and participating preferred	25,000,000	25,000,000
Seven per cent. non-cumulative preferred	72,750,000	*65,532,815
Common stock	79,000,000	65,000,000
Total issued	$213,750,000	$191,782,815

In reference to the sale of the 8 per cent. preferred, President Wolvin, of the Dominion Steel, states that it has been agreed that not less than $20,000,000 of the $25,000,000 thus placed in the treasury will be spent in improvements, development and extension of the undertakings of the Dominion and Nova Scotia companies.

The revised balance sheet, compared with former figures, reflects the exclusion of the Canada Foundries and Forgings Co. and the Port Arthur Shipbuilding Co., from the merger, and is as follows:—

Assets.	New figures.	Old figures.
Properties, per appraisals	$394,076,920	$403,770,990
Deferred balances	79,209	79,209
Cash	26,522,759	24,091,269

	$474,016,345	$484,389,361

Besides being reduced in amount, this class of stock has been changed from non-cumulative to cumulative, so that the account will now be known in the balance sheet as $65,522,815 7 per cent., cumulative second preferred stock. It is pointed out that the change will enhance the value of the new shares in a very palpable way. It is also pointed out that the first cumulative preferred will be exchangeable for the preference stock of the constituent companies, the holders of which have the option of making such exchange or retaining their present securities, while the 8 per cent. cumulative and participating preferred is to be issued to secure additional capital to extend and improve the various units of the new consolidation. Both issues will rank equal as to dividends and assets.

Bell Telephone Co.—According to a statement made to Mayor Church, Toronto, the application for increased rates, predicted by K. J. Dunstan, Ontario manager of the company, will be opposed by the city. "Any increase in rates will be strenuously opposed by the city," declared the mayor. "It is up to the company to give a good service before it talks about higher rates. The provincial Hydro Commission has been asked by the municipalities to report on a system of hydro telephones, but that has been held up by the U.F.O. government, just as they are holding up the radials."

Assistant City Solicitor Irving S. Fairty, who fought the recent increase in rates before the Railway Board, stated that it had been clearly shown that even the "emergency increase" granted the company by the board was not justified. The city's appeal is now being considered. Mr. Fairty pointed out that the city had put in evidence to show that the increased rates were not necessary, while the company had failed as yet to give figures on depreciation to show that the recent increase was justified.

Tooke Bros., Ltd.—Net profits for the year ended May 31, after provision is made for war taxes, amounted to $238,230, a gain of $85,920 over the 1919 showing, and one of $102,472 in excess of that for the preceding year. After depreciation of $15,000 was provided for, and deducting preferred dividends, which included all arrears on the senior securities of the company, there remained a balance of $119,805 applicable to the common stock, against $51,122 in the 1919 period and $38,070 in the 1918 one. The year's earnings, after all deductions, are equal to, approximately, 18.5 per cent. on the outstanding common stock issue of $650,000.

The balance sheet shows an excess of current assets over liabilities of a similar category of $727,377, compared with $388,296 at the end of the company's last fiscal year. Inventories are up by $291,056, reflecting, in all likelihood, the increased costs of raw materials, but this increase is offset by the item of $491,731 in bank loans, compared with $315,000 as at May 31 a year ago. Accounts payable are also higher at $484,336, against $395,966 last year.

Brazilian Traction, Light and Power Co.—An increase of nearly 45 per cent. in net revenue of the company is the feature of the financial statement for the year ended December 31st, 1919, now in the hands of shareholders. The company had net revenue last year of $7,873,967, as compared with $5,419,672 in 1918, and $5,266,518 in 1917. After payment of $600,000 dividends on preferred there was a surplus for the year of $7,273,967, or equal to 6.85 per cent. on the $106,000,000 common stock. Secretary J. M. Smith, reporting for the board, points out that between January 1st, 1917, and December 31st, 1919, surplus revenue amounting to $15,196,021 has been applied as follows:

In reduction of floating debt	$ 2,840,914
Toward necessary capital expenditures	12,355,107
Total	$15,196,021

The surplus revenue for the year, as has been already pointed out, amounted to $7,273,967.26, which, with the balance of $7,613,041.31 brought forward from 1918, gives a total of $14,887,008.57. During the past three years the sum of approximately $12,300,000 has been utilized towards meeting capital expenditure on the properties, and a corresponding amount has therefore been transferred to general reserve account, leaving a balance of $2,587,008.57 to be carried forward in profit and loss account. The sum reinvested in the enterprise out of revenue since the inception of the companies amounted at the end of the year to $[illegible]. The construction work on capital account carried on during the year comprised additions and extensions to the tramway, light, power, gas and telephone [illegible] the amount expended for this purpose [illegible] the sum of $2,361,385 was spent [illegible]

Secretary Smith in commenting [illegible] as affecting the company, says: "The [illegible] for exchange on London [illegible] from 13 5-64d. in January to 17 41-64d. [illegible] rate for the [illegible] for the year 1918. The [illegible] corresponding [illegible] for the [illegible] little change in the value of the [illegible] New York. The [illegible] during 1919 was 20.[illegible] cents [illegible] as compared with 25.59 cents during the previous year. On funds remitted from New York to [illegible] between 1.27 [illegible] per cent. and [illegible] per cent., the average for the year being [illegible] per cent."

The balance sheet shows considerable improvement in working capital. Current assets [illegible] as compared with $11,202,389, while current liabilities have been reduced to $7,244,893 from $[illegible] in 1918. Total assets have risen from $230,505,576 to $[illegible].

NOVA SCOTIA FIRE PREVENTION

The fire prevention board recently formed under the Nova Scotia Fire Prevention Act met in Halifax on June [illegible]. It consist of A. H. Whitman, Halifax; Charles V. Wetmore, Sydney; M. B. P. Saunders, Col. W. E. Thompson, J. F. W. Doane, Halifax, and James Sealy, of Kentville.

It was decided to advertise for a fire marshal whose duties will be to investigate, upon the recommendation of local assistants, the origin and circumstances of every fire in which property has been destroyed or damaged, with a special view of ascertaining whether such fires have been the result of negligence, accident or design. The investigations are to be begun within three days following the fire by the local assistant, who may be the chief of the fire department in each city, town or municipality in which a fire department exists, and the mayor or warden of every town or municipality in which a fire department does not exist. The fire marshal will be invested with authority to enter at all times during the night or day into a building or premises where a fire had occurred, and also other buildings and premises adjoining or near the same that he deems necessary in connection with the investigation.

In case of fires of a suspicious nature a [illegible] report will be made containing essential facts regarding the property. If after investigation the fire marshal is of the opinion that there is sufficient evidence to charge any person with the crime of arson, he will at once report to the attorney-general, and furnish him with the names of witnesses and all information to be obtained. Other duties are assigned the fire marshal, and are outlined in the Fire Prevention Act. He will have the whole province under his jurisdiction.

A FIRE IN[illegible] [illegible] 150

RECENT FIRES

Large Boarding-house at Niagara Falls, Irving and McKillop at Calgary and Kidd Mill at Prince Albert had the Largest Losses this Week

Arden, Ont.—Sawmill, owned by Albert Marsh, destroyed. There was no insurance.

Belleville, Ont.—July 2—Cheese factory, owned by H. R. Free, was destroyed. Loss partly covered by insurance.

Bowmanville, Ont.—July 3—Farm buildings, owned by Alfred C. Hardy, destroyed. Fire caused by lightning.

Calgary, Alta.—June 29—Garage belonging to Irving and McKillop Motors damaged. Loss is estimated at $30,000. The fire was caused by gasoline in the radiator shop.

Cobourg, Ont.—June 30—Cheese factory belonging to H. R. Fee at Cold Springs destroyed. The loss is covered by insurance.

Fleming, Sask.—June 30—Home of Mrs. Harry Bowering destroyed. Fire was caused by an explosion from an oil lamp. Two fatalities.

Forest, Ont.—July 2—Barn, owned by N. Herbert, destroyed. Fire caused by lightning.

Halifax, N.S.—June 27—Stables belonging to J. A. Leaman and Co. destroyed.

Montreal, Que.—July 3—Sawmill belonging to Bickerdike Harbor Commisisoners destroyed. The fire was caused from sparks from the furnace.

Nelson, B.C.—July 2—O'Neil, Irvine and Mann Lumber Co. destroyed. Fire due to dry weather.

New Glasgow, N.S.—July 7—Main workshop of the Maritime Bridge Co. destroyed.

Niagara Falls, Ont.—July 7—Large boarding-house destroyed. Loss is $35,000, fully covered by insurance.

Ottawa, Ont.—July 7—Four residences damaged. Loss, $500.

Portsmouth Ont.—July 2—Residence of Rev. F. W. McDonald damaged. Fire was caused by lightning. Loss fully covered by insurance.

Prince Albert, Sask.—June 19—Kidd Mill was damaged. Estimated loss, $25,000, partly covered by insurance. Fire believed to have been started by children playing with matches.

Quebec, Que.—July 5—The station of Mastai, on the Q.R.L. H. and P. Co., Montmorency division, was destroyed by fire.

St. John, Nfld—July 4—Villages of Lamanche, New Chelsea and the Great Northern Pond have been damaged during the forest fires in Newfoundland.

Thorold, Ont.—June 17—Residence of Angelo Dame damaged. Loss, $7,000.

Toronto, Ont.—July 5—Lumber belonging to Ontario Wrecking and Construction Co. was destroyed when the barn caught fire. Estimated loss, $5,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Allen, Sask.—June 1—Barn and equipment belonging to K. Selzter destroyed. The total loss on contents and building was $10,000, with insurance of $600 on the building.

Ayr, Ont.—June 14—Plant of John Watson Manufacturing Co. destroyed by fire. The fire was caused by incendiarism. Total loss, $[illegible]00,000. Insurance of $70,000. Two-story brick building, occupied by the Canadian Bank of Commerce and owned by Dominion Realty Co., Ltd., was destroyed. The fire was caused by heat from the Watson Manufacturing Co. Total loss on building, $300. Insurance, $3,000.

Frindale, Ont.—June 13—House and barn belonging to Frindale Farms, Ltd., destroyed. Fire was caused by lightning. The total damage to contents and building was $50,000. Insurance in the North British and Mercantile, $25,000.

Moncton, N.B.—May 26—Bank of Nova Scotia, a store and law and insurance offices were destroyed. The total loss is $20,000, fully covered by insurance.

Ontario.—The fire marshal's report for March, 1920, shows that during the month there were 919 fires, with a loss of $889,205, of which $633,443 fell upon the insurance companies and the balance of $255,760 was uncovered. The corresponding number of fires in March, 1919, was 832, with a loss of $795,791, of which $618,555 was met by the insurance companies.

Saskatchewan.—The fire marshal's report for the year 1919 in the province of Saskatchewan shows losses totalling $2,400,000. The total number of fires reported in 1919 was 1,385, nearly half of these conflagrations being in dwelling-houses. Others were: Stores, 138, dwellings 603, elevators 35, schools 25, churches 7, garages 21, granaries 48, livery barns 15, poolrooms 12.

Carelessness in handling gasoline and coal oil was responsible for serious injury to 24 people.

St. Catharines, Ont.—July 1—Residence of Thos. Pattington damaged. Total loss on contents and building, $3,000, fully covered by insurance. The fire was caused by an electric iron.

Vancouver, B.C.—June 20—The Balmoral apartment house fire, which occurred on June 20th, caused a loss of $50,000 on the building, with insurance of $22,500 in Yorkshire and Home and $15,000 in the Newark Insurance Co. Loss on the contents was $35,000, with insurance of $10,000. Five fatalities.

Winnipeg, Man.—June 15—D. E. Adams Coal destroyed with a total loss of $40,000. Insurance of $12,000 in the Alliance and Occidental Insurance Companies.

SOME ALBERTA TOWNS AND THEIR PROBLEMS

(Continued from page 44)

mission will make further enquiry into their position. To this arrangement the bondholders' representatives assented.

The hopeful feature of the situation according to those in touch with the bondholders, is that more economy is being exercised in town administration and greater care is being given to the efficient management of utilities. It is now being more fully realized by these municipal bodies that borrowing leaves behind it obligations which must be met and that there is a limit to credit extended by banks. Another fact more clearly realized is that the amount of money obtainable in the form of taxes on unimproved land, particularly land held by speculators and non-residents, is limited and as a source of annual revenue, is quite undependable. A reliable source and one on which greater dependence will have to be placed is improved property and property which is in actual use by the resident citizens. Taber is fortunate in being a mining centre, and Redcliff has behind it some active industries. Their respective positions will be strengthened also by improved local agricultural conditions and also by developments of irrigation plans.

Crop Prospects are Encouraging

At the present time it seems to be assured that crops will be normal if not much better than normal. This means a great deal to all the towns that came under review and it is now believed that they will all be able to take care of their debt and the interest upon it. It is felt here that if the arrangements made between representatives, respectively of the bondholders and the towns concerned, are carried out, it will materially improve the municipal credit for the entire province of Alberta. Hon. C. R. Mitchell, provincial treasurer of the province, appeared to be very pleased with the result of the negotiations. If the results are as hoped, it will leave Alberta in a much better position than it has been in for some time. There only remains one municipality, the affairs of which have not been adjusted satisfactorily, and if they are eventually cleared up, Alberta will be able to face the financial markets with the advantage of being able to say that none of its towns have caused loss of principal to holders of their debentures. If the municipalities and the government of the province can attain to this position, it will assist greatly in securing capital which will certainly be required for growth and development.

Can Public Utilities Be Operated at Cost?

Municipalities Have Had Difficulty in Adjusting Revenue to Expenditure—Increase in Operating Expenses Last Year Was Not Anticipated—Citizen's Lack of Interest in Their Enterprise—The Experience of Lethbridge

By ANGUS LYELL

THE efficient municipal management of public utilities, such as electric light and power, waterworks and street railway, is a matter to which the average citizen pays far too little attention. He will complain, of course, should the service become grossly inefficient or should there be temporary discontinuance, through accident or other cause. This is about all the interest the average ratepayer takes in municipal management, except, perhaps, to protest when there is an announcement that, say, the electric light department has yielded a surplus for the year. A surplus! Why, ridiculous. The power plant should have been operated at cost and the charge to the consumer reduced. Such is no uncommon line of talk.

No Interest in Civic Industry

This lack of interest in the municipal administration of utilities is well shown by the general inaccessibility of data pertaining to such management, that is, inaccessibility to the average citizen. All cities now-a-days have an annual audit, and locked up in the archives of the city hall is a mass of useful information pertaining to the city's affairs. But in addition to the city's bank and some stock brokers and a few more individuals more or less interested, how many people become conversant with the year's operations? Go into almost any city in Canada and ask the average man, even the average business man, for details of the capitalization and operation of his city's power plant, or waterworks, or even street railway, and in a very large number of cases you will be referred to the city's officials. What the average man usually knows to-day is that the street railway is being operated at a loss and that there is an agitation for increasing the fares. Question him on the cause of the loss and you will find that he cannot discuss details. About the only informatian you can get is that the operating expenses are said to be increasing faster than the revenue.

Ratepayers and Shareholders

Such apathy to civic affairs is not a healthy sign. There is no valid reason why every city should not publish annually for general circulation a complete financial statement, showing clearly the result of the year's operations and the city's standing financially. A city is a corporation just the same as a joint stock company incorporated for the purpose of marketing, say, a food product. The only difference is that the one is a public concern and the other is private. Both are governed by the powers contained in their charter. Both have beneficiaries—one the ratepayers, the other the shareholders. These beneficiaries [illegible] are the aldermen of a city just as [illegible] of a joint stock company. Both [illegible] talization basis and have [illegible] management problems to solve and [illegible] while the shareholders of the private company usually follow its operations more or less closely, the citizens of the municipality are generally apathetic. They do not, as a rule, even demand the issue to all taxpayers of an annual financial statement.

Service at Cost is Aim

The object of placing the operation of a public utility under municipal control is to give the best possible service at the least cost. The theory is that the utility should be operated at cost. Under private ownership the aim is to create a surplus, so as to provide for the payment of dividends to the shareholders. The dividends the citizens expect are better service and less cost. They do not look for a surplus. They want operation at cost.

Now, this is easier said than done. The city of Lethbridge, for example, which, for a number of years has been issuing annual financial statements, has been unable to operate its utilities at cost. It operates four important utilities—a power plant, waterworks, street railway and a coal mine. I have before me the reports for the years 1911 to 1918 inclusive and in none of these years has the city been able to operate exactly at cost.

Example of Lethbridge Light and Power

Take the electric light and power department. Here are some interesting figures pertaining to [illegible]

Year	Revenue	Operating Expenses	[illegible]	[illegible]	[illegible]
1911	$ 88,04	$43,476	$ 8,8[illegible]	[illegible]	[illegible]
1912	108,[illegible]	57,29[illegible]	9,17[illegible]	11,[illegible]	[illegible]
1913	109,875	71,5[illegible]	13,100	4,418	[illegible]
1914	110,898	64,190	10,964	6,071	[illegible]
1915	110,585	64,6[illegible]	[illegible]	[illegible]	[illegible]
1916	116,118	63,139	[illegible]	[illegible]	[illegible]
1917	110,317	67,160	[illegible]	[illegible]	[illegible]
1918	112,8[illegible]	57,11[illegible]	[illegible]		[illegible]

Apparently, after the [illegible] 1911 and 1912, when the [illegible] intended to reduce the [illegible] find that [illegible] ing fund and [illegible] there was an [illegible] slight [illegible] [illegible] to the year 1917 [illegible] was an increase in the revenue of nearly $12,700, this was more than offset by an increase of over $20,000 in the operating expenses. The result was that despite the substantial increase in the revenue there was a decrease of nearly $8,200 in the surplus compared with that of the previous year. Happily, there was still a balance of $1,794.71. But had the estimates been on an operation at cost basis, it is reasonably certain that the year's operations would have resulted in a substantial deficit—to be met, of course, out of general taxation:—

Lethbridge Waterworks Department

In the operation of its waterworks department the city of Lethbridge had a deficit of $816.58 for the year 1918. For the preceding three years, the operation had been very near cost as may be seen from the following figures:—

Year		Revenue	Operating Expenses	Sinking Fund	Debenture Principal	Debenture Interest	Surplus
1911	..	$54,602	$20,917	$4,626	$ 560	$17,610	$10,886
1912	..	65,072	22,166	6,558	4,541	21,294	10,512
1913	..	77,065	30,467	7,441	5,221	21,586	12,348
1914	..	76,917	34,472	7,520	5,275	22,802	6,847
1915	..	74,362	36,870	8,238	5,330	23,282	640
1916	..	78,149	40,444	8,755	5,389	23,501	58
1917	..	87,112	49,202	8,755	5,451	23,546	155
1918	..	99,142	62,045	8,755	5,516	23,641	*816

*Deficit.

During the years 1911, 1912 and 1913 there was a substantial surplus. The revenue was steadily increasing. In 1914, however, it diminished slightly, and an increase in expenditure, mainly in operating costs, caused a material reduction in the surplus. A further reduction in the revenue for the following year, accompanied by increased charges, reduced the surplus to $640.47. This fell to $58.68 in 1916, although there was an increase of nearly $4,000 in the revenue for that year. In 1917, the revenue increased by about $9,000, but this was practically absorbed by increased operating costs. The operations for 1918 were somewhat similar only the increase in operating expenses exceeded the increase in the revenue, with the result that there was a deficit of $816.58.

Losses on Street Railway

The operation of a street railway at a loss is more general to-day than exceptional. It was in 1912 that the city of Lethbridge built its street railway, which was operated for one hundred and twelve days that year. Since then as may be seen from the following statement there has been a steady and substantial deficit:—

Year		Revenue	Operating Expenses	Sinking Fund	Debenture Interest	Deficit
1912	.....	$20,756	$17,698	$ 372	$ 7,841	$ 5,176
1913	.....	60,609	69,739	6,888	14,812	30,831
1914	.....	46,053	55,136	8,934	19,184	37,202
1915	.....	41,740	44,024	8,756	18,801	29,841
1916	.....	49,639	47,597	9,903	20,063	27,924
1917	.....	52,203	49,637	9,903	21,530	28,867
1918	.....	51,930	55,356	9,903	21,530	34,859

The population of Lethbridge during these years has ranged from ten to fourteen thousand and it may be taken for granted that the citizens are prepared to operate the street railway for some time at a loss because of the general convenience it affords.

From the experience of Lethbridge in the operation of its utilities it will be seen that it is extremely difficult to operate such at cost. There will be either a surplus or a deficit, and it will be generally admitted that the former is preferable. What would be most valuable, however, in promoting the study of municipal finance would be, as already indicated, the publication for general use by all cities of their annual financial statements. These statements should be drawn up on a uniform basis, so as to facilitate comparison. I need hardly point out that if the citizens of Lethbridge had available statements for, say, six cities of about the same area and population such would enable them to take a much more intelligent interest in the affairs of their own municipality. Reforms usually follow and do not precede agitation, and when there is a demand for the general circulation of the annual financial statements of municipalities, such will be forthcoming.

Reorganized Cabinet Includes New Ministers

Hon. F. B. McCurdy is Minister of Public Works and Hon. Hugh Guthrie Minister of Militia—New Premier Has Risen Rapidly In Politics—Purchasing Now Permanently Centralized—Developments in Merchant Marine

(Special to *The Monetary Times.*)

Ottawa, July 15th, 1920.

CANADA has a new prime minister, Hon. Arthur Meighen having been selected to succeed Sir Robert Borden. He has the distinction of being the youngest Canadian prime minister as well as the first executive head to come from west of the great lakes. It is under trying and difficult circumstances that Mr. Meighen undertakes the leadership. He has to organize a new party; he has to defend a government which has accumulated in the past three years of war and peace more than its share of enemies. He has to hold in line the old Conservatives, who are none too pleased at the passing of their party with all its traditions and he has to conciliate Liberal-Unionists, who are dubious as to whether they will not lose their identity completely in the shuffle. In addition, he faces a rehabilitated Liberal party led by Hon. Mackenzie King, young and aggressive like himself, although lacking in his parliamentary experience and skill and a Farmer-Labor party, flush from recent political victories and appealing with a sort of irresistible fervor to all the elements of unrest in the country.

Hon. Mr. Meighen has had rapid political advancement, but has reached his present position by sheer force of character and ability. There is no chance in his selection. An Ontario man and easterner by birth, shortly after his graduation from Toronto University he went west teaching school and studying law in Winnipeg. He hung out his shingle in the little Manitoba plainstown of Portage la Prairie. There seven years after going west he was the Conservative candidate for parliament in 1908. His party was beaten at the polls by the then dominant Liberal party under the leadership of Sir Wilfrid Laurier, but he was elected. Only 32 at the time, a mere boy in appearance his capacity soon impressed the house and it was not long until he was one of the leading critics of the government. In the reciprocity campaign of 1911 he was one of its chief opponents in a province that naturally favored the pact. When Sir Robert Borden formed his cabinet he was not included. Youth, [illegible] and other conditions were against him.

But although a private member and a back-bencher, it was soon to him Sir Robert Borden turned when the government was hard pressed in debate. Ruthlessly logical, with a mind almost [illegible] a keen student of history [illegible] ablest debaters in the [illegible]

Reputation Gained in Naval Debate

His parliamentary reputation was [illegible] ing the memorable naval [illegible] Sir Robert Borden proposed [illegible] of dreadnoughts to the British [illegible] attacked with all the ability [illegible] the long experienced and [illegible] position could summon. [illegible] ment to the country [illegible] adopted by the opposition. [illegible] out. A casual visitor to Mr. Meighen's [illegible] covered him almost buried in a pile of [illegible] same night the rumor got abroad that the [illegible] preparing a closure bill. A week later [illegible] no evidence of relaxing in their obstruct[illegible] measure was introduced by Sir Robert Borden. [illegible] was immediately ferociously attacked by the opposition, Sir Wilfrid Laurier leading the attack with [illegible] energy. Upon Meighen's head the opposition poured [illegible] wrath, as it was known he was the author. [illegible] and locally, the bill was subjected to every possible method of attack, but the structure which the young member had builded stood the storm. When the violence of the debate had subsided Meighen's reputation as a legal luminary was beyond dispute. Throughout this acrimonious debate he was cool, resolute, confident of his position, master of himself and his materials, secure in his opinions and inflexible in his purpose. Even his opponents expressed admiration of the skill, logic and vigor of his defence.

In the same year he was brought into the cabinet as solicitor-general. He rapidly developed into the mainstay of the government in defence and every knotty problem was turned over to him for solution. In 1917 when Union government was formed he was made minister of interior.

Able Rather Than Popular

Mr. Meighen has not the impressive appearance of a Laurier or a Borden. He is slight, anaemic-looking; he might be mistaken for a young cleric. He is not a [illegible] fellow well met and knows it. To the public he seems cold, austere and reserved, although as a matter of fact he has a fine sense of humor and enjoys a holiday with [illegible] abandon. He is a natural student, with a remarkably retentive memory. The English classics are his favorites. He is partial to Macaulay. To the study of Macaulay may be laid his rolling sentences and fine rounded periods. His power in debate, however, is not derived from a flowery flow of language, from exuberant eloquence or from graceful imagery. His strength lies in his marvellous capacity to marshal facts, his ability to analyze and the [illegible] inquest of logic to which he subjects the argument of an opponent.

Imperialist in Sentiment

As long as Mr. Meighen is prime minister [illegible] that there will be no move towards a break [illegible] nection with Great Britain [illegible] Canada's position [illegible] principles of his [illegible] tense admiration of the British [illegible] institutions and [illegible] Canadian that the Dominion [illegible] international [illegible] Any move towards [illegible] resisted by him.

His views and [illegible] address [illegible] hostilities when he [illegible] before the Royal [illegible] words he said:

"In feeling [illegible] in the sense of [illegible]

[illegible]

New Cabinet Announced

The [illegible] 19 [illegible] Affairs, Hon. Arthur Meighen; President of the Privy Council [illegible] Minister of [illegible] Minister of Health, Hon. J. A. C[illegible]; Minister of [illegible] and Commerce, Sir George E. Foster; Minister of Finance, Sir Henry Drayton; Minister of Justice, Hon. C. J. Doherty; Minister of Militia, Hon. Hugh Guthrie; Minister of Railways and Canals, Hon. J. D. Reid; Secretary of State, Hon. A. L. Sifton; Minister of Marine and Fisheries and Naval Affairs, Hon. C. C. Ballantyne; Minister of Agriculture, Hon. S. F. Tolmie; Postmaster-General, Hon. P. E. Blondin; Minister of Public Works, Hon. F. B. McCurdy; Minister of Customs and Inland Revenue, Hon. R. W. Wigmore; Minister of the Interior and Superintendent General of Indian Affairs, Sir James Lougheed; Minister without portfolio, Sir Edward Kemp and Hon. E. K. Spinney; Solicitor-General, not yet appointed,—Hon. Mr. [illegible]

War Purchasing Department Continued

The war purchasing commission has just been transformed into central purchasing commission for all departments, by order in council. In 1919 and 1920 efforts were made by Hon. N. W. Rowell and some of his colleagues to get legislation to make permanent such a commission. [illegible] there was such opposition that the government had to withdraw it. It is explained now that the government has power to continue the existence of the War Purchasing Commission for an indefinite period. Under the new order-in-council the board can do all the buying for the government, if it wishes, or it can direct and control buying where it feels that the buying could best be done by the departments [illegible]. The order-in-council is compiled along the same lines as the [illegible] measure [illegible]. There will be a chairman and two members appointed. Until then Sir [illegible], secretary of the War Purchasing Commission, will carry on.

Government Merchant Marine

The Canadian government [illegible] entirely [illegible] by March 31, 1921, [illegible] laws. [illegible] and [illegible] the [illegible]

[illegible] Indian [illegible]

COLLECTIONS VERY SLOW IN THE WEST

New Orders Are in Good Volume, However—Crop Prospects Maintain Healthy Sentiment—Bankers Discuss Deep Waterways Project

(Special to *The Monetary Times.*)

Winnipeg, July 15th, 1920.

ON the whole, the crop outlook in Manitoba and throughout the whole west is very encouraging. Reports from a majority of points are entirely satisfactory, while from other places there is complaint of lack of recent rains. During the past week there have been local rains, but some places have been missed, and evaporation at this time of year is rapid. From no place in Manitoba is there any suggestion of crop failure or even of crops having suffered considerably, and the present promise is that the crop will vary from fair to very good, according to locality.

Collections Not Good

Winnipeg wholesale houses are fairly busy. Wholesale hardware reports trade good and orders coming in freely. Midsummer conditions exist in retail lines, with many sales in clothing and boots, but no real price cutting. Further west, wholesale and retail trade are both quiet. Collections at western and Pacific coast points are reported very slow, and poor.

Bankers Attend Duluth Convention

Representatives of the Bank of Montreal and the Imperial Bank have returned to Winnipeg from Duluth, where they attended the annual meeting of the State Bankers' Association. The total attendance at the assembly was about nine hundred. The subject of greatest local interest was the proposed deepening of the channel of the St. Lawrence River. The estimated cost of this work was $130,000,000 and it was stated that a saving of this amount would be effected each year. United States people of the northwest are deeply concerned in the question owing to the freight congestion which exists at the present time all through that country. They state that it would nearly cut their freight bills in half.

Local Financing

The Winnipeg firm of Strange and Snowden this week bought the bonds of the rural municipality of Swan River. These are good roads debentures and are guaranteed by the province. The amount is $58,000. The bonds run for 30 years and bear 6 per cent., interest and principal are payable only in Canada. The funds cost the municipality slightly less than 7 per cent.

The province of Manitoba have this week opened an up-to-date ground floor office in the Lindsay Building to receive savings deposits on which 4 per cent. interest will be paid. Many thousands of dollars have been sent in already from all over Manitoba.

CASUALTY INSURANCE MANAGERS' ASSOCIATION

The annual meeting of the Casualty Insurance Managers' Association was held on June 17, and the following officers elected for the ensuing year: President, J. C. Gagne; vice-presidents, A. E. Kirkpatrick, Toronto, and H. F. Roden, Montreal; treasurer, E. Willans; senior secretary, T. D. Hutchins, Montreal; Toronto secretary, H. S. Humphries.

Announcement is made by the United Financial Corporation, Ltd., of the removal of their Ontario branch office, which is under the management of G. E. Cork, to the premises occupied by the Guaranty Trust Co. of New York, at 14 King St. East, Toronto. The foreign service department of the Guaranty Trust Co. will continue at the above address under the supervision of E. N. Wilkes, correspondent, as formerly.

HIGHER RAILROAD RATES APPLIED FOR

Canadian Railway Association Presents Arguments Based on Cost of Operation—Net Earnings Have Fallen Rapidly

APPLICATION for a 30 per cent. increase in rates was filed on July 10, with the Board of Railway Commissioners for Canada, by the Canadian Railway Association. On July 14 the Board announced that the application will be considered in Ottawa on August 10, and arguments from both sides heard. The association presents its case in the application as follows:—

Text of the Application

"The Railway Association of Canada, on behalf of the railway companies members thereof, and of all other railway companies within the jurisdiction of the board, hereby applies to the board under section 325 of the Railway Act, and such other sections thereof as may be applicable, for authority to make a general advance of 30 per cent. in the tolls at present charged for the carriage of freight by the said companies. In support of such application the applicant respectfully states.

"(1) During the period since the outbreak of the war the scale of expenditure of the said railway companies on capital, maintenance and operating account has increased to an extent unprecedented, which has greatly exceeded the aggregated increase in freight and passenger revenues granted during such period.

"(2) As a concrete example of the great burdens under which the railway companies are laboring, reference may be made to the result of the wage increase granted in 1918. The so-called 25 per cent. advance in freight rates granted under order-in-council No. PC1863, effective August 12, 1918, was intended to reimburse the railway companies for the increased wage expense to which it was then estimated they would be put through the application of the rates of wages and working conditions which had then recently been fixed for the railways of the United States under the so-called McAdoo award and supplements thereto, and which had been made applicable to Canada by order-in-council No. PC1768, effective August 1, 1918. Contrary to all expectations, such increase in revenue proved far from satisfactory to accomplish what it was intended. During the year 1919 the increase in wages granted as above mentioned amounted on Canadian railways to more than $80,000,000, while the increase in revenue derived from the advance intended in the aforesaid to provide therefor amounted to only approximately $43,000,000, a shortage of at least $37,000,000. Apart from the increase in wages, the prices of the principal supplies and materials in use by the railways have increased more than 100 per cent. since the beginning of the war period.

"(3) In order that the railway companies may maintain their systems in such a state of efficiency as to enable them to serve the interests of the public in a proper manner, it is essential that they be accorded an advance in tolls of at least the extent applied for herein.

"(4) The increase in rates sought by this application is based entirely on present costs, and does not take into consideration any increase in wages or costs which may occur hereafter."

Discussed Informally With Government

This application has already been forecasted on several occasions. President Beatty pointed out the necessity for higher rates in his address to the shareholders of the C.P.R. The request of the Edmonton, Dunvegan and B.C. Railway, just heard by the board in Edmonton, is supposed to have been a preliminary move in this direction. On July 5 a delegation headed by President Beatty, of the Canadian Pacific, Chairman Howard G. Kelly, of the Grand Trunk management board, and President Hanna, of the Canadian National Lines, along with a number of other high officials of the various lines, met the government.

ORGANIZED PROTECTION FOR THE CONSUMER

THE Board of Commerce which was presented to this country last year is now, in so far as active work is concerned, a thing of the past. Its record has been a great disappointment to the people of Canada. If it had even showed how industry should not be controlled some service at least would have been rendered. But so much time was absorbed with questions of the board's jurisdiction, with personal disputes and with petty investigations that nothing of positive value was accomplished.

The events leading up to the organization of the board, the powers conferred upon it and some conclusions regarding its operation were reviewed at length in *The Monetary Times* of June 4th. The chairman, Judge H. A. Robson, of Winnipeg, resigned last February, and the facts made public during the past few weeks make it apparent that he had not intended to occupy the position permanently. The initial handicap of being presided over by a gentleman not permanently identified with it was a thing which militated against the success of the board from the start. The resignation of W. F. O'Connor, vice-chairman, who had always been the spectacular member, took effect on June 10th. Late in the month of June James Murdock, the third member of the board and a prominent labor leader, also resigned, making at the same time [illegible] against the former chairman and against the government [illegible] for its lack of sympathy and support. [illegible] these personal developments is the decision of the Supreme Court announced on June 1st, in which the [illegible] as to the powers of the board [illegible] work for an indefinite period.

Three members now constitute the board [illegible] these are W. W. White, formerly [illegible] deputy minister of labor, and G. A. [illegible] is only nominal, it a [illegible] satisfied that undue profits [illegible] industries. The public [illegible] time it is patent that some lines of industry are so highly organized as to make the fixing of prices and of market conditions easily possible. When this stage is reached, government control is the only alternative to public ownership or operation. Economic laws may be relied upon to keep prices at a fair level in some cases, but not in all. Some organization subordinate to the general government is necessary for this purpose, for the government is the only body which protects the consumer against the evil that all organizations in the fields of trade and labor [illegible]. The board should be reorganized, [illegible] with adequate technical assistance, and given a fresh start.

CO-OPERATION OR THE MIDDLEMAN?

"CUT out the middleman" has been one of the [illegible] economic slogans of the past few years. [illegible] efforts have been made to do away with this [illegible] [illegible] principal effort has taken the form of [illegible] [illegible] The Journal of Political Economy [illegible] [illegible] of the co-operative movement, and more particularly, in its phenomenal spread during the years of the recent world war."

The middleman is regarded as a parasitic growth who renders no service in return for the profits he obtains. If this is the case, then there is a whole field of distribution which should be dispensed with. Goods pass through the hands of many parties who do not change them in any way, nor even carry them from one part of the country to another. The price, and presumably the value, increases at each stage. This vast distributive organization has been built up at the request of the public, which has demanded that goods be offered to it in the most convenient time, form and place, and has until recently paid willingly for the service thus rendered. The consumer need take no thought for the morrow, for he knows that his every wish has been anticipated. This is one of the factors which has made the modern economic organization so complex.

Co-operative movements do not as a rule attempt to throw any of the burden upon the consumer. They differ, therefore, from ordinary business only in the character of the proprietors. The lack of unity in control is a business handicap, and the co-operative concern is soon eliminated, or control gravitates into the hands of a few. Where some responsibility is thrown on the consumer, as where he is encouraged to buy in large quantities, and at slack seasons, the inconvenience caused results in unpopularity. Co-operation, in short, is no substitute for present methods of distribution.

CANADA'S POSITION IN IRON AND STEEL

AMONG the fundamental industries which were disorganized by the war, one of the principal was iron and steel. Great Britain lost ground which went to her great competitor, the United States. A determined effort was made to maintain the supplies usually sent to British Dominions, but nevertheless the exports to British possessions fell from $9,759,661 tons in the five years from 1909 to 1913, to 4,561,397 tons from 1914 to 1918. American iron and steel exports expanded greatly during the war and to a limited extent met the shortage in the export market created by the blockade of Germany, the occupation of Belgium and the diversion of the British output. The United States, Great Britain and Germany produce 80 per cent. or more of the total iron and steel output of the world, while Belgium is a considerable factor in the export international market.

Canada has always been one of the United States' best customers. This country, as is pointed out by Herbert P. Howell, vice-president of the National Bank of Commerce of New York, in an article in that bank's July Monthly, produces considerable iron and steel, but not sufficient for the growing needs. Before the war Canada bought more steel rails, steel bars and rods, steel sheets and plates, and tinplate from the United States than did any country, taking over half the exports in some cases. Since 1914 Canada's importance as a customer of the United States has relatively decreased. This is shown in the following comparison of average yearly imports (in tons):—

United States Exports—	1910-14	1915-19
Rails	393,942	168,794
Billets, ingots and blooms	150,026	1,200,013
Bars and rods	117,921	549,663
Sheets and plates	264,483	545,541
Tinplates, terneplates and taggers' tin	18,708	205,780
Exports to Canada—	1910-14	1915-19
Rails	87,830	38,117
Billets, ingots and blooms	43,402	115,489
Bars and rods	85,730	112,002
Sheets and plates	194,955	200,094
Tinplates, terneplates and taggers' tin	39,734	50,816

"Despite unfavorable exchange, Canada must buy American sheets and plates to keep the wheels turning in her own factories," says Mr. Howell in conclusion. This country has, however, a substantial part of the world's iron deposits. The natural resources are sufficiently great and convenient to offset the lack of skill and the high production costs. Deposits in some of the other countries are nearing exhaustion. The future of the iron and steel industry in Canada seems assured, and it may not be long before there is a surplus available for export.

ANOTHER COBALT IN THE MAKING

RAPID progress is being made in opening up and permanently establishing a new silver camp in Gowganda. Situated in the very heart of Ontario's wildest wilderness, where it is almost impossible to get in supplies or machinery to work with, silver has been found equalling anything Cobalt ever produced. The history of Gowganda is similar to that of many other mining camps. A few years ago silver was discovered by prospectors and a "rush" then occurred. Claims were held at such high prices that capital was discouraged in entering the field. A few companies started operations but the very high cost of development work soon depleted their treasuries. The O'Brien interests took over the Miller Lake O'Brien mine and by chance struck it rich. They are a private company and details of their progress is not made public. They have been operating for a few years now and until recently were about the only producing mine in the district. It is known in well informed quarters that they produce about a million dollars worth of silver yearly from this mine. Over a year ago Engineer Arthur Cole, when reporting on ore reserves, estimated there was seventeen million ounces in sight. It is said by people who have been down in this wonderful mine that they have a silver vein four feet wide, which runs sixty per cent. silver. This information is given by a reliable party who had actually examined the vein personally.

Within the past year with the prevailing high prices for silver the camp has taken on a new lease of life. Several prominent Cobalt companies have taken options on claims or bought outright promising properties after proving them up. A railway will soon be put into the camp and electric power will be available in August. The camp will then go ahead rapidly.

The Canadian Industries Exhibition in London, England, for which extensive preparations had been made, proved a "dud." Such a failure is worse than no exhibition.

Trade relations with the Russian government are to be resumed. A government which has held the reins of power for nearly three years can certainly be regarded as a *de facto* government, even if it is not officially recognized.

Premier Drury of Ontario intimates that the provincial civil service is to be thoroughly reorganized, and that departments will be provided with staffs sufficient to carry the normal rather than the "peak" load of work. One reason why the earnings of civil servants have been low is because their earning power has not been applied to its full extent.

"There was a time back in the '70's when the government guaranteed the bonds of solvent municipalities, but who had to pay when the collapse came?" This was asked by Premier Drury of Ontario, when he was questioned as to why the government should hesitate to guarantee the bonds of solvent municipalities. The government has wisely decided to act with caution; it must control, rather than be dominated by the Hydro-Electric Commission.

International Trade

In the transaction of foreign business, knowledge and experience count for much. The experience gained by this Bank at its own offices in such centres of international trade as the following:

London, Eng.	Mexico City
New York	San Francisco

is available for extension of Canadian trade abroad. In addition it maintains a Foreign Department specially equipped to handle all foreign exchange transactions.

PERSONAL NOTES

J. H. Hanna, secretary-treasurer of the Calgary Public School Board, has been appointed secretary of the Calgary Board of Trade.

Sir Lomer Gouin has retired from the premiership of the province of Quebec, after successfully administering the affairs of the province for fifteen years, and according to latest advices, has accepted a position on the directorate of the British Empire Steel Corporation. "In 1905," said Sir Lomer, in a statement regarding his resignation, "after having been called upon to form a government I drew up a program which, since that time, has appeared to carry weight and which affected every branch of the administration. During fifteen years, I have had the signal honor of enjoying the most complete confidence of our population. I feel that I should now confide to other hands the work of peace, concord and prosperity which the Liberal party has striven to accomplish in this province since 1897." Besides being premier and attorney-general for Quebec, Sir Lomer was also a prominent business head, having been identified with many industrial and other undertakings in the province. He is a director of the Royal Trust Company; director of the Montreal City and District Savings Bank; director of the Mount Royal Assurance Company. He is particularly interested in the pulp and paper industry in Quebec, his name having been mentioned in connection with recent important developments. He will also be connected with "La Presse," the Montreal afternoon daily. The Hon. Louis A. Taschereau is mentioned as his successor to the premiership.

Robert Gray, of Chatham, Ont., one of the leading business men of the western part of the province, and president of the Gray-Dort Automobile Company, has been appointed to the directorate of the Standard Bank of Canada.

Carl Riordon, an outstanding figure at the present time in the pulp and paper industry in Canada, and vice-president of the Riordon Company, Limited, has been appointed to the directorate of the Sun Life Assurance Company of Canada, replacing the late John McKergow.

W. P. Kirkpatrick, former manager of the Canadian Bank of Commerce at Saskatoon, Sask., has returned from a business trip to Havana, Cuba. Mr. Kirkpatrick left Saskatoon last November, and during his stay in Havana, succeeded in establishing a branch of the Canadian Bank of Commerce there.

Major R. T. MacKeen, who has been with the Royal Insurance Company since March, 1919, has been appointed assistant manager in charge of life business for Ontario. Previous to joining the Royal Insurance Company, Mr. MacKeen served in the Canadian army, and after being invalided was for two years vocational officer for Quebec.

Mr. J. W. Scott, of Listowel, Ont., was head of the private banking firm of J. W. Scott and Son, which has just been purchased by the Bank of Montreal. The actual transfer was made on May 31st. Mr. Neil L. Scott, son of Mr. J. W. Scott, remains as manager of the branch. Mr. J. W. Scott is one of the oldest and best-known private bankers in the Dominion, having conducted a large private banking business in Listowel for nearly fifty years, as well as having offices in Palmerston, Clifford and Atwood, and with the late J. A. Halstead, in Mount Forest, Shelburne and Wingham. Mr. Scott has large business interests outside of banking, and, with T. L. Hamilton, who has been with him for nearly thirty-five years, will continue to look after these, with offices over the Bank of Montreal.

OBITUARIES

Walter M. Campbell, assistant secretary of the North American Life Assurance Company, Toronto, died on July 11th, at the age of 49 years, after a lengthy illness. Mr. Campbell had been connected with the company for 29 years.

John Farley, K.C., one of the oldest and best-known barristers and residents of St. Thomas, Ont., died on July 10th after a brief illness. Mr. Farley was born in Missouri Township 83 years ago, of Irish parentage, his parents settling in Ontario in the early fifties. He graduated in law in 1862 and practised his profession in St. Thomas over 50 years.

SUN INSURANCE OFFICE

A notable year of progress is recorded in the annual report of the Sun Insurance Office, which is printed elsewhere in this issue. The company, which was organized in London, England, on April 7th, 1710, has been conducting fire insurance business in Canada on a large scale since June 3rd, 1892. According to the latest available figures, assets held solely for the protection of Canadian policyholders amount to $673,018, while total Canadian assets are $979,619. The head office of the company for Canada is at Toronto, and Lyman Root is manager.

The Canadian returns for 1919 show that net cash received for premiums amounted to $711,903, while in the previous year the figure was $712,182. This result is more favorable when it is taken into consideration that the ratio of losses to premiums was considerably smaller, the figure being 46.03 per cent., as compared with 52.13 per cent. in 1918. Gross amount of risks taken during the year totalled $93,113,893, as against $87,963,278 in the preceding period.

The total business of the Sun Insurance Office is worldwide in extent. Premiums to the amount of $11,333,095 were received on fire account, and losses totalled $5,360,690. The funds total $20,118,340, of which the fire fund, to the amount of $12,533,240, is the largest. Included in this total are also the paid-up capital of $2,400,000, the profit and loss balance of $2,201,860, an investment suspense fund of $375,000, and a war contingency fund of $125,000, indicating that company has assets much greater than the necessary reserves, as well as being one of the oldest insurance companies in the world.

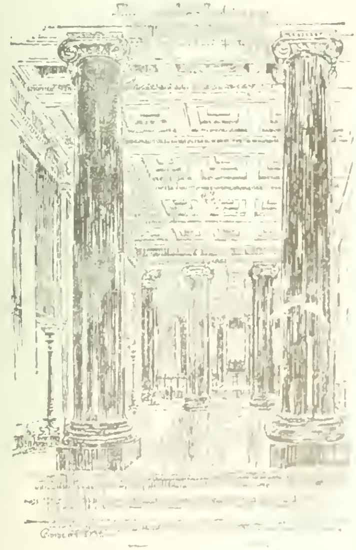
THE STRENGTH OF A BANK



ESTABLISHED in 1817 with modest capital, the Bank of Montreal for over a hundred years has followed a conservative, aggressive policy, until today it has assets in excess of FIVE HUNDRED MILLION DOLLARS

LIKE Canada herself, Bank of Montreal has grown stronger with the service it has rendered and the obstacles it has overcome.

TODAY the Bank is stronger than ever, prepared to render ever-increasing service to the people and the business concerns of the Dominion

With Branches in every important centre of every Province [illegible] banking connections throughout the world, we are fitted for the task of helping Canadian business to grow to full stature

A steadily increasing number of business men, [illegible] house holders, ambitious young people, thrifty [illegible] everywhere—are getting the benefit of the strength [illegible] this financial institution

CASHING CHEQUES FOR STRANGERS

Responsibility Rests Chiefly on Banks, and Adequate Precautions are Not Always Taken to Prevent Loss

By A. B. Barker

THE chief point of daily contact between the banks and the general public, is at the teller's wicket, when cheques are presented for payment. At times there is considerable friction, due to the bank requirements in the matter of identification. The law holds the bank responsible for payment to the proper party, and some of the public, not realizing this, or possibly not caring, are inclined to be resentful when asked to prove their identity.

The average teller endeavors to perform this part of his duty with full regard to the feelings of the payee, but in view of his responsibility, he must play absolutely safe. There are some, of course, as in all professions, who are lacking in manners, but the vast majority handle the situation with tact and courtesy.

Resent Suggestion of Dishonesty

Part of the resentment felt by the honest man, who is asked to get someone known to the bank, to identify him, is due to pique at not being recognized, and this blow to his self-esteem is apt to make him unreasonable. with others of course it is merely a form of bluff, as they know perfectly well they are asking the teller to take a risk which they themselves, under similar circumstances, would not take. Sometimes men known to the bank are quite willing to endorse "for identification only," and profess to be much agrieved when this is refused. This may be due to ignorance, but as a rule their intention is that any risk in the matter shall be borne by the bank, while any benefit accruing will come to them.

Responsibility of Bank

When a bank accepts a deposit from a customer it agrees among other things to account to him therefor on demand, and to honor his instructions to pay his cheques on presentation, out of the funds at his credit. In this capacity it is a trustee for its customer, and naturally the customer looks to the bank to protect his rights to the full under this arrangement. Under the Canadian law the responsibilities of the banks in this connection are greater than the law of Great Britain imposes on banks in that country. The British system of crossing cheques insures the negotiation of a cheque by the rightful payee only by having it placed to his credit in the bank in which he has his account. The law practically says that the maker of the cheque, by crossing it as the act provides, can guard against loss by theft, and that if he decides not to avail himself of this method of protection, he must stand the consequences. If a bank in Great Britain, therefore, in good faith and without negligence, pays an "uncrossed" or open cheque, the loss would fall on the maker. This system of crossing cheques is part of the Canadian law, but as the bank is not relieved of any responsibility thereby, it is seldom used.

Banks Liable for Negligence

In the matter of contributory negligence, the public in Canada is also protected at the expense of the banks. The following is a case in point: Some years ago, in the west, a farmer, in paying off his foreman, signed a cheque on his bank account, the body having been filled in by the foreman, who purposely left spaces in the cheque. It was drawn for four dollars, and later filled up for four hundred by the foreman. It was presented to the bank, the officials of which knew the man as an employee of their customer. It was in order, so far as they could tell, and, in good faith, they paid it. Later, it was disputed, and the bank's solicitor advised that, except for the amount for which it was orginally drawn, it was a forgery, and the bank, therefore, liable. The case did not come to trial.

In the United States the Supreme Court of California held that a bank paying out money on a cheque drawn to order on which the payee's endorsment had been forged was liable to the depositor, irrespective of the bank's freedom from negligence.

When the public in general understands just what responsibility is borne by the banks in regard to cheques, the vast majority, who constitute the reasonable part of any community, will readily admit the necessity for adequate precautions, and can be depended on to co-operate.

Epidemic of Frauds

At the present time the country is pestered with a number of forgers who are operating in various sections. These have, unfortunately, been sufficiently successful to encourage further attempts, and one result will be a tightening up of the regulations as to identification in all of the banking institutions. Some of the schemes of these gentry are most ingenious. In one of the more recent frauds a man of rather good appearance presented a cheque for a fair amount at the counter of one of the branch banks, and on being asked for identification, claimed to be a relative of one of the officials in a nearby plant, and suggested that they call him up for confirmation, giving the telephone number. The accountant, with visions of a new account, foolishly called up the number without verifying it, and was answered by someone claiming to be the party asked for. He obtained a full and flattering description of the man who had presented the cheque. Later, the cheque was found to be fraudulent, and they are still looking for the payee and his confederate, and the unfortunate accountant has learned a somewhat expensive lesson.

PHŒNIX ASSURANCE COMPANY, LTD.

Previous records of the Phœnix Assurance Co., Ltd., are shown to have been surpassed by that company in 1919, according to the annual report, given in detail elsewhere in this issue. Net premiums in the fire department totalled $11,320,195, compared with $9,970,775 in 1918. Net losses were $4,812,610, a ratio of 42.5 per cent., against 44.6 per cent. in 1918. New life business to the amount of $10,813,120 was issued, bringing in new net premiums of $467,535. In the marine department net premiums totalled $4,197,670, and claims, $3,839,190.

The company has been doing business for 138 years, and in Canada its record extends over 117 years. The present managers in this country are R. MacD. Paterson and J. B. Paterson, of Montreal. Last year the net cash received for fire premiums totalled $1,145,616, an increase of nearly $100,000 for the year. The loss ratio was 43.16, or slightly higher than in 1918. New life policies were issued in Canada to a total of $659,843, an increase of $100,000, and the amount in force is now $7,441,533.

The most notable event of the past year was the amalgamation of the Phœnix with the Norwich Union Fire, which took place on January 1st, 1920. As a result of this arrangement, Sir Gerald Ryan succeeds Lord George Hamilton as chairman of the Phœnix, and R. Y. Sketch succeeds the former in the position of general manager.

In his address to shareholders at the annual meeting, held in London on April 28th, the chairman, Sir Gerald Ryan, outlined the successful results in the various branches of the company's business. He also pointed out the important assistance rendered by the insurance companies in war finance by subscriptions to war loans and by the heavy taxes paid. This would not have been accomplished if insurance had been nationalized. "What would become of the vast volume of profitable foreign business if insurance were nationalized?" he asked, and continued to show how this foreign business reacted to the benefit of the nation as a whole. "I have ventured to lay before you these few personal reflections," he said, "in order that all who are concerned in our important branch of industry may give thought to the great damage that may accrue to many interests, private and public, by these unsound and ill-considered proposals."

BANK BRANCH NOTES

Five New Branches Announced This Week—New Buildings Planned in St. John, N.B., New Toronto, Ont., and Marpole, B.C.

The following is a list of branches of Canadian banks which have been opened recently:—

Winnipeg, Man. (Stafford and Grosvenor Streets)	Canadian Bank of Commerce
Winnipeg, Man. (Portage Ave.)	Canadian Bank of Commerce
Walkerville, Ont. (Ottawa and Walker Rd.)	Bank of Montreal
Montreal, Que. (St. Catherine and Poupart Streets)	Banque d'Hochelaga
Hemingford, Que.	Banque d'Hochelaga

The Royal Bank of Canada erecting a new building at Marpole, B.C., at a cost of $30,000.

The Bank of Nova Scotia will erect a new building in New Toronto costing $30,000.

The Standard Bank is erecting a building at St. Johns, N.B.

Edward J. Fitzpatrick, after three years' service in the Brockville, Ont., branch of the Bank of Toronto, has been transferred to Petrolia, Ont.

W. H. Thomson, who for the past 18 years has been in charge of the Portage la Prairie branch of the Imperial Bank, has now been transferred to Regina, Sask.

H. S. Calder, formerly at the Myrtle Station, Ont., branch of the Sterling Bank, has been appointed manager at Sombra, Ont.

A. Burrow, former manager of the Sterling Bank at Sombra, Ont., has been transferred to Richmond Hill, Ont., as manager of that branch.

N. J. Stevenson, formerly accountant of the Sterling Bank at St. Catharines, Ont., has now been promoted to acting manager of the Jordan Station, Ont., branch.

E. G. Matthews, formerly at Auburn, Ont., branch of the Sterling Bank, is now manager of the Monkton, Ont., branch.

RATIFY ENTRANCE TO STEEL MERGER

Shareholders of the Dominion Steel Corporation at a special meeting in Halifax, N.S., on July 15th, ratified unanimously the agreement made by the directors for the entrance of their company into the British Empire Steel Corporation. Following the adjournment of the meeting, Roy M. Wolvin, president of the company, gave out the following statement:

"I am more than gratified at the splendid spirit of unanimity evidenced at the meeting this morning. The vote polled, 298,000 shares, is the largest represented at a general meeting since the inception of the company, and there was not one dissenting vote. Now that our shareholders have taken this step, I feel that it is fitting for me to say a few words regarding the British Empire Steel Corporation.

"This plan to provide for the association of various Canadian enterprises has been very close to me for a long time, and I am convinced that it will be of great benefit to the province of Nova Scotia and the Dominion of Canada. We to-day, must take a broad world vision, and the association of the proposed companies will make it possible for the Canadian steel industry to take its proper place in world trade."

A most successful season has been concluded by the Atlantic salmon hatcheries in Nova Scotia. While the total number of eggs is not so large as it has been for the past few years the percentage of eggs hatched was considerably larger. The distribution amounted to 6,722,000 fry, including [illegible] trout. Fry to the number of 50,000 are being [illegible] in ponds during the summer.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13 7-16 pm	13 9-16 pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.40	$4.41	....
Cable transfers	4.41	4.42	....

New York quotations of exchange on European countries, furnished by the National City Co., Ltd., as at July 15, 1920, are as follows (all in cents per unit of foreign currency): Cable, London, 389¼, cheque, 388½; cable, Paris, 8.29, cheque, 8.28; cable, Italy, 5.90, cheque, 5.89; cheque, Belgium, 8.80; cheque, Swiss, 17.75; cheque, Spain, 16.05; cheque, Holland, 35.07; cheque, Denmark, 16.65; cheque, Norway, 16.70; cheque, Sweden, 22.05; cheque, Berlin, 2.59; cheque, Greece, 12.75; cheque, Finland, 4.50; cheque, Roumania, 3.10.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended July 14, compared with the corresponding week last year:—

	Week ended July 14, '20.	Week ended July 17, '19.		Changes.
Montreal	$170,114,423	$136,108,497	+	$34,005,926
Toronto	105,686,766	91,646,337	+	14,040,429

Kitchener	1,349,081	908,057	+	441,024
Windsor	3,523,733	2,066,425	+	1,457,308
Prince Albert	449,988	431,444	+	18,544
Totals	$409,945,051	$342,359,460	+	$67,585,591

Another conference for the adjustment of the finances of some Alberta municipalities has just been held, and it is reported that arrangements have been made for raising revenue sufficient to meet the obligations. Is a municipality, which cannot itself calculate and levy an adequate tax rate, competent to borrow?

Membership in the Saskatchewan Rural Telephone Companies, Ltd., has more than doubled during the past year, according to the report of the secretary of the association, at the second annual convention held in Regina on July 7 and 8. Representatives of some 500 rural telephone companies in the province, with a total of about 150 delegates were in attendance.

Provincial and Municipal Finances

Comparision of Per Capita Revenues and Expenditures in the Different Provinces, and in 12 Representative Cities—Per Capita Expenditure For All Governments is Highest in Edmonton and Lowest in Charlottetown

"THE simplifying and standardizing of the financial reports of provinces and municipalities would give the citizens of Canada a basis for judging the efficiency of the governing bodies who are working for them. The exercise of individual judgments based on impersonal facts is the only possible guarantee of effective democratic government." This is the foreword to a summary of the revenues and expenditures of the Canadian provinces, and of 12 representative cities just issued by the Citizens Research Institute.

This pamphlet follows a series recently issued dealing with each province and leading cities. "The preparation of the various provincial bulletins," says the Institute, "demonstrates clearly the necessity for: (1) Standardization of provincial and municipal accounting methods; (2) a revision of the methods at present employed by some provinces and many cities in their reporting of financial facts, in order that the average citizen may have a clearer understanding of the financial operations of his governing bodies.

"Some provinces and cities have already made commendable progress in modernizing their accounting and reporting procedure, but others are still following methods which are obsolescent or distinctly obsolete." A comparison of the main sources of provincial revenue, on a per capita basis, for the year 1917, is given in table 1. Table 2 compares provincial expenditures for 1917 in the same way. Revenues and expenditures of 12 representative cities for 1917 are shown in tables 3 and 4.

Adding together the cost of municipal, provincial and national government in 12 leading cities, for the year 1917, the results compare as follows:—

Victoria	$ 66.44
Vancouver	69.31
Edmonton	81.56
Regina	53.87
Winnipeg	58.39
London	45.79
Hamilton	44.82
Toronto	56.06
Quebec	39.70
St. John	40.85
Halifax	39.30
Charlottetown	29.23

SOME LIFE INSURANCE OBSERVATIONS

Slackening Tendency in Some Quarters—Labor Situation and Approach of Hot Season Contributing Factors—Tight Money Has Little or no Effect

A SURVEY of life insurance conditions in Canada by the "Life Underwriters' News," brings out some pertinent and interesting facts. The following questions were forwarded to insurance offices in all parts of the Dominion:—(1) Is business showing a tendency to slow up, or is it being sold at the same rate? (2) If it is slowing up (a) is it due as a natural consequence of the approaching hot season? (b) Or is it the beginning of the long-expected slump? (c) Or is it due to the tightened financial condition? (d) Or can you assign any other reasons? (3) What are other observations from your experience?

In regard to the part one of the first question, the vote was two to one in favor of the negative. The number of affirmative answers was 23, of which 8 were head office, and 3 from the western provinces, while the number of negative replies was 39, of which 9 were head office and 7 from the west. Those who said that there was a slowing up advanced the following contributing causes: (1) Approaching hot season. (2) Beginning of long-expected slump. (3) Tightened financial condition.

Other Reasons for Slackening

In reply to part "D" of question No. 2, the following answers were submitted: From head offices: (a) Labor unrest causing some uneasiness in respect to industry. (b) Natural reaction from excitement of war leading to conservative policy in all lines of business. (c) A few districts affected by unfavorable crop conditions.

From the west:—(a) Desire to await events. (b) Anxiety re crops.

From Ontario:—(a) New Dominion Luxury Tax. (b) Want of rain. (c) Labor situation. (d) Press scares. (e) General feeling of fear in minds of business men that reaction is at hand.

From Quebec:—(a) Luxury tax and other taxes. (b) Awaiting decline in prices to invest money outside of own business.

From the maritime provinces:—(a) Many have been spending too freely, and will economize in life insurance now. Business good. Effect of luxury tax has soon worn off.

General Observations

General observations, in reply to question No. 3, prove [illegible], and are as follows:—

Group and foreign business good. Country business [illegible] better. Crop prospects bright, which will naturally offset any letting up there may be in industrial activity. Paying premiums more promptly, although loans are heavy. Cause of loans attributed to necessity of having to buy houses. Effect will be good.

Present tendency to "slow up" only temporary, as public will be reassured that business conditions are sound in Canada, although there has been a great deal of extravagance. Any slowing up is the result on the agent's mind rather than any lack of ability, due mostly to the psychological effect of depression talk. Changed attitude on the part of the public is a permanent one. Money getting tighter has no effect on life insurance.

During past three years life insurance has become so favorably known as an important means of protection and investment that it will take more than tight money and poor crops to seriously affect volume. A slump will only serve to emphasize the value of life insurance—a good business even in bad times. No falling off whatever in collection. If business is falling off, it is because agents are lazy. This opinion is generally held. Results still coming to the *real* life insurance salesman even in increasing volume. People generally are as prosperous as last year.

There is certainly no room for pessimism. Optimism rules the day. If a slump does come, people will think, and naturally realize that all their other assets are apt to fluctuate in value, and that practically the only investment they can make which will pay 100 cents on the dollar at their death is life insurance. Life insurance men have a golden opportunity not enjoyed by any other classes of salesmen.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station, for the week ended July 9th: Nipissing Mine, 390,147; Mining Corporation of Canada, 128,679; O'Brien Mine, 64,380; total, 583,206. The total since January is 12,546,119 pounds, or 6,273.05 tons.

GRAND TRUNK ARBITRATION BOARD

The Grand Trunk Arbitration Board is now complete, with Sir Walter Cassels, Chief Justice of the Exchequer Court, as chairman; Sir Thomas White representing the government, and the Hon. W. H. Taft, ex-president of the United States, representing the Grand Trunk Railway.

The court, which will begin some time in September, had had submitted to it by the government the duty of determining the value of the first, second and third preferred stock and the ordinary or common stock of the Grand Trunk Railway. The award is to be made by the arbitrators within nine months of the time of appointment, unless more time is granted by the government. A unanimous award will be considered final, but if not unanimous there can be an appeal to the Supreme Court of Canada or to the Judicial Committee of the Privy Council, if notice of appeal on any question of law be given within 30 days of the making of the award.

These stocks are given at a total par value of £37,073,491, the common stock alone being shown at £23,955,437. The real value of these stocks has to be determined. The sum of the total award to the company is an amount on which the annual dividend at 4 per cent. per annum would not be more than $5,000,000.

A first dividend to the depositors and creditors of the defunct Dominion Trust Co. will be paid in September, according to an announcement made by Liquidator G. C. Gwynne, in Vancouver, on July 8. Passage of a special act by the federal parliament has removed all obstacles which would have delayed payment for another two years.

INSURANCE LICENSES ISSUED IN JUNE

Two New Companies Obtain Charter to Transact Business in Canada—Four Others Have Scope Extended—Fraternal Benefit Societies Also Registered

TWO new insurance companies obtained Dominion licenses in June, while four others already licensed under Canadian laws, were authorized to extend their scope. The new companies which obtained licenses were: Traders and General Insurance Association, Ltd., to transact the business of fire insurance, with head office at Toronto, Ont., with Carson and Williams Bros., as chief agents; Pacific Marine Insurance Company, to transact the business of fire, automobile and inland transportation insurance, with head office at Vancouver, B.C., and L. H. Wright, president of the company, as chief agent.

Companies which obtained authorization to extend their scope were: London and Lancashire Fire Insurance Co., Ltd., to write explosion insurance; General Accident Assurance Co., of Canada, to write burglary insurance; Casualty Company of Canada, to write automobile insurance in addition to plate glass insurance for which it is already licensed; Globe Indemnity Co. of Canada, to write forgery insurance.

Besides these charters, two fraternal benefit societies also obtained licenses. "The Maccabees" was authorized to transact in Canada the business of sickness and disability insurance, to the extent authorized by its act of incorporation, in addition to life insurance for which it is already licensed. The "Association Canado-Americaine," a new society, was also authorized to transact the business of life insurance to the extent authorized by its act of incorporation. The chief agency of the association will be in the city of Montreal, Que., and J. Emile Lussier has been appointed chief agent.

New Provincial Charters

New companies which obtained provincial licenses to do business in the province of Quebec are as follows:—British Northwestern Fire Insurance Company, to transact the business of fire insurance, with G. Gordon Lewis, Lewis Bldg., Montreal, chief agent; Tokio Marine and Fire Insurance Co., Ltd., to transact the business of fire insurance, with Wm. Boyd, c/o Irish and Maulsen, Montreal, chief agent; American Central Insurance Company, to transact fire, hail and tornado insurance, with W. G. MacKenzie, Lewis Bldg., Montreal, chief agent.

The Caledonian-American Insurance Company, which is already licensed under Quebec, British Columbia and Manitoba laws, has been granted certificate of registration for the transaction of fire insurance in the province of Alberta. The Retail Merchants' Mutual Fire Insurance Company has also been registered under Alberta laws to transact mutual fire insurance in the province.

Permit has been granted to the Canada Security Assurance Company, for the Western Underwriters' Agency, permitting them to transact in the province of Manitoba, the business of fire, hail and automobile insurance. The General Accident, Fire and Life Assurance Corporation, Ltd., has also been granted a permit for the Scottish Canadian Underwriters' Agency, authorizing them to transact in the province of Manitoba, the business of fire, hail and automobile insurance (excluding insurance against loss by reason of bodily injury to the person).

Agency Notes and Appointments

Messrs. Jones and Procter Bros., Ltd., Toronto, have been appointed general agents for Ontario, of the Continental Casualty Company.

The partnership between Arthur McBean and A. S. Hill, Montreal insurance agents, has been dissolved, and that business will be continued under the name of A. McBean and Co. in the same office, Lewis Bldg., St. John St. The new company will continue to represent the Occidental and Nova Scotia Fire insurance companies.

F. C. Walls, manager of the agency of the Edmonton Agency of the North American Life Assurance Co., has been appointed president of the Edmonton Life Underwriters' Association.

Geo. A. Symons, for the past two years cashier of the eastern townships division (Quebec) of the Sun Life Assurance Company, is giving up his office duties to devote his whole time to field work. Mr. Symons is secretary-treasurer for the Eastern Townships Life Underwriters' Association.

W. R. Brownlee, of the Continental Life Insurance Company, has assumed the duties of provincial manager for Quebec, with office in Montreal. He succeeds M. D. McPherson, who has resigned.

S. C. Tweed, superintendent, Mutual Life Assurance Co. of Canada, Waterloo, Ont., has resigned that position, his resignation to take effect at the end of the calendar year.

SOLDIER SETTLEMENT LOANS

Soldier Settlement Board loans passed the seventy million mark in June. Up to the 19th of the month there were 17,872 soldiers' loans, amounting to $70,555,434, approved. The loans were for the following purposes:—

Land purchase	$38,399,892
Implements	7,849,386
Stock and equipment	22,259,668
Removal of encumbrances	2,046,488
	$70,555,434

ALBERTA INSTITUTE OF CHARTERED ACCOUNTANTS

The annual meeting of the Institute of Chartered Accountants of Alberta was held in Edmonton on May 22nd, with President J. B. Sutherland in the chair. The president's report showed that there had been a net increase of eight members during the year, bringing the total up to 67, of whom all but about a dozen would qualify for the D.A.C.A. The financial statement showed a net surplus of $2,010, the principal part of which had been invested in Victory bonds. Delegates Sutherland and Race reported to the meeting concerning the convention at Winnipeg, and arrangements were made to send two delegates to the convention in Ontario during the summer, Messrs. J. B. Sutherland and W. H. A. Thompson being the representatives elected.

A recommendation was sent forward to future meetings, that the president who is retiring and the incoming president be the representatives in ensuing years to the D.A.C.A. It was agreed that special arrangements might be made at any time, but the adhering to some such plan as the one suggested would provide desirable continuity. The elections for the following year resulted as follows: President, Ed. D. C. Thomson; first vice-president, F. M. Harvey; second vice-president, M. C. McCannell; secretary-treasurer, C. E. Race; auditor, H. O. Patriquin; representative of the institute on the senate of the university, Ed. D. C. Thomson.

Fifty-seven votes were reported as being either completely or substantially in favor of the proposed tariff of fees, and it is probable that action will be taken shortly to have the tariff authorized by the Lieutenant-Governor-in-Council. A proposal that railway fares within the province be paid to members attending the annual meeting was debated, but it was decided that the time was not opportune for putting such an arrangement in force. A recommendation was carried that annual meetings should be held alternately in Edmonton and Calgary. Explanation was made by Mr. Sutherland of the recent incorporation of cost accountants. Committees were appointed to thrash out the details of Alberta's view concerning the report of the Dominion Committee on Uniformity of Standards. Their report has since been sent in to the Dominion secretary.

MANITOBA PROVINCIAL SAVINGS BANK

Deposits up to July 10 Totalled $135,325, Says Chairman Weir—Facilities Brought to Attention of Public

"BANKING by mail is a special service adopted by the province of Manitoba savings office to give depositors outside the city of Winnipeg a safe, convenient and profitable method of depositing their savings," says a booklet just issued by the chairman, E. A. Weir. Any person, it is explained, at any time, may deposit any amount by mail. The interest rate is 4 per cent. per annum on the minimum monthly balance compounded half-yearly. The money may be withdrawn at any time by merely forwarding an order to head office in a special order form provided for on request by letter signed by the depositor himself. Accounts are opened by signing a letter, enclosing the money, in post office, express money order, or bank draft, and mailing to the office, for which a receipt in the form of an ordinary bank pass book is issued. The book is balanced and interest computed every May and November.

Regarding the safety of the deposit system, the booklet says:—

"Deposits in this office are absolutely guaranteed by the government of the province of Manitoba. Depositors cannot lose. All the natural resources of the farms, forests, mines, fisheries, water powers, the wealth of industries in all Manitoba's towns and cities, the strength of the strongest financial institutions and the resources of all the people of the province of Manitoba guarantee the depositor's funds.

"This office was established to give the citizens of Manitoba an opportunity to invest their savings to help their own province. The money secured from the people will be used to finance the Rural Credits Societies and Manitoba Farm Loans' Association. These institutions have helped to make Manitoba prosperous by enabling farmers to break up thousands of acres of land, buy livestock, clean off old and burdensome debts, make purchases for cash and develop better rural communities. The money may also be loaned to assist in financing cities, towns, villages, rural municipalities or school districts within the province of Manitoba."

Business Done So Far

Up to July 10, $135,325 had been received on deposit, according to a statement made by E. A. Weir, chairman, on that date. The first deposit was made by W. J. Sisler, principal of Strathcona School, Winnipeg, on June 2. The total number up to June 10 was 25. "We have had deposits," said Mr. Weir, "from ten districts in Manitoba by mail. Among them are Elphinstone, Oakville, Souris, Sandy Lake, McAuley and Minitonas. The foreign residents of the city are displaying great confidence in the bank. Our deposits in the north end branch and the number of enquiries we are daily receiving are an indication, I believe, that the provincial savings bank will prove to be immensely popular. The guarantees we offer, the rate of interest and other factors entering into the banking business are proving very attractive to prospective banking customers."

The head office of the bank, in the Lindsay Building, will be opened July 20 or 21, Mr. Weir expects.

A CANADIAN NATIONAL SUMMER RESORT

Among the new activities of the Canadian National Railways this year is the opening of a modern summer hotel at Grand Beach, on Lake Winnipeg, about 60 miles north of Winnipeg. There are 200 guest rooms, each supplied with hot and cold running water. The building has been lined inside with fireproof gypsumboard, the material for which was obtained from Gypsumville, Man., and manufactured in Winnipeg. Smoking rooms and ladies writing rooms are provided on every floor. The cost of the improvements totalled in the neighborhood of $100,000.

BRITISH REPORT ON CANADIAN TRADE

General Situation is Sound, Concludes Commissioner—United Kingdom Manufacturers Alive to Foreign Competition Here

"ECONOMIC, industrial and commercial conditions in Canada are sound, and given more stable, political and social conditions throughout the world than those obtaining at the beginning of 1920, the Dominion should achieve a degree of development far surpassing that achieved hitherto." This is the conclusion expressed in a blue-book just issued by the British government, giving reports on the trade of Canada and of Ontario by F. W. Field, British trade commissioner in Ontario. With reference to the market for British manufacturers, the following statement is made:—

"As a market for British manufacturers Ontario presents an attractive field, more especially in the lines in which United Kingdom manufacturers have excelled for so long. The development of Canadian manufacturing, of which such a large proportion is carried on in Ontario, leads one to the conclusion that the greater part of British trade in this market will in future years be confined to the principal groups of manufactures which constituted the business here of United Kingdom firms before the war."

Other Exporters are Active

Reference is made to the activity of the Japanese in Canadian trade; to the opportunity for sales of machinery here; to the need for more advertising of goods; to the high production costs in Ontario factories as compared with those in the United States; and to the increase in the number of American branch plants here. British manufacturers also showed their interest during the year by establishing factories here. As regards agencies, the following comments are given:—

"It is still a matter for the consideration of certain United Kingdom firms as to whether their agency arrangements for Ontario, and Canada generally, should be treated as part of their United States agency arrangements. At least one British firm with branch works in the United States has now established a branch in Ontario. The tendency of United States firms with trade connections in Canada is to establish separate units in Canada, either branch works, offices, or agents, to deal with their Canadian trade."

GERMAN GOODS IN CANADA

Germany is already securing considerable business in Canada, according to statements made by E. J. Edwards, British trade commissioner in Canada, at a meeting of the Montreal branch of the Canadian Association of British Manufacturers on July 7. Several clever and attractive German trade circulars had come into his hands, he said, through different Canadian firms which had received them, and he urged that representatives of British manufacturers here take warning from this German activity and keep in close touch with buyers, even if they had difficulty in supplying goods.

It had come to his notice, continued the speaker, that foreign manufacturers were trying to tempt British agents here of good selling reputation to accept their agencies on promise of ready supplies and high commission. He hoped that such agents would not accept offers of that kind, but would make some small sacrifice by retaining their British agencies, which would become more remunerative when conditions reverted to normal. Another point stressed by Captain Edwards was that British agents here should urge manufacturers they represented to allocate a certain proportion of their output for the Canadian market exclusively, and so ensure a steady supply of British goods to this country.

Foundations of Progress and Prosperity

Changing Viewpoint as to Maintaining and Raising Standard of Living—There Is No Surplus Which Can Be Tapped, Nor Does More Money Provide a Remedy—Capital as Well as Labour Must Be Efficient

By W. W. SWANSON

PROFESSIONAL economists and others who ought to know better are engaged in the pleasant process of persuading "labor" that it is being grossly exploited by the capitalist class, inasmuch as the entire field of labor has not been organized and the workers have not, therefore, a sufficient "voice" in the management of industry. The general conclusion that is reached is that the accumulation of capital has proceeded apace, and that the rich have grown richer as the poor have grown poorer. This is true neither absolutely nor relatively.

An examination of many of our financial corporations will disclose the fact that not only are their shares held widely by the people, but also that their activities are vitally essential for the common good — and not for the betterment of a preferred class. Be that as it may, the common notion that the "surplus" should be seized by labor for its immediate enrichment is one of the most pernicious fallacies of the times. It is not by that facile and short-cut method that the workers will be able to make permanent gains. This is obvious enough to those, including the workers themselves, who have observed that the increase in money wages has in general given no corresponding increased command over the necessaries and comforts of life.

Wage Increases Were Ineffective

It has been said sufficiently often that wages when advanced have but brought prices and wages alike within the swing of a vicious circle. This solution of the wages problem was, under present conditions, doomed to failure from the first. The assumption underlying this plan of bettering living conditions was that it was possible to restore the standard of living to all the people that existed in 1914 — that a mere increase in money wages would maintain and even improve that standard for the masses. The futility of the argument, and the program, is found in the fact that while money wages were never before so high in Canada and the United States, and while money circulates in growing volume, it becomes increasingly difficult to get back to the old standard of living. In the countries of continental Europe the very plethora of money has raised prices to fabulous levels while at the same time reducing and degrading the standard of living. It is well to recognize that the chief difficulty to be overcome is the actual dearth of goods — that no matter how high money wages are raised there are simply not enough commodities to go around. And if this continent is to do its fair share in rehabilitating the economic life of the world there will not be sufficient commodities to satisfy even the primary needs of humanity for a long time to come.

Production and the Hours of Work

The intimate relation of production to consumption is ignored or glossed over by those who speak so glibly of solving the economic problem by the easy expedient of dividing the "surplus" with labor, or handing over that surplus in its entirety. In that exceptionally able work, "The Case for the Shorter Working Day," by Felix Frankfurter of the Harvard Law School, and Miss Josephine Goldmark, the chief emphasis was placed upon the relation of industrial fatigue to productivity; and the eight-hour day was justified by the fact that it had resulted in a higher output per individual per day, which in turn was made the reasonable basis for increased wages and a higher level of living.

But much of present day discussion turns upon a reduction of hours to increase the amount of work, or rather, to make the same task go farther. Many workers are obsessed with the idea that shorter hours and higher money wages make for the permanent prosperity of their craft or class. They lose sight of the fundamental fact that real wages consist of what money will buy, and that a general decrease in productivity injures them first, and most of all. At present, the needs of the world considered, there are simply not enough commodities to go around. The granting of higher money wages, without a corresponding increase of the productive output, leads labor into a fool's paradise. If a general increase in the volume of money in circulation means prosperity, then Russia, Germany, Italy and France should be just now the most prosperous countries in the world.

There Is No Surplus

Emphasis upon thrift in order that the permanent machinery and tools of production may be increased through investment does not appeal to many in the community who demand that they may eat their cake and have it. The practice of thrift is too painful and prolonged a process when immediate whims and desires may be sated by the appeal to the local or general strike, or when wages may be increased by the mere threat of provoking industrial disorganization. And thus throughout the United Kingdom, the United States and the Dominion the idea has become all too general that the chief business of labor to-day is to obtain a greater share, or the whole of the surplus — when the surplus is not there. The only surplus that can be divided is one that is produced; and this brings one back to the basic and elementary fact that the quickest and most certain method of raising both local and general standards of living is first of all to produce the goods. The attempt to correlate wages with ever-climbing prices, and to get back to the old standards of living by the money mirage route is burning the truth into the minds of men that labor cannot reap where it has never sowed, and that underproduction makes its malign effects felt first in the field of labor.

Industry Must Have Skilled Direction

Much is made to-day of the "democratization" of industry, and no doubt the principle itself when correctly applied is capable of accomplishing great good. There are radicals and visionaries, however, who imagine and indeed insist that democracy in industry involves the abolition of the executive and capitalistic class as we now know it. In Canada there are relatively few capitalists, as such, who are not directly concerned in the management of industry; and of men of this type the imperative need of the day is for more of them, not less. For, in a word, the executive is the man who has both the vision and the practical ability to get things done, and to get them done in the most effective way. He it is who has learned to combine the many factors of production in such a manner as to obtain the best results — for labor as well as for capital. The man who has that great gift will always be in demand, and will always receive a high return, whether in terms of money, of prestige, or of power.

Combining Factors in Production

Dominating the nation's economic life is the great law of proportionality — the combining of the factors of production in the most efficient way. Abundance of land and abundance of capital in fixed forms — in mines, farms and factories — is in itself the origin and the explanation of the demand for labor. It has often been remarked by economists that the chief reason for the higher level of wages in the Dominion and the United States, as contrasted with hitherto prevailing European standards, is found in the alternative employment always open to the worker on the land — and particularly to the pos-

SUN INSURANCE OFFICE

Excerpts from Report of the Directors for the Year ending 31st December, 1919

Fire Account

Premiums received, less Re-Insurances		[illegible]
Losses paid and outstanding . . . being at the rate of 47.30 per cent. on the Premiums received.		[illegible]
Expenses of Management (including Commission to Agents and Working Charges of all kinds) being at the rate of 38.83 per cent.		[illegible]
After reserving as unearned 40 per cent. of the Premiums to cover liabilities under current Policies, there is a Credit balance of . . . . . . which is transferred to Profit and Loss Account.		[illegible]

Profit and Loss Account and Dividend

The balance brought forward from last year was		$ 2,098,010
Paid for Dividends in respect of 1918		684,000
Leaving a Credit Balance of		$ 1,414,010
This by the operation of the year has been increased to		$ 3,110,860
There has been:— Carried to Pension Fund .		150,000
Leaving a Credit Balance of		$ 2,960,860
An interim Dividend of $1.75 per Share, less income tax, absorbing . was paid in January last. The Directors have declared a further dividend of $2.75 per Share, less income tax, payable on the 1st of July, which will absorb a further sum of	$294,000 462,000	756,000
Leaving unappropriated		$ 2,204,860

LYMAN ROOT, Manager

sibilities of self-employment there. The same principle obtains with respect to the building up of capital resources in fixed forms. A greater railroad mileage and a more efficiently organized railway system makes for the employment of labor and higher wages. An increase of capital brings benefits to the entire community, and directly raises the status of labor. With enlarged capital investment in fixed forms, and more abundant funds in the loan market, the return to capital by way of interest and dividends declines. At the same time the demand for labor increases, and with that increased demand the rate of wages. The decline in the interest rate makes for community progress and development, and hence for increased general prosperity.

Increased Wealth Benefits All

Thrift and increased production, let it be repeated, make inevitable the raising of the standard of living for labor and the improvement of social and economic conditions for the entire nation. It is impossible to increase the per capita production of wheat, say from five bushels to eight or nine, without at the same time raising the standard of well-being of the whole population of the country. And what is true of wheat is true of all other economic goods — both concrete goods as well as services. If wealth increases faster than population the relative return to capital falls, and the return to labor rises. Granted that there is injustice in specific cases, that some employers underpay employees, it by no means follows that employers in general, by concerted efforts or otherwise, can defraud labor of its just reward. With an abundance of free land, or of cheap land, and an abundance of capital, the demand for labor will inevitably force wages to higher levels. Underproduction penalizes capital, but it is fatal to the best interests of the workers themselves.

Example of Russia

There are some radical labor leaders who profess to see great advantages in the soviet system of government. If they have followed recent developments in Russia they will have observed that the emphasis has been shifted from the right to strike to the necessity to work, and that a great scheme is being formulated and put into operation for the conscription of labor. It has come home to the leaders of soviet Russia, and to the members of the various committees in charge of national affairs, that not visionary theories but hard work is the only way of economic salvation for the nation. If one can rely upon reports from Russia, already the soldiers of the third army in the Ural region, retaining their military discipline, have been compelled to reorganize for labor in the service of the nation. Bitter protest has been entered against the scheme of compulsory labor on the ground that it will make the technical expert and the business executive supreme and lead to the collapse of "industrial democracy." Whether such be the outcome or not, it has become plain to the backers of the soviet that all that remains of Russian civilization and industry will disappear unless the entire labor power of the country is organized in behalf of production. The imperative importance of work, and not the right to strike, receives the emphasis there to-day.

During the war the Anglo-Saxon democracies, including the United States, gave close attention to the cadastration and the organizing of all available resources — not only of material wealth but also of labor power. Under the stress of war amazing feats of production were performed. It was regarded as something little short of treason that waste of materials or of labor power should be permitted. In the great industrial establishments of the United Kingdom and the United States scientific analyses were made of the causes of under-production and the loss of productive energy. As a result of these studies, production was keyed up to the highest possible pitch. Workers were instructed not only how to make their labor count for more, but also how to safeguard [illegible]. True, the driving power that the war emotion gave to industry has gone, but the idea must be recaptured and [illegible] effective in new ways. If farms that are now under-[illegible], and workers that are below the average, could be [illegible] up to par the result would be an immense increase of capital and new areas of work opened up in the fields of trade and commerce.

Guaranteeing Return on Investment

This obligation of increased efficiency rests not only upon labor but upon capital also. In the recent United States legislation, providing for a guaranteed return of 5½ per cent. on the capital value of the railways in the several groups into which they are divided, the opinion was expressed in some quarters that such a guaranteed return would inevitably make for inefficiency. The contrary, however, is the case, for the guaranteed return is assured only to those railroads that come up to standard in the sphere of organization and management. There are many important features about the legislation in question, but none more so than the insistence placed upon the necessity of earning a guaranteed return by giving results — and service. And among other things, it raises the fundamental question as to whether the nation, if it restricts dividends by means of an excess-profits tax, should not — in the case of public service corporations at least — also guarantee a reasonable return on the value of the business in lean years

Unemployment Pay a Poor Remedy

But beyond that, larger issues are thereby raised for labor. If a fair return on capital, as in the case of the United States railroads, is guaranteed, and that return is related to efficiency, there is bound to result therefrom steadier employment for labor. More than that, the industry may be held more strictly to account in providing reasonable working conditions. It appears evident that the guarantee of work, under decent conditions of hours of work and wages, is the vital factor in the field of labor to-day. In the United Kingdom provision is being made for an unemployment benefit of 15 shillings weekly, the inadequacy of which is bitterly denounced by the labor interests. True, such a benefit is but little better than the pre-war old-age pension; but the objection to the entire scheme goes deeper than that. To pay such an unemployment benefit the industries of the entire nation are taxed, whereas unemployment may develop in only one or two at the same time — leaving a period of general depression out of consideration. This draws attention sharply to the fact, referred to above, that industries as well as labor should be held to "strict accountability" for the efficiency with which they function. Slipshod management, as well as slipshod work, is a matter of common social concern.

To guarantee work, then, is a far bigger and more significant matter than to guarantee an unemployment dole. This ought to be taken into account, in much greater measure than is done at present, by both legislators and workmen who are turning their attention to insurance against unemployment as an urgent social necessity. Production and exchange, the tariff, trusts, pools and combines, and the like, should be studied from this point of view. The finding of additional markets, the relation of Canada's trade to conditions in Central Europe and elsewhere, take on, from this standpoint, a new meaning. To protect the nation's economic life and aid in the great work of saving the world from the collapse of civilization itself is the supreme obligation of the hour.

Minority rule menaces Canada as never before in her history. Class-conscious interests develop everywhere, and the formation of group government in the place of national solidarity threatens the country. It is essential, therefore, as never before, to work out an economic and social policy making for the common good. The One Big Union idea, which is catching the imagination of many Canadians, is that the old constitutional methods have failed, and that the appeal to the ballot must be displaced by the appeal to the power of the general strike. Let no one deceive himself that this idea will fail of making converts. The only sane and effective method of destroying that idea is to displace it by a better and more dynamic idea — the idea that opportunities for progress will be enlarged; that work can be made more certain and continuous for all willing to labor; and that industry as well as labor will be held responsible for efficiency and service. That way lies the broad highway of social and economic progress.

TRUSTEES UNDER DOMINION BANKRUPTCY ACT

Every Province Represented in Appointments Already Made—Individual Bond of $15,000 Must be Furnished

TRUSTEES have been appointed under the Dominion Bankruptcy Act, which went into force on July 1st, as shown in the list below, issued on Monday, by the department of the secretary of state. The appointees are largely chartered accountants, auditors and financial agents, and they must deposit an individual bond of $15,000 before the appointments are gazetted and before they will be able to act. It is understood that practically every trust company doing business with the public in Canada applied for appointment. Some of them have not been actively doing this class of business, but in any case they wished to have the necessary powers. The list was, therefore, somewhat of a surprise in trust company circles, as in some provinces only one or two have been appointed. In Ontario, for instance, the National, the Toronto General and the Consolidated are the only ones, although some other companies which have not yet been appointed in Ontario, are on the list for other provinces. It is thought, therefore, that further appointments will be made from time to time.

ONTARIO—Henry Barber, Joseph James Clarke, Edward Roper Curzon Clarkson, Edward Guy Clarkson, Frederick Curzon Clarkson, Geoffrey Teigmouth Clarkson, John Dickie Wallace, Norman Leslie Martin, Samuel Ernest Montgomery, Donald McKenzie McLelland, National Trust Co., Ltd., John Bissland Robertson, Richard Tew, Harry Vigeon, Osler Wade, Albert Elliott Weatherbe, Rutherford Williamson, James Hardy, the Toronto General Trusts Corporation (Toronto), William Alanson Cole, George Andrew Welch, Arthur Alfred Crawley, William Young Denison (Ottawa), Joseph Edmund Crawford, Robert Henry Neeland (Fort William), James Michael Johnston (Cornwall), Oliver Stuart Hillman, Frederick Henry Lamb (Hamilton), the Consolidated Trusts Corporation (London).

QUEBEC—Thomas James Coulter, L.I.A., John Joseph Robson, L.I.A., Albert Onesime Chalifour, Joseph Alphonse Lefebvre, Joseph Gustave Mousseau, L.I.A., Ernest Stamour, Paul Louis Turgeon, Pierre Henri Dufresne, Edouard Henri Merrill, Eugene Prevost, Vincent Lamarre, Edmond Garneau, Wilfred Damphousse, Clovis St. Louis, John W. Ross, Joseph E. Lemire, William Gordon Finlayson, George Taylor Gardiner, Alphonse Moisan, Robert Wilson, Alexander Fowler Riddell, Alexander Irwin Morison, Arthur Gagnon, Joseph Alphonse Villeneuve, Morris Goodman, Richard Costigan, John Hyde, Royal Trust Company, Montreal Trust Company, Bankers' Trust Company, Charles Alfred Sylvester, Arthur Panneton, Edward H. Begin, Frederick William Sharp, F.C.A., Edwin Brigs (Montreal); J. Arthur Larue (Quebec), John James Griffith, L.IA., Gedeon E. Begin, L.I.A., (Sherbrooke), Joseph Conred Perrault (Joliette).

PRINCE EDWARD ISLAND—The Canadian Credit Men's Trust Association, Limited (Summerside).

NEW BRUNSWICK—The Canadian Credit Men's Trust Association, Limited (St. John), Arthur Earle Cox (St. John).

NOVA SCOTIA—The Canadian Credit Men's Trust Association, Limited, Robert Carter (Halifax).

MANITOBA—The Canadian Credit Men's Trust Association, Limited, William Alexander Henderson, the Northern Trust Company, the Traders Trust Company, the Western Trust Company (Winnipeg).

BRITISH COLUMBIA—Frederick James Carter, The Canadian Credit Men's Trust Association, Limited, Mather Joseph Crehan, Robert Baldwin Ellis, Walter Ernest Hodges, Harry Joseph Perrin, Sydney Wilson, George Edward Winter (Vancouver), Thomas Sturch Annandale (New Westminster).

SASKATCHEWAN—The Canadian Credit Men's Trust Association, Limited, Saskatchewan General Trusts Corporation, Limited (Regina), Great West Securities and Trust Company, Limited, Executors' and Administrators' Trust Company, Limited, Wm. Ewart Hodge (Moose Jaw), David Mowat (Saskatoon), Oswald Julius Godfrey (Indian Head), the Traders' Trust Company, the Western Trust Company, the Northern Trust Company (Winnipeg).

ALBERTA—The Canadian Credit Men's Trust Association, Limited, the Security Trust Company, John Bain Watson, James Gordon Edgar, the Trusts and Guarantee Company, Limited (Calgary), James Angus MacKinnon, National Trust Company, William Lewis Wilkin (Edmonton), the Western Trust Company, the Traders' Trust Company, the Northern Trusts Company (Winnipeg), Frederick Martyn Oliver (Medicine Hat).

MANITOBA RURAL CREDIT LOANS

A total of $2,000,000 will have been passed under the Manitoba Rural Credits Act for the period of December 1 to July 31, Chas. Gifford, administrator, stated a few days ago. The amount is approximate, however, but is expected to double the amount for last year. Up to date the total value of cheques issued since April 2 of this year is $1,090,000, to 56 operating rural credit societies.

MANITOBA CHARTERED ACCOUNTANTS

At the annual meeting of the Manitoba Institute of Chartered Accountants, held recently, the officers elected for the ensuing year were as follows: President, F. C. Gilbert; vice-president, B. F. Griggs; secretary, W. J. Spence; council, F. C. Gilbert, B. F. Griggs, W. S. Ronald, W. A. Henderson, Hubert Reade, E. S. Reid, J. Parton, W. D. Glendenning, S. A. Brown, D. Young, W. Gray, F. C. S. Turner, C. E. White and A. E. Phillips.

PAYMENT ON 1919 WHEAT CROP

The Canadian Wheat Board has decided to make an interim payment of 30 cents per bushel as soon as possible after July 15 against the wheat represented by its participation certificates when such certificates are presented to the board, states an official announcement made recently. While the board, says the statement, will be unable to determine the total value of the certificates before the business is completed; at present, indications are that this payment represents approximately 75 per cent. Owners of participation certificates can send them either direct for payment or through any available agency.

WELLINGTON FIRE INSURANCE CO.

Cash premiums of the Wellington Mutual Fire Insurance Co., Guelph, Ont., during the year 1919, totalled $107,628, and mutual premiums, interest, etc., brought the income for the year up to $122,486. In addition there was $8,228 brought forward from 1918, and $82,050 received as payment on capital stock. Claims to the amount of $49,541 were paid, including $1,809 on 1918 account. Commissions totalled $24,378, and rebates and returned premiums $10,520. The sum of $43,288 was invested, and a balance of $63,940 remained on hand at the end of the year. The company's assets now total $206,251, mostly consisting of bonds and debentures. Liabilities to the public are $66,943, leaving $139,307 as security to policyholders. The paid-up capital is $124,500.

These figures represent good progress during the year, the amount of insurance in force being increased from $10,345,797 to $13,107,130. With the payment of the remaining 65 per cent. on the capital stock, the latter is now fully paid, and the position of the company strengthened by the investment of these funds.

PHŒNIX ASSURANCE COMPANY
LIMITED

Sir Gerald H. Ryan on the Insurance Outlook—Interesting Report of the Company's One Hundred and Thirty-Eighth Annual Meeting—Nationalization of Insurance Bogey—Growing Demands of Taxation

---

RECORD FIRE PROFITS.

The **ANNUAL GENERAL MEETING** of the shareholders of the Phœnix Assurance Company, Limited, was held April 28, 1920, at Phœnix House, King William-street, **SIR GERALD H. RYAN**, Bt. (chairman of the company), presiding.

The **SECRETARY** (Mr. R. A. C. Thomas, F.I.A.) having read the notice convening the meeting and the report of the auditors.

The **CHAIRMAN** said:—Gentlemen, we have now reached the 138th year of the company's existence, and each year it seems to me that the preparation of a chairman's speech must become more difficult. The accounts gather together, in a condensed form, our operations in practically every branch of insurance business in nearly every part of the world. Questions of great importance necessarily arise in a large number of cases affecting our various interests in one place or another, and these are lost sight of in the audited accounts. It is, therefore, desirable that the opportunity should present itself in the chairman's speech to supplement the accounts and the report, which latter is mainly but a brief summary of the accounts. I accordingly propose to follow the example set by my predecessor in the admirable addresses he delivered for so many years in succession, by offering a running commentary on the results embodied in the accounts, adding a few more general remarks on broader questions which our experience and observation during the year render desirable.

FIRE RESULTS.

My first and most pleasant duty is to call your attention to the signal success of our fire department in 1919. An unusually low loss-ratio—it was only 42.5 per cent. of the premium revenue, and 50 per cent. is regarded by us as a favorable ratio—and expenses which remained at the normal level of 38.3 per cent., left us with a handsome margin of profit. The final profit of £326,377 is not only highly satisfactory in amount, but is the largest contribution the department has made to our profit and loss account since the company was established. (Cheers.) An increase in our premium revenue of no less than £260,884 is also a very favorable feature, this being largely due to the higher values of properties and commodities, and to the growing appreciation of the community that its insurance must be greatly increased in amount if it is to enjoy full and proper protection. A word of praise will be ungrudgingly given to our fire manager, Mr. Boston, for these excellent results (hear, hear), and I would also mention Mr. Beresford, our manager in the United States, for special recognition of his very successful efforts. (Hear, hear.)

MARINE RESULTS.

The marine accounts are not so simple and convincing as the fire figures, because the effect [illegible] the marked and temporary addition to our annual income due to the transaction of war risks during the years 1914 to 1919. The claim payments thus relate to business of much ampler dimensions than that completed in the year of account. The same remark applies to our expenditure, and it would be wholly misleading to regard these outgoings as comparable with the premium revenue of 1919. The actual result as shown in the amount of £300,000 carried to profit and loss is exceedingly satisfactory. We may now be said to have passed into the calmer waters of normal peace conditions, and the directors feel that the shareholders would like to join them in their congratulations to Mr. Sandeman Allen and his colleagues for the skill and success with which they conducted this portion of our business in circumstances of unprecedented difficulty. (Cheers.)

ACCIDENT RESULTS.

The accident department exhibited a satisfactory development and a moderate profit was earned. Certain branches of this business—burglary and [illegible] risks especially—are passing through an unprofitable phase and require exceptional attention. New legislation, in the shape of the Workmen's Compensation (War Addition) Amendment Act (1919), introduces a disturbing element in Workmen's Compensation business. The position of this class of business is being closely watched by ourselves and other tariff companies.

LIFE RESULTS.

The operations of the Life Department revealed some unusual features. An almost universal increase in the new policies issued in the year occurred in that section of insurance business. Various reasons have been assigned for this; the larger incomes now enjoyed by so many, the need of providing for the heavy death duties, the necessity of making good depreciation in values [illegible] the shrinkage in the value of investments, and a [illegible] of the greater amount of insurance required [illegible] families to provide for the protection of their dependents—these, among other reasons, may be given for this [illegible] and expansion of new life business. [illegible] that, whatever the cause [illegible] healthy indication of thrift and forethought on the part of the community [illegible] tions. (Hear, hear.) A [illegible] another [illegible] feature [illegible] speaking [illegible] has been [illegible] It is necessary for me to [illegible] natural outcome [illegible] heavier cost [illegible] tion which the [illegible] I shall make further [illegible] In what respects there is little to comment upon the Life Department, which is in a flourishing condition apart from the fall in the value of investments, a matter so largely outside the control of your board. The outlook is not free from anxiety in this connection, and in such circumstances it is a matter of satisfaction that the board has seen its way to declare a substantial bonus to the policyholders of the Law Life section, after making full allowance for all depreciation. The quinquennial valuation of the company's life fund will be made at the end of the year, and the result must largely depend on the values of investments then ruling.

Profit and Loss.

I now pass on to what is often considered the most important of our accounts, namely, profit and loss. In this we find gathered together the results of the several trading departments, and interest, dividends, and rents received, on the one side, and our dividend and debenture interest payments on the other. Examining this account closely, we first see that our available interest receipts amount to £187,600 against dividends and debenture interest of £201,489. Next, we find the various profits from separate departments make up a grand total of £636,637, but from this no less than £438,260 has to be deducted in order that we should provide fully for all the taxes that have properly accrued. I say it with no desire to boast, but I believe we take a stricter view of the taxes to be provided for than do many other companies. We hold that at the same time as you pass an item of profit into your accounts you should debit the accounts with the full taxes of all kinds, which are applicable to such profit. (Hear, hear.) It is not unusual, I believe, to charge in account only the amount of taxes actually paid in the year under observation, but this may lead to a small profit in one year having to bear the taxes strictly applicable to a possibly larger profit of the year before, and against this inconvenience our system fully protects us. With this large deduction for taxes and a sum of £170,977 set aside to write down our shareholders' investments to their market values, our trading profits are practically exhausted. The usual provision of £25,000 off the value of our office premises has, however, been made.

Depreciation and Taxation.

Now in these figures we see reproduced a feature of our recent experience—namely, a highly satisfactory total trading profit melting away to nothing through the operation of the joint forces of depreciation of values and taxation of income. Of these trading profits our shareholders have taken practically nothing, their dividend being largely provided by interest on their reserves and funds. Almost the whole of the outcome of the trained skill of our managers, the long-established connections of the company throughout the world, and the fruits of our energy, enterprise, and exceptional hard work, have either been whittled away by a shrinkage in our assets or taken from us by the State as taxes. A few words may be spared to deal a little more fully with this phenomenon of late years. As to the depreciation in our funds, this has been caused, directly or indirectly, by a weakening of the nation's credit.

Response to Government's Appeal.

No class of financial institution answered more freely or promptly to the Government's appeal for support on the issue of the several State loans than did the insurance companies. (Hear, hear.) "Twenty per cent. of the total funds for the Government" was the formula adopted by the great majority of companies, and exceeded by not a few, including our own. The heavy fall in the public quotation of all these securities has had its inevitable effect in the periodical revaluation of our assets. Even since our accounts were made up a further considerable decline has taken place in prices, and, according to the judgment of competent authorities, the lowest point has not yet been reached. Other investments of a high character naturally followed suit, and the reduction of values has become general. In the last 10 years the Phœnix has written off from the value of its assets (apart altogether from the life funds) sums amounting to upwards of £700,000, and in the five war years, 1915 to 1919, the total was no less than £470,000. Great inherent strength and a wise husbanding of our resuorces alone enabled us, and other leading insurance companies, to withstand such serious and long-continued depreciation. This, however, must be looked upon as a direct consequence of the war, the debilitating effects of which have left their mark upon the company in many other ways.

Growth of Taxation.

The item of taxes also yields some remarkable figures. During the 10 years, 1910 to 1919, our shareholders' profits and interest have provided no less than £1,623,315 in taxes of one kind and another, the five war years, 1915 to 1919, alone accounting for £1,552,500. I wonder what the corresponding figures of all the insurance companies would be, and what the total would amount to? Surely something colossal. Now, it may be rather disappointing to insurance shareholders that the profits of their companies should be dangled before their eyes and then withheld for other purposes, and this is a reasonable enough view for them to take. But I think we may all gather solid consolation from the thought that our skill and energy have not been thrown away, nor been worked fruitlessly and to no end, but have rather been employed at their full strength to provide, if not dividends for our shareholders, what was still more important, the sinews of war for the protection of our country. (Hear, hear.) The machine has run at its maximum speed, and the output was never more satisfactory; our shareholders will be the first to express their gratification with the substantial help we have been able to render to the State, even though, in the meantime, their immediate pecuniary interests may have suffered.

The Problem of Nationalization.

There is one aspect of these figures which is, indeed, not without a moral. We hear nationalization spoken of as a principle to be applied to many branches of public or private effort. To-day it is the mines; to-morrow it may be the railways, and so on. Insurance has not escaped the net which has been flung far and wide by the theorists and idealists, who aim at destroying the present fabric of industry. On its political side we have, naturally, nothing to say in such a meeting as this. But will anyone maintain that the same measure of financial support, either in subscriptions to loans or in payment of taxes, would have been forthcoming to the nation in its emergency had the business of insurance been in Government and not in private hands? (Hear, hear.) Remember that a great portion of the total profit of the large insurance offices is derived from foreign business—the result of "missionary" enterprise in the past and of diligent cultivation ever since without intermission.

What would become of the vast volume of profitable foreign business if insurance were nationalized? We have recently had brought prominently before our eyes one example of the complete failure of a Government Department to deal with a certain type of life assurance. Would the result be any the more successful were the more highly technical business of fire or marine or accident insurance undertaken by the State? And even if, for purposes of argument, we admit that home affairs would not necessarily prove to be so palpable a failure, would not the great benefit to the country of our foreign business, carrying everywhere the high name and fame of Great Britain and earning profits for shareholders and taxes for the State, be lost to the country? (Hear, hear.)

The time has not yet come for a detailed and critical analysis of the errors and evils inherent in any scheme to

(Report continued on page 34)

JOINT MANAGERS

R. MacD. PATERSON and J. B. PATERSON

substitute bureaucratic control for individual enterprise in the wide field of insurance, but I have ventured to lay before you these few personal reflections in order that all who are concerned in our important branch of industry may give thought to the great damage that may accrue to many interests, private and public, by these unsound and ill-considered proposals.

INCREASING EXPENSES.

I have already mentioned, in connection with the Life Department, the increase in our expenditure. This is, of course, not confined to any single department, but affects every section and phase of our business. The causes are world-wide in their incidence, and too well understood in their origin to call for any remark. The heaviest addition to our expenditure is in the item of salaries, and though the directors are not unmindful, in a company like ours, of the necessity of economy in carrying on our business, they consider that a company like ours must look after its employees properly, and remunerate them on a liberal scale. The temporary allowances made in the shape of war bonuses have, therefore, been made fixed additions to salaries, and during the last few weeks a further substantial revision has been made. In this and other ways the board seek to promote the welfare of the staff, and they have expressed themselves as favorable to joint action among the staff to enable representations to be made to the management, whenever it may seem necessary, on the conditions of employment in the company. At the same time, I cannot conceal from you the fact that all this means a constant increase of expenditure throughout all branches of our business, the full result of which is not apparent in the accounts before us. No corresponding increase in the premiums we charge for the various risks undertaken has yet been made on this account, and, judging by recent results, our profits have been well able to sustain the additional burden. But for some years past insurance business has enjoyed a spell of considerable prosperity, and we cannot reckon upon the continuance of such good times. Indeed, in several directions indications are observable, over a wide area, that a turn of the wheel of fortune has occurred.

MULTIPLICATION OF NEW COMPANIES.

Furthermore, the multiplication of new companies in the last year or two must lead to more strenuous competition for the most desirable risks. I am told that since 1914 the number of active British marine companies has been more than doubled, and new fire offices have, as we all know, sprung into existence in great profusion. These conditions give us no ground for anxiety concerning the future of our company, but sound the note of warning, and show the need of the utmost care and watchfulness in the conduct of our affairs. We believe that our chief safeguard in these circumstances is that we have the benefit of a highly skilled general manager in our new chief official, Mr. Sketch—(hear, hear)—with whom our most efficient experts are associated in the various fields of our work. Together they will be able, we confidently believe, to guide us through any coming difficulties.

THE NORWICH FUSION.

What I have stated as to the general outlook applies with equal force to the business of our newly associated company, the Norwich Union Fire Insurance Society, the fusion of which with the Phœnix was effected, with such remarkable smoothness and goodwill, in the early months of the present year. By this alliance, the Phœnix "group" becomes one of the largest and most important of all British insurance combinations. It is my firm conviction that a great and prosperous future lies before the allied companies, and that in due time we shall see a development and expansion of our business which could hardly have been thought of in the old days. The one thing to give ground for doubt is the state of the national finances, with the fear lest, in their desire to find a quick and easy solution of present difficulties, our Ministers may be induced to adopt expedients that will weaken the springs of enterprise and undermine the foundations on which our industries have been raised. (Hear, hear.) I now beg to move:—

"That the report be adopted, and that a dividend of 12s. per share, subject to income-tax, be declared out of money available for that purpose at the end of the year 1919, to be payable in two instalments of 6s. each, on May 1 and November 1 next, to members on the register on April 30 and October 31, respectively, except that holders of Phœnix (Norwich Union Fire) shares shall on 1st proximo receive a proportionate amount of 4s. per share instead of 6s., in accordance with the terms of the argeement of January 12, 1920.

"Provided that where no allotment of new Pelican shares has been made by April 30, 1920, to the parties entitled thereto, the May dividend of 6s. in respect of each of such shares shall be retained and paid to such parties on their being duly entered on the register of the company.

"Provided also that where persons entitled to exchange their shares in the Norwich Union Fire Insurance Society, Limited, under the said agreement of January 12, 1920, have been unable, for reasons not objected to by this company, to get their names entered on the register of this company by April 30, 1920, and subsequently comply with such agreement in all respects, the amount of the 4s. dividend shall be retained, and paid to them on their being duly entered on the register of this company."

The **RT. HON. LORD GEORGE HAMILTON**, P.C., G.C.S.I., seconded the resolution, which was unanimously approved.

Mr. **W. H. C. WHIGHAM** then proposed that the retiring directors (Mr. Alex. T. Hawes, Sir Joseph White Todd, Bt., and Mr. William Fladgate, M.V.O.) be re-elected.

Mr. **G. E. COCKRAM**, in seconding, took occasion to congratulate the chairman on his very able and comprehensive address. He expressed the hope that when the next Budget was proposed the Chancellor of the Exchequer would think a little more about economy and a little less about taxation. (Hear, hear.)

The resolution was unanimously approved.

On the motion of Mr. **T. W. S. BOWLBY**, seconded by Mr. **S. WALKER**, the auditors (Messrs, Chatteris, Nichols, and Co., and Messrs. Spain Bros. and Co.) were re-elected.

Mr. **MILLAR WILKINSON** then proposed a hearty vote of thanks to the chairman, the directors, the executive, and the staff of the company. Although, he said, he had objected to the recent amalgamation, he had recently expressed his confidence in the present directors by increasing his share interest in the company.

The motion was seconded by Mr. **I. E. ROUCH**, and unanimously accorded.

The **CHAIRMAN**, in acknowledging the compliment on behalf of the directors and himself, stated that they could never have attained the high position in which they now found themselves, or could hope to succeed in holding that position, if they had not had a most competent staff to control their organization. (Hear, hear.)

Mr. **R. Y. SKETCH** (general manager), replying for the staff, said that the vote of thanks so heartily accorded at their annual meetings was greatly appreciated by every member of the staff, and, he could assure them, it was well deserved. Both in bad years and good years the staff always did their best.

The proceedings then terminated.

What Canada Sells The United States

Analysis Shows Few Commodities In Which Canada Secures Most Business—Exports to United States More Than Offset By Imports—Changes Found in Recent Years

By JOHN A. COOPER
Canadian Bureau of Information, New York

CANADA did fairly well in selling goods to the United States in the year 1919. A new record was made—the total sales amounting to $494,695,869, according to the figures just issued by the Department of Commerce at Washington. This was an increase of $43,000,000 over 1918 and $81,000,000 over 1917. The question then arises: What is the future likely to realize? Will these sales increase or decrease?

In order to answer these questions, the following tables may be studied. They are not exhaustive in range, because the United States government gives the Canadian figures only in twenty-nine classes of goods. Two classes may be added, because Canada is practically the only source of supply—newsprint and asbestos. This makes 31 classes out of a possible sixty or seventy.

Comparison by Years

The following table compares the totals of the 31 classes for the year 1919. The second column gives the total imports from all countries into the United States in 1919, while the third column gives the percentage supplied by Canada:—

IMPORTS INTO THE UNITED STATES FROM CANADA

	1919	Total purchases by U. S. 1919	Per cent supplied by Canada
Animals, cattle	$50,576,054	$ 53,296,078	95
Asbestos, unmanufactd.	7,369,685	7,369,685	100
Breadstuffs, wheat ...	11,293,097	14,905,722	70
Coal, bituminous	4,547,407	4,950,686	95
Copper, ore and matte	6,222,768	23,541,020	25
Copper, other forms ..	5,769,539	55,307,521	11
Cotton cloths	143,503	17,664,903	1
Flax	767,941	3,996,590	20
Furs undressed	16,378,378	69,289,909	25
Calfskins	3,764,056	32,655,139	11
Cattle hides	13,057,554	125,590,047	10
Sheepskins	1,700,853	30,520,519	5
India rubber	2,530,297	215,820,115	1
Iron ore	64,787	2,585,089	¼
Lead ore	441,177	5,458,537	1
Sole leather	646,403	1,286,133	50
Upper leather	1,533,350	2,296,031	67
All other leather	870,060	12,262,106	6
Fresh beef and veal .	5,416,764	6,408,081	20
Paper, newsprint ...	43,674,094	43,674,094	100
Flax seed	5,322,051	11,360,935	12
Clover seed	3,527,694	7,401,964	50
Sulphur pyrites	387,490	2,176,565	18
Tea	772,397	20,145,894	4
Tobacco leaf	435,134	10,019,891	1
Wood pulp, mechanical	7,083,488	7,117,110	99
Wood pulp, chemical unbleached	18,816,872	27,066,707	70
Wood pulp, chemical bleached	3,394,887	4,867,[illegible]	70
Wool combing	451,310	4,58[illegible]	10
Wool clothing	7,875,206	171,[illegible]	1
Zinc ore	115,974	[illegible]	[illegible]

Division Into Groups

Examining these figures and figuring the percentage that the purchases from Canada bear to the total purchases from foreign countries the following [illegible] results are obtained:—

Group 1. Twenty classes of articles in which Canada supplies less than 25 per cent. of the total imports of said articles into the United States: Wheat, copper ore, copper bars, cotton cloths, flax, furs undressed, calfskins, sheepskins, cattle hides, India rubber, iron ore, other leather, flax seed, sulphur pyrites, tea, tobacco leaf, combing wool, clothing wool and zinc ore.

Group 2. Two classes of articles in which Canada supplies less than 51 per cent. and more than 25 per cent. of the total United Stated States importation: Sole leather, clover seed.

Group 3. Three classes of articles in which Canada supplies less than 75 per cent. and more than 50 per cent.: Upper leathers, bleached sulphite, unbleached sulphite.

Group 4. Six classes of articles in which Canada supplies more than 75 per cent.: Live cattle, unmanufactured asbestos, bituminous coal, fresh beef and veal, newsprint, mechanical wood pulp.

Where Canada's Share is Small

In the first group there are twenty classes of articles in which Canada now supplies only a small percentage of what the United States requires from abroad. The sales of all of these could be increased considerably, except India rubber and tea which are not grown in Canada. But even in the high-possibility group, care must be taken not to over-estimate Canada's effort. It is true Canada sold the United States wheat to the value of $11,293,097 in 1919, but the United States sold Canada wheat to the extent of $[illegible], which reduces the favorable balance. So the sale of copper ores by Canada was around $11,000,000, but Canada bought back refined copper to the extent of $4,000,000. Raw furs were shipped to the United States to the extent of $16,378,378; yet Canada got back "raws" valued at $1,[illegible],662 and "dressed" valued at $1,111,324. In lead Canada bought about half as much as was exported.

Sales Offset by Purchases

So when group two is considered, Canada shipped sole leather to the extent of $646,403, but bought back $[illegible]. The figures are not available for clover seed in 1919, but the experience of years proves that clover seed crosses the border at about the same rate in both directions.

In group three, the situation is similar in the case of upper leathers. Canada sold the United States $1,533,350 which looks well, until one discovers that Canada bought from the United States more than twice as much of the same material. In sulphite, of course, the movement is all one way, because the pulp resources of the United States are not sufficient for domestic requirements. Here is a great opportunity, as everyone recognizes.

In group four, where Canada supplies nearly all the United States gets of these materials, there is [illegible] In bituminous coal Canada sold $4,547,407 and bought $[illegible]. In beef and veal Canada sold $5,416,764 worth, but bought back fresh, pickled and canned beef to the extent of $767,[illegible] and [illegible]. In this group, the [illegible] for geographical reasons.

[illegible] and [illegible] not [illegible] United States [illegible]. The [illegible] tations from [illegible] are as follows: [illegible] $1,[illegible]; pulpwood, $[illegible] [illegible] $5,[illegible],000; [illegible]

[illegible]

Whalen Pulp and Paper Mills Limited

ANNUAL REPORT

Of the Directors of Whalen Pulp and Paper Mills Limited, Year Ended February 29, 1920

To the Shareholders:

The accounts of the Company for the year ended 28th February, 1919, showed the following results:

Gross Earnings	$4,065,206.99
Expenses	3,952,892.22
Net Earnings	$112,314.77
Deduct:	
Taxes	60,104.07
	$ 52,210.70
Fixed Charges	389,940.31
DEFICIT	$337,729.61

The accounts of the Company for the year ended 29th February, 1920, show the following results:

Gross Earnings	$4,619,734.67
Expenses	3,741,185.41
Net Earnings	$878,549.26
Deduct:	
Taxes	56,181.48
	$822,367.78
Fixed Charges	$498,610.61
NET PROFITS	323,757.17

The expenses for the year amounted to 80 per cent. of the earnings as compared with 97 per cent. for the previous year. The earnings for the fiscal year under review exceeded those of last year, notwithstanding one of the Plants was closed for six weeks through lack of orders following the signing of the peace treaty. Your Directors, while optimistic as to the future, recognize mounting labor and material costs, and prudence demands conservative financing, looking to possible falling markets. Your Directors sold, during the first half of 1919, $500,000 Gold Notes, $550,000 Debentures and $1,500,000 Bonds. You will notice by a comparison of the Balance Sheets for the years ended February 28, 1919, and February 29, 1920, that the net liquid assets of your company have been increased by $1,673,805.90. Recognizing the need of conserving the timber resources of British Columbia, and to stabilize wood costs, your Directors felt it wise to instal barkers, etc., for small-wood operations at your Plants to supplement present large-wood operations. The wisdom of your Directors in installing small-wood operations is borne out by the fact that the price of logs on the open market has doubled in the past year. The improvements and betterments necessarily interfered to some extent with operations, but the work had to be undertaken to improve and increase production and to meet growing log costs. The results of the small-wood operations and the betterments undertaken should be reflected in the last half of the present year's operations. To increase production and improve the quality of your product, one extra digester, additional screens, drying apparatus, etc., are being installed in anticipation of your approval. Your Directors authorized Capital appropriations as under:

For small-wood operations and additional facilities to increase production and improve the quality of pulp at the three plants	$488,000.00
For erection of Shingle Mill and installation of five machines at Woodfibre	12,000.00
For the purchase of Logging Equipment	60,000.00
	$560,000.00

Also your Directors are making provision for further additions to your Plant and Equipment at an approximate cost of $193,380.20, distributed as follows:

Woodfibre	$39,611.00
Swanson Bay	10,200.00
Port Alice	15,000.00
Additions to Logging and Transportation Equipment	128,569.20
	$193,380.20

At the end of February the Grand Trunk Pacific completed a car ferry barge, and railway cars are now ferried between your Swanson Bay Plant and Prince Rupert which will cheapen transportation and make it efficient. During the course of the year the launch "Nooya" was sold. For the Directors,

GEORGE BURY, President.

Vancouver, June 25th, 1920.

BALANCE SHEET FOR YEAR ENDING FEBRUARY 28, 1919

AUDITORS' REPORT TO THE SHAREHOLDERS

We have examined the Books and Accounts of the Whalen Pulp & Paper Mills, Limited, for the year ended February 28, 1919, and have obtained all the information and explanations we have required. We certify that the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs, according to the best of our information and the explanations given to us and as shown by the books of the Company.

PRICE, WATERHOUSE & CO.,
Auditors.

Vancouver, May [illegible], 1919.

OPTIMISM PREVAILS REGARDING WESTERN CROP

General Rain Reported in Alberta—Notable Improvement in Southern Part of Province—General Conditions Continue Favorable—Manitoba Prospects Encouraging

REPORTS of crop conditions in the west received during the past week reveal rather a mixed condition. The "Manitoba Free Press" in its fourth statement, states that generally, conditions in the whole west are not quite so satisfactory as last reported, while in some large areas, notably southern Alberta, conditions are much improved. The one serious drawback has been lack of rain at many places. Out of 234 points heard from, 115 want more moisture. Coarse grains, as a whole seem to be in a thrifty condition and promise well.

The agents along the western lines of the Canadian National Railways, between the Great Lakes and the Rockies, continue to be optimistic regarding the yield of cereals to be harvested this season. The detailed crop report for the week ending July 3rd, contains some half dozen references to such temporary conditions as need of rain, presence of grasshoppers or presence of cutworms, with attending slight damage from same. But practically all are agreed that the prospects for a bumper crop are excellent. The tone of the report generally appears to be more like that of 1915, than has any since that year of record crops in western Canada.

Manitoba Prospects

Prospects for Manitoba are decidedly encouraging, according to the last report of the provincial department of agriculture. The situation is summarized as follows:—

"Reports from probably fifty per cent. of points are entirely satisfactory, while from other places there is complaint of lack of recent rains. During the past two weeks there have been local rains, but some places have been missed, and evaporation at this time of year is rapid. From no place is there any suggestion of crop failure or even of crops having suffered considerably, and the present promise is that the crop will vary from fair to very good, according to locality.

"An interesting phase of the situation is that some of the places that have suffered most from drouth during recent years have been liberally supplied with moisture this year, while the call for more rain comes from parts that are usually blessed with plenty. Many of the early wheat fields are headed or are heading out. Here and there small hailstorms have occurred, though only a few of these are mentioned in our reports. Practically no damage from heat is evident. The grasshoppers have been very successfully fought this year, though, of course, there are some hoppers still. It is significant, however, that from every place where poison has been used the report to date is satisfactory. In some places cutworms have done a little harm, and one report mentions sawfly damage in the wheat crop, but insect damage, other than that by grasshoppers, is very slight. No rust reports are at hand, and as the crop has moved along so very rapidly, and recent weather has been so unfavorable to rust development, the outlook in this respect so far is good.

"Summerfallow work seems to be progressing well, and a hay crop above the average is indicated. The prevailing outlook is decidedly optimistic. What is wanted now for the grain crop is a good rain or two in the drier parts and bright fairly cool, moderately breezy weather. Present prospects suggest a fairly early harvest."

Expects Repetition of 1915

Superintendent J. M. McKay, of the C.P.R., Saskatoon, on a recent tour of inspection of the lines in Alberta and Saskatchewan was favorably impressed with crop prospects. Mr. McKay stated the crops are good on the lines from [illegible] to Saskatoon. Indications are favorable for a better than an average crop throughout the whole of the territory. Some localities are blown out and while serious to the individual farmers effected the condition is all purely local. The crop conditions taken as a whole are good. On the trip from Saskatoon to Saltcoats, Sask., returning to Yorkton, and from Balcarries over the Grand Trunk and from Lemberg to Saskatoon, Mr. McKay said the crops are far above the average, and if conditions continue as they have been so far a repetition of the crop of 1915 can be expected.

"What impressed me most," said Mr. McKay, "was the fact that in the scrub country, particularly the territory between Wynyard and Yorkton, the crops were better than anywhere else. This, to me, indicates the necessity of tree planting throughout Saskatchewan."

Beneficial Rain in Alberta

A report from Calgary, dated July 6, states that farmers are unanimous in declaring that rarely, if ever, has there been such a beneficial rain as that which started a day or so previously. Only in one or two isolated cases has there been hail and any damage resutling from this has been extremely limited. The rain, it appears, was general, Edmonton, Lethbridge, Calgary and Medicine Hat participating in the downpour was steady, particularly in the latter place when the rain continued for more than two days. The report adds:—

"One of the outstanding features in connection with the rainfall is the extreme optimism of business men in the city. It is undeniable that a certain amount of uneasiness was beginning to be manifested, although there were old-timers like Pat Burns, who never for a moment were lacking in their faith of the country. There were pessimists, nevertheless, who were ever ready to remind one of the drought of last year. All this doubt has now been cleared and it is certain in the opinion of farmers that there will be a good crop in Alberta this year."

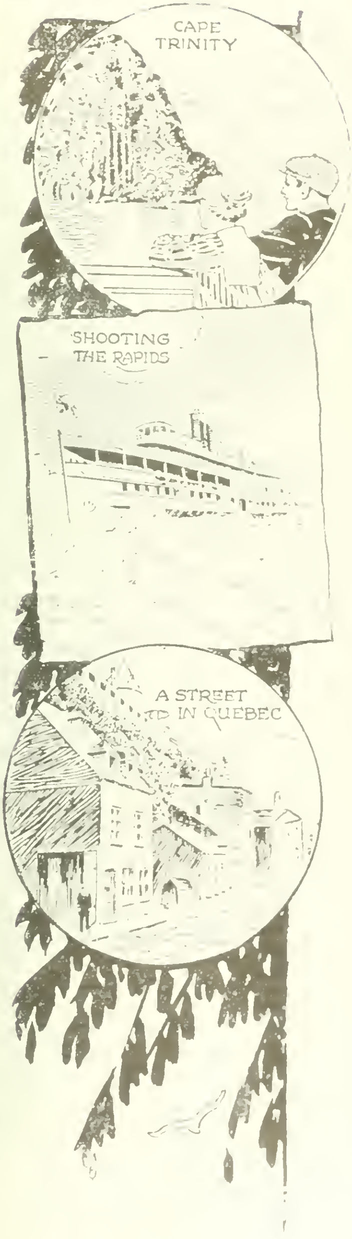
Farmers are agreed that the present weather is ideal for bringing on the crops most rapidly. At Rumsey, wheat is 37 inches in height in many fields and the heads are beginning to shoot. Crops in that district are generally in the best of condition, and at Stettler are far ahead of what they were this time last year.

NORTHERN ASSURANCE COMPANY

Progress made by the Northern Assurance Co. during 1919 was well up to that made by other British insurance companies, as indicated by the eighty-fourth annual report, which has just come to hand. During the year the company acquired the stock of the Medway Insurance Co., Ltd., and of the Tasmania Insurance Co., Ltd. Since the close of the year the capital has been increased to £6,502,500 by the creation of 300,000 new ordinary shares of £10 each, of which the directors decided to issue 50,000 at once to the existing shareholders at the price of £15 per share of £10 (£1 paid). The new caiptal will appear in the accounts for the year 1920.

In the fire department premiums received increased $637,940 over the previous year. Losses amounted to $4,509,515, or 44.2 per cent. of the premiums, as compared with 43.6 in the previous year. The ratio of expenses to management was 38.97, as against 34.84 previously. The life and marine departments were particularly successful. In connection with the former, 2,402 policies were issued for new assurances, amounting in the aggregate, after deduction of re-assurances, to $6,609,490, yielding annual premiums of $275,400 and single premiums of $35,070. This is the largest amount of new business transacted in the history of the company in that department, the sums assured being $3,724,425 in excess of the figures for 1918, which itself was a record here for the company. The profit and loss account shows net profits of $3,166,320, which, after dividends and usual deductions, left a total of $2,570,325 to be carried forward.

The company, which writes fire business in this country, has an aggressive Canadian organization in charge of G. E. Moberly, manager, and in 1919 the company's reputation was further sustained here, net premiums amounting to $1,050,101, as compared with $977,872 in the previous year.



Come for a Glorious Vacation Trip

COMMENCE your boat-trip-holiday at Lewiston, where one of our luxuriously-appointed Steamers will connect with your train. Thence across Lake Ontario to Toronto—through the Thousand Islands and the Rapids, to the Cities of Montreal and Quebec. Such is the route on the trip from

"Niagara to the Sea"

terminating in the canyon-like scenery of the Saguenay. We approach Cape Eternity, a towering mass of rock that looks down upon us in isolated grandeur, making our craft look like a microbic organism in some spectral picture.

Our steamer traverses a little bay, and we gaze spellbound at Cape Trinity—the lowest of its three elevations graced by a huge statue of the Virgin, which for 30 years has gazed with seeming compassion on the waters below—impervious to the elements, a thank-offering of a devout Catholic.

These mightiest of all the promontories that tower above the dark waters of the majestic Saguenay, form a fitting climax to a trip that has no equal for awe-inspiring grandeur and panoramic charm.

Send 2c. postage, for illustrated booklet map and guide to JOHN F. PIERCE, Passenger Traffic Manager, Canada Steamship Lines, 208 R. & O. Building, Montreal, Canada.

TENDERS FOR DEBENTURES

GOOSE LAKE CONSOLIDATED S.D. No. 1283, ROBLIN, MAN.

Sealed tenders, addressed to the undersigned, will be received up to Saturday, August 14th, 1920, for the following Debentures:—

First Issue.—Debentures for Twenty-five Thousand Dollars ($25,000.00), dated January 1st, 1920, bearing interest at 6 per cent. per annum, and repayable in twenty (20) equal annual instalments of $2,179.61 each. First payment, January 1st, 1921. Payment to be made at Union Bank of Canada, Roblin, Man.

Second Issue.—Debentures for Twenty-five Thousand Dollars ($25,000.00), dated June 1st, 1920, bearing interest at 6 per cent. per annum, and repayable in twenty (20) equal annual instalments of $2,179.61 each. First payment, June 1st, 1921. Payment to be made at Union Bank of Canada, Roblin, Man.

District includes Village of Roblin and 109 sections of land. Assessment for 1920, $830,465.00.

The highest or any tender not necessarily accepted.

I. S. MITCHELL,
Secretary-Treasurer,
Roblin, Man.

DIVIDEND No. 11

Notice is hereby given that a dividend of 5 per cent. (5%) on the issued Capital Stock of the Company will be paid on the 1st day of September, 1920, to Shareholders of record at the close of business on August 1st, 1920.

By Order of the Board.
M. P. VAN DER VOORT,
Secretary-Treasurer.

Dated at Toronto, July 9th, 1920. 190

CANADA AT WASHINGTON

A Canadian government representative at Washington is to be appointed, according to announcement recently made in parliament, and at times this representative will act for the empire as a whole. Mr. Bonar Law, in explaining the reasons in the British house, said that the imperial government expected from it closer co-operation and good-will between the empire and the republic. Commenting upon the announcement, "United Empire," the journal of the Royal Colonial Institute, says:—

"This is a distinct constitutional step forward, and obviously in conformity with the new status of the Dominions. It is not so much a departure from practice as a supplement and a confirmation. Canada has on more than one important occasion, where her interests were concerned, been allowed a special representative. At Washington her intersts are constant and many. Criticism of the new arrangement, curiously enough, comes from Canada, where it is objected that it has been made without consultation with parliament. The point might surely have been raised with more effect at Westminster, but on this side there is approval only. Not the least noteworthy feature of the scheme is that when the British ambassador is absent the Canadian minister will take his place. In other words, the empire will be represented by the Dominion. It is naturally asked what view the other Dominions will take. Sooner or later they will probably demand that they too should have special representatives. The appointment will give Canada a real opportunity to fill the role which so many think should be hers—that of interpreter of things American to Great Britain and of things British to the United States."

The January-June, 1920, index to *The Monetary Times* is now printed, and subscribers may obtain copies free upon request.

MORE FAILURES BUT SMALLER LIABILITIES

Number of Insolvent Firms for First Six Months of this Year Shows an Increase—Liabilities Have Been Reduced to a Large Extent

BUSINESS failures in Canada for the six months ended June, 1920, were greater in number in comparison with the same period in 1919, the figure being 415, as against 385. While the number shows an increase, however, there is a considerable improvement as a whole, liabilities of the insolvent concerns being only $7,636,633 for the period, as compared with $9,316,645 in 1919, a decrease of $1,680,012.

The showing for the second quarter, as represented in the half-yearly statement, indicates an all-round improvement over the first quarter, the number of failures in the latter period being 206, compared with 209 in the former three months. Liabilities also showed a reduction of more than $1,000,000. Figures for the first half of this year, as compiled by R. G. Dun and Co., and compared with the results back as far as 1908, are as follows:—

	Total Commercial.			Manufact'ng.		Trading.		Other Com'l.		Banking.

INCOME ASSESSMENT OF OIL AND GAS COMPANY

Ontario Supreme Court Decision Means that a Company Might be Losing Heavily, but Must Still Pay on Profitable Works

THE value of mineral land for assessment purposes is determined by the income derived from it, according to the decision of the Supreme Court of Ontario, on appeal *re* Union Natural Gas Company and the Township of Dover, announced on January 19th, 1920. It was also held that it is not the income from the general business carried on, but the income from the mine or mineral work that is to be assessed.

Company Actually Had Deficit

In 1916 the Union Natural Gas Co. leased land in the township of Dover, county of Kent, and drilled wells in search of oil and natural gas, but its efforts came to little until 1917, in which year the value of oil and gas produced was $11,011, and in 1918, when oil and gas to the value of $93,838 were produced. In its efforts to produce this the company drilled in the township of Dover some twelve wells, of which only two—designated well No. 1 and well No. 7—produced oil and gas, and they produced practically all the oil and gas secured by the company in this township. The two wells in operation were assessed at $25,000 each, but on appeal to the County Court this was reduced to $62,376, this amount being arrived at by deducting ground rent and cost of operation from gross income. The company claimed that it had suffered a deficit, for its payments on all wells, whether productive or not, had amounted to $116,120, which, less the assessed income of 1919, viz., $62,376, left a deficit of $53,744.

Meredith, C.J.O., in his written judgment, states that the question for decision is as to the mode of assessing which should be adopted.

Each Mine Treated Separately

The Ontario Assessment Act, section 40, provides that the income from a mine or mineral work shall be assessed by and the tax leviable thereon shall be paid to the municipality in which such mine or mineral work is situate. Provided that the assessment on income from each oil or gas well operated at any time during the year shall be at least $20. Then comes subsection 6 which provides for the assessment of mines or mineral works that are being operated. In his lordship's opinion, "each gas or oil well—being a mine or mineral work—is to be treated as a separate entity and the income from it is to be separately assessed." "The assessment in respect of a mine or mineral work is a very different thing from the assessment of a merchant, a manufacturer, or mine-operator in respect of the business carried on by him. If, as counsel for the appellant contended, the appellant was to be assessed in respect of its business generally, language very different from that which is used in sub-section 6 would have been used. What the legislature was there dealing with was land, and it was providing that in the case of a mine or mineral work, the land should not be assessed at its actual value or at less than the value of other land in the neighborhood used exclusively for agricultural purposes, but that its value for assessment purposes was to be determined by and be the amount of the income derived from it. It is to be noticed also, that it is not the income from the business carried on by the apellant, but the income from the mine or mineral work, that is to be assessed."

"I would affirm the order of the Board."

W. L. McKinnon and Co., bond dealers, Toronto, have returned to their office premises in the McKinnon Building, which was damaged by fire some weeks ago.

News of Industrial Development in Canada

Three New Paper Mills to Locate in Ontario—Definite Announcement to This Effect Has Been Made—Another One May Possibly Be Established at Kapuskasing—Spanish Merchant Investigating Dominion Lumber and Pulp Conditions—South African Steel and Iron Representatives Placing Orders in Canada

DURING the past week announcement has been made of the establishment of four pulp and paper mills, all of which are to be located in Ontario. The Provincial Paper Mills, Ltd., has just acquired full ownership of the Port Arthur Pulp and Paper Co., of which they had control for some time previously. About $1,500,000 is involved in the transfer, and it is intended to expend about $2,500,000 in the erection of a paper mill. Preliminary work has been in progress for the past six months, but delay in delivery of machinery, owing to the over-crowded condition of paper machinery factories, has made definite plans for completion impossible. The plant, which occupies 140 acres in the city of Port Arthur, Ont., has turned out about $2,000,000 of sulphite annually, which has been sold in the United States, chiefly in Wisconsin and Minnesota. It is now intended to complete the product into paper on this side with a mill to turn out 40 tons a day.

Arrangements have been completed to commence building on the Mission site at the mouth of the Mission River, Fort William, Ont., a $3,000,000 plant, according to an announcement by R. J. Manion, M.P., for Fort William. It is understood that the name of the company is the Fort William Pulp and Paper Co., and that Kaministiquia power will be used.

A large pulp mill is to be erected at Kapuskasing, although nothing definite as to the plans have yet been given out. The site is regarded as being ideal for such an enterprise, the territory tributary to the Kapuskasing River above that point and south of the Transcontinental Railway being heavily timbered, and a large waterfall being conveniently located with which to generate the required electric power. It is understood that the plan took form some two years ago, but was delayed. Actual work on the laying out of the site will be commenced at an early date. The names of those interested have not been mentioned, but it is known definitely that the mill will be located, although complete plans are not yet available.

The Nipigon Fibre and Paper Mills, Ltd., will locate a mill one mile west of the village of Nipigon, Ont., which, when completed, will produce 40 tons of pulp per day. Head offices of the company are at Port Arthur.

International Mill Ready Soon

An announcement from New York states that the new mill of the International Paper Co. at Three Rivers, Que., will be put into operation about November 1st next. It is estimated that the output of the new plant will be approximately 80 tons of sulphite pulp per day. Eventually, it is planned to produce newsprint at the Three Rivers plant, although definite steps to materialize this forecast may not be taken in the near future, although it is hoped that the newsprint section of the plant will be in a productive stage by the fall of 1921.

Relative to the rumor that the plant at Cornwall, Ont., would be closed down, the Howard Smith Paper Co. states that the plant is at present, and has been for some time, working to the limit of its capacity, with every prospect of such a condition keeping up for some time. The company is also building a large sulphite mill near its present plant, which will add greatly to the output.

Timber limits containing fir and some cedar on the south-west of Vancouver Island, B.C., have been sold by the Rat Portage Co. to John W. Blodgett, of Grand Rapids, Mich., for $400,000. A mill will be erected on the property.

Initial steps toward establishing trade between Canada and Spain are being taken by Augusta Ramoneda, of Barcelona, Spain, who is the representative of all the paper mills of Spain. Mr. Ramoneda states that the primary object of his trip to Canada is to investigate the lumber and pulp supply of the country, and to ascertain how much of the product is available for export. "The paper mills of Spain need 60,000 tons of pulp," he said, "and the first two shipments from Canada, amounting to seven thousand tons, left Quebec the latter part of last month." The development of trade in other products would follow later, Mr. Ramoneda declared. An office has been established in Montreal.

Mr. T. A. Connolly, a member of the firm of J. W. and T. Connolly, leading steel and iron merchants, Capetown, South Africa, has arrived in Canada. For many years the firm which Mr. Connolly represents, had been buying from Great Britain, but during the war they started obtaining supplies from Canada through the Dominion Exporters, Ltd., whose headquarters are in the New Birks Building, Montreal. Mr. Connolly was so impressed with the possibilities and advantages of the Canadian trade that he has taken a trip here with the South African director of the Dominion Exporters, Ltd., and through the Montreal offices he has come in contact with a large number of the leading manufacturers, with the result that he has placed some important contracts in Canada, with the intimation that further contracts are likely to be given out in future.

Manufacturing Notes

The St. Thomas, Ont., Hydro-Electric Commission has declared a reduction of approximately 15 per cent. on all power rates in the city, the new order to be retroactive from June 1st. This will mean a big saving to the larger commercial users in the community.

Owing to the scarcity of coal, the plant of the Canada Cement Co. at Hull, Que., may close immediately and may not reopen until belated shipments of fuel arrive. The cement plant has been operated at one-half capacity since last spring.

The Andrew Gray Upholstering Co., of Toronto, an industry established for many years, and doing an extensive business, will locate in Owen Sound, Ont., as soon as a factory can be built. The site of the factory will be on Third Avenue East, near the old Central Hotel, a property owned by Elias Lemon. The building will be of stone construction, two stories high at first, and 50 feet wide by 72 feet long. The company will rent the factory from Mr. Lemon, with the option of purchase, and will manufacture all kinds of high-grade upholstering. Hydro power will be used for the operation of machinery. No bonus or aid from the ratepayers is being asked by the company.

Affiliation of the Mann Axe and Tool Co., Ltd., of St. Stephen, N.B., with the James Smart Manufacturing Co., Ltd., of Brockville, Ont., is announced. The Mann Axe and Tool Co. had its origin in St. Stephen, 1911, in conjunction with the James H. Mann Co., of Lewiston, Pa. It succeeded the Maritime Edge Tool Co., which, in turn, had been established here in 1900, when Mr. Huestis came from St. John, and with H. W. Broad and the late John Wilson took over the business that had for many years been carried on by E. Broad and Sons. It is expected that the St. Stephen branch will be directed as in the past by Charles E. Huestis, who will continue as president and general manager of a new company under the charter of the Mann Axe Co., Ltd.

Work on the contract for the erection of the new thousand-foot dock for the G.T.P. at Prince Rupert, B.C., has already commenced. The material is being assembled and the preliminary work is under way by the contractors, Grant, Smith and Co. and Magoffin, Ltd. This dock is expected to

be used for Oriental as well as Alaskan trade. It will be one of the most modern docks on the coast.

The York Cotton Mill, St. John, N.B., will be electrified. New equipment to be provided includes two steam turbines of 600 horse-power each, for which a new power-house is now being constructed. The new units are replacing a 250 horse-power steam and a 150 horse-power gas engine. Some additions will also be made to the Cornwall, Ont., mill.

Location of the Samson Tractor Co. of Canada, Ltd., at Oshawa, Ont., is announced. The new company will manufacture and look after the Canadian distribution of Samson tractors, Samson trucks and Samson farm implements. It is intended to commence the manufacture of the trucks at once, but, as time will be required to equip a plant for the manufacturing of the tractors and implements, these will be imported, for the present, from the factory of the parent company at Janesville, Wis., the Canadian firm taking care of the distribution.

Mexicans Want Canadian Trade

Luis Murna Martinez, recently appointed commercial representative of the new Mexican government, arrived in Toronto a few days ago for the purpose of working up closer trade relations. The new government is now firmly established, he says. "We wish to establish closer relationship, too, because Mexico offers facilities for the investment of Canadian capital for the development of many industrial plants, where there is plenty of raw material produced in the country. The principal aim of the new government is to establish larger trade relations with this and other countries." Regarding power interests in Mexico in which enterprises Canadian capital is invested, Mr. Martinez says that the Mexican Light and Power Co. have about £10,000,000 sterling to invest in large plants for tramways in Mexico.

DOMINION BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended July 9, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
July 9	6	7	3	0	0	0	2	2	0	20	8
July 2	Figures not yet available										6
June 25 ...	0	0	3	0	4	2	0	0	0	9	15
June 18	1	9	0	1	2	2	0	2	1	18	9

CONTINUE PURCHASE OF SEED GRAIN

Abnormal conditions throughout the prairie provinces during the past two years have led the federal government to decide on a continuation of the Dominion Seed Purchasing Commission, it was announced by Dr. S. F. Tolmie, minister of agriculture, recently. This means that the government, since the commission was established in 1916, has done business with the farmers of the country to the extent of approximately $15,000,000. The actual balance sheet, just completed by the department, and covering the three years up to September last, shows $11,896,540 advanced to the Seed Purchasing Commission on the authority of the minister of agriculture. On that date there had been refunded to the receiver-general $11,903,437, and, in addition, the commission held assets, including seed grain in storage, amounting to $51,185.

Referring to the need for a continuation of the work of the commission, Dr. Tolmie went on to show that the money advanced for the past season's business amounted to $3,800,000, over $3,200,000 of which has already been returned to the receiver-general. The final accounting of the year's business may not be completed before September, but the estimated balance at the end of May gives promise of the total amount being returned to the public treasury, an exceedingly satisfactory state of affairs, according to the minister.

NEW INCORPORATIONS

Riordon Co., Ltd., $80,000,000—Brunette Sawmills, Ltd., $2,000,000—Marsh Mines Development Co., Ltd., $1,500,000

News of Municipal Finance

Calgary Will Lose By Transfer of Collected Tax Arrears To New York—Regina Sinking Fund Report Shows All Required Provision Made — Good Tax Collections Reported By Oak Bay—Saskatoon Anticipates Big Deficit on Street Railway This Year

Ottawa, Ont.—The Eastview council will negotiate with the Ottawa city fathers in the near future, with a view of annexing their municipality to the city.

West Kildonan, Man.—School board estimates for the year 1920-21, amounting to $71,258, have been passed. This amount is for five schools and is an increase of $20,823 over last year.

Woodstock, N.B.—The board of school trustees in submitting its report for the year ended June 30 last, shows receipts of $16,986 and expenditures of $17,507 for the twelve months, leaving a debit balance of $521.

Timmins, Ont.—Assessment of the town has been increased from $2,025,613 to $2,445,264. The principal increases are in land, buildings and income. The population is given as 4,018, as compared with 4,663 last year.

Devon, N.B.—The tax rate this year will be $3, as compared with $2.71 for last year. Assessment has also been increased about one-third. The big increase in the money requirements of the town this year is due largely to the increased cost of schools, the expenditure in that department being increased from $5,400 last year to $11,500 this year.

Calgary, Alta.—Since July 1, the date when payment of 1920 taxes began, the city treasurer has taken in more than $153,920, most of which were current taxes. Until July 20, taxpayers are allowed 10 per cent., which rate is lowered to 6 per cent. to August 20, and reduced 2 per cent. each month thereafter. At the end of the year unpaid taxes become delinquent.

Quebec, Que.—City representatives have decided to act upon the following plan in all future negotiations for tax exemption: New industries will be tax exempt for ten years for real estate tax only. Nothing the first year and 10 per cent. each year up to the eleventh year when they will be paying their full tax. Where conditions warrant, extensions of factories will be tax exempt for five years, the first year nothing and 20 per cent. each year until the sixth year.

Oak Bay, B.C.—Tax collections up to the end of June, after which a penalty is added, were 82 per cent. of the entire levy. The levy in Oak Bay last year was $182,000, while this year it is up to $215,000. The amount collected up to the end of June last year was $140,000, while this year it amounts to $175,000. Outside of properties protected by the War Relief Fund, Oak Bay has at the present time practically no tax arrears on its books.

Lennox and Addington Counties, Ont.—The following equalization of the townships for assessment has been made by the council: Adolphustown, $408,679; Amherst Island, $430,091; Bath, $111,000; Camden, $2,097,900; Denbigh, A. and A., $57,209; Ernesttown, $1,986,184; N. Fredericksburgh, $753,534; S. Fredericksburgh, $762,659; Kaladar, A. and E., $76,512; Napanee, $880,000; Newburgh, $117,983; Richmond, $1,093,350; Sheffield, $604,194; total, $9,387,295.

Saskatoon, Sask.—Decision has been made by the city council to reduce the street car service, in view of a deficit of over $40,000 which the city faces on its street car lines for 1920. A report by Commissioner Yorath brought to light that the loss on the system up to May 31 was $11,382, and the city would also have to pay out $11,700 for the South claim. The estimated loss for June would be $6,500, making a total up to June 31 of $29,582. Total capital charges monthly are $5,229, so that the road is losing approximately $1,300 per month on operating alone. This condition has existed only twice before—June, 1916, caused by jitney competition, and November, 1918, caused by the flu epidemic.

Ontario.—Provincial legislation which will go into effect on July 31, will mean an increase in civic revenue in municipalities all over the province of several millions, according to an estimate by City Treasurer Baker, of London. This law permits municipalities to levy taxes on the incomes of citizens derived from dividends declared on stock held in industrial and manufacturing corporations. Hitherto, this source of income has been without the jurisdiction of civic corporations, but the new law passed at the recent session of the Ontario legislature puts all these matters on a new footing.

Mr. Baker points out that a visible reduction in the city tax rate will be made through it, and some Ontario cities are preparing to take advantage of the new order this year. Brantford, he states, is seriously considering the preparing of a second assessment after July 31, and that the proposal may be made in the city which he represents.

Montreal, Que.—Approximately $1,250,000 on gross revenue, covering a period of two years and a half, is owing to the city by the Montreal Tramways Co. This money is payable at the rate of $500,000 a year, and the company has paid nothing on this account since the new contract was signed early in 1918. The clause in the agreement regarding the payment of this money reads:—

"The city shall receive out of gross revenue over and above all other amounts to which it may be entitled under this contract or otherwise, the sum of five hundred thousand dollars ($500,000) per annum during the continuation of this contract, payable quarterly."

The administratve commission when questioned on the matter stated they had allowed the company a delay in making payment, for the reason that if they insisted on payment it might have for effect an increase in car fares. Meanwhile, the company pays the city interest on the amount owed.

Alberta.—The new tax recovery act as passed by the last legislature is now going into effect, being dated as operative from July 1. Under its terms proceedings are to be taken for the recovery of all taxes in arrears at the end of 1919. The municipal authorities in each case will be responsible for putting through the tax recovery, and they will include in it not only their own taxes, but those levied by any other taxing authority, so that overlapping may be avoided.

Lists of assessable lands in arrears in all parts of the province will be prepared at once and will be furnished by the department of municipal affairs to the reeves. These lands will then be advertised for sale, and tax sales will follow in due course, the date set under the act being on or before December 15.

One year's time will be allowed for redemption, and if not so redeemed the delinquent lands will be taken to a judge for final action. It is estimated that the total amounts outstanding in tax arrears of all kinds in the province, even not counting the cities, run into the millions, and the new act now going into operation is expected to result in substantial increases in overdue payments during the balance of the year.

Regina, Sask.—The report of the sinking fund trustees for the year ended December 31, 1919, shows that adequate provision has been made by the city, as required by the city act, for sinking fund purposes, and all levies in this respect have been paid into the fund in full as at December 31, 1918. There is a balance of $29,836 due by the city on account of 1919 levy. The corresponding balance which was due from

the 1918 levy at the end of 1918, was $62,887, which is an indication of a great improvement in prompt payment of the tax levy.

New investments were made during the year to the amount of $434,057. The trustees received from the city council on November 15, 1918, the sum of $75,000, being a portion of the insurance money collected on the Winter Fair Bldg., for investment. As this money was required for the erection of a new fair building, the trustees returned the proceeds of the investment on June 23, 1919, which amounted to $81,985.

The interest rate per annum, capitalized yearly, calculated to pay the principal of the debentures when, and as they became due, is 4 per cent., as provided in Section 292 of the City Act. The average yielding rate of the sinking fund investments is 6 per cent., and as a result, a surplus has been established, which for the year 1919, amounted to $28,974, and which added to the previous surplus shows a total surplus earned since the policy to invest sinking funds was adopted, of $74,456. Of this amount $63,748 has been returned to the city to be used for current or other expenditures, and $10,708 has been set aside as a reserve to provide for the possible losses or depreciation in the securities.

Total sinking fund investments are $1,836,875, and interest accrued on investments, $51,294. Cash in bank amounts to $18,676 and that on hand, $61,658. Total assets are $1,998,339, while total liabilities, including investment reserve of $10,708, amount to $1,970,592.

Calgary, Alta.—Messrs. Spitzer, Rorick and Co., the American financial house from which the city obtained a loan of $1,500,000 in June, 1919, on 5-year treasury notes, issued against the 1918 and previous taxes as security, are demanding that the city proceed to turn over the amount of these taxes which have been collected to date. At the present time, this amount totals some $225,000, and at present exchange rates it would mean that the city would lose some $35,000 on the transfer of these funds to New York. In a letter to the city on the subject, Spitzer, Rorick and Co., admit that they gave written permission that the city treasurer was to transmit these funds, as collected, from time to time, taking advantage of favorable rates of exchange. City Treasurer Mercer maintains that as exchange has at no time, since the loan was obtained, been more favorable than then, but, on the other hand, is higher, the written permission has entitled him to retain the funds in Calgary. Naturally, there is no benefit to the city in holding them, as once they are forwarded, an equivalent amount of the interest bearing treasury notes will be taken up. The only question at issue, therefore, is the loss of exchange.

Spitzer, Rorick and Co. maintain that the city may lose still more money by holding them, that exchange is growing worse instead of better, and point out that although the city of Vancouver, in a similar position, lost money by transmitting funds last January, nevertheless it actually saved money by sending the funds at that time, as if it had waited until the present its loss would have been much greater. Moreover, the firm say that when they made the loan last summer, they stood a loss of $75,000 in transmitting the funds for the loan from the United States to Canada on account of exchange, and hence they do not think the city is right in declining to shoulder any loss in returning them. The subject is now being discussed by the city.

Government and Municipal Bond Market

Usual Summer Quietness Prevails—Few Small Municipal Issues Taken Up—British Columbia Disposes of More Securities to Local and American Syndicate—Alberta Campaign for Sale of "Baby Bonds" Now Under Way

QUIETNESS prevailed in the bond market during the past week. A few small municipal issues were taken up at prices which certainly registered no improvement. The city of Windsor is asking for tenders on bonds approximating $380,000, of the instalment type, but outside of this the immediate future offers nothing of especial interest.

Victory Bonds as Investments

Under the above caption, Messrs. Wood, Gundy and Co. in a financial digest, publish an article which should prove interesting. It reads in part as follows:—

"If an unusually large supply of any commodity is placed on the market within a comparatively short period, the result, no matter how great the anticipated ultimate demand, is that the price of that commodity eases to a point below the original value of the article. Then, after the primary demand has been supplied and the secondary demand prevails, the price readjusts itself, and if there is no increase in the output, that commodity will return to its former selling price.

"This truism constitutes one of the reasons for the position of the bond market to-day. It is true that inflation and the non-productive employment of labor have played a part, but between these two factors and government loans, exists a connecting link. Had it not been for the immense volume of labor employed in the manufacture of munitions, and the financing of a huge fighting force engaged in a non-productive pursuit, the raising of large sums within so short a period would have been unnecessary, and without these factors, no inflation would prevail.

"To accomplish this war financing, it was realized that the institutions and private individuals whose [illegible] it was to buy bonds could furnish but a portion of the capital required. It was necessary to secure large sums from industrial, mercantile and other concerns, who strongly supported the loans, and from individuals who had hitherto regarded bonds as an investment for the wealthy only. Undoubtedly, the market for bonds was greatly widened by educational campaigns, which taught hundreds of thousands the advantages of owning this class of security.

"Finally the time arrived when many of these concerns found it necessary to employ their assets in financing expansions and additions to their businesses, which had been postponed during the latter period of the war. Also, a number of people who bought Victory Bonds either through patriotism, or believing that war-time wages would continue, have required to part with their holdings. As a result of this liquidation, it seemed that the market might suffer from a surplus of these bonds. Buying, however, has been surprisingly good and the opinion that these bonds would soon become the property of the permanent investor is vindicated by the large number of orders continually received. Redistribution, now under way, takes time, and in this period bonds are cheap.

"Final absorption, therefore, may be termed the crux of the price situation. Victory loan bonds are rapidly passing out of the hands of those who wish to sell, and into the hands of those who plan to retain them until maturity. The floating supply will grow smaller and with its absorption a strengthening in the Victory bond market should occur."

Coming Offerings

The following is a list of debentures offered for sale of which mention has been made in this or previous issues:—

'The Bond Market'

is the name of our latest publication. It contains short articles on such questions as "Victory Bonds as an Investment," "Canada—a Creditor Nation" and "Inflation."

It will prove of interest to those people who care to read of the elements affecting the financial situation.

Macdonald R.M., Man.	25,000	6	20-years	July 28
Goose Lake, C.S.D., Man.	50,000	6	20-inst.	Aug. 14

Brantford, Ont.—A block of $150,000 school debentures have been placed on the local market. The city recently disposed of $300,000 in the same manner.

Goose Lake C.S.D., Man.—Tenders will be received until August 14th, 1920, for the purchase of $50,000 6 per cent 20-instalment debentures. (See advertisement elsewhere in this issue).

Macdonald R.M., Man.—Tenders will be received until July 28th, 1920, for the purchase of $25,000 6 per cent., 20-year telephone debentures, which are in denominations of $500. H. Grills, Sanford, Man.

Windsor Ont.—Tenders are being received to-day, July 16th, for the following debentures:—$17,000 6 per cent. 10-instalment; $12,000 6 per cent. 10-instalment; $40,000 6 per cent. 10-instalment; $107,547.81 $5\frac{1}{2}$ per cent. 10-instalment; $50,000 6 per cent. 20-instalment: $150,000 6 per cent. 20-instalment, totalling $376,547.81.

Sherbrooke, Que.—Tenders will be received until July 26, 1920, for the purchase of the following debentures: $150,000 5 per cent., maturing August 1, 1925; $242,500 5 per cent., maturing June 1, 1925, both payable in the province of Quebec. Tenders must be accompanied by an accepted cheque equal to 1 per cent. of the amount of the tender and specify whether the offer is made with or without accrued interest.

St. Jerome-de-Matane, Que.—Tenders will be received until July 27, 1920, for the purchase of $150,000 $5\frac{1}{2}$ per cent. debentures, which are dated April, 1920. The price offered in the tenders shall not include the interest accrued on the bonds at the time of their delivery. Separate tenders shall be made for redemption of the debentures by the corporation: (1) In five years by annual series; (2) in ten years by annual series; (3) in thirty years by annual series. The debentures are to be printed by the tenderer.

Debenture Notes

Courtenay B.C.—Ratepayers have voted in favor of raising $110,000 for a new waterworks system.

Sandwich, Ont.—Ratepayers have defeated a by-law authorizing the raising of $30,000 for the erection of a new fire hall.

Newfoundland.—A resolution empowering the governor-in-council to raise a loan of $1,000,000 to be used in the rehabilitation of the Reid-Newfoundland Railway, has been introduced in the house of assembly.

Moose Jaw, Sask.—On July 10th, ratepayers voted in favor of the following by-laws:—$45,000 for school; $16,500 for school; $2,000 for cottage schools. A by-law authorizing the raising of $34,000 for addition to Alexandra school was defeated.

Sarnia, Ont.—Ratepayers have defeated a by-law authorizing the raising of $300,000 for a duplicate water main system, and also one authorizing the additional expenditure of $20,000 towards the purchase of a municipal paving plant.

Westmount, Que.—Two civic loan by-laws totalling $830,000 have been approved by the minister of municipalities for the province and by the lieutenant-governor, and immediate steps will be taken to promulgate the by-laws, and make legal the bonds to be issued thereunder, even though they may not be placed on the market for some time. The money will be used chiefly for roads, sewers and general improvements.

Saskatoon, Sask.—A by-law authorizing the raising of $30,000 for the extensions to the municipal street railway, will be submitted to ratepayers on July 22nd. A by-law authorizing the raising of $27,300 for extensions to the electric light and power plant will also be submitted.

St. John, N.B.—A heavy financial program is faced by the city this year. Already $150,000 is needed for the nurses' home and $357,000 for water extensions. Besides this, school trustees are planning two new schools which cannot be built under $100,000 each, and many other smaller, but not less important items.

Halifax, N.S.—The finance committee is recommending a loan of nearly $900,000 for the following purposes:—$200,000 for sewers; $150,000 for water extensions; $300,000 for street paving; $60,000 for fire station; $150,000 for tuberculosis hospital; $4,000 for fire alarm quarters.

Renfrew, Ont.—Two tenders were received on the $17,938 5 and 6 per cent., 23 and 30-instalment debentures, but both were rejected. Turner, Spragge and Company offered $15,745.47 and R. C. Matthews and Company, $15,285. J. A. Devenny, clerk-treasurer, informs *The Monetary Times* that an option has been taken for two weeks, but by whom he does not say.

London, Ont.—The finance committee will recommend to the council that the Ontario Railway Board be petitioned to authorize the issuance of $265,000 of debentures for the public utilities commission. The amounts required are:—$100,000 for a new reservoir, for which the people voted at the last election; $85,000 for waterworks extension, and $80,000 for hydro-electric department extensions. All three issues were sought in the city of London bill which was killed in the legislature.

Bond Sales

Swan River R.M., Man.—An issue of $58,000 6 per cent. 30-year bonds has been sold to Messrs. Strange and Snowden, Winnipeg, at an interest cost to the municipality of slightly less than 7 per cent.

Drummondville, Que.—Rene T. Leclerc has been awarded $83,000 6 per cent. 10-year waterworks and sidewalk debentures at 96.50. . Versailles, Vidricaire and Boulais bid 95 while the Municipal Debenture Corporation bid 95.50.

St. Chrysostome, Que.—The $7,500 6 per cent. 10-instalment debentures which were issued to pay off the floating debt, have been sold to J. A. Porrier at 100.25. La Banque Provinciale bid 93.1 while Credit-Canadien, Inc., bid 96.14.

Hawkesbury, Ont.—The town has accepted an option from Messrs. A. E. Ames and Co. for the $179,000 6 per cent., 6, 20 and 30-year debentures. The option was taken at 95.883 less $1\frac{1}{2}$ per cent. Messrs. Wood, Gundy and Co., also took an option at $92\frac{1}{2}$.

Grand Prairie Alta.—Two debenture issues aggregating $13,000 have been disposed of to the three local men. H. W. Smith, a pioneer farmer and rancher of the Grande Prairie district, took $10,000; Norman Cuthbertson, $2,000, and A. W. Carveth, $1,000. Numerous applications for smaller allotments were received but rejected. The price obtained was 92, the bonds bearing $6\frac{1}{2}$ per cent. for a fifteen-year period.

Alberta Local Sale

Sale of the Alberta government "baby" bonds under the new plan recently announced by the provincial treasurer, is now getting under way. Already $74,000 have been disposed of, representing daily average of $3,500 for twenty-one selling days. This average is expected to increase largely as the campaign gets further under way.

British Columbia Sale

British Columbia.—W. J. Goepel, deputy minister of finance, wires *The Monetary Times* that the amount of the recent bond sale was $1,300,000. The bonds are dated June 30, 1920, mature in five years, bear interest at the rate of 6 per cent., and are payable both in New York and here. A part of the issue was sold at 99.78, to whom Mr. Goepel does not mention, and part to a local syndicate comprising British-American Bond Corporation, Royal Financial Corporation. Ltd., and Gillespie, Hart and Todd, at par.

Helping the Operator

We suggest that subscribers practise the following:

1. Always consult our latest directory, because numbers are frequently changed.
2. In a moderate tone speak slowly and distinctly directly into the mouthpiece with your lips not more than an inch away.
3. Answer promptly when your bell rings. It saves "Central" ringing again, saves the calling party's time and speeds up business generally.
4. When you answer give your name or the name of your firm instead of the old-fashioned "Hello," thus allowing the conversation to begin without waste of time.

Co-operation with the operator, as above, cannot but help your service.

The Bell Telephone Co. of Canada

SELLING MUNICIPAL BONDS

Trading Broader But Not So Heavy On Montreal Exchange—Paper Issues Still the Features—Provincial Paper Company May Issue Bonds—New Brunswick Telephone Company to Increase Capital—Brompton Shareholders Ratify Proposed Stock Changes—American Sales Book Shares Now Listed in Toronto

IRREGULARITY marked dealings in the New York market for the week ended July 14th, although trading was broader. The easing in call money had little effect. Traders were disturbed to a large extent by reports of commercial difficulties and by the threatened interruption in industrial operations on account of transportation congestion and the coal shortage. Speculative interests are still much confused over the immediate future of the money market and outlook for general business. If there was more certainty about these matters they would be disposed to buy stocks more freely.

Although trading in some stocks on the Montreal exchange was not as heavy as in the preceding week, the market was broader. The features were the paper stocks, both in activity and strength, Abitibi, Spanish River and Laurentide leading that section. The sensational rise of 25 points in Riordon is considered a belated one, and is attributed to the exchange of shares in regard to the recent consolidation. Such an advance has been expected for some time. Outside of the paper issues, Atlantic Sugar was the most attractive stock, gaining 11 points on a comparatively small turnover. At the close there was a weakening tendency which left that issue 4¾ points lower. The preferred also attracted considerable attention, rising 15 points, and continuing strong until the close. The actions of the latter are understood to be related to the conference in New York with regard to the payment of dividend arrears, which amount to 29¾ per cent. National Breweries was active and strong, while the tendency in Quebec Railway was to lower levels. The banking section was weak.

Toronto Exchange

Brazilian, Atlantic Sugar and Spanish River were the three stocks on the Toronto market which attracted the most interest. Brazilian was the active feature of the three, with a fractional gain. Atlantic Sugar exhibited much strength, the common gaining 16¼ points and the preferred 16 points. Spanish River, which remained fairly steady all week, sought higher levels at the close, the common gaining 9 points and the preferred 14½ points. C.P.R. attracted much attention when it rose 6½ points at 140½. There was a reactionary tendency at the close, however. Canada Bread was rather erratic, while Quebec Railway was somewhat weaker.

Railway Issues on Market

There was little interest in the bond market outside of Quebec Railway, which issue was inclined to weakness. It is interesting to note the prices of the odd blocks of Canadian railway bonds which are now being offered in the United States. The Canadian Northern 6 per cent. equipment trust certificates, maturing each June and December from December 1st, 1920, to 1929, inclusive, which were put on the market in January last, were then offered to yield 6¼ and 6½ per cent. These same bonds are now being offered to yield 7.50 per cent. Likewise, the Canadian Northern 5½ per cent. gold notes, due December 1st, 1922 and 1924, which were put on the market in March at prices to yield 7.01 and 6.96 per cent., are now being sold to yield 7.75 and 7.40 per cent The Canadian National 7 per cent. equipment trust certificates, due May 1st, 1935, which were put on the market in May, are still being offered at the same price, namely, 7.10

Capitalization Changes

At the session of the Public Utilities Commission of New Brunswick on July 9th at St. John permission was given to the New Brunswick Telephone Co. to issue $175,000 additional stock. The former authorization was for $2,000,000. The additional issue is for the purpose of paying for extensions and improvements effected during the last few years for which no stock had been issued.

The capital stock of F. T. Hill and Co., Ltd., will be increased from $150,000 to $500,000 by the creation of 3,500 shares of new stock (par value $100). Supplementary letters patent have been issued by the province of Ontario for this purpose.

It is probable that the Provincial Paper Mills, Ltd., will do some new financing later in the present year in connection with the new plant at Port Arthur, Ont. A bond issue is mentioned, which will be secured by the company's four properties, the other mills being at Georgetown, Thorold and Mille Roches. In the reorganization of the company last April ownership of the Port Arthur Pulp and Paper Co. was acquired. At the time of reorganization the Provincial Paper Mills was allowed $2,400,000 authorized preferred stock, of which $1,700,000 has been issued; $7,600,000 of common stock, of which $3,500,000 has been issued, and $3,000,000 of bonds, none of which have been issued. It is the present intention of the company to finance the new mill on bonds, if possible, with a supplementary sale of treasury preferred stock, should that be necessary.

Brompton Shareholders Approve Increase

At a meeting of the shareholders of the Brompton Pulp and Paper Co. in Montreal last week ratification was given the proposal of the directors to increase the common capitalization, which now consists of 70,000 shares of a par value of $100 each, to 210,000 shares of no par value. Of the latter issue present shareholders of the company will receive two shares of the new securities for each one of old, the balance of 70,000 shares remaining in the Brompton treasury to be issued in order to provide for future exigencies in the way of financing.

It has been stated, however, that there is no present intention on the part of the board to issue any portion of the new stock in the treasury, the financial position of the company at the present time being so comfortable that the extensions at East Angus and elsewhere now in process of completion are being provided for out of current earnings.

Following the meeting, it was announced that the regular dividend of 1¾ per cent. had been declared on the preferred shares and one of 3 per cent. on the common, the latter being equal to $1.50 per share on the new no par value stock. Both disbursements will be made on August 7th to holders of record July 31st.

American Sales Book Shares Listed

Both issues of the stock of the American Sales Book Co. are now listed on the Toronto Stock Exchange. The outstanding common stock is $614,660 (par value per share, $20), and preferred, $3,073,300 (par value, $100). The number of shares in each case is 30,733. The delay in listing this stock was due to the distribution going on among Carter-Crume shareholders, which is now practically completed.

American Sales Book Co. was organized in 1911 by the present president, Mr. S. J. Moore, and has plants at Niagara Falls, N.Y., and Elmira, N.Y. It is one of the few Canadian companies operating in the United States, and is the largest manufacturer of mercantile sales books in the world. The company was formed by merging the Carter-Crume Co., the Eastern Sales Book Co. and the American Sales Book Co., Inc., shareholders of the original companies receiving stock in the new concern in return for the assets they turned in. There are upwards of 800 shareholders, the majority of them being in Canada.

Common has been quoted all week at 25 bid, while preferred was quoted at 86 asked and 80 bid.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

REGINA WILL DO ITS OWN FINANCING

Will Not Pay More than Current Rate of Exchange on Sterling Issues—Local Sales Being Attempted

(Special to The Monetary Times.)

Regina, July 10th, 1920.

SOMEWHAT of a spirit of antagonism between the Regina city council and the bond brokers of eastern Canada has been created, as a result of which the city council has just turned down a recommendation of the city commissioners to call for tenders for a block of debentures of about $100,000 which will be ready for the market, provided the burgesses approve the issues at the polls on July 22nd. The city council will instead attempt to sell the issue over the counter to local investors, and, in order to ensure a ready sale, a committee of the council has been appointed to co-operate with the city commissioners in putting on a publicity campaign.

Won't Pay Interest at Par

The situation has been partly brought about by the attitude of the city council with respect to the payment of interest coupons of sterling bonds domiciled in Canada. This has been a burning question in the council chamber since the first of the year. The coupons are made payable in sterling currency, and the council decided to redeem at current rate of exchange.

The decision brought a storm of protest from bond houses on behalf of their clients, and, as a result of the representations which have been made, the question has been discussed at numerous meetings of the council during the first six months of the year, and was only finally disposed of early this month by the aldermen ordering the item struck off the agenda, thus proclaiming its intention to adhere to its original decision. At the same meeting it was decided to make an appeal to the local investors for the necessary funds to construct this year's programme of improvements.

The council adopted the attitude that the city should not be expected to pay par rate of exchange on what was stated to be large quantities of Regina city sterling bonds sold to Old Country investors and repurchased in this country last year with the object of realizing on the difference in exchange. A compromise was suggested by some of the aldermen in the form of a provision that par rate of exchange should be paid on all securities which had been domiciled in Canada prior to July 1st, 1919, putting it up to the holder to support his claim by a sworn statement of date of purchase. This, however, was declared to be impracticable, and the council has now definitely decided to pay current rate of exchange on these coupons.

New Financing this Year

The city will have for sale this summer debenture issues totalling approximately $240,000. Of this amount, $100,000 will be voted on at the polls on July 22nd, and, subject to the approval of the burgesses, subscriptions are already being taken [illegible] that this [illegible] to the local [illegible].

Early [illegible] the city [illegible] securities on the local market. [illegible] of $[illegible] per cent. debentures, [illegible], and an issue of $[illegible] 6 per cent. debentures, [illegible], were offered through the wickets at the city hall. The [illegible] flotation was over subscribed to the [illegible] of the [illegible] of both flotations and of the other issue [illegible] was sold, the selling price being par in both cases.

When the city council [illegible] the recommendation to call for [illegible] for the new issue maturing in [illegible], some of the aldermen declared that they would have to pay a higher price than those which had been sold locally, and they did not wish to place themselves in the position of being turned down by the bond houses. Further, to pay a higher price to eastern bond brokers would be an injustice to the local investors, who had paid par for 6 per cent's., it was stated.

While the foregoing was the attitude of the majority of the council, one or two members shook their heads. "What about the future when we may wish to call for a million dollars or more?" they asked.

Local Sales Being Pushed

The Local Government Board in this province is also doing what it can to encourage the sale of municipal and telephone debentures among local investors, and, largely as a result of its actions, issues totalling $250,000 were sold directly to local investors in 1919 in addition to further sums sold indirectly.

The Saskatchewan Rural Telephone Companies' Association, at its convention in Regina last week, passed a resolution, asking the Local Government Board to afford every opportunity to telephone subscribers to purchase rural telephone debentures. The Hon. Geo. Bell, chairman of the L.G.B., told the convention that, up to the limits of his staff's capacity, the board was prepared to do this, and would issue debentures in any denomination to assist local sales.

THE RIORDON PULP AND PAPER COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 18

Notice is hereby given that a quarterly dividend of [illegible] has been declared on the Common Stock of the Company for the quarter ending June thirtieth, 1920, payable August fifteenth, 1920, to shareholders of record at the close of business on August sixth, 1920.

By Order of the Board.
F. B. WHITTET, Secretary-Treasurer.

Montreal, July [illegible], 1920.

Corporation Finance

Position of New Riordon Company Clearly Reviewed—Directorate of the Organization Has Been Announced—Sherwin-Williams Selling Interest in Canadian Subsidiary—Whalen Company Improves Position—Still Need For Conservative Financing, However—Toronto Railway Would Defer City Payments

Calgary Gas Co.—The Calgary city council is at present considering action to be taken in regard to the request of the company for an increase of rates. Permission has been asked to investigate the books of the company before coming to a final decision.

Ottawa Light, Heat and Power Company.—Satisfactory earnings are reported by the company as derived from its subsidiaries, the Ottawa Gas Company and the Ottawa Electric Company. Notwithstanding the increased cost of fuel, labor, etc., current earnings are running at the rate of approximately 9 per cent. per annum on the company's common share capital, as compared with 7 per cent. per annum in 1919.

Toronto, Hamilton and Buffalo Railway Co.—For the year ended December 31st last the net income was $338,521, as compared with $902,507 in the previous year. Gross revenue was $2,500,917; net railway operating revenue, $493,919; operating income, $421,919; gross income, $628,198, and net income, $338,521. The surplus was $78,981, and the profit and loss surplus now amounts to $2,537,718. Total assets are $15,449,061.

Tooke Brothers, Ltd.—At the annual meeting of the company in Montreal last week, there was a revision of the personnel of the directorate. The new directors, Lt. Col. Chas. W. McLean and W. M. Weir, were elected to the board, replacing W. Fred. Heney, of Montreal, and Hon. F. H. Phippen, K.C., of Toronto. Lt.-Col. McLean also replaces W. A. Brophey in the vice-presidency of the enterprise, the latter, however, retaining his post as managing director.

The board and officers now comprise: W. A. Tooke, president; Lt.-Col. C. W. McLean, vice-president; W. A. Brophey, managing director, and the following directors: A. J. Brown, K.C., Wm. McMaster, W. M. Weir and W. S. Barker, the latter member of the board being also secretary-treasurer of the company.

Toronto Street Railway.—The company is asking the city for permisison to defer payment of the city's percentages on revenue on condition that the accumulated sum of these percentages be deducted in 1921 from the whole amount which Toronto has to pay for the assets of the company. In the meantime the company would use the funds to meet its increased expenses. It is estimated that the sum of these percentages, between now and the end of the franchise, will be $1,500,000. The proposition is not favored by the civic authorities, and will be considered in its legal as well as other aspects. Mayor Church, in making a statement on the matter before the council, said:—

"I have gone fully into the question, both from the legal point of view and as a matter of policy, and have come to the conclusion that it can't be done. In the first place, it will open up the whole question of the agreement; secondly, it will depreciate our revenue, and the amount of the depreciation will have to be made up in the tax rate. There is no security, and there are also legal objections which would lead to complications. On these grounds and as a matter of policy the company must finance itself without the help of the city. We would have to borrow money at 7 to 8 per cent if we didn't get our money in time."

Montreal Light, Heat and Power Co.—Figures were produced before the Quebec Public Service Commission in Montreal on July 11th in support of their contention that the price of gas should be increased from the present rate of [illegible] cents per thousand cubic feet net to $1.20 per thousand, less 10 cents discount, or $1.10 net, an increase of [illegible] per thousand feet. J. S. Norris, general manager of the company, produced the figures for the five years [illegible] and showed that profits had steadily fallen for each of the years, while on the figures for the last eight months of 1919 it was contended there would be a deficit on the sale of gas for 1920 of $1,075,362 if present rates were maintained.

The commission considered the application and will render judgment shortly.

Illinois Traction Co.—The annual financial statement now going to shareholders shows that gross earnings of the company increased by $2,495,580, or 16.35 per cent., to $17,756,583, all departments participating in the increase except gas and miscellaneous decreases to the amount of $54,733 under no particular name. The decrease in the gas item is due to the placing of the earnings from the products in another category. These by-products showed an increase of $234,614.

After deductions, the balance left for the preferred was $1,335,393, an improvement of more than $840,000 from the year before. Balance carried forward amounted to $1,078,073, as compared with a previous balance of $1,060,345.

Whalen Pulp and Paper Mills, Ltd.—An improvement in the financial position of the company, as already shown in a brief review which has appeared in these columns, is emphasized in the detailed report which is given on another page of this issue. Although the future of the company appears bright, the directors, in view of present conditions, recognize the necessity of conservative financing. Sir Geo. Bury, president, in his report to shareholders, states:—

"The expenses for the year amounted to 80 per cent. of the earnings as compared with 97 per cent. for the previous year. The earnings for the fiscal year under review exceeded those of last year, notwithstanding one of the plants was closed for six weeks through lack of orders following the signing of the peace treaty.

"Recognizing the need of conserving the timber resources of British Columbia, and to stabilize wood costs, it was felt wise to instal barkers, etc., for small-wood operations at your plants to supplement present large-wood operations. The wisdom of installing small-wood operations is borne out by the fact that the price of logs on the open market has doubled in the past year. The improvements and betterments necessarily interfered to some extent with operations, but the work had to be undertaken to improve and increase production and to meet growing log costs. The results of the small-wood operations and the betterments undertaken should be reflected in the last half of the present year's operations. To increase production and improve the quality of your product one extra digester, additional screens, drying apparatus, etc., are being installed in anticipation of your approval."

A recent report from Vancouver states that Sir George Bury will retire as president of the company. Sir George has declared that he cannot continue with the company as he has accepted an appointment in advisory capacity with certain large interests on the Eastern Coast. What position he has accepted, and who will be his successor, have not yet been determined.

Sherwin-Williams Company of Canada.—A cable from London, England, confirms the recent rumors which have been current in stock circles, regarding negotiations with the London and Australian subsidiary, the Lewis Berger and Sons Company. The cable reads as follows:—

"Walter H. Cottingham, president of the Sherwin-Williams Co. of Canada, Limited, who is now in London, states that he has formed a syndicate to purchase the Canadian interest in the London and Australia Company of Lewis Berger and Sons. The Canadian company retains a considerable stockholding interest in the English company,

She's Daddy's Girl-

RECENT FIRES

Western Printing and Lithographing Co. at Calgary and Mann Axe Factory at St. Stephen, N.B., Both Suffered Loss of $100,000

Alvinston, Ont.—July 13—Planing and sawmills belonging to D. J. McEachern and Sons damaged. The loss is estimated at $10,000, with insurance of $1,500.

Brockville, Ont.—June 30—Residence of Al. Henry, township of Dungannon, destroyed. Building and contents were insured to the extent of $500.

Calgary, Alta.—July 5—Western Printing and Lithographing Co. damaged. Estimated loss, $100,000.

Fairville, N.B.—July 8—Warehouse belonging to Ready's Breweries damaged. Fire was caused by an ash pile. The loss was fully covered by insurance.

Golden, B.C.—July 3—Store belonging to A. D. J. Mathieson and Co. and the fire hall at Golden destroyed by fire.

Halifax, N.S.—July 9—Garage belonging to the Nova Motor Co. damaged.

Jasper, Ont.—July 9—Methodist church destroyed. Fire was caused by an electrical storm.

Kensington, P.E.I.—July 7—Bank of Nova Scotia building damaged by fire.

London, Ont.—July 12—Factory belonging to the Taylor-Campbell Electrical Co. damaged. Loss, $3,000.

Moncton, N.B.—July 11—City almshouse and barn destroyed.

North Bay, Ont.—July 12—Twenty two houses destroyed in the village of Wye. Fire was caused from bush fires.

Parry Sound, Ont.—July 12—House owned by Beagan Brothers, was destroyed. There was no insurance.

St. Stephen, N.B.—July 10—Mann axe factory damaged. Estimated loss, $100,000, with insurance of $50,000.

Toronto, Ont.—July 11—Garage belonging to L. G. Randle and twenty-five motor cars destroyed. Total loss, $25,000.

Waterloo, Ont.—July 7—Warehouse belonging to Bauer's shoddy mill damaged. Loss, $20,000.

Winnipeg, Man.—July 10—Building belonging to the Crescent Furniture Co. damaged. Estimated loss, $50,000.

July 12—Commonwealth Block damaged by fire. Estimated loss, $30,000.

Wrentham, Alta.—July 7—Walsh store and contents damaged. Estimated loss, $6,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Ayton, Ont.—June 3—The Ayton Creamery, owned by P. J. Biniger, was damaged by fire. The fire was caused by a spark from smokestack. Total loss, $8,000, with insurance of $5,000.

McAdam, N.B.—June 19—Restaurant and ice cream parlor belonging to King and Smith damaged. The total loss was $5,000, with insurance of $1,200 in the Nova Scotia Fire.

Stratford, Ont.—June 23—A sewing machine, table and iron belonging to Wally Hern was destroyed. The fire was caused by an overheated iron. Total loss, $90, fully covered by insurance.

Winnipeg, Man.—June 14—Warehouse and contents occupied by R. A. Lister and Co., Ltd., and owned by the Northern Trusts Co. was destroyed. The loss is $9,000, with insurance of $7,000 in the Sun Insurance Co., Insurance Co. of North America and the Scottish Union and National.

Mr. I. W. Killam, president of Royal Securities Corporation, Montreal, announces the election of the following officers of the corporation: W. C. Pitfield, vice-president and general manager in charge of the corporation's entire organization, and V. M. Drury, vice president. The new appointments take effect at once.

EFFORTS TO MAKE RATING UNIFORM

Co-Operation Between Eastern and British Columbia Associations—Balmoral Apartment Fire Reveals Defects in Building Regulations

Vancouver, B.C., July 10th, 1920.

In the report of J. A. Thomas, British Columbia fire prevention officer, on the Balmoral apartment house fire, in which several people lost their lives, Mr. Thomas said: "The present fire by-law, operated in Vancouver, cannot be understood by laymen of ordinary intelligence or by some lawyers, for this reason and also for the reason that the staff of the building inspector and city fire wardens was insufficient in numbers: by-laws have not been properly enforced in the past." A large number of technical recommendations for the protection of apartment houses, hotels and semi-public buildings have been made by Mr. Thomas in his report.

John Jenkins, Manager Britannic Underwriters, paid a visit to Vancouver this week. Mr. Jenkins, who is vice-president of the Canadian Underwriters' Association, stated that it was the desire of the governing council of that body to have the basic system of making rates the same all over the American continent, and the rates themselves, as nearly alike as the differences in local position will permit, and with that end in view the Canadian Automobile Underwriters' Association are giving the provincial association every assistance in their power.

The new Manual containing the rates at which automobile insurance can be written is now being printed. As a new system of rating has been adopted and the rates have nearly all been changed ample time is being given before they become effective, which will be on September 1st.

J. R. Davison this week addressed all the insurance organizations of the coast cities of British Columbia at a luncheon held in Vancouver. Mr. Davison is publicity comsioner for Vancouver. The speaker outlined the work of the publicity department in advertising Vancouver throughout the prairie provinces and coastal states. He appealed for the insurance men to support his work and to see that the city provided greater sums to carry on with.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of June:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
June 7	$3,619,000	$2,957,000	+ $ 662,000
June 14	3,660,000	3,062,000	+ 598,000
June 21	3,578,000	3,024,000	+ 554,000
June 30	5,060,000	3,977,000	+ 1,083,000
Totals	$14,917,000	$13,020,000	+ $2,897,000

Canadian National Railways.

	1920.	1919.	Inc. or dec.

Advertising to Increase Bank Business

Habit of Ultra-Conservative Advertising Was Hard to Break—Banks Are Now Adopting Methods Successfully Used in Commercial Lines—Care in the Selection of Advertising Media—How Business May Be Held When Once Secured

By W. F. DORWARD
Manager, Royal Bank, Rexton, N.B.

WITHIN the last thirty years general commercial advertising has made immense strides. A perusal of the magazines of 1890 will show that the advertising of that date was crude and elementary compared to the finished product of to-day. This, of course, is due in no small measure to the improvements in processes of reproduction, but most largely to the effect of intense specializing in the modern advertising art.

Bank advertising has not kept pace with the publicity given to the retailer or the manufacturer. The reason is not far to seek. Until very lately all the banks, in Canada at least, seemed to indulge in the same flat, stale and unprofitable method of advertising, which invariably consisted either of a bald statement of the bank's name, birthday, address and resources, or an imposing statistical table of figures, elucidating the recent position of its finances. This was not advertising. The man on the street or on the farm was little interested or did not understand, and these so-called ads received not even a cursory glance from all except perhaps a few senior bank officers (for whom they were not intended) or a stray interested shareholder or two.

Precedent Was Hard to Break

It appears that during all those years no one of the banks would venture to become a bold pioneer in advertising, and break the deadly monotony of business cards or balance sheets. We cannot believe that during this long period of joyous effusions of assets and liabilities that all the banks were dead to the value of their great article of stock-in-trade—service. So we must revert to the first solution and assume that the so-called dignity of past generations held in leash all the seductive inducements which now begin to show themselves to tempt the masses to brave the awe-inspiring bronze grille.

To use a slang expression, the man who has silks, [illegible], or sardines for sale, "has the bulge" on the banker in the advertising field. In the first place these are actual commodities, good to wear or to eat, and their very quality sells them or condemns them. Again the house that has a reputation for supplying a good article can sell on its reputation. In addition to the actual goodness of quality and the attractive appearance of certain goods and their containers, the wise vendor *adds* the main drawing card of what banks have to offer—service and courtesy.

Reaching Different Classes of Customers

The chartered bank has really but one great big trump card service. There are several banks in Canada, strong, healthy and widespread. A cheque, a draft, a deposit, or a loan in any one is pretty much the same as a cheque, etc., in any other, but it is the manner of the reception and the successfully expressed willingness to serve that the secret lies; these are the deciding factors. I have already referred to advertising as an art, but I am now tempted to call it a science, so I will compromise and state that the art of the banks in bringing the general public to their wickets is developing into a science; just as general advertising has already achieved the distinction of having become a perfected science with correspondence schools to unfold its mysteries throughout Europe and America. In concrete form successful bank advertising consists in representing in terms of publicity the methods adopted by successful bankers themselves. Thus the inducements offered to the different component parts of the general public seek to be appropriate to their several lines of business and so couched as to arouse interest for "interest," is the bull's-eye of all advertising, and "attention" is the inner circle. A man's attention must be gained before he is interested. It is obviously [illegible] to appeal to the average farmer with a [illegible], say, tabulated statements of the imports of ship supplies with custom duties thereon, and very indifferent would be the shipbuilder to advertising matter pertaining to agriculture. In like manner the wise bank manager talks [illegible] to the tinker, crops to the farmer, etc.

Catches Readers Off Guard

Mankind universally craves entertainment, not necessarily in the form of a theatre or a ball game, but something to amuse, to interest, to divert. Although the average man is busily occupied the greater part of each day, he instinctively turns his attention to some relaxation during his spare time. Apart from outdoor exercise possibly the most popular pastime is reading, and right there the advertiser gets his message. Even the [illegible] is often driven [illegible] through [illegible]. By far the greater part of advertising [illegible] in the mood of [illegible] and [illegible] interesting [illegible]. [illegible] the bank [illegible] periodical, other [illegible].

Although I [illegible] the leading stock-in-trade [illegible] revolving [illegible] proof [illegible] less [illegible] as it is possible [illegible] lead to [illegible] a [illegible] and [illegible] to be the [illegible]. Rome was not built in a day, and all the [illegible] institutions once [illegible] pied the same standing as their smaller contemporaries. Moreover, the class of people whose business can be better served by the ubiquitous bank are usually well aware of such conditions, as their business is widespread, and they seek such a bank without reference to advertisements.

Variety of Advertising Media

The advertising matter appearing in the dailies and in the financial periodicals is so attractive, that it invariably receives more or less attention, and is doubtless productive of some result and equally doubtless is it that huge sums are fruitlessly expended through ill-chosen mediums or inefficient composition. The expert does not waste good money on advertising on barren land or to empty houses. Then there is another class of advertising which we do not find sandwiched between fact and fiction. What of the omnipresent blotter, the booklet, the calendar. The keynote of what success is attained by these lies in their very obtrusiveness, or in their striking appearance. To explain, who can help noticing a calendar that stares one out of countenance day after day? The wording of the blotter becomes unconsciously memorized, while many of the delightful little brochures or more imposing catalogues hold the attention because of their sheer artistic excellence.

Some Advertising Costs Nothing

At the beginning of these comments I should have classed bank advertising under two chief divisions: (1) That which costs; and (2) the impressionistic advertising which is free to employers. I have made some remarks, incomplete and sketchy, on the costly article, but would not pass by the never failing business getter—courtesy. Courtesy in itself is a very excellent attribute, pleasant to exercise, but it should never degenerate into obsequiousness. Courtesy compatible with absolute and impregnable self-respect will always leave a dignified impression behind. But courtesy alone will not render a bank its full measure of advertising service from a manager; it must be accompanied by a persistent and genuine effort to assist, facilitate, and make the going easy for his clientele. By this kind of service the smallest trader or farmer will get the impression that the bank is making a special pet of his account, and do not forget it, he will talk about it, and interest his neighbors. If then, any one bank accentuates this attitude to its officers, and if the rank and file of the branches collaborate loyally, an undoubted result will accrue. The bank will be discussed in the town and country hotels, in the rural post offices, and in the market places, and a tide of business shall flow its way.

Diplomacy Also Helps Business

Diplomacy, too, plays no mean part, not so much in advertising, but in holding business already obtained. I think it was Disraeli who said that the art of taxation was "the art of plucking a chicken without making it cry." He was wise in his day and generation. The busy bank manager does not have to pluck many chickens, but he frequently has to gently and diplomatically decline to advance money where he or his executive, or both, have good reasons for such action. The executive can efficiently discriminate from long experience, and the unsuccessful applicant if judiciously handled will depart still friendly with the institution and with respect for the manager. Very special attention to such a client will make him realize the bank's earnestness to serve him up to the limit prescribed by sound business principles. And he will spread the good word after his temporary disappointment is long forgotten.

To quote from Mr. Pickwick, bank advertising "comprises, in itself, a difficult study of no inconsiderable magnitude," and space prevents its exhaustive treatment here.

There are now many methods of bank advertising, most of which can, and will, be improved upon, and there is yet much virgin soil to be uncovered. Now that the balloon of what was mistaken for business dignity has been pricked, we will see many more progressive methods, and the sagacity of the executives is not likely to permit the aggressive, joyous art of modern bank advertising to degenerate into the mediocre, but will maintain the prestige and the success of their institutions by a straightforward, interesting, legitimate and persistent appeal to the general public, whose cooperation will result in the desired mutual benefit.

Cabinet Ministers Have Summer Recess

Vacations and Trips of Inspection the Order of the Day—Premier Addressed Montreal Board of Trade—Tariff Enquiry Will Be a Feature of 1920—Other Financial Developments—Russian Trade Situation Explained by Sir George Foster

(Special to *The Monetary Times.*)

Ottawa, July 22nd, 1920.

THESE are the dog-days at Ottawa. The new prime minister may be concocting some big policies or some spectacular moves, but there are no open evidences of it. Most of his cabinet, tired of the sight of Ottawa, parliament, departments, Privy Councils and deputations have hied themselves from the capital. They are either frankly on holiday trips or else on inspection tours, which are generally camouflaged holidays taken at the expense of the country. In the meantime, Mr. Meighen is about steering the ship of state alone. It is an opportunity, however, to get acquainted with the deck and the workings of the machinery.

Mr. Meighen's first big worry is the by-elections. Everything as far as his future is concerned depends upon the five pending contests. He has two new ministers to elect in Hon. R. W. Wigmore, in St. John, N.B., and Hon. F. B. McCurdy in Colchester, N.S. If these ministers are defeated then Mr. Meighen will have no honest alternative but to appeal to the country and to appeal under the most difficult circumstances. In addition there are three more hard by-elections in East Elgin, West Peterboro and Kamloops, where Hon. Martin Burrell has resigned to become parliamentary librarian. Defeats in these ridings, if the new ministers won, would not necessarily mean a general election, but it would be a blow at the prestige of the government and would reduce an already slim majority.

Hon Arthur Meighen's first public speech since his appointment as premier was made before the Montreal Board of Trade on July 21st. While in the city he also inspected the harbor works and discussed the marketing of the 1920 grain crop. The premier in his address made an appeal to all Canadians for toleration in their political views.

Decision on Wheat Board

One of the first deeds of the new government was a decision not to operate the new wheat board, but to allow this year's grain crop to be handled through the regular grain exchange channels. In view of the fact the American authorities have come to the same conclusion, this would seem to be a wise decision. The guarantee of a fixed price by the government with the possible danger of the general taxpayer being called upon to foot a bill for millions for the farmers is a principle that can only be defended in times of emergencies. The western farmers, or an element of them, are already, though, vigorously protesting against the [illegible]. However, their protests [illegible] not [illegible] at Ottawa in view of the fact [illegible] of [illegible] farmers' organizations were objecting with equal [illegible] against the wheat board when they thought the board was [illegible] a price beneath the American guaranteed [illegible]. The farmers themselves, however, are divided on this subject. [illegible] Hon. T. A. Crearer, the recognized [illegible] leader, [illegible] against wheat control in the House.

Tariff Inquiry Will be Extensive

Sir Henry Drayton is preparing to [illegible] the long-delayed tariff enquiry in the early fall. It is not yet decided whether the inquiry will be by a committee of the cabinet or a specially appointed board. It has been decided, though that the inquiry will not be behind closed doors, that it will be broad in its scope, thorough, and will give every section of the country and every class an opportunity to be heard. This will be the first systematic tariff inquiry since 1908, when a committee of the cabinet, headed by Hon. W. S. Fielding, went over Canada on a similar mission.

Sir Henry, by the way, has instituted a simple but practical reform in presenting the Dominion financial statement in such a way that the public can more clearly realize what it means. In former statements it was the custom to place various kinds of non-active assets against the gross public debt, the result being to give the country a false impression of its actual net obligations. Sir Henry has written off a number of non-active assets, such as loans to the G.T.P. and C.N.R., which, for the time being, at all events, are really not assets at all, with the consequence that the public is enabled to know exactly what is the net debt. Another promised improvement is tabulation of the financial statement in such a way that the amount of revenue from different sources is clear. This is particularly necessary now that there is so much direct taxation.

Central Purchasing Commission

When the government appoints a central purchasing commission to buy for all of the departments an entirely new board is likely to be selected. At present there are two commissioners, Sir Hormisdas Laporte and Mr. H. W. Brown. It is known that Sir Hormisdas is anxious to return to his own business, and Mr. Brown will probably return to his permanent post at the Militia Department. The new board will consist of a chairman and two members.

Pensions May be Commuted

Commutation of pensions, or payment to pensioners of a lump sum in final settlement of their pension claims, as provided for by amendments to the Pension Act adopted by parliament, is a matter that is now engaging the attention of the Board of Pension Commissioners. In a memorandum the board points out that the important point for pensioners to bear in mind is that no pensioner need have his pension commuted unless he desires to do so. It is emphasized that only pensioners with disabilities between 5 and 14 per cent. may have their pensions commuted. Pensioners entitled to commutation of pension will be forwarded a statement within the next two months, in which they will be asked to decide whether or not they wish to have their pensions commuted or continued for the period of their disability. All cases will be dealt with automatically, and it is not necessary for pensioners to communicate with the board.

Labor Supply for West

The question of a supply of [illegible] crop was discussed a few days ago [illegible] representatives with the department of labor. [illegible] employment service, a careful survey of [illegible] ments for the harvest was made and [illegible] 40,000 harvesters would be needed, [illegible] could [illegible] to recruit [illegible] ber [illegible] for Saskatchewan [illegible] Alberta. [illegible] at the [illegible] west [illegible] the [illegible] of labor [illegible] of the east [illegible] past, objection [illegible] obvious that [illegible] of [illegible] should [illegible] the successful harvesting of the western grain crop, as the industrial prosperity of [illegible] thereby.

Excursions from Coast

The decision to send harvest excursions out of British Columbia is a new departure, agreed upon with a view to further lessening the strain upon the east, and also with a view to absorbing any labor that may be available on the coast. It is thought that probably about 5,000 harvest hands will be secured in British Columbia, most of whom will be placed in the province of Alberta. It is probable that the first excursion from the east will reach Winnipeg August 10th. The Manitoba harvest will start prior to that date according to the present indications, but the employment service plans to recruit a sufficient number of workers from the local labor supply to meet the demand until the first quota of workers from the east arrives. The Saskatchewan and Alberta harvests are expected to commence about the middle of August. Much of the United States harvest will have been completed before a beginning is made in the Canadian west, and numbers of these men should be available for the Canadian harvest. Negotiations with the United States Department of Labor in the matter are now in progress. Harvest hands from the United States whose services are utilized in this way will be given temporary entry into Canada and will be returned immediately after the harvesting is completed. This should prevent the drawing of labor too heavily from the eastern provinces.

Trade Position Officially Explained

On July 15th Sir George Foster, minister of trade and commerce, issued a statement to the effect that there was no embargo to prevent a Russian citizen making purchases in Canada, or opening a place of business here. He stated: "With reference to various rumors which have been afloat and the statements purported to have been made by various parties as to trade between Russians and Canadians, it may be stated:—

"(1) No recognition has been asked [illegible] of the Soviet or any other Russian [illegible].

"(2) Russian correspondents from the United States and elsewhere have been informed that [illegible] in Canada against exports [illegible] and that it is open to any [illegible] from Canadians [illegible] mutually agreed upon [illegible] upon [illegible] of the [illegible] time [illegible] people of [illegible] ment [illegible] otherwise [illegible] means, nor [illegible] to [illegible].

"And [illegible] of Russian [illegible] of Canada."

GOOD CROPS WILL STIMULATE BORROWING

Western Provinces and Municipalities in Need of Funds—Commercial Outlook at the Coast

(Special to *The Monetary Times.*)

Winnipeg, July 21, 1920.

SPLENDID rains have fallen in Manitoba and throughout the West in the last 24 hours. In Winnipeg and vicinity it has been raining steadily for 12 hours. Rain was badly needed in many localities and will be worth millions to the country.

In Alberta for the most part the crop outlook is good. The special correspondents of the "Calgary Herald" from a large number of centres in Alberta all point to satisfactory prospects. In some cases it is stated that the present appearance of wheat and oats, as well as other cereals and grasses, is the best for years. At Irricana for instance, farmers are assured of a crop similar to the famous yield of 1915, while at Delia and Bessiker, 50 per cent. of the wheat has now headed out. Many of the correspondents state that in places where the ground is of a sandy nature there is ample moisture to carry the crops to harvest.

With the outlook for good crops in Western Canada this fall, the bond business is certain to be brisk. If the crops are good, there will be plenty of money for investment, and the provinces and municipalities, almost all of which are in urgent need of funds, will have their opportunity. A similar opportunity will be presented to Canadian companies of all kinds, which are looking for funds for their undertakings. At present the investment business is quiet.

A. L. Crossin, of the firm of Oldfield, Kirby & Gardiner returned this week from the Pacific Coast, and is well satisfied with the general financial conditions of British Columbia. "The tourist traffic." he said, "Has become in recent years quite a factor in the business life of Vancouver. Some lines of costly goods can be bought in Vancouver more cheaply than in the United States and the volume of trade from this source is considerable. In connection with agriculture, deeper interest is being taken in the fruit raising and the sale of this product has now reached real commercial importance. Retail trade in Vancouver is brisk and the general commercial prospects are quite satisfactory."

JUNE BANK STATEMENT

Advance figures of the June bank statement show that current loans increased more than $16,000,000, while savings deposits advanced about $15,000,000, as compared with the previous month. Other principal changes are as follows:—

	June, 1920.		Changes from May, 1920.
Reserve fund	$ 128,675,000	+	$ 100,000
Note circulation	227,775,253	+	1,440,216
Demand deposits	659,622,583	+	13,665,334
Notice deposits	1,243,700,977	+	14,627,462
Total deposits in Canada	1,903,323,560	+	28,292,796
Deposits elsewhere	360,358,386	+	15,262,911
Current coin	80,964,285	+	765,685
Dominion notes	173,691,988	+	1,623,421
Deposits, central gold reserve	100,400,000	—	7,650,000
Call loans in Canada	115,272,587	—	3,841,906
Call loans outside	219,214,431	+	5,250,249
Current loans in Canada	1,365,151,083	—	16,071,102
Current loans outside	184,328,464	—	342,242
Total liabilities	2,811,158,772	+	7,681,495
Total assets	3,091,674,511	+	10,991,711

A complete statement of the June figures will be published in the next issue of *The Monetary Times.*

The head office of the Sovereign Life Assurance Company, Winnipeg, has been moved from 707 Canada Building to 300-301 Boyd Building, Portage Ave.

VANCOUVER STOCK EXCHANGE

At the annual general meeting of the Vancouver Stock Exchange, held on July 13th, the following officers were elected for the ensuing year: President, C. M. Oliver; vice-president, C. G. Pennock; honorary treasurer, S. W. Miller; honorary secretary, A. E. Jukes. Committee of management—H. J. Thorne, J. T. MacGregor and A. N. Wolverton.

The retiring president, Major G. Ivor Gwynn, reviewed the affairs of the exchange during the past year, which were shown to be in a very satisfactory condition, the total value of bonds traded in having increased over 100 per cent. and the value of shares dealt in having increased over 50 per cent.

UNLICENSED AUTOMOBILE INSURANCE

In a circular issued on July 20th, G. D. Finlayson, Dominion superintendent of insurance, calls attention to the fact that insurance on automobiles, as well as on real property, cannot be solicited by unlicensed companies. The circular says:—

"It has been drawn to the attention of the department that a considerable amount of insurance is being effected on automobiles in Canada in British or foreign companies or underwriters not licensed under the Insurance Act.

"Such insurance on automobiles is subject to the same requirements as insurance on real property in unlicensed insurance companies, and is permitted only if effected outside of Canada, and without any solicitation whatever, directly or indirectly, on the part of the company or underwriters; otherwise, any person inspecting the risk or adjusting the loss in Canada is subject to the provisions of the Criminal Code.

"Every person so insuring an automobile is required to make a return thereof to the department, the forms for which can be obtained on request."

LONDON ASSURANCE BI-CENTENNIAL

English insurance companies were the pioneers in the field of modern insurance, and their leadership in the United Kingdom and in the foreign field has been well maintained during the past two hundred years. This is illustrated by the records of such old companies as the London Assurance, which has just completed two hundred years of business. The interval has witnessed many changes in methods of writing insurance and in the field of finance as a whole.

While stray cases of insurance were found previous to this date, it was not until around 1720 that it was organized as a systematic business. The London Assurance arose out of a marine insurance scheme started in 1719. In 1721 it was authorized to write fire and life as well. The authorized capital was £1,500,000, of which £896,550 was subscribed. The shares fluctuated in value during the first year from as low as £12 to as high as £160. Prospective insurers were examined by the board of directors, and if the risk was considered good, the premium for one year was accepted. In 1720 the income from marine insurance was £9,740; in 1917 it was £1,743,928. In 1721 the income from fire was £570, compared with £1,231,617 in 1918. The corresponding figures for life insurance show a rise from £170 to £247,386. Canada is one of the fields into which the London Assurance first expanded, a Dominion license having been secured in 1862. The joint managers in Canada are W. Kennedy and W. B. Colley.

The Directors of the London Joint City & Midland Bank Limited, have announced an interim dividend for the past half year at the rate of 18 per cent. per annum less income tax, payable on the 15th instant. The dividend for the corresponding period last year was at the same rate.

RAILROAD RATES ARE TOO LOW

RAILROAD transportation on the North American continent is in a deplorable condition, the trackage, power and equipment being quite unable to cope with the demands. As a consequence, large quantities of freight are held up, with an immense economic loss to the United States and Canada. The situation in the former country is admittedly due to the attitude of the Interstate Commerce Commission, which for several years back has construed "just and reasonable" rates to be those which would just keep the roads alive for the time being, without provision for the future. A new Transportation Act went into effect on March 1, however, which requires the commission to "give consideration . . . to the transportation needs of the country and the necessity . . . of enlarging such facilities in order to provide the people of the United States with adequate transportation." In the July "Index," issued by the Liberty National Bank of New York, it is stated that the demand for freight movement has increased 57 per cent. and passenger business has increased 32 per cent. since 1917, but the roads during this period have spent only $1,000,000,000 on capital account, whereas they should have spent $5,000,000,000 on the basis of the investment in former years.

The Canadian Pacific Railway is one of the most successful in the world, and it has come through these trying years with little difficulty. The Canadian National is burdened with long unprofitable sections to such an extent that the net earnings from the profitable [illegible] In spite of these two extremes, however, [illegible] lation here has not been quite so restrictive, [illegible] uation in Canada is the same. The Canadian Pacific, with its immense assets increasing in value, [illegible] pay more than a moderate dividend. [illegible] absolutely discouraged the construction [illegible] equipment and improvements of [illegible] construction of new lines [illegible]

On July 20, the Railway Labor Board [illegible] its first award following [illegible] time past. The award grants about one half of what was asked by the two million employees concerned and will mean over $500,000,000 to the companies. The Canadian roads will, no doubt, adopt whatever award is granted in the United States, as they did in the case of the McAdoo award, and the result will be a still further increase in operating expenses. The application of the Canadian roads for higher rates is now before the Board of Railway Commissioners, and will be considered by them on August 10. Public opinion has been fairly well worked up to regarding an increase in rates as necessary. E. W. Beatty, president of the C.P.R., outlined the situation at the annual meeting of that company in March, and D. B. Hanna, president of the Canadian National, has presented a good case in articles in the "Canadian National Railways Magazine" for February, and in the "Grain Growers' Guide" of July 7. About 200,000 railway employees in Canada are interested, and if the American award is adopted here it will mean an additional bill of about $75,000,000 annually.

Railroad rates have, in fact, [illegible] rising costs. The return on the [illegible] has, as a result, been too low on the one hand [illegible] railroad service [illegible] ing the latter point [illegible] the congestion of freight and the [illegible] roads to meet the [illegible]

MONEY CONDITIONS CONTINUE STRINGENT

WHATEVER contraction has taken place in the volume of commercial business transacted, the credit situation is still tight, according to latest reports from the United States. In his report on business conditions issued on June 30, the agent of the second federal reserve district, in New York, says:—

"Since the last issue of this report the Federal Reserve Bank of New York announced a further advance in discount rates, effective June 1. The rate on commercial paper was raised from 6 to 7 per cent., with corresponding increases in other rates. The purpose of the advance, it was stated in the announcement, was 'in order that bankers, their customers and the public generally may find in the discount rates of this bank a reflection of existing credit conditions.'

"Credit conditions, which are analysed in this report each month, were fully discussed in the report of April 30. The outstanding facts are that during the twelve months ended February 28, 1920, in spite of a decrease of $256,450,000 in the gold holdings of the country, bank loans, according to the best available estimate, expanded $5,200,000,000, or 24 per cent., and prices expanded 26 per cent. From May, 1919, to May, 1920, this expansion resulted in the following increases in the cost of credit: New security issues, from 6½ and 7 per cent. to 7 and 8 per cent.; commercial paper, from 5½ per cent. to 7½ per cent.; government bond basis, from 4.65 per cent. to 5.45 per cent.; government short certificates, from 4½ per cent. to 5½ per cent."

The outlaw strike of railway switchmen, which has not yet come to an end in some parts of the United States, has paralyzed the movement of goods there. "The recent partial breakdown of our transportation system," says the National City Bank of New York in its letter covering economic conditions in June, "causing in some quarters a refusal to renew credits, has resulted in realizing sales of merchandise. However, there is a tendency to exaggerate their importance in the general business situation. There is no doubt that credit here, as in all of the principal countries of the world, is inflated. But it would be a mistake to assume that we are on the eve of immediate deflation on a large scale. The great need of the time is an increase of production, and in the long run, a large output of necessary goods will be the chief instrument in reducing the relative amount of credit used in the conduct of business. Immediate and drastic steps should be taken to cure our transportation evils, but when it comes to what is called the rationing of credit, it is important that every case be considered on its individual merits, and that the greatest discrimination be exercised in order to facilitate the production of necessary goods."

The high money rates being paid by the United States government are referred to by the Guaranty Trust Co., of New York, in a report on financial and business conditions as at July 2: "If basic economic conditions are against any long fall of prices, it would seem that they are also against any such fall in the rates for money as have been predicted recently in some quarters. It has been asserted that after the July 1 payments money would be cheap and would continue so. Why the United States government should have entered the market within this last month for advances at rates not reached since civil war days, if there were anything to indicate a recession so soon, it is hard to understand. There is much discussion of the possibility of a bank rate rise in London, thus indicating the continuance of money shortage at that centre of the world's markets. Here at home borrowings continue on a high level in spite of all efforts at curtailment of credits, indicating a very strong demand for funds that would become insistent immediately upon any easing of the market. The railroads and equipment companies are merely instances of the many enterprises that must be financed. All in all, the prediction of easy money does not seem well founded."

Developments during the present month indicate no loosening of credit on this continent.

NEW LIFE INSURANCE RECORDS

TEN of the largest life insurance companies doing 75 per cent. of the business written in Canada, placed $188,296,940 of new business on their books during the first five months of 1920, as compared with $145,626,167 during the first five months of last year. This is an increase of about 30 per cent., and indicates that the influences which were at work to swell the volume of business in 1919 are still effective. Of these ten companies, seven are Canadian; these wrote $121,911,738 of new business, compared with $90,372,659 up to the end of May, 1919. The remaining three, which are American companies, wrote $66,385,202, as against $55,253,508 last year.

These ten companies had $1,675,604,920 of business in force in Canada at the end of May. The enormous expansion in life insurance during the past few years is indicated by the fact that on May 31, 1913, seven years ago, their total was $740,057,154. The increase during these seven years has, therefore, been well over 100 per cent.

Toronto city council's difficulty in coming to a decision as to how the street railway system is to be managed when it is acquired next year is ample proof that operation by a city council at least would not be satisfactory.

"The whole empire is proud of Quebec," says "United Empire," in commenting upon Sir Lomer Gouin's recent visit to London. Quebec has shown the other provinces that, though its industrial progress has not been so spectacular, what advances have been made have been sound, and Quebec is least of all subject to radical agitation.

* * * * *

Chester Martin, professor of history in the University of Manitoba, has just written an account of the controversy between the Dominion and the provinces regarding the control of natural resources. The Canadian field affords ample material for historical research, and valuable assistance can at the same time be rendered in connection with the problems of the day.

* * * * *

Prices will come down, but wages must be maintained at their present level, says Tom Moore, president of the Trades and Labour Congress of Canada. When prices were rising, efforts were made to keep wages from doing likewise, but without success. The two movements come together, because they both are an illustration of changes in the purchasing power of the dollar.

* * * * *

Investment Items, issued by the Royal Securities Corporation, says that "the Canadian people wish no further conventions of the American Federation of Labor—held in Canada—nor will they tolerate the further extension of its activities in the Dominion." But the international unions of which the federation is largely comprised have been the most responsible and conservative of labor organizations on this continent, taking the lead in the fight against the "one big union" in Canada.

Trade with the Orient

With correspondents of the highest standing in China, Japan, India and other countries of the Orient, and branches in all the principal ports on the Pacific coast of North America, namely:

Prince Rupert	Portland, Ore.
Victoria	Seattle
Vancouver	San Francisco

this Bank is excellently equipped to serve the interests of Canada's growing trade with the Orient.

Collections effected in all parts of Canada promptly and cheaply.

Correspondence solicited

J. P. BELL - General Manager

PERSONAL NOTES

Robert Gray, president of Gray-Dort Motors, Ltd., has been appointed a director of the Standard Bank of Canada.

Geo. Hurst, a member of the Toronto assessment commissioner's staff, will be in charge of the new branch of that department, which will look after the collection of taxes on dividends received on mercantile and manufacturing shares.

George Thomson, one of British Columbia's pioneer legislators, died in Vancouver last week at the age of 65 years. The late Mr. Thomson sat in provincial parliament for Nanaimo from 1896 to 1900, and was afterward government agent at that city. He retired several years ago.

Frank S. Leslie, late of the Bank of Nova Scotia, has joined the staff of Bryant, Isard & Co., Toronto stock brokers. Mr. Leslie has made a special study of the pulp and paper industry, and will give chief attention to that phase of the work in his new position.

Major David Drummond has succeeded Andrew H. Allan as European freight manager of the Canadian Pacific Ocean Services. He was formerly with the Canadian embarkation staff in England, and latterly became secretary to Sir Thomas Fisher, manager of the Canadian Pacific Ocean Services in Europe.

Hon. L. A. Taschereau, who succeeds Sir Lomer Gouin as premier and attorney-general of the province of Quebec, was previously minister of public works and labor for the province. Born in Quebec City in 1867, he was educated at the Quebec Seminary and Laval University. From the latter institute he received the degrees LL.L. in 1889, and LL.D. in 1908. He was called to the Quebec bar in 1889, and began professional career as partner with Sir Charles Fitzpatrick. He was elected to the Quebec legislature for Montmorency in 1900. In 1904 he was re-elected and in 1907 accepted the portfolio of minister of public works and labor.

W. W. Perkins, who has been for over nine years with the Guardian Assurance Co., of London, Eng., has joined the staff of the Union Insurance Society of Canton, Ltd., and the British Traders' Insurance Co., Ltd., as Ontario inspector. Mr. Perkins has had a wide connection in the field, and received his early training in the Canadian Fire Underwriters' Association.

Lieut. A. M. Wiseman, M.C., has joined the staff of Major Edwards, Senior British Trade Commissioner in Canada and Newfoundland, and taken up his duties as chief assistant to Major Edwards at Montreal. Lieut. Wiseman, after demobilization, entered the service of the Board of Trade, London, England, and his meritorious work there has led to his being sent to Canada as assistant to the British Trade Commissioner.

Georgs H. Ross, the newly appointed treasurer of Toronto, Ont., took up his duties on July 19th. In regard to his new position he made the following statement: "One of the greatest assets which I hope to take with me in my new task is the experience I gained as inspector of the 100 strong branches of the Bank of Ottawa between Montreal and Vancouver. In that capacity I became familiar with the manner in which all the important Canadian municipalities conduct their financial business and I also had the opportunity of making the acquaintance of agents of the large banks in Chicago, New York and other places. It was a wonderful opportunity to get information that will be valuable in my new task." When asked what financial policy he intended to pursue and whether he intended to follow that instituted under Mr. Bradshaw, the former city treasurer, he stated that the point was not at all debatable. "The success of that policy is shown in the reports for the past three or four years," he said.

TAXATION OF LEASED FEDERAL PROPERTY

An action in which an important legal point affecting the right of a city to tax leased federal property is to come up before the Privy Council, according to a cable from London. The Privy Council has given permission to the city of Montreal to appeal the action, which was brought originally against the attorney-general in Montreal, decided in favor of the city, and thrown out by the Supreme Court at Ottawa, which held it had no jurisdiction in the matter. The city authorities do no contend that they have the right to tax federal property in general, but they submit that when this property is leased to private individuals, and should be taxed, which the city of Montreal is authorized to do by the city charter.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first two weeks in July:—

	1920.	1919.	Inc. or dec.
Canadian Pacific Railway			
July 7	$3,773,000	$3,120,000	+ $ 653,000
July 14	3,854,000	3,325,000	+ 529,000
Canadian National Railways			
July 7	$1,932,961	$1,713,404	+ $ 219,557
July 14	2,000,993	1,659,083	+ 341,910
Grand Trunk Railway			
July 7	....	....	......
July 14	$2,138,945	$1,688,850	+ $ 450,095

AMERICAN INDUSTRY IN CANADA

Tariff and Exchange are Important Factors Bringing Capital Here—"Made in Canada" Campaign also an Influence in Buying

American manufacturers with a large Canadian business must establish plants in Canada if they hope to hold this trade intact, it is claimed by A. G. Sclater, manager of the statistical department of the Union Bank of Canada, in the July issue of the "Union Bank Monthly." After noting that Canada for many years before the war and to-day ranks second only to Great Britain among the customers of the United States and that changes in trade during the war has placed the Canadian dollar at an appreciable discount, Mr. Sclater continues as follows:

"Even under the conditions which existed before the war, the importer of American made merchandise in Canada was forced to pay a heavy customs duty, which averaged about 35 per cent. ad valorem. During the war this duty was increased by the further imposition of a 7½ per cent. war tariff, a tax which has been recently removed. The Canadian importer of American made merchandise was thus compelled to pay during the war on an average at least 42½ per cent. of the wholesale value of the goods he bought in the United States as a Government tax. When on top of this already heavy tax was imposed the additional one created by conditions of the exchange market the situation became serious for the American manufacturer. While it had, in most cases, been possible to do business with Canada in the face of a 35 per cent. tariff, when it became necessary to make provision for what actually was equivalent to a tax of about 52 per cent. of the wholesale value of his produce in the United States, a solution had to be found on pain of losing Canadian trade almost entirely.

Many Branches Already Here

"During 1919 over 200 American manufacturers solved this problem and a number of less pressing ones by either erecting or leasing plants in Canada. They thus not only solved the problem outlined above but they, at one stroke, took advantage of a series of opportunities which a number of American manufacturers already had seen and profited by. Long before the war rendered commercial relations between Canada and the United States more difficult, several hundred—about 350 to be exact—American manufacturers had taken advantage of the opportunities they believed Canada to offer and had built Canadian plants and established purely Canadian businesses.

"These manufacturers had established themselves in Canada, first, to escape the Canadian tariff; and, second, to take advantage of the preferential tariff treatment given by other parts of the British Empire to goods originating within the boundaries of the British Commonwealth. Without waiting for events to force upon their attention an opportunity of a rare kind, they foresaw the future, and have profited greatly as a result of their foresight.

Desire to Buy in Canada

"While these manufacturers who have been in Canada for many years are now firmly established and in enjoyment of a large volume of trade, not only in Canada but in all parts of the British Empire, the opportunity which they foresaw so many years ago still exists. Times have changed, however, and with them the nature of the opportunity. To-day the American manufacturer who has any large volume of business in Canada must establish himself in Canada to hold that business. The instinct of financial self-preservation is forcing Canada to do all in her power to curtail her purchases in the United States and to make within her own borders those things which her people need. Only in this way can she hope to rehabilitate her credit in the United States and to reduce the volume of her war debt. Canadians plainly see the logic of the situation, and the 'Made in Canada' movement is daily gathering strength in the Dominion. In this task of making herself self-sustaining Canada is being helped by the course of events. Canada is now an exporting nation of some importance and this development is making it increasingly possible for Canadian manufacturers to produce commodities in quantities and bring down their initial costs. This development of Canada's export trade has stimulated the imagination of the Canadian manumanufacturer; he sees more clearly than he ever did before his opportunities in the markets of the world, and he is fitted with a renewed ambition to make the most of these opportunities. The inevitable outcome of this development will, of course, be greater ability on the part of the Canadian manufacturer to hold his own domestic markets against outside competition. This will mean less buying in the United States as time goes on."

CANADA FAVORED IN COAL ALLOTMENT

Plans for speeding up the movement of coal to central Canada were discussed on July 19th in Washington by Frank B. Carvell and S. J. McLean, of the Canadian Railway Board, at conferences with the United States Interstate Commerce Commission and Daniel Willard, chairman of the Advisory Commission of the Association of Railway Executives. Before returning to Ottawa the Canadian commisisoners announced they would meet later with Canadian railroad officials to consider priority of movement for coal and increasing car mileage. Both commissioners said they were confident that the coal problem would be solved, but added that it primarily rested with the United States railroads and coal operators in getting improved movement of coal.

Following these discussions, new emergency orders were issued on Tuesday by the United States Interstate Commerce Commission, giving priority in the movement of the winter stock of soft coal to the northwestern states and Canada. More than a score of railroads serving mines in western Pennsylvania, Ohio, West Virginia, Virginia, Kentucky and Tennessee were directed by the commission not only to give preference in the movement of coal for the territory at the head of the Great Lakes, but also to give preference in the supply of cars for such shipments.

COMMISSION TO INVESTIGATE RADIALS

The Ontario government has announced the personnel of the commission to enquire into the proposal to purchase the Dominion government radial lines in the province. It is composed of Justice Sutherland, chairman; W. A. Amos, C. H. Mitchell, A. F. MacCallum and F. Bancroft. As first announced, the commission included T. A. Russell, president of the Russell Motor Car Co., in place of C. H. Mitchell, but Mr. Russell withdrew as a result of criticisms aimed at his connection with the motor car industry. Justice Sutherland was speaker of the House of Commons from 1905 to 1909, and was liberal member for North Essex in the House of Commons. He practised law in Windsor until his elevation to the bench. W. A. Amos, vice-president of the United Farmers of Ontario, was formerly a Presbyterian minister. Illness caused him to retire from the pulpit, and he is now a farmer in Perth county. At the last provincial election he was U.F.O. candidate in North Perth. Brigadier-General C. H. Mitchell is dean of the School of Practical Science of Toronto University, and served with distinction in the Canadian army. A. F. MacCallum, at present commissioner of works in Ottawa, was formerly assistant engineer for York county, and later city engineer in the city of Hamilton. He has been on several arbitration boards. Fred Bancroft, although a member of the Pattern Makers' Union, has been in newspaper work for years and is a "Star" reporter. He has been a vice-president of the Dominion Trades and Labor Congress, and has represented unions on numerous boards of arbitration and conciliation.

BANK BRANCH NOTES

Thirteen New Branches Announced This Week

The following is a list of branches of Canadian banks which have been opened recently:—

Point St. Charles, Que.	Dominion Bank of Canada
Montreal, Que.	Imperial Bank of Canada
Notre Dame de Charny, Que.	Merchants Bank of Canada
Wallaceburg, Ont.	Canadian Bank of Commerce
Sturgeons Creek, Man.	Provinciale Bank
Winnipeg, Man.	Royal Bank of Canada
Lanark, Ont.	Royal Bank of Canada
Brandon, Man.	Royal Bank of Canada
St. James, Man.	Royal Bank of Canada
Calgary, Alta. (Stockyards) .	Royal Bank of Canada
Wilkie, Sask.	Royal Bank of Canada
Ameliasburg, Ont.	Royal Bank of Canada
Chemainus, B.C. (open two days a week)	Canadian Bank of Commerce

Imperial Bank Staff Changes

The Imperial Bank announces the following appointments: D. Robb, accountant at Prince Albert, Sask. branch, has been appointed accountant-in-charge at Greencourt, Alta., succeeding J. A. McDonald. J. A. McDonald has now been appointed manager at Krydor, Sask., in succession to C. J. Dainard. C. J. Dainard, who has been acting manager of Krydor branch, has been appointed accountant at Prince Albert. F. L. Graban, at present manager at Yorkton, Sask., has been appointed to Portage la Prairie branch. W. H. Thomson, formerly manager at Portage la Prairie, has been appointed manager at Regina. D. Sutherland, formerly accountant at Galt, Ont., branch, has been appointed manager at Timmins, Ont. J. A. Wetmore, formerly manager at Regina, has been appointed manager of the Fairview branch at Vancouver. H. J. Hawkins, formerly teller at Niagara Falls main branch, has been appointed accountant at Walkerville, Ont.

The James St. branch of the Imperial Bank at Sault Ste. Marie, has been made an independent branch with C. A. Kehoe, formerly accountant at the main office, appointed to the position of manager.

Other Appointments

R. H. Anderson, manager of the St. John, N.B., branch of the Bank of Nova Scotia, has been appointed supervisor of the maritime and Newfoundland branches, with headquarters at St. John, N.B.

J. H. Stevenson, formerly manager at New Glasgow, has been appointed manager of the St. John branch of the Bank of Nova Scotia, in succession to R. H. Anderson. L. D. Payzant, formerly assistant manager at Halifax, has been appointed manager at New Glasgow.

W. Lawlor, first teller in the Royal Bank at Fredericton, N.B., has been promoted to the position of manager of the branch at Harvey Station, N.B.

H. C. McDonald, manager of the Imperial Bank at Timmins, Ont., has resigned.

J. S. Gibb, manager of the Imperial Bank, Fairview branch, Vancouver, is resigning after thirty years' service.

J. K. Ball, for the past eight years manager of the Bank of Toronto, at Vancouver, and in charge of the bank's activities in British Columbia, is giving up his connection with the bank. He will be succeeded by Mr. Lamprey, who has been manager of the branch at Kitchener, Ont.

M. D. Ross, late manager of the Royal Bank of Canada at Peachland, B.C., has been appointed manager of the new branch of the Royal Bank established at Alice Arm, B.C.

A. C. Steven, assistant manager of the Vancouver main office of the Canadian Bank of Commerce, has been appointed manager of the Seattle branch.

W. J. Swaisland, assistant manager of the Union Bank of Canada in Vancouver, has been promoted to undertake special duty for the bank in the east. He is succeeded by H. C. Sams, formerly inspector at Regina.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13⅝ pm	13¾ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.3450	$4.3550	....
Cable transfers	4.3550	4.3650	....

New York quotations of exchange on European countries, furnished by the National City Co., Ltd., Toronto, as at July 22, 1920, are as follows (all in cents per unit of foreign currency): Cable, London, 382, cheque, 381¼; cable, Paris, 7.92, cheque, 7.91; cable, Italy, 5.62, cheque, 5.61; cheque, Belgium, 8.42; cheque, Swiss, 17.47; cheque, Spain, 15.83; cheque, Holland, 34.70; cheque, Denmark, 16.40.

METHODS OF QUOTING EXCHANGE

Some banks in New York now quote all European exchanges in cents per unit of the foreign currency. The customary method of quoting rates for francs, lire, etc., has been in foreign units per dollar. The new method was discussed at a meeting of the Foreign Exchange Club recently, and an informal vote of the members of the club showed a majority in favor of the change. Those who advocate quoting foreign rates in terms of cents per unit do so on the ground that already the majority of foreign exchange rates are thus quoted and that it would simplify dealings considerably to have all rates on a uniform basis. They say that the great increase in American foreign trade has brought many new interests into the foreign exchange market and that commercial houses and individuals who are now concerned with foreign trade for the first time find it difficult to understand the old system of quoting the Latin exchange.

BANK CLEARINGS

The following are the Bank Clearings for the week ended July 21 compared with the corresponding week last year:—

	Week ended July 21, '20.	Week ended July 24, '19.		Changes.
Montreal	$147,777,220	$116,954,513	+	$30,822,707
Toronto	106,544,711	71,310,334	+	35,234,377
Winnipeg	40,475,348	33,156,267	+	7,319,081
Ottawa	8,775,325	7,176,981	+	1,598,344
Hamilton	7,975,809	5,663,351	+	2,312,458
Quebec	8,330,038	5,554,510	+	2,775,528
Halifax	5,172,092	4,361,364	+	810,728
London	3,621,118	2,933,915	+	687,203
Regina	4,270,899	3,444,798	+	826,101
St. John	3,539,327	3,389,480	+	149,847
Saskatoon	2,433,309	2,005,986	+	427,323
Moose Jaw	1,555,855	1,518,389	+	37,466
Brantford	1,502,063	1,079,788	+	422,275
Fort William ..	1,027,084	762,559	+	264,525
Medicine Hat ...	488,883	410,011	+	78,872
Peterboro	1,005,170	688,214	+	316,956
Sherbrooke	1,549,583	709,217	+	840,366
Kitchener .. .	1,157,577	790,657	+	366,920
Windsor	5,146,361	1,997,074	+	3,149,287
Prince Albert .	444,961	343,354	+	101,607
Totals	$352,792,733	$264,250,762	+	$88,541,971

On and after August 2, 1920, the Toronto offices of the Union Trust Co., Ltd., which are now in the Temple Bldg., will be moved to the Union Trust Bldg., at the northeast corner of Richmond and Victoria Streets.

Union of Saskatchewan Municipalities Convention

Finances of Cities and Towns Discussed in Moose Jaw—Local Government Board is Discouraging Loans Except for Necessary Purposes—Federal Housing Scheme Does Not Appeal to Municipalities—Income Tax Would Reach Professional Men

(Special to *The Monetary Times.*)

Moose Jaw, Sask., July 16, 1920.

TAXATION and housing problems were the chief centre of attraction at the annual convention of the Union of Saskatchewan Municipalities (urban) in Moose Jaw, July 14 and 15, which was attended by about seventy delegates from the cities, towns and villages of the province. The necessity for an equalization of the assessment of lands as between the urban and rural municipalities was apparent during the discussion. The Association of Rural Municipalities at its annual convention in March decided to ask the Saskatchewan government for the appointment of an equalization board and the urban convention was in line with this proposal.

Special Board Not Wanted

The work of the Manitoba Tax Commission was outlined by its chairman, L. W. Donoly, of Winnipeg, and the convention expressed approval of the system, but there was a general feeling that a board should be appointed by the government, responsible to the government, or the work should be done within the Department of Municipal Affairs, rather than add to the number of commissions already in existence. The work of equalization between the individual rural municipalities is being conducted by the department, with the assistance of an advisory board of members of the association, and it was thought that an extension of this plan would suit the purposes of the convention.

Objection was urged by a representative of the rural association to the control of rural assessment and the absence of control over urban assessment for provincial taxation, and he suggested that either both should be controlled or the rural assessment de-controlled.

More Sources of Revenue

New sources of revenue for the urban centres were discussed at some length, the proposals including the use of the income tax as one of the principal revenue producers. While this did not meet with the popular view, it was generally felt that some steps should be taken to tax the incomes of professional men who occupy small office space and who therefore virtually escape taxation under the business assessment based on floor space. Mayor Young, of Saskatoon, thought it should be left optional with the municipality to assess on the basis of income or business. The discussion focussed in a resolution authorizing the secretary to appoint a committee, one from each city, to devise ways and means of getting at a portion of the professionl man's income.

The convention was also of the opinion that the cities and towns should have the right of collecting some of the moneys expended on amusements and a resolution asking the government to confer power upon them to levy an amusement tax was passed.

No Decision Regarding Housing

While the convention sought to find a solution of the housing problem, one which is very acute in the larger cities and towns, the feeling was predominant that under present economic conditions the federal housing scheme was impracticable, and despite considerable discussion the question was eventually allowed to drop.

Commissioner L. A. Thornton, of Regina, declared that the municipalities were curtailed in taking advantage of the scheme by the fact that the government insisted that loans must be made a charge against the borrowing power of the municipality and with the present high cost of materials and labor, coupled with the likelihood of depreciation of the assets within a few years, he would not recommend the adoption of the scheme. G. F. Blair, city solicitor for Regina, referring to the same question in his report on the work of the Local Government Board, expressed the opinion that even if housing bonds were placed in the excepted list, the bond buyers would regard them in the light of general borrowings, "and," he said, "rightly so."

It was generally admitted that a loss would be incurred by any municipality taking advantage of the appropriation and the question was where the loss should be placed. Andrew Leslie, city clerk of Saskatoon, suggested it shou be divided equally between the federal and provincial governments and the borrowing municipality. Mayor Peaker, of Yorkton, thought that provincial government should assist the municipalities to finance a housing project on a co-operative basis, similar to some of the commercial agricultural schemes such as the Saskatchewan Co-operative Elevator Co., any loss that might be incurred to be provided out of general provincial revenues. In the event of the government declining to consider this proposal, he was of the opinion the municipality should borrow from the government and stand the loss. A resolution incorporating this proposal, however, was voted down.

Work of Local Government Board

An interesting feature of the convention was the presentation by Mr. Blair of his annual report as representative of the association on the advisory committee to the Local Government Board, in the course of which he suggested that the powers and scope of the board be extended to include the management and operation of all public utilities. "In these days," said Mr. Blair, "when there is an increasing danger of municipal representatives administering utilities and quasi-public works in the interests of a selfish and interested sectionalism, rather than the general good, the need of an independent board to deal with these matters is very apparent."

Mr. Blair announced that the board had adopted the policy of refusing applications for permission to float debentures for the construction of curling and skating rinks, secondary schools, electric light plants and community buildings, especially in small towns and villages, on the ground that their borrowing powers were practically all required for improvements necessary to the health or safety of the community. In this policy the advisory committee concurred.

With reference to the borrowings of rural municipalities, the speaker said, the board has decided to limit the borrowings to $15,000, and will not approve expenditures for roads except where the plans conform to the general provincial highway scheme. In all classes of municipalities the board is endeavoring to encourage the policy of mapping out expenditures for a period of five or ten years ahead with a view to distributing the indebtedness with some equality and also to encourage systematic planning.

Would Shift Expenses to Province

In addition to seeking for new sources of revenue the urban municipalities are endeavoring to shake off some of the tributes levied against them by the Saskatchewan government towards the maintenance of inmates of the various institutions of detention and objects of charity. These include mothers' pensions, the care of the destitute sick and

Manager for Canada - ALEX. BISSETT

other indigent dependents. The convention felt that the care of these people should be properly chargeable to the public purse of the province and passed resolutions accordingly.

City Commissioner L. A. Thornton, of Regina, was elected president for the ensuing year and the retiring president, Mayor Peaker, of Yorkton, was made honorary president. The executive committee is as follows:—

Cities—Mayor Grassick, Regina; City Clerk Leslie, Saskatoon; Alderman Jopp, Swift Current; Mr. Dixon, North Battleford· Commissioner Mackie, Moose Jaw; W. E. Webb, Prince Albert; Mr. West, Weyburn.

Towns—O. J. Godfrey, Indian Head; F. J. Pilkington, Yorkton; M. T. McDonald, Davidson; W. Hartwell, Rosetown; A. Moore, Outlook.

Villages—W. Stokes, North Regina; F. J. Batute, Perdue; A. J. Kjelbson, Halbrite.

The next convention city will be Prince Albert. Invitations having been extended by Regina, Saskatchewan Beach and other places. The representative of the union on the Local Government Board is again G. F. Blair, of Regina.

ONTARIO INSTITUTE OF CHARTERED ACCOUNTANTS

The annual meeting of the Institute of Chartered Accountants of Ontario was held in Toronto on July 17. The work of the year was reviewed by the President, Robert J. Dilworth of Toronto, whose address was of much interest and showed continued progress.

The election of officers for the year resulted as follows: President, R. J. Dilworth; 1st vice-president, Rutherford Williamson; 2nd vice-President, Arnold Morphy; secretary-treasurer, T. Watson Sime; council, R. Easton Burns, Kington; Arthur A. Crawley, Ottawa; Francis G. Jewell, London; J. Wyndham Eddis, Fred. Page Higgins, Arnold Morphy, T. Watson Sime, G. T. Clarkson, R. J. Dilworth, George Edwards, Edmond Gunn, G. M. Munholland, Arthur C. Neff, Bryan Pontifex, R. Williamson, all of Toronto; representatives on council of the Dominion Association of Chartered Accountants, Arthur C. Neff, Bryan Pontifex, Osler Wade; auditors, W. K. Colin Campbell, Kris A. Mapp; registrar, William J. Valleau, Toronto.

BANQUE PROVINCIALE'S FIGURES UP

Preliminary figures of the annual financial statement of the Provincial Bank of Canada for the fiscal year ended June 30 last, shows the bank's position in a favorable light, the year being a record one. The figures for the twelve months just ended compare with the preceding period, which comprised 18 months, with the result that comparison of the figures is difficult. Net profits in the period amounted to $333,882, as against $434,594 in the previous eighteen months, a proportionate increase of $44,152 on a twelve months' basis.

Total obligations to the public, deposits, etc., as on June 30, stand at $35,788,000, against the sum of $28,594,000 on June 30, 1919, showing an increase of over $7,200,000. Total assets of the bank stand at $39,077,000 against $31,093,000 the year previous, showing an increase of about $8,000,000.

The sum of $100,000 has been transferred to rest account, which now stands at $1,100,000, and a further sum of $45,000 has been added to the pension fund, which is to date $100,000. The sum of $25,000 has been written off bank premises.

On the 2nd of July inst., a new issue of stock of $1,000,000 at $120 was over-subscribed and paid for, which brings the total paid-up capital of the bank to $3,000,000, with a rest account of $1,300,000. The cash assets stand at $9,264,000, and other quick assets, Dominion Government and municipal securities, call loans, etc., amount to $17,225,000, making a total of $26,489,000, being a percentage of 74 per cent. of the total obligations to the public, $35,788,000.

CANADIAN FISHERIES PRODUCED SIXTY MILLIONS

Revenue Last Year was Twenty-five Millions Above that for 1914—British Columbia Prospects for this Year Good

CANADIAN fisheries for the fiscal year which closed with March last produced a total commercial revenue in excess of sixty million dollars, or an increase of twenty-five millions, as compared with the fiscal year that closed with March of 1914. The export trade in fish for the last fiscal year was worth $40,687,172, an increase of over 100 per cent. in value, as compared with 1914. The increase over the preceding year was in excess of four million dollars.

The export trade with the United Kingdom increased from $6,726,389 in 1914 to $9,815,979 in the last year, while the trade with the United States jumped from $5,644,355 in 1914 to $17,180,250 last year. The great increase in fish sales to the United States has been due to the fact that the value of canned salmon sold to the republic in 1914 was $115,360, while last year it was $12,067,319. During a span of six years there has been a jump of nearly 300 per cent. in the value of dry-salted cod, ling, hake and pollock shipped into the United States.

Business Going to United States

Trade authorities look with some disfavor upon the increased fish trade with the United States, because a large quantity of salmon and other fish imported from Canada is exported again. Statistics indicate that the premium on American money is attracting Canadian trade to the exclusion of other markets. "While United States firms have agents abroad building up future trade, Canadians," remarks an official statement, "are content to sell to the United States. They seem not yet to have appreciated the fact that the premium on American funds gives Canadian exporters in foreign markets an advantage over their American competitors to the extent of the premium. The warning given recently by a Canadian bank that Canadians are letting slip by the opportunity to build up Canadian trade would seem to be applying just now to the fishing industry."

Good Salmon Yield Expected

For the present year reports are fairly optimistic. The best sockeye season in several years for Rivers and Smith Inlets, B.C., canneries is predicted by travellers returning from northern British Columbia and by officials of the Dominion Fisheries Department. Conditions on the Skeena are reported only fair, but Bella Coola has had a very good run of spring salmon, although bad weather hurt the catch in the Bella Coola district as well as on the Skeena. The run of sockeyes at Alert Bay has been good so far this summer, and there has been a good run of springs, red and white, at Knight Inlet. Quathiaski Cove and Pender Harbor districts have not shown well to date.

On the west coast of Vancouver Island the splendid run of springs that came early in the season appears to have gone south again after bad weather had interrupted the fishing when it was at its best. The run appears to be over. The traps on the south-west coast of the island did fairly well in both sockeyes and springs. On the Fraser the run of springs up to now has been above the average, but what the sockeyes will amount to is a matter of conjecture. This is the third year of the four-year cycle of the sockeyes, next year being technically the "big year," although not much is expected, owing to the smallness of the run in 1917. The third year usually brings with it a considerable catch, and it would not surprise canners if this year proves to be better than next year.

120 British manufacturers, accompanied by representatives of the London Chamber of Commerce, will meet delegates from western Canada in Toronto next spring with a view to filling orders for the west. This meeting has been arranged by Col. Macdonnell, who has just returned from Europe.

My Will!

You did not forget to insure your house or your motor last year, but did you make your Will and thus provide for a proper administration of your affairs in case of your death?

See us at once and make good the omission of 1919. Make your Will now.

Adverse Trade Balance Over Hundred Million

Figures For Three Months Ended June Show Enormous Excess of Imports Over Exports—Unfavourable Balance of $28,000,000 in June—Situation Reversed Since Last Year—Imports Have Increased Much More Rapidly Than Exports

AN unfavourable balance of $28,000,000 is shown in the June statement of trade just issued by the Department of Customs. Exports of domestic products show an increase of $29,195,257 over May, as compared with an increase in the preceding month of $24,000,000. As compared with a year ago the June figure showed an increase of more than $18,000,000, while in May there was a reduction of $15,000,000 in the same comparison.

For the three months, however, exports show a reduction as compared with last year, although the decrease was decidedly less than that at the end of the previous month. Imports continue to increase on a large scale, the figure for the three months being $346,303,678, as against $200,615,514 in the same period last year. The decrease in the value of exports was largely due to the fact that agricultural and food products sent abroad were worth only $66,622,080, as compared with $96,450,495 last year. There was also a falling away of several millions in the value of animal and animal products exports. On the other hand wood products and paper shipments abroad advanced from $34,000,000 to $66,000,000, an increase of nearly 100 per cent.

The recapitulation shows that for the three months the unfavourable balance is more than $100,000,000, as compared with $76,000,000 for the period at the end of the previous month, and a favourable figure of $53,000,000 for the same period a year ago. This position is created by the rapid advance in imports, rather than the decline in exports, which is not large.

BUILDING PERMITS DECREASE IN MAY

Total For Month Shows a Falling Away of $4,500,000 as Compared With Previous Period—There is An Increase of $3,500,000 For the Year, However

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 56 cities showed a decrease during May as compared with the preceding month, the total value of building permits falling from $16,385,153 in April to $12,160,379 in May, a decrease of $4,224,774, or 25.8 per cent. Nova Scotia, Ontario, Alberta and British Columbia reported increases in this comparison, that of $129,592 in Ontario being the largest. On the other hand, Prince Edward Island, New Brunswick, Quebec, Manitoba and Saskatchewan reported decreases, those in Manitoba and Quebec of $2,359,581 and $2,268,292 respectively, being the most noteworthy.

The figures for May, with comparisons, as compiled by the Department of Labor, are as follows:—

DEPARTMENT OF LABOUR FIGURES CITY	April 1920	May 1920	May 1919

DOMINION FINANCES AT THE END OF JUNE

Important Changes Registered in Monthly Statement—Net Debt Increased by Deduction of Non-Active Assets

IMPORTANT changes are shown in the June statement of the Dominion Finance Department. Net debt increased nearly $25,000,000, as compared with $50,000,000 in the same month last year. A feature of the statement is that for the first time a deduction of non-active assets is made, such as loans to Canadian Northern Railway, Grand Trunk Railway and Grand Trunk Pacific, and to this extent, of course, the net debt is increased.

The revenue account also showed some changes. It has previously been the custom to lump practically all revenue from direct taxation under the miscellaneous heading, and not to give separately the revenue from business profits tax and income tax, except in the budget speech following the close of the year. Now the revenue from these taxes is to be shown month by month. Ordinary expenditure last month exceeded revenue by nearly $8,000,000, while in June, 1919, there was a surplus on revenue account of nearly $18,000,000. For the first three months of this fiscal year the surplus is nearly $18,000,000, as compared with a surplus of nearly $27,000,000 last year.

A summary of government accounts as at June 30 last, is as follows:—

PUBLIC DEBT			1919	1920
LIABILITIES			$ cts.	$ cts

WHEAT SITUATION PUZZLES GRAIN TRADE

Uncertainty as to Whether Enabling Act, Passed at Last Session of Parliament, Will be Put in Force—Government Control a Costly Method—Experience of United States with Open Market

By C. Birkett

Secretary, Fort William and Port Arthur Grain Exchange

THE enabling bill, passed by the House of Commons to provide for the appointment of the Canadian Wheat Board for another year, if found advisable, is very similar in character to the legislation under which the board now operates. The most important change is a clause inserted, safeguarding the trade in case the markets are opened and then closed by order of the government. This clause reads: "Should a board be appointed under this Act after trading in the wheat crop of 1920 has commenced, the board shall have power to adjust and make payments from the funds of the board in respect to actual losses incurred by reason of the bringing into effect of the Act. Provided, that before payments are made such adjustments and payments are approved of by the governor-in-council."

Loss Through Closing Exchanges

Last year the Canadian grain exchanges were opened for a few days and then closed on the strength of a wire received from the minister of trade and commerce. The markets were closed arbitrarily, and no reason was given at that time for the action taken. The result of this action was that many firms who had purchased legitimate futures were left high and dry. It has taken the representatives of the Winnipeg Grain Exchange eight or nine months to secure a settlement of these claims. The government, in the dying days of the session, put through the House a vote for some twenty odd thousand dollars to pay the said loss to these firms, a loss caused entirely by the action of the government.

The government did not allow these firms one cent of interest nor one cent of profit, notwithstanding the fact that it was entirely the fault of the government that the situation arose. It was the feeling of some members of the grain trade that the Canadian Wheat Board should pay these legitimate claims out of their funds, but the board apparently did not consider that they had any jurisdiction nor the power to do such a thing.

To obviate a repetition this year the government inserted the above clause, which will act as a safeguard not only to the trade, but also to banks.

Preference to Export of Flour

Another clause that was inserted in the bill this year which was not in the old bill is as follows: "And also to the reasonable necessities of the Canadian consumer, provided that as between wheat and flour preference should be given to the exportation of flour, except in cases where the public interest would be adversely affected thereby."

This clause might or might not be of material benefit to the miller. There are so many provisos contained therein that it is questionable whether the millers will be able to secure preference for the export markets: At the present time there is a discrimination in rates against flour, and the millers claim that it has been difficult, and it will be difficult, for them to compete in the European markets. They ask that, if the board is appointed, that the board will endeavor, first of all, to sell flour in preference to wheat to keep the mills running and to provide offal for domestic consumption.

The grain trade of Canada has been assured that it is not the intention of the government to bring the bill into effect only under the gravest emergency. If the European countries combine buying and have one purchasing agent for wheat; or if the United States bring into effect the Lever Act as it affects the exchanges; or if the financial stability of any country is endangered, any one of these three might be sufficient cause to bring into effect the bill and give Canthe wheat. It is quite obvious, therefore, that government paternalism.

Government Sale More Expensive

Is it cheaper to handle Canadian wheat by a government board or through the usual channels of commerce? It is a well-known fact that under control country elevators, track-buyers, commission merchants, brokers, public terminal elevators, private elevators and eastern public elevators have all received their usual scale of charges. The banks also have received their interest and the transportation companies have received their rates, and lake tonnage is in the same position as under open market conditions.

None of these charges have been eliminated, because it was the policy of the wheat board to utilize as far as possible existing organizations to handle the crop. But, in addition to the above charges, there will have to be deducted from the price of wheat the organization and administration expenses of the board itself, which expenses are an added charge, and must be deducted from the funds received for the wheat. It is quite obvious, therefore, that government control is not more economical, but rather the other way, more expensive.

Open Market in United States

The United States are to-day operating under open market conditions. The price of their highest grade mill wheat at the present time is $2.75 per bushel, which indicates that the price of wheat has a tendency to drop. Some experts claim that wheat might reach $5 per bushel; other experts claim that the price of wheat will drop during the next five or six months, and after the new year will materially increase.

The Baltimore exchange opened on June 25th, and the first sales were made at $2.83 per bushel for September delivery. Taking everything into consideration, it seems reasonably certain that, sooner or later, the price of new wheat will start to decline. The duration of the break will depend to a great extent on the size of the harvest and the movement. But the Canadian Wheat Board, if functioning, are obliged to secure the world's highest price for the wheat and bring the Dominion wheat and flour on a parity with the world's price. Therefore, it follows, if the Canadian Wheat Board does its duty, it must, of necessity, secure a price pretty well on a level with the price that would prevail under open market conditions.

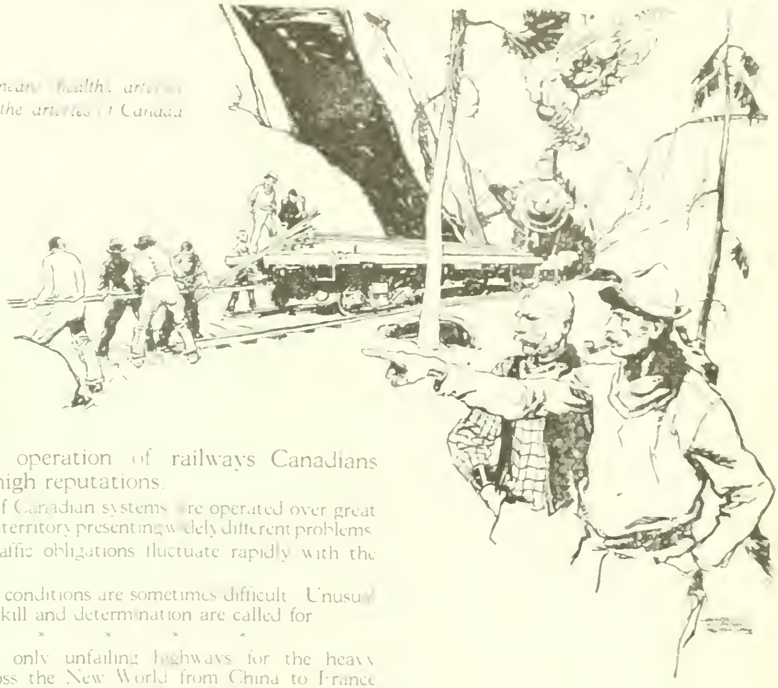
Present Situation Too Uncertain

If the government are afraid of grain prices soaring, the legislation enacted will not save the situation; if they are afraid the price will drop, the Enabling Act will not be much use. The wheat board are simply instructed to see that the price obtained for export wheat or flour is the world's market price, and that wheat and flour for domestic consumption are on a parity with that price. With such a bill hanging over the heads of the members of the grain trade, making it difficult to know what to do, the Canadian government should decide, and should decide very quickly, what its intentions are.

Crop reports from the Canadian north-west indicate that the crop is in splendid condition, and everything points to a bumper year. Moisture has been plentiful and weather has been ideal, and, barring the usual hazards, it is estimated that a tremendous amount of wheat will be handled this year. This will mean large lines of credit on the part of the different grain firms. This will mean tightening up of the grain organizations to give the most effectual service.

The government should immediately supplement the statement made in the House of Commons by the minister of trade and commerce, Sir George E. Foster, to the effect that it was not the intention of the government to make this bill operative only under the gravest emergency; by notifying the trade that wheat will be de-controlled, and giving

A healthy body means healthy arteries
The railways are the arteries of Canada



IN the operation of railways Canadians hold high reputations.

The chief Canadian systems are operated over great stretches of territory presenting widely different problems.

Their traffic obligations fluctuate rapidly with the seasons.

Climatic conditions are sometimes difficult. Unusual foresight, skill and determination are called for.

* * * *

Yet the only unfailing highways for the heavy traffic across the New World from China to France during the war—were Canadian railways.

Canada alone, among the allied countries, had no war-time transportation crisis. When foreign roads choked under their loads she relieved them of millions of tons. At a time when ships were the need of the hour no ship lost time in any Canadian port through failure of the railways to deliver cargoes at the docks.

To-day the Canadian producer still commands the fastest, the most dependable and the cheapest railway service in the world.

But the foresight that made this record possible could do nothing without MONEY! The skill that kept terminals uncongested had to be backed with MONEY! The determination that drove crippled engines ahead in the face of 40 below zero and mountain snow would in the long run have been useless without MONEY!

* * * *

Thus to-day the alarming fall in the net revenue of the railways is a menace to railway efficiency. It injures railway credit. It lessens the resources needful to meet the expanding needs of a growing country. It imperils national prosperity.

Increased freight rates are imperative, therefore, not merely on behalf of railways but in the interests of Canada itself!

specific reasons under what conditions the government consider they should be closed.

Latest Announcement is More Definite

Since the above was written, Sir George E. Foster, minister of trade and commerce, has announced the de-control of wheat and the winding up of the Canada Wheat Board on August 31st. He states in his official statement that three reasons may arise that might make it necessary for the government to proclaim the enabling bill:—

1. The centralization of buying in Europe.
2. Necessity of the government extending credits to buyers of our wheat.
3. If the United States markets are closed at a later date under the provisions of the Lever Act.

The exchanges do not believe these contingencies will arise and are making arrangements for the wheat business of this country to return to normal channels on the 1st September. It is expected the option market will open in Winnipeg about the middle of August.

MERGERS A FEATURE IN INSURANCE WORLD

Subsidiary Organization Frequently Unchanged, but Policy Principal must Ultimately Dominate—"Fleets" now Operating in Canada—U. S. Watching Movement Closely

MERGERS such as characterized the Canadian industrial field about 1911 are now taking place in insurance. British companies are at the head of this movement, and several Canadian as well as British companies have been acquired in this way. The subsidiaries continue to do business in the usual way, though it is customary for the principal to guarantee their policies. H. W. Crossin, of Armstrong, Dewitt and Crossin, commented on this movement in a recent number of the "Toronto Board of Trade News" as follows:—

"The Old Country combinations are no doubt rightly referred to as mergers, but the Canadian deals have been more in the nature of a swallowing process. While the Canadian companies may preserve their identity, the management will generally be in the hands of the officers of the owning company. In the case of the Liverpool and London and Globe, which was acquired by the Royal or the Norwich Union, which is now owned by the Phoenix of London, the Canadian organizations of these companies are, so far as the outsider can observe, being conducted exactly as heretofore, with the same distinct offices and officers, the owned and the owners apparently continuing to follow their own ideas of operation. Eventually, of course, the underwriting views of the parent companies will probably dominate. Where, however, smaller companies have been taken over by larger companies, the management and individuality of the smaller companies almost immediately disappears, and they become a part and parcel of the parent companies.

Chain of Six or Eight Companies

"At the present time there are one or two companies doing business in Canada which own as many as six or eight other companies. In some cases the management of a subsidiary company, in so far as Canada is concerned, is entirely independent, while in others it is not. These groups which may include several fire insurance companies, a casualty company, and may be a marine or plate glass company, which are owned or controlled by a single company, have come to be known in the insurance world as the "Fleet" of the owning company or interest.

"Of course, these mergers or sales come about through one or other company seeing an advantage in the deal. As a general rule, the buying company is desirous of securing a wider spread of business, or with the same end in view, an additional feeder, as, the wider the company's business is spread, the better it is for that company. Very often such a result is obtained, with also a reduction in overhead expenses, all of which is not only beneficial to the company, but also to the insurer as anything which will result in the business being more profitable to the insurance company is bound, in time, to be reflected in the rates charged.

New Companies Counteract Effect

"One difficulty which this condition presents to the public is that when one buys the policy of, say, the World-Wide Insurance Company, he may find that in reality, so far as security goes, he is actually buying a policy of the Omnipotent Insurance Company. In this general tendency also, one is sometimes inclined to fear that the business is gradually working into the hands of a few companies, which would dominate insurance throughout the British Empire, if not, in fact, throughout the world. This, of course, would be a condition which no one would like to see. However, reports continue to be received of the formation of a great many new companies, so that probably there will always be a sufficient number of independent companies to safeguard the situation.

"Interest of the United States company officials has been specially aroused by the recent mergers, as they see in them a great strengthening of the position of British companies, and yet find themselves prevented from adopting the same course to improve their own position. This is owing to the fact that companies coming under the insurance law of the state of New York are prohibited from acquiring the stock of any other insurance corporation carrying on the same kind of insurance business. The law referring to the investing of funds by domestic companies reads in part as follows: 'The residue of the capital and surplus money and funds of every domestic insurance corporation . . may be invested . . but no such funds shall be invested in or loaned on its own stock or the stock of any other insurance corporation carrying on the same kind of insurance business.'

Monopoly Not Now Feared

"Apparently this restriction was placed on companies in the early days with the view of preventing a monopoly. It now seems to be felt, however, that insurance is no longer regarded as a private business, but as one in which the public at large has an interest, and that if it is not conducted fairly the state will step in and regulate it, and that, therefore, this restriction should be removed. Writers in the United States who seem to express the views of the companies owned there, are agitating to a certain extent to have the restriction removed. The comment of one writer in this connection is of interest: 'Whatever may be the American attitude toward concentration of control of capital, preferences or prejudice at times have to give way in the face of conditions. Leading American companies are now reaching out for world business. Their chief competitors are British companies—old, strong, experienced and already strongly entrenched in the markets of the world. They operate under laws which permit them to own other companies doing the same class of business. Within the past few months the greatest fusions of British companies ever known have been effected because the companies saw that under single control they could meet competition more effectively than as unrelated institutions. Those companies can and do own numerous American companies which strengthen them by acting as feeders for them. Yet the laws of various States, including New York, deny to American companies the privilege which British companies exercise to their own advantage right here in America. It is most unusual for one company to handicap its own institutions in competition with those of other countries. It is anomalous that while Congress is endeavoring to build up foreign commerce and enable American marine insurance to cooperate to this end, the individual States should continue to hobble American insurance companies because at a time now well in the past, under conditions which no longer exist, they thought it in the public interest.'"

DIVIDENDS AND NOTICES

LAKE OF THE WOODS MILLING COMPANY, LIMITED

DIVIDEND NOTICES

Notice is hereby given that a dividend of 1¾ per cent. on the Preferred Stock of Lake of the Woods Milling Company, Limited, for the three months ending August 31st, 1920, has been declared, payable on Wednesday, September 1st, 1920, to Shareholders of record at the close of business on Saturday, August 31st, 1920.

By Order of the Board.
R. NEILSON,
Assistant Secretary.

Notice is hereby given that a dividend of 3 per cent. on the Common Stock of Lake of the Woods Milling Company, Limited, for the three months ending August 31st, 1920, being 2½ per cent. from the earnings of Lake of the Woods Milling Company, Limited, and one-half of 1 per cent. from the earnings of the Sunset Manufacturing Company, Limited, re declared payable on Wednesday, September 1st, 1920, to Shareholders of record at the close of business on Saturday, August 21st, 1920.

By Order of the Board.
R. NEILSON,
Assistant Secretary.

Notice is hereby given that a special dividend of 25 per cent. upon the Common Stock of the Company, being $25.00 per share, be, and it is hereby declared, payable on the 1st September, 1920, to Shareholders of record at 3 o'clock p.m. on the 21st August, 1920.

By Order of the Board.
R. NEILSON,
196 Assistant Secretary.

CANADA CEMENT COMPANY, LIMITED

PREFERENCE SHAREHOLDERS

DIVIDEND No. 12

Notice is hereby given that a dividend of 1¾% for the three months ending June 30th, 1920, being at the rate of 7% per annum on the paid up Preference Stock of this Company, has been declared, and that the same will be paid on the 16th day of August next to Preference Shareholders of record at the close of business, July 31st, 1920.

H. L. DOBIE,
Secretary.

Montreal, July 16th, 1920. 195

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Three per cent. for the current quarter, being at the rate of Twelve per cent. per annum, upon the Paid-up Capital Stock of the Bank, was declared, payable on 2nd August next to Shareholders of record on the evening of 17th July; dividend on new stock, computed in accordance with [illegible] to be at the same rate.

By order of the Board
D. C. MACAROW
General Manager

Montreal, 28th June, 1920. 181

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three per cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Wednesday, the First Day of September next, to shareholders of record of 31st July, 1920.

By Order of the Board
FREDERICK WILLIAMS-TAYLOR,
General Manager

Montreal, 20th July, 1920. 202

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 131

Notice is hereby given that a Dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st August next, and that the same will be payable at the Bank and its Branches on and after Wednesday, 1st September, 1920, to shareholders of record at the close of business on the 16th day of August, 1920.

By Order of the Board
JOHN AIRD,
General Manager

Toronto, 19th July, 1920. 200

DIVIDEND NOTICE

MURRAY-KAY COMPANY, LIMITED

Notice is hereby given that a dividend of one and three quarters per cent. for the three months ending July 31st, 1920 (being at the rate of seven per cent. per annum), has been declared on the Preferred shares of the Company, and will be payable on August 2nd next to Shareholders of record at the close of business on July 20th, 1920.

The Transfer Books of the Company will be closed from July 21st to 31st, 1920, both days inclusive.

By Order of the Board.

Bankruptcy Act Means Better Business Methods

Debtor May Be Forced into Bankruptcy if His Books Are Not Proper—Act Came into Force on 1st of July—Defects in the Provincial Insolvency Legislation—Good Accounting Methods Have So Far Been the Exception Rather Than the Rule

By ANGUS LYELL

ONE of the best provisions in the new Bankruptcy Act is that which requires traders to keep proper accounts. This does not merely mean records of cash receipts and payments and credit transactions, but also stock records. An inventory has to be taken at least once a year. The object is to ascertain, in the event of failure, whether a merchant has been acting honestly towards his creditors, in which case he will have little difficulty in obtaining a discharge in bankruptcy proceedings.

Of course, if a trader knew—which he does not—that he would always remain solvent, he need not worry over the keeping of adequate financial and stock records, if he can get along without such. But the dangerous thing in connection with the new act is that, if a man gets behind with his payments, a creditor can force him into bankruptcy, when if it can be shown that he has not kept proper books, he becomes liable to a heavy penalty. It would be wise, therefore, for all merchants to see that their business records can bear adequate scrutiny.

Definition of "Proper" Records

There is also a penalty under the criminal code for failure to keep proper books with a view to defrauding creditors. There have been few convictions, however, under this law. It has usually been difficult to define just what are "proper" books, and intent to defraud has, of course, to be proven. There was a conviction recently in Calgary when William Quirk and his son-in-law, S. H. Wallace—the members of a cash grocery firm—were each sentenced to one month of imprisonment for failure to keep proper business records. Under the Bankruptcy Act, however, conviction will be much easier, because of the clearer definition of what constitutes proper financial and stock records.

The Bankruptcy Act, which was assented to a year ago, has now become operative. The delay in making it operative was due to the fact that a good deal of procedure had to be drafted. There were rules of court to be drawn up, a legal tariff of fees to be fixed to conform to the expenditures allowed under the act, while uniformity in the various provinces is necessary because this is a Dominion measure.

Trustees Must be Competent

Since 1878 there has been no bankruptcy law in Canada. The old act, which remained on the statute books for five years, was repeated because it became unworkable. Most of those entrusted with its administration were inefficient, having secured their appointment through political favor, and the cost of operation was excessive. Much care will be exercised in the appointment of trustees under the new act, to obviate the errors of the past.

Provincial Assignment Acts

With no Dominion legislation governing bankruptcy, it devolved on the provincial legislatures to enact insolvency laws. Each province passed its own measure under which a debtor might make an assignment of his assets for the general benefit of his creditors. These Assignment Acts, however, were by no means uniform in all their provisions, and they contained no provisions under which a deserving debtor might claim a release from his creditors. Such release can be claimed only in bankruptcy proceedings and the Dominion government alone has the power to enact such law. As a matter of fact, some debtors who had made an assignment obtained a release from their creditors, sometimes on a compromise settlement over and above the proceeds of the assets assigned. Others did not. The result was a tendency on the part of those who had failed in business, but who had later met with success to so arrange their affairs that they became proof against execution. They usually did this by operating after their failure in the name of somebody else. Nearly every sheriff could to-day point out men, known to be well off financially, against whom a writ of execution is valueless.

The result was that the business interests—the wholesale and retail houses, boards of trade, bankers and others—felt that it would be to the advantage of all engaged in business to have a uniform bankruptcy law. If a man failed in business but had acted honestly in his transactions, why not relieve him of his liabilities, giving him another chance to succeed? Then in the case of joint stock companies, the winding up of which have often been expensive under the Winding-Up Act, mainly because of litigation, why not bring these under the jurisdiction of the bankruptcy law, vesting the trustee with greater powers than those of a liquidator?

Uniform Law Obtained

The business interests exercised pressure and to-day we have the new Bankruptcy Act. But the measure is not devoid of defects and in some ways may become a disappointment to its sponsors. While the fees of both the trustee and his solicitor are limited by the act, yet the expenses in some cases may be heavy. The measure is not lacking in loopholes. All insolvent corporations, except building societies having a capital stock, incorporated banks, savings banks, insurance, trust, loan and railway companies, come within its jurisdiction; but these also, if so ordered by a judge of the Supreme or Superior Court, may be wound up under the Winding-Up Act. In practice, therefore, the only important change may be that relating to the bankruptcy of sole traders and firms or partnerships. The new act, being a Dominion measure, will likely supersede the existing provincial insolvency laws—Assignments Acts. Under it a trader may be forced into bankruptcy by his creditors or he may voluntarily assign his assets to a trustee and make the necessary petition to the court of relief.

The University of Minnesota recently made an investigation into the records kept by one hundred and thirteen retail stores and found that only 10 per cent. kept adequate financial and stock records, while 40 per cent. had practically no records at all, although engaging in credit transactions. The other 50 per cent. purported to keep books, but the entries were made in such a way as to be of little value. It may be that as bad a condition exists in some parts of Canada and, if such is the case, retailers should lose little time in introducing bookkeeping and stock record systems adopted to the needs of their business.

The annual report of the harbor commissioners of the port of Montreal, covering operations during 1919, shows there was only one serious accident in the year in the St. Lawrence ship channel, and that the total cost of the harbor work was $29,500,000. Total wharfage at the end of 1919 was 8,133 miles. Receipts totalled $1,990,594, a decrease of $113,597 on the previous year and the cost of operation was $2,114,555, an increase over the previous year of $88,013, leaving a deficit of $123,961.

A "Host" of Vacationists call this

AMERICA'S FINEST BOAT TRIP

All other holidays fade into insignificance when compared with the delights of this water trip vacation. Experienced travellers come back year after year to experience the wonderful thrill of the "St. Lawrence Rapids." A churning, splashing, whirling volume of foam-lashed water, where once only the skilful Indian would venture, but where now luxuriously appointed boats travel with confident ease.

This is but one of the features that compel your interest in the trip from

"Niagara to the Sea"

There's the delightful scenery of the Thousand Islands, the sojourn in Quaint Quebec—and finally the canyon-like scenery of the Saguenay, where massive promontories rise like giant obelisks and seem to touch the very sky. Capes Trinity and Eternity are higher than Gibraltar; they and the canyon of which they are a part form a fitting climax to a trip of incomparable charm and interest.

CANADA STEAMSHIP LINES LIMITED

Wheat Acreage Decreased Ten Per Cent.

Other Grains, Excepting Oats, Also Register Declines, According to Latest Estimate— Alberta Crop Conditions Ideal—Manitoba and Saskatchewan Need Rain—Eastern Provinces Report Average Conditions--Lack of Moisture in Nova Scotia

Acreage sown to wheat, including fall wheat, in all Canada, is now estimated at 17,186,300 acres, which compares with 19,295,968 acres, the final estimate for 1919, and represents a decrease of 10 per cent. Spring wheat, according to the estimate of the Dominion Bureau of Statistics, occupies this year 16,446,000 acres, or 11 per cent. less than last year. Fall wheat acreage this year is 740,300 acres, an increase of 10 per cent. over last year. Acreage in oats has increased 4 per cent., from 14,952,114 to 15,555,400 acres. Barley is sown on 2,588,000 acres, or 2 per cent. less than last year; rye, 729,500 acres, or 3 per cent. less; peas, 2,588,000 acres, a decrease of 3 per cent.; mixed grains, 909,350 acres, an increase of 1 per cent.; hay and clover, 10,409,150 acres, decrease of 2 per cent.; alfalfa, 229,300 acres, increase of 1 per cent. The acreage in potatoes is 819,000 acres, practically the same as last year.

The three prairie provinces have an estimated area sown to wheat of 15,771,000 acres against 17,750,167 last year, a decrease of 10 per cent. Manitoba has 2,687,000 against 2,880,301 last year; Saskatchewan, 9,440,000 acres against 10,587,363; Alberta, 3,644,000 acres against 4,282,386 acres last year. The report from the bureau says: "Upon the whole, the conditions of field crops at the end of June is very favorable, timely rains having fallen in the prairie provinces during the critical period of growth. Expressed numerically in percentage of the decennial average, 1910-19, the conditions for the whole of Canada on June 30th, with the corresponding condition for 1919, in brackets, is as follows:—

"Fall wheat, 97 (102); spring wheat, 100 (90); oats, 100 (87); barley, 98 (91); rye, 98 (97); peas, 96 (92); mixed grains, 99 (91); hay and clover, 88 (92); alfalfa, 95 (96); pastures, 97 (100); potatoes, 98 (95). A telegram from the Saskatchewan department of agriculture stated that the general crop conditions in the province are fair, rain, however, being urgently needed to ensure the anticipated crop."

Bank of Montreal Report

The outlook in the province of Alberta has been greatly improved by recent rains, according to reports recently received by the Bank of Montreal. In Saskatchewan and Manitoba rain is needed. Brief statements follow:—Edmonton District—Weather conditions excellent. All wheat in shot blade, some heading out. No damage of any kind.

Calgary District—Outlook greatly improved by recent rains. All sections of the district now expecting from fair to heavy yield of grains, and large hay and feed crops.

Lethbridge District—Prospects much improved by recent rains, grain still somewhat backward, but growing rapidly. Good average yield expected, excepting some localities north and west, where damage by wind is reported.

Saskatoon District—Within a thirty-mile circle of Saskatoon farmers are likely to get little more than seed. Other districts fair to good. Rain required.

Regina District—West, good. East, fair to good. Rain needed. Reasonably look for average crop, and probably better with favorable weather conditions.

Winnipeg District—Many districts need rain. Wheat, 60 per cent. headed out. Coarse grains in healthy condition. Pasture drying out in some districts, but cattle doing well.

Quebec and the East

Reports from the different sections of the province of Quebec indicate all crops, especially grain and hay; much improved by recent rain, and in some localities an average cut of hay is anticipated. Roots are doing well. Grass pasture reported from fair to good; according to locality. General prospects good.

Timely rains and favorable conditions have greatly improved the general prospects in Ontario during the past two weeks. Hay crops will be heavier than was expected, and other crops will make up for deficiency in localities where it falls below average. Cutting in full progress. All root crops in excellent condition. Grain well up to average. Excellent yield of all varieties of fruit appears certain. Some damage by hail, but effect strictly local. Farmers optimistic in nearly every district over prospects of best general crop in years.

Maritime reports indicate that recent rains have been beneficial and New Brunswick reports that grain crops, principally oats, promise to be about average. Hay, however, is reported light; probably 80 per cent. of an average crop. Potatoes doing well, and the outlook is generally satisfactory.

Weather is favorable in British Columbia. Fruits, 25 per cent. below last year, but size and color better. Roots, fair crop in Okanagan and Cariboo; other districts, good. Grains show improvement. Prospects good in Coast District; fair in interior. Hay, light crop throughout. Pasturage satisfactory.

Ontario Conditions

A summary of the weekly reports made by the agricultural representatives to the Ontario Department of Agriculture to July 20th, states that fall wheat cutting began last week in some of the southwestern counties, and by the end of the present week harvesting will be general over a large portion of the province. Elgin and Norfolk report serious injury to the crop from the Hessian fly in the western parts of those counties. Late sown wheat did best in this connection.

The harvesting of fall wheat will overlap haying in many quarters, as the showery weather of the last two or three weeks interfered considerably with the cutting, curing and storing of clover and other hay crops. Barley and oats are referred to as looking most promising, both for straw and grain. Spring wheat is described as doing only fairly. Hay is roughly estimated as giving at least a three-fourths yield; but the second growth never made a better start, and a good later cut is looked for. Corn is now growing rapidly, and good returns are expected. Tobacco has made great growth in Norfolk, some leaves measuring 24 inches in length and 18 inches across, with 18 inches of stalk.

Potatoes are referred to by several representatives as promising generous yields, and, where hoed, all root crops are in more or less good condition. Showery weather made the fields unusually rank with weeds, and also prevented early hoeing. Buckwheat is also looking well, and more of it is being grown. Lincoln reports a heavy drop of Alberta peaches, but says that there will be sufficient left on the trees to produce a good yield of first-class fruit. Reine Claude plums have also dropped heavily. Middlesex states that much injury has been done to raspberry plantations by the cane-borer. Victoria reports that grasshoppers are just now very numerous in the ranching country in the township of Somerville.

Cattle are in good general condition, and are selling at from 9 to 16 cents a pound. Veal calves are bringing from 13 to 16 cents a pound. Manitoulin says that up to $90 is being paid for two-year-old cattle. Milk production has

AMERICAN AND CANADIAN MORTALITY EXPERIENCE

Accidental Death Rate Higher in Canada, but Fewer Deaths from Certain Diseases—Variations Among States

THE joint committee of American and Canadian actuaries, which has been engaged in investigating American-Canadian mortality experience for the past five years, has collated the result of its enquiry in two volumes: the second and completing volume has just been published. The first volume deals—namely, with a series of tables of modern mortality experience among American men and women, and among Canadian men and women, under a variety of standards and comparisons of actual with expected deaths for varying periods; the second gives a comprehensive analysis of experience under the various plans of insurance—ordinary life, limited payments, endowments, conversions, etc., also tables showing mortality experience among American and Canadian men and American and Canadian women, according to place of residence, with a very complete analysis of causes of death.

These analyses present some very interesting comparative data. For example, the tables show the different mortality rates in New England states, as compared with the middle Atlantic and southern states. Similarly, a comparison of deaths by various causes between Americans and Canadians reveals the interesting information that, while Canadian mortality from accidental causes is higher than among Americans, the deaths from cerebral hæmorrhage and apoplexy, organic diseases of the heart, diabetes, nephritis and Bright's disease, were much higher among Americans.

High Mortality on Large Risks

With limited data before them the committee attempted a study of the experience of several companies on policies aggregating $50,000 or more on a single life. The results indicate that the mortality experience is somewhat higher in the case of such lines than the general experience of the companies on risks of all amounts. Of this the committee says: "It seems to be certain that the mortality among large risks taken at one time is higher than the average for risks of all amounts. It is probable, on the other hand, that the mortality on cases from $50,000 to $100,000 inclusive, on persons who have gradually increased their insurance as their means permitted, over a series of years, would be satisfactory. There is a general belief that a good mortality could be obtained on policies of $100,000 or more, taken in one application, provided the so-called moral hazard could be eliminated, and provided men who had overworked in attaining their wealth could also be eliminated. At the present time there is probably a smaller proportion of cases involving moral hazard for large amounts than in previous years, as many men are now making provision for payment of inheritance taxes through insurance, and as it has become a commercial practice to insure for the benefit of the corporation the employees who are necessary for its success."

NEW MONTREAL INVESTMENT HOUSE

Offices of N. A. MacDonald & Co., Inc., a new investment house, will be opened at Montreal and Ottawa. The head office, Montreal, in the Royal Insurance Building, 2 Place D'Armes Square, will be under the management of Stanley MacPherson, formerly of Hanson Bros., while G. Drummond Burn will have charge of the Ottawa branch in the Union Bank Building of that city.

The company, while essentially Canadian in management, is closely allied with the banking house of N. A. MacDonald & Company, Incorporated, with head office in Buffalo, branches in Rochester, Hartford, Lockport and has connections through private wires with Messrs. Hornblower & Weeks, of New York, Boston, Chicago and elsewhere. The company will specialize in government, provincial, municipal and industrial bonds.

PROPERTY LISTED IN SCHEDULE TO WILL

This Does Not Prove Ownership, Nor Affect Right of Any Claimant to Assert His Rights, Says Supreme Court of Alberta

EVEN though property is mentioned in a schedule of assets in papers leading to a grant of administration, this does not finally decide that such property belongs to the deceased, according to a judgment of the Supreme Court of Alberta on March 26th of this year. It is pointed out by the court, however, that claimants to such property may assert their rights freely, for the appointment of the administrator allows the claimant to take the initiative and proceed against a definite person; and a person resting his claim on a mere right of possession will know who alone can begin proceedings against him.

Acquired Property Under Statute of Limitations

The facts of the particular case were in brief that a man named Butterworth had acquired title to a quarter section of land by homesteading prior to 1897, that he had then left the neighborhood, apparently intending to go to the Yukon, and that he had not since been heard of, that no trace of him could be found, and it appears that he had left no next of kin and was not married. Nelson, who was a neighbor and close friend, was told by Butterworth before leaving that if he did not return he could have the land. On the strength of this Nelson went into occupation and continued so, undisturbed, until 1914, so that the Statute of Limitations had apparetnly run in his favor. In that year he sold the land to Cranston for $1,000.

Claimant Can Assert Right

In the papers upon which the application for administration was made, the land is mentioned as the only asset of the estate. Cranston by his solicitor appeared and opposed the application for administration. His Lordship, in deciding on the right of Cranston to intervene and oppose the grant, says in part, "The mention of a particular piece of property in the schedule of assets in the papers leading to the grant does not decide finally that that property belongs to the deceased. Any person claiming to own the property described is just as free as ever to assert his right. And indeed it is only by the appointment of an administrator that any person is named against whom he can proceed to assert his right if he needs to take the initiative himself as perhaps he does where the deceased is at any rate the registered owner. Of course, if he intends to rest on a mere right of possession he will not need to begin any proceedings, but at any rate he will know who it is that alone can bring proceedings against him."

FIXING SUCCESSION DUTY RATE

In fixing the rate of succession duties on big estates where part of the estate lies outside a province, the province is allowed to take into account the total value of the estate, according to a judgment of the Supreme Court of Canada, handed down on July 12, in Ottawa. At present time some 20 large estates in British Columbia are held up in the parliament buildings awaiting this decision.

The case on which the decision has just been handed down has to do with the estate of Sir William Van Horne, former president of the Canadian Pacific Railway. When he died a few years ago his total estate was valued at $6,000,000, of which $300,000 was in British Columbia. Hon. John Hart, Minister of Finance, claimed that in fixing the rate of succession duty he could strike the rate for the $300,000 in the province on the basis of the rate for a $6,000,000 estate. He argued that in assessing the succession duty he could take into account the property of the deceased, both within and outside the province, both as to the liability of the estate to pay duty and as to the rate. The case went on to various courts, with the result that the minister's contention has been upheld.

News of Industrial Development in Canada

Three Million Dollar Pulp Mill Will Be Valuable Asset For Fort William—Saskatchewan Plant to Utilize Waste Straw For Paper Making—Vancouver Industries Obtain Loans From Provincial Government—Large Wholesale Warehouse For Edmonton—Alberta's Wool Crop

SOME interesting facts have been made public regarding the Fort William Pulp and Paper Company, of which passing mention was made in these columns last week. While the city council has to pass upon the agreement, and submit the by-law authorizing tax exemption and additions to the utilities to the ratepayers, it is not expected that these formalities will delay the undertaking. The plant, which is expected to be ready by January, 1922, involves the outlay of $3,000,000. The driving of test piles by Barnett-McQueen and Company, Fort William, by whom the principal contract is being undertaken, has already been commenced.

Using pulp to be cut from limits between Fort William and Sioux Lookout, which is estimated to last for about forty-five years, the industry will start with one hundred men, enlarging to 350 men on the local end, and operating up to 1,000 men, when the pulp camps are in operation. The limits secured by permission of the Dominion government, are known as the Farlinger-MacDougall limits. Kaministiquia power will be used, and when the plant is working to capacity the output, it is stated, will not be less than 100 tons daily. Extension of street car facilities to the site, and completion of the mission driveway so that vehicles may operate direct to the mill, are included in the city's end of the bargain. About one third of a mile is the extent of the street car extension, but the additional expenditure should be taken up by the increased revenue from mill employes.

The company will divide its work in two sections. First attention will be paid to the erection of the pulp-grinding plant. This will cost a million, exclusive of the cost of the site, which has been leased from the government. Here the logs will be ground into pulp ready for receipt by the paper mill, a department which will cost two millions to build. The whole enterprise should be ready for normal output by the beginning of 1922, so that the mill takes a little more than a year to get into shape. In the meantime a large number of men will be at work on construction, not only of the mill, but also of the street car extension, road building and camp sites in the woods. Pulpwood limits acquired include 1,000 square miles of limits on the Grand Trunk Pacific between Fort William and Sioux Lookout, known as the Farlinger-MacDonald limits. The lease is to run for twenty years, with a privilege of renewing for two further periods of 25 years each.

The Mead Investment Company, of Dayton, Ohio, who are stated to control fourteen per cent., of the newsprint supply of the United States, will be the controllers of the new company. It is understood that John G. Sutherland, of Dayton, Ohio, will be the president of the company. H. J. Wekman is the company's representative at Fort William now, and is in charge of organization.

Lumber and Paper Prospects

Southern Saskatchewan is being surveyed by W. R. Phillips, of Trenton, Ont., with a view of establishing a $1,000,000 paper mill. Thousands of tons of waste straw in the province will be used in the manufacture of the product, and large financial interests in Toronto are behind the project. As to the success of such a venture, Mr. Phillips is most optimistic. A plant already in operation in eastern Canada has proved most successful, while in the United States there are several mills in operation. Experiments have shown that a ton of paper can be manufactured from two tons of straw, while two tons of coal would be necessary for power, the paper could be turned out at a considerably lower price than that now charged for the pulpwood product.

For the first six months of 1920, British Columbia has shipped 29,000,000 feet of lumber. Orders are on hand for approximately 36,000,000 feet. These orders include 2,900,000 feet for South Africa; 14,000,000 feet for the United Kingdom; 700,000 feet for West Coast of South America, 18,000,000 feet for Australia; 3,000,000 feet for New Zealand. There are large enquiries for railway ties from India and the United Kingdom. This is a very important matter for the mills of British Columbia, as the grade of lumber used in these ties takes up a portion of the logs which does not go into merchantable lumber. Australia and New Zealand are in the market for large quantities of lumber, and the prospect for increased business is good.

The Gillies timber limit, on the French River, will shortly be thrown open to the mining prospector. These limits were withdrawn from prospecting, but practically the whole area, with a reservation in the south, may be entered by prospectors after July 20, by virtue of an order-in-council just passed by the Ontario government on the advice of the minister of lands and forests. The lands are added to the Timiskaming mining division. Those lands still withheld by the Crown against prospecting include the right-of-way of the Cobalt Power Company, and the right-of-way of the Cobalt Hydraulic Company's Transmission line, both 100 feet wide.

The British Columbia Mills, Ltd., incorporated at a million dollars, will shortly commence the construction of a large saw mill at Wattsburg, B.C. The syndicate, which is organized on American capital, has secured large timber limits in the Cranbrook district and the new saw mill will be in operation by next spring.

A large pulp mill plant is about to be erected between St. Romuald and New Liverpool, at Levis, Que. The company will begin doing business with a capital of $5,000,000 under the direction of John Breakey, of Breakeyville, Levis.

Loans for Vancouver Industries

Approval by the British Columbia government, on the recommendation of the department of industries, has been given in regard to the loans to the following Vancouver companies, which are either commencing or enlarging their plants: Canada Western Woollen Mills, Ltd., $30,000; Stettler Cigar Factories, Ltd., $25,000; Aetna Saw company, $15,000, and Standard Shoe company, $15,000.

The Stettler Cigar Factories, Ltd., of Stettler, Alberta, which located in Vancouver some years ago, was contemplating leaving Vancouver and removing to Eastern Canada, owing to difficulty over securing a suitable larger factory and having to finance the storage of home-grown and other tobaccos during the three year period of curing. The loan made by the government on the recommendation of the industrial department is to be used for the purchase of a suitable factory with storage facilities, and means that the company will make its permanent home in the city of Vancouver instead of in Eastern Canada.

The advance of $30,000 to the Western Canada Woollen Mills, Ltd., supplements the capital of the company, which has about $100,000 worth of machinery installed in the new factory at the corner of Hastings east and Clark drive, and has commenced the manufacture of woollen blankets and tweeds from home-grown wool. With the advance of $15,000 to the Aetna Saw Company that organization is to instal a tempering plant at its factory on Industrial Island and in future will do its own work in this line. It is understood that the company will also enlarge its output so as to manufacture cross cut hand saws as well as circular saws.

The Standard Shoe Company, which has had its private capital augmented by a loan of $15,000 from the industrial department of the provincial government, is a new boot and

Large Warehouse for Edmonton

With the completion of a building, which has recently been planned for Revillon Wholesale, Ltd., Edmonton, Alta., will have the largest commercial warehouse building in Canada, according to M. J. Hutchison, associate secretary of the Board of Trade. This structure will contain 11 acres of floor space and will extend 350 feet on 104th street and 135 feet on 102nd ave., and will tower 9 stories from the side-walk. At present the Revillon warehouse measures 150 feet by 135 feet, 6 stories in height and work was commenced some little time ago on the erection of a 200 ft. addition along 104th st., and upon this, eventually, the nine stories will be built, together with three additional stories to the original building. In the meantime, however, the company only plans to build, this year, two stories to the addition, leaving the construction of the plans of the structure until the price of building material has been reduced somewhat.

Starting originally in 1903 as a wholesale branch for the purpose of supplying their own trading posts, this department of Revillon Bros. was continued until 1912 under that name, when a reorganization took place, the new firm being known as Revillon Wholesale, Limited. At the present time, not more than 2% of their business is with their own posts. In 1912, coincident with the reorganization and the change in name, the building, which up to the present has been the largest wholesale warehouse in Northern Alberta and one of the most extensive in the West, was built and occupied. This is the only large wholesale house in Canada handling general lines, five departments being maintained, namely, dry goods, groceries, hardware, drugs and paper and stationery.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station, for the week ended July 16: La Rose Mine, 90,666; Dominion Red'n, 64,000; Nipissing Mine, 86,390; Temiskaming Mine, 82,366; Hudson Bay, 60,293; Coniagas Mine, 61,305; total, 445,020. The total since January is 12,991,139 pounds, or 6,495.5 tons.

LIFE ASSURANCE AS A SOCIAL FACTOR

"Life assurance has been evolved by the demand of the homes for protection from the assaults of poverty, distress, crime and a thousand kindred evils which inevitably follow the death of the breadwinner of the home", said Thomas J. Parkes in addressing the Rotary Club, Sherbrooke, Que., recently. Mr. Parkes, who is manager of the eastern townships division for the Sun Life, spoke on "Life Insurance as a Factor in Social Economics." He compared the importance of life insurance to that of the church and of the state. "While schools and religion must rank first as promoters of education, morals and religion, life assurance easily takes second place to them by its indirect aid to these paramount necessities."

Mr. Parkes quoted figures to show how life insurance benefits the community by lessening poverty and crime, and by increasing thrift. "Nor must it be overlooked," he added, "that the more recently exploited field of partnership or corporation insurance furnishes further facts for proving life assurance a beneficient factor in social economics. More than one large business with its ramifications affecting the families of thousands of dependent workmen and clerks has been saved from disaster, or, at least, from being seriously crippled, by a policy carried on the life of its executive. I would instance F. H. Peavey, the Minneapolis elevator man, whose $1,000,000 insurance paid at his death brought relief to his successors and enabled the banks to furnish credit to continue the business. No insurance on his life might have spelled disaster to many a farmer scattered over the vast prairies of the west."

1870 —— OUR GOLDEN JUBILEE —— 1920

Mutual in Principle: Mutual in Practice

Prosperity has attended every step in the march of the Mutual from the opening of its long campaign in 1870 down to the present, and much of that success has been due to the practice of the principle of [illegible] which has characterized all ranks of the ever increasing army. Obstacles have been removed, difficulties overcome and a long succession of victories achieved by co-operation, the most vital force in the world. The objective of the Mutual Life of Canada since its organization in 1869 has been "to furnish the largest amount of sound life insurance at the lowest possible net cost." This objective has been attained as actual results clearly show. The limited number of lapses indicates a membership of satisfied policyholders while the rapidly expanding business reveals the growing popularity of the company on its victorious march.

BE A MUTUALIST!

SUCCESS IN LIFE INSURANCE

Salesmanship depends so much upon the service rendered that we have adopted as our slogan: **"Greater Service to Policyholders."** We have a few desirable positions for good salesmen who will study their clients' best interests, and co-operate with the Company. Every assistance, financial and otherwise, given earnest, hard workers, to make good. Apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

THE CONTINENTAL LIFE INSURANCE CO.

Head Office - - TORONTO, ONTARIO

"I will Insure next year"

Very few men deliberately refuse to take Life Insurance. In nine cases out of ten the man whose life is unprotected believes in Insurance, intends to insure—but procrastinates. "I will insure next year," he says, forgetting that if only one could count upon "next year" there would be no need for Life Insurance.

The Great-West Life Policies are issued on terms so attractive that there is no sound reason for anyone to delay taking a Policy. Plans are available to meet every need and circumstance, and premiums may be paid annually, half yearly, quarterly or monthly to suit the convenience of the insured.

Ask for personal rates—giving date of birth.

News of Municipal Finance

Regina's Position at the End of 1919—South Vancouver Had Revenue Balance Last Year—Edmonton Loses Heavily in Redeeming Debentures in New York — Middlesex County Treasurer Suggests Elimination of Borrowing By Higher Tax Rate—Edmonton and Calgary Utilities Have Deficit For Six Months

Phœnix, B.C.—A tax rate of five mills was decided upon last week, four mills being for general purposes and one mill being for schools.

Goderich, Ont.—The tax rate of the municipality has been struck at 41 mills, a reduction of three mills, as compared with last year.

Belleville, Ont.—To meet current expenditures for the year the Board of Education has requisitioned the city council to provide $92,303. This is an increase of $25,000 over last year.

Toronto, Ont.—The 1919 operations of the local Hydro-Electric Commission showed a surplus of $4,000, notwithstanding several severe handicaps. In the first place, wage increases added $136,000 to the pay-roll, over and above the wages paid in the previous year, while an item of $18,000 for exchange on bonds sold by the city in New York had to be met. The sum of $106,000 was paid to the Provincial Hydro Commission for power delivered but not re-sold.

Calgary, Alta. It is expected that the deficit on the municipal hospitals for the year will equal, if not exceed, the city's estimate, which was $271,000. Allowing for the provincial government grant, the deficit for the General Hospital for the first six months is more than $140,000.

For the first six months of the year the deficit on the street railway amounted to $15,185, as compared with a deficit of $9,551 for the first six months of 1919. The increasing deficit, in spite of increasing revenue, is due, of course, to increased wages, increased cost of material and increasing repair costs, due to the accelerating depreciation of the lines and equipment.

Montreal, Que.—Notice has been given by the city in regard to debentuure transfers from the London, England, register to Montreal, that in future these transfers would be dealt with as to principal and interest by payment in sterling funds. In the case of the city of Montreal, the majority of their stocks are expressed in sterling, with the privilege of transferring to a Montreal register. This transfer does not, however, give the holder the right to expect dollar certificates in Montreal. It means that instead of having so many pounds on the London register they have the same number of pounds on the Montreal register. It has always been the custom to remit the interest on stocks transferred to Montreal at the par rate, but the city has never bound itself to do so.

Edmonton, Alta.—A net deficit of $24,234 is the result of civic utility operations during May, 1920, according to the comptroller's report for that month. At the end of May the departments had a net surplus for the five months of this year of $1,063, while the same period of 1919 recorded a surplus of $62,233.

In May the power-house department had a loss of $10,202, while the radial service was on the losing end of business by $14,760. In the pumping and filtration plant the loss was $2,879, while the waterworks deficit was $1,239. Profits were reported by the telephone and electric light branches of $4,709 and $136, respectively. Regarding the power and pumping plants, the comptroller says that the deficits will be wiped out by surplus earnings when the consumption of power increases in later months of this year.

Winnipeg, Man.—Since the city commenced to carry its own workmen's compensation insurance, a saving amounting to $60,000 is reported by City Treasurer Thompson. The funds at the disposal of the Civic Workmen's Compensation Insurance scheme amount to over $30,000, while the charge has been only half of regular insurance rates which the city would have to pay if insuring its workmen through an insurance company, resulting in a saving of $60,000, half of which would be kept on reserve for the fund.

The city commenced handling its own insurance three years ago, it being then considered advantageous to handle the insurance under the Act. Since that time it has only paid half-premiums, resulting in having on hand the sum of $30,000. The other $30,000 has been a net saving.

Calgary, Alta.—A letter has been forwarded by Mayor Marshall to Spitzer, Rorick and Co. with reference to their demand that the city forward at once to New York the taxes in arrears which have been collected and pay off an equivalent amount of treasury notes which are held there against these taxes. The letter, which was approved by the finance committee, offered to place the collected taxes in trust in a Canadian chartered bank until the exchange situation is bettered.

The total amount of these arrears collected is approximately $300,000. With exchange off about 13 points at present, it is estimated that the city would lose from $39,000 to $42,000 if the funds were transmitted at the present moment. The original agreement for the loan provided that the city was to remit the arrears of taxes as they were collected every three months.

This agreement, however, was modified later by a covering letter from the firm last summer, agreeing that the taxes might be remitted from time to time to take advantage of "a favorable rate of exchange." The city treasurer has been holding the sums collected since that time, but exchange has constantly got worse instead of better.

Toronto, Ont.—In making his report on the collection of the first instalment of taxes, Acting City Treasurer Black says: "It is pleasing to note that, although no new record was established, the somewhat disturbed financial conditions prevailing have not affected the collection of the first instalment of taxes, and, on the whole, the result is very gratifying.

"Notwithstanding that the total amount levied is in excess of the previous year by $1,780,654 and the rate two mills greater, the total amount collected on the first instalment was $12,591,617, or an increase of $760,826 over the amount collected for the first instalment of last year, while unpaid balance is $8,561,334. The total amount levied on the city this year was $21,242,951, of which $9,724,963, or 45.78 per cent., was payable in June. The amount paid in was 59.27 per cent."

A reduction of $482,821 has been made in the arrears of taxes, which now total $1,762,618, of which $1,306,917 was due in 1919 and the balance in the previous year.

The city treasurer's return of current expenditure for the first six months shows $15,386,270 expended by civic and outside boards. For the last half of the year there is $14,511,008 available.

Regina, Sask.—A deficit of $12,839 is shown in the general revenue and expenditure account for the year ended December 31st, 1919. Large increases in expenditure over estimates in the street lighting account and the hospital account were chiefly responsible for this. In connection with the latter account, however, a supplementary grant of $8,297 was made after the adoption of the estimates. The net surplus on the operation of the utilities for the year after taking credit for the sum of $20,575, being payment of street railway sinking fund out of property sales account, is $14,239, as compared with the estimate of $13,301.

As a copy of the 1918 statement is not on hand, it is not possible to compare the results of the 1919 balance sheet with that year. The comparison with 1917, however, is interesting. The bonded debt of the city has been increased from $10,526,087 at the end of 1917 to $10,897,858 at the end of 1919. Capital expenditure last year totalled $14,771,128, less depreciation represented by $365,777 debentures redeemed, $1,995,963 sinking fund reserve and $244,834 depreciation reserve, leaving a net amount of $12,164,554, which compares with $12,463,024 at the end of 1917. Capital surplus at the end of 1919 was $5,762,500, as against $3,659,622 in 1917. The revenue deficit, as already mentioned was $12,839, while in 1917 the deficit was $14,117. Arrears of taxes at the end of 1917 totalled $572,151, while at the end of 1919, the amount was $362,812. Cash on hand showed an increase of $72,448 for the two years, while the advance in inventories was of a like nature. The bank liability at the conclusion of last year amounted to $589,065, as against the 1917 figure of $367,003.

Newmarket, Ont.—A tax rate of 32 mills has been struck, as compared with 37 mills last year.

Hope Township, Ont.—The township council has struck a tax rate of 10 mills.

Toronto, Ont.—Three Toronto business men have been elected by the city council to act as members of the new Transportation Commission. They are: P. W. Ellis, head of the P. W. Ellis Co., Ltd., wholesale jewellers; F. R. Miller, member of the firm of Roger Miller and Sons Co., which company is undertaking a considerable portion of the work on the harbor, and Geo. Wright, manager and owner of the Walker House. These three men, into whose care the Toronto Street Railway is entrusted, are acting in an honorary capacity, and all have had considerable business experience, besides a good knowledge of municipal and public works.

Middlesex County, Ont.—County Treasurer Robson recently stated that between $6,000 and $7,000, a sum equal to one-fifth of a mill on the tax rate, is the amount expended annually by the county in paying interest on bank loans to cover current expenditures. According to the treasurer, this money is absolutely wasted, in that the county might, by a slightly higher rate for a few years, put the county in such a position that it would be practically unnecessary to borrow. Treasurer Robson attributes the misunderstanding in the county's finances to this borrowing. A special meeting was called about three weeks ago to clear up this misunderstanding. After examining the finances of the county it was shown that the difference between the auditor's statement and the estimates was due to the necessity of borrowing in December approximately $80,000 for county road work and current expenditures. The borrowing of $60,000 for road work was necessary to cover expenses until the arrival from the provincial government of their portion of the cost, while the remainder was for current expenses pending the payment of taxes.

Referring to the elimination of borrowing by higher tax rates, Treasurer Robson stated that until 1907 the estimates submitted by the treasurer's department were accepted and borrowing was not necessary. In that year the estimates were pared and no allowance was made for interest on the sinking fund. Incidentally, it was pointed out that this is contrary to the Municipal Act, and the councillors who cut off the interest on the sinking fund in the estimates were liable to be disqualified for office for two years. Since that time the county has had to make up this interest and this, with the paring of the estimates from year to year, has resulted in the necessity of borrowing money, the interest of which is mounting up. Treasurer Robson believes that the various councils, instead of attempting to keep down the tax rate each year, should rather make an attempt to save the county the money which is being wasted annually by fixing the tax rate at a figure which would in a short time eliminate extensive borrowing.

Edmonton, Alta.—In taking up [illegible] which came due on July 1st the [illegible] change, or an amount equal to two mills of the tax rate. The funds were provided from the proceeds of [illegible] tures sold to the National Bond Corporation [illegible] This total is now placed at $1,[illegible]

made to the Bank of Manhattan company through the Imperial Bank, and also included collections from tax arrears paid into the sinking fund.

The severe exchange rate is evident when compared with 1918, when these short-term securities first came due, and an extension was secured by ex-Mayor Evans, administration. On a payment of around $1,000,000 the exchange rate was 2 per cent., involving an additional cost of $22,000. The remaining one-half of the issue was extended two years, and as a result fell due on July 1st last. On July 1st the city made a payment of $1,225,000 against debentures issued on 1914 and 1915 tax arrears. Also, the city took up $220,000 of 1916 tax debentures, with an additional $127,172 issued in the following year. These bonds were redeemed on interest due dates, and possibly mean interest saved. The next maturity the city has to provide for is $124,000 of three-year notes which come due next September. But the big obligation develops next January 1st, when an issue of $2,075,000, made up of five-year notes hypothecated against long-term debentures, matures.

Nearly $500,000 of current taxes was paid into the city assessor's department in June, when the 8 per cent. discount period prevailed. To date, collections amount to $2,044,963, which also takes in payments on business and income taxes.

Government and Municipal Bond Market

Three Ontario Municipalities Sell Securities — Ingersoll Gets a Good Price — British Columbia Will Consider a Domestic Loan — Question of Financing Alberta Irrigation Works Still Perplexing

As a whole, the bond market was void of new developments during the past week. A few municipal issues were disposed of, but, with one exception, there was very little interest in these. The price received by the town of Ingersoll for its 6½ per cent. debentures was considered good. The issue will be offered on a 6.30 per cent. basis, which, being at a premium, is rather unusual at the present time.

Local Selling

Sales of securities to local citizens appears to be gaining in popularity. The condition of the bond market during the past few months has caused some municipalities to try this method, and if their efforts are particularly successful now, it is highly probable that in the future they will use the local market to the greatest possible extent. Several western municipalities during the past month or so, which have hitherto disposed of their bonds in the east, are now selling their securities in the community with the aid of local dealers. Regina and Point Grey are two instances. In Ontario, Brantford and London are outstanding examples. While few are engaged in this method of selling now, the results are being watched carefully, and others will act accordingly.

Local selling is not only confined to municipalities, however. The province of Alberta is at present engaged in selling bonds of small denomination at par, and, according to latest reports, these securities are being taken up in a satisfactory manner. Many of the purchasers of these small-denomination bonds have exchanged provincial saving certificates for them. As was expected, a number of purchases have come from outside points, including Manitoba, Wisconsin and California. The treasury department is doing some special advertising in connection with the bond sale, and it is expected that there will be an active demand for the issue during the next few weeks. About $1,000,000 is expected to be disposed of in this manner. In the meantime, the sale of savings certificates is reported to be going on briskly. For the six months ending June 30th the total sales were $741,508, which exceeds by more than $100,000 the sales in any whole year previous.

British Columbia is also considering the question of floating a domestic loan, somewhat along the same lines of Alberta. It is understood that a conference of representatives of provincial bond houses is to be called at about the end of this month by the provincial treasurer at which the question of handling a domestic issue will be brought up. With large purchases made by local investors in the bonds of other provinces, it is felt by the treasurer that a local loan, to be used for provincial highway or university or other work of permanent provincial improvement, would make a strong appeal to British Columbia investors. The province has already raised several million dollars by selling bonds this year, but wishes to borrow considerably more if market conditions are at all favorable.

Coming Offerings

The following is a list of debentures offered for sale, of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Capreol, Ont.	$ 17,000	6	10 & 20 inst.	July 24
Trail, B.C.	9,000	7	10-years	July 26
Sherbrooke, Que. ...	392,500	5	5-years	July 26
St. Jerome-de-Matane, Que.	150,000	5½	Optional	July 27
Macdonald R.M., Man.	25,000	6	20-years	July 28
Picton, Ont.	5,000	6	10-inst.	July 31
Alberta School Districts	132,135	7 & 8	Various	Aug. 5
Goose Lake, C.S.D., Man.	50,000	6	20-inst.	Aug. 14

Picton, Ont.—Tenders will be received until July 31st, 1920, for the purchase of $5,000 6 per cent. 10--instalment debentures.

New Glasgow, N.S.—Tenders will be received until July 24th, 1920, for the purchase of $28,000 6 per cent. 10-year debentures, dated August 1st, 1920, and in denominations of $500. Interest payable half-yearly at the Bank of Nova Scotia, New Glasgow or Halifax. James Roy, clerk and treasurer.

Alberta School Districts. — Tenders are asked until August 5th, 1920, for the purchase of school district debentures totalling $132,135 as follows: **Rurals**—15-years, 8 per cent.; Kenilworth, $3,000; Bruce Lakes, $2,500; Garrard, $3,000, 12-years, 8 per cent.; Crystal, $3,000, 10-years, 8 per cent.; Lake View, $3,500; Poplar Dale, $2,400; Black Spring Valley, $1,000, 10-years., 7 per cent.; Lotus, $1,800; Forcina, $3,000; 15-years, 7 per cent.; Blarney, $2,500, 5-years, 7 per cent.; Fertile Hills, $575, 5-years, 8 per cent.; Manawan, $500; Wintering Hills, $3,000, 6-years, 8 per cent.; Szypenitz, $1,400, 20-years, 8 per cent.; Harvey, $3,000. **Consolidated**—8-years, 8 per cent.; Champion, $3,500, 15-years, 8 per cent.; Falher, $10,000; Skiff, $1,860. **Villages**—20-years, 8 per cent.; St. Aubin, $600, 10-years, 7 per cent.; Bellevue, $14,000; Naemine, $8,000. **Towns**—25-years, 7 per cent.; Coleman, $25,000, 30-years, 7 per cent.; Hanna, $35,000. J. T. Ross, Deputy Minister of Education, Edmonton.

Debenture Notes

Chatham, N.B.—Ratepayers have declared themselves as against the issuing of bonds for permanent paving purposes.

Newmarket, Ont.—It is probable that the council will authorize the issue of $30,000 debentures for sewerage purposes.

A Problem for Men of Affairs

Do you realize the effect of the increased tax upon your investments? Have you carefully weighed each one with a view to deciding upon the advisability of converting a portion of your income into tax exempt bonds? Many business men with substantial incomes have overlooked the fact that an interest return of from 6.42% to 15% is required to yield the 5.55% net afforded by tax exempt Victory Bonds.

Write us and we shall be glad to furnish full particulars.

'Twill be Called "The Pulp and Paper Boom"

But it is not a "boom." World demand and the water-powers and raw materials to fill the demand are behind it.

This is a pulp and paper year—but but one year of many yet to come. Canada's leadership in the industry should increase for the next five years and perhaps for a decade. Why? Because Canada has the last great accessible forest reserves. The world must have our pulpwood and lumber, and the price must be paid.

Those who possess sound pulp and paper securities should retain them and increase their holdings at every available opportunity. Write, if you wish, and we will advise you of some choice pulp and paper securities to invest in. Address:

BANK OF TORONTO BUILDING
TORONTO

Strome, Alta.—The Board of Public Utility Commissioners has authorized the council to borrow $6,000 for the purpose of building a new community hall

Port Colborne, Ont.—Ratepayers have carried a by-law authorizing the raising of $19,500 to purchase property on the lake front for a town park.

Victoria, B.C.—The city is considering a loan of about $150,000 to carry on work on the Johnson Street bridge until about September. The total cost of the bridge will be between $700,000 and $800,000, and up to the present $8,000 has been spent on preliminary work.

South Vancouver, B.C.—A statement issued from the commissioner's office shows that during 1919 receipts reached the sum of $1,548,147, of which amount $192,370 was borrowed from the Bank in March, 1919, to enable debenture interest payments to be met in April. All current expenditures were provided for out of the revenue, and a substantial balance was left on hand for reserves, etc. The statement is divided into two sections, showing "What we received in 1919," and "How we spent it." Under the first caption the following figures are given: Cash on hand January 1, $34,870; taxes and interest, $1,063,548; school and government grant, $93,058; water rates, $81,227; sundry collections, $69,658; soldiers' housing, $13,397; borrowed from bank, $192,370; total, $1,548,147.

Under the second caption the figures are: Schools, $305,661; interest, $264,952; sinking fund, $92,495; waterworks, operating and interest on debentures, $111,347; fire department, $17,980; police, $23,105; treasury bills repaid, $43,371; joint sewerage board, $24,310; street light, $19,551; road maintenance, $66,627; ditches and watercourses, $9,578; soldiers' housing, $13,607; tax sale redemptions, etc., $26,742; hospitals and grants, $11,494; relief, $1,967; accounts previous years paid, $5,311; departments and sundries, $81,620; cash reserve to reduce liabilities, $105,152; reserve to finance till 1920 tax collection period, $302,646; cash on hand, current accounts, etc., $20,931; total, $1,548,147.

According to advices received from the city's bankers, the corporation has placed to the credit of the tax trust, 1917 account, the sum of $124,489. This is against the $227,000 borrowed to pay off the Spitzer-Rorick debt. There is also in the bank $65,073 to the credit of the tax trust, 1920, account, which sum is set aside to retire the bank loan.

Bond Sales

Alliston, Ont.—Messrs. Wood, Gundy and Co. have purchased $15,707.39 6 per cent. 20-instalment debentures at 94.27 and accrued interest. At this price the municipality paid about 6.75 for its money.

The offer of Wood, Gundy and Co., was originally in the form of an option, but at the request of the municipality it was changed to a straight bid. It is understood that there were two other bids higher than that at which the bonds were awarded.

Point Grey, B.C.—Messrs. Pemberton and Son, together with the Royal Financial Corporation, Ltd., have purchased $135,000 5½ per cent. 20-year debentures. The securities are to be placed on the Vancouver market at a yield of 6½ per cent.

East Kildonan, Man.—Messrs. Strang and Snowdon, Winnipeg, who recently secured an option on $150,000 6 per cent. 30-year serial bonds at 90.25, have exercised the same. The issue is an obligation of the East Kildonan School District.

Hawkesbury, Ont.—An issue of debentures amounting to $179,000 has been purchased by A. E. Ames and Co. at 94.53. The bonds, which bear interest at the rate of 6 per cent., are as follows: $95,000, 20-instalments; $19,000, 5-instalments; $65,000, 30-instalments. The offering is being made at a price to yield 6½ per cent.

Brandon, Man.—Messrs. J. A. Thompson and Co., Winnipeg, have purchased $75,000 5½ per cent. 30-year school bonds at a price which costs the city slightly in excess of 7 per cent. for its money. The amount wanted originally was $150,000, but only half of the issue was sold, as $75,000 is sufficient money at the present.

Ingersoll, Ont.—Messrs. Wood, Gundy and Co. have purchased $61,000 debentures from the town at 99.27. The issue is in two blocks, one of $36,000 for fifteen years, and the other for $25,000 for ten years, both payable in instalments, and bearing interest at the rate of 6½ per cent. The bonds will be sold at a premium, the yield being 6.30 per cent.

Brantford, Ont.—The city's $150,000 6 per cent. bonds, which are being sold locally, are meeting with a good reception, according to A. K. Bunnell, treasurer. There have been some enquiries from patries outside of Brantford, but not to any great extent. Local dealers are co-operating in disposing of the bonds, which are being sold at par and accrued interest. Brantford has been particularly successful in disposing of bonds locally in the past, and no difficulty is anticipated in the sale of the present issue.

Windsor, Ont. — The following debentures have been awarded to A. E. Ames and Co. at 95.631: $17,000 6 per cent. 10-instalment; $12,000 6 per cent. 10-instalment; $40,000 6 per cent. 10-instalment; $107,547.81 5½ per cent. 10-instalment; $50,000 6 per cent. 20-instalment; 150,000 6 per cent. 20-instalment, totalling $376,547.81.

Wood, Gundy and Co. submitted a straight bid on the whole block for 95.18, and an alternative bid, asking for an option at 95.68. An offer was also submitted by the Dominion Securities Corporation.

Irrigation Problem Still Troublesome

As yet the Alberta government is undecided as to what to do with the irrigation bonds. The Warren Brothers' Construction Co., which made the original proposition for taking up the Lethbridge Northern bonds, has again signified its willingness to submit a new offer, which will be the same as the first, with the exception of a change in bond prices. It is also a condition of the new offer that Premier Stewart must change his attitude in regard to the question of contract and bond proposal in one.

The premier has always insisted upon the selling of the bonds and the placing of the contract being treated as two separate transactions, but the Warren company wants to buy the bonds and to build the irrigation works, and insists that the government must take it that way, too. Lethbridge farmers are in favor of the new proposition, and intend to impress the fact on the premier, with the hope that he may change his opinion.

LONDON AND SCOTTISH ASSURANCE COMPANY

A record gain was made in the life department of the London and Scottish Assurance Corporation, Ltd., (formerly the London and Lancashire Life and General Assurance Assoc. Ltd.,) for the year ended Dec, 31, 1919, the number of policies issued being 2,753 as compared wth 1,834 in the previous year, and the sums assured amounting to $7,501,450, as against $4,780,830 in 1918. Total new premium income was $378,583, a gain of $94,839. Total income of the life department increased more than $250,000 during the year. Total funds of the company at the end of 1919 amounted to $28,858,210, while at the end of the previous year the figure was $25,486,354. Other departments of the company made equally good showing, including fire and marine.

The London and Lancashire Life was organized in Aug. 1862, with head office at London, England. During the past year, however, the name was changed to the London and Scottish. The company's business extends throughout Great Britain and the larger British colonies, including Canada, South Africa, Egypt and India. Business in Canada commenced in 1863, and the head office for the Dominion is at Montreal, under the able management of Alex. Bissett. Operations here last year, as in other spheres in which the company does business, were attended with much success. New policies to the number of 863 were issued, as compared with 586 in the previous year, and the amount was $2,073,307, as against $1,405,731. Net premiums totalled $536,342, a gain of $34,836.

Corporation Securities Market

Dull and Irregular Market—Light Volume of Business on Canadian Exchanges —Ontario Steel to Increase Capital—Wabasso Cotton May Issue More Stock

DEALINGS in New York for the week ended July 21, were merely a repetition of those of previous sessions. As a whole, the market was barren of interesting results. The publication of the wage terms of the United States Railway Board had very little effect outside of the rail section, and the easing in call money rates produced very little interest. The market is still in a "waiting attitude" and speculators are holding back.

In Montreal the buoyant market of a week ago was replaced by one of dullness and irregularity, and at the close of the exchange on July 21, the trend of prices was uncertain, with a tendency in some cases to go to lower levels. Atlantic Sugar was the only stock traded in to any extent. The issuance of a favorable annual financial statement by Ontario Steel and the declaration of a dividend, tended to strengthen that issue considerably, but, in keeping with the rest of the market, there was a weakness at the close. Reaction apparently has settled over the paper section, weakness in those stocks continuing all week. There was some interest in Brompton, new, but not enough to prevent a falling away in that issue. The light volume of business and the weakness of the whole market is probably due to seasonal influences.

Trading in Toronto was broad, but not very heavy, and on the whole the price range was narrow, with advances and recessions about equally divided. In a large number of cases the losses made during the week were partly retrieved at the close. As a whole the banking section was stronger, although some further losses were made.

The bond market was more active than it has been for some time, several issues being traded in to quite a large extent. Price movements were uninteresting, however.

Capital Changes

At a meeting of the directors of the Lake of the Woods Milling Co., in Montreal, on July 16, a by-law was passed authorizing the offering of one new share at par for each four held. A special dividend of $25 a share was also declared upon the common stock of the company. In addition to the special dividend, directors of Lake of the Woods have declared the regular dividend of 3 per cent. on the common, payable September 1st to shareholders of record August 21st, and 1¾ per cent. on preferred, payable September 1st to shareholders of record August 21.

Directors of the Ontario Steel Products Co., Ltd., have decided to increase the authorized capital stock of the company from $1,500,000 to $2,750,000. The capital presently outstanding is divided between $750,000 7 per cent. cumulative preference shares and $750,000 ordinary shares. The company also has outstanding $600,000 6 per cent. bonds, due July 2nd, 1943, less $77,800 bonds redeemed by sinking fund.

Application has been made by the Western Canada Pulp and Paper Co., for the listing of its securities on the unlisted department of the Toronto Stock Exchange. The company's operations are carried on at Howe Sound, five miles from Vancouver, B.C. The common stock outstanding is $1,000,000, par value $100. First mortgage bonds of $1,000,000 and 6 per cent. debentures of $1,200,000 authorized complete the securities. The common stock is fully paid, and the first mortgage bonds are serial from 1920 to 1940, bearing 7 per cent.

A circular has been issued by the Wabasso Cotton Co., Ltd., concerning a plan to readjust the share capital. The plan calls for the doubling of the stock from 17,500 shares to 35,000 shares and changing the shares from a par value of $100 to a no par value basis. The new shares will be allotted in proportion of two for one now held. The proposed resolution will be submitted for approval at a special general meeting of shareholders to be held on August 26, immediately after the annual general meeting, and, if approved, application will be made for the necessary supplementary letters patent on the issue of which the readjustment of the capital stock will immediately become effective, and certificates for the 35,000 no-par value common shares will be issued pro rata.

Capitalization Increases

Companies registered under Dominion charter have been authorized to increase their capitalization as follows:—

	Former capital stock.	Increased to
North American Lumber Supply Co., Ltd.	$100,000	$1,000,000
Citizens Lumber Co., Ltd.	100,000	1,000,000
S. Fremes and Co., Ltd.	40,000	200,000

In all of the above cases the new shares to be issued will have a par value of $100.

Under provincial charters the changes are as follows the name of the province being indicated:—

McLaren and Co., Ltd. (Ontario)	$100,000	$ 200,000
Blachford Calf Meal Co. of Canada (Ontario)	75,000	150,000
*Wells Bros. Co. of Canada (Ontario)	40,000	250,000
Dominion Press, Ltd. (Quebec)	20,000	250,000

---

*Under supplementary letters patent, besides having its capital increased, the company's name is changed to Greenfield Tap and Die Corporation of Canada, Ltd. In all of the above cases the new shares to be issued are to have a par value of $100.

RUSSIAN SOVIET WILL PAY IN GOLD

Arrangements have been made by the Russian government for the transfer of $10,000,000 in gold to Canadian banks, according to a statement made by Ludwig C. A. K. Martens, chief of the Soviet Bureau in New York, on July 12. This money is for the purchase of Canadian goods, following upon the opening up of trade relations. Mr. Martens stated that he believed that arrangements had been made in London by Santeri Nuorteva, one of the Soviet representatives, who recently toured Canada interviewing Canadian manufacturers, and who afterwards went to London to conduct negotiations regarding the financing of contracts with Canadian firms. He said that the gold would be shipped from Esthonia or from that deposited by the Soviet government in Scandinavian banks. It would be sent to the Dominion, but he did not know which Canadian bank would handle it. That was a matter which was to have been arranged in London.

Dominion Steel Shareholders Ratify "Merger" Proposals Unanimously—Ontario Steel Had Successful Year—Collingwood Shipbuilding Terms of Entrance into British Empire Steel Corporation Are Announced—Winnipeg Street Railway Employees Reject New Wage Offer

London Street Railway.—In reply to complaints of poor service, the vice-president of the Street Railway Union announced that until the wage scale reaches a minimum of 52 cents an hour there will be no money spent on improvements. The system is at present being operated by the Ontario Railway and Municipal Board, and the men are working for 48 cents an hour, with the understanding that when the receipts warrant it they will receive increased pay. Citizens may have to contend with a still further reduced service if earnings fall off at the present scale of wage.

Bell Telephone Co. of Canada.—Final sanction and approval of a 10 per cent. increase in telephone rates by the company, which was authorized over a year ago by the Dominion Railway Board, has been given by the governor-general-in-council. The new rates will, by this approval, remain permanent, because the cabinet has refused to grant the appeal of Toronto and other municipalities in which the request was made that the board's order be rescinded as unjustified, and there is no higher court to which to appeal.

Winnipeg Street Railway.—By a majority of eight, and with about 300 men not voting, employees voting against accepting the 10 per cent. increase in wages offered them by a board of arbitration. The vote was: 481 against accepting the award and 473 in favor. Another ballot is to be taken on the question of striking to enforce a demand for a 20 per cent. wage increase.

Company officials say that the 10 per cent. increase would raise the operating expenses $300,000 per year, and claim that this could be met only by increased fares.

Dominion Flour Mills, Ltd.—Bondholders of the company have ratified a resolution of the directors, modifying the bondholders' rights and permitting the company to dispose of their mills located in the province of Ontario, should they see fit to do so. It is stated that no offer has been made the company for any or all of their mills in Ontario, but should such an offer be made, the company would have no authority to consider same before consulting the bondholders. It was for this purpose that the special meeting was called, and the approval of bondholders sought.

Fort Frances Pulp and Paper Company.—The Paper Control Tribunal has handed out a judgment regarding the refund of overcharges alleged against the company, and that the Fort Frances interests must refund to various newspapers concerned, charges over and above the prices for newsprint, amounting to approximately $122,000. At the same time the tribunal has allowed the appeal of the Fort Frances company against another ruling, and allowed the company to charge $80 a ton for paper from and after December 31st, 1919. Mostly western journals are involved in the appeal of the newspapers, and the claims cover a period from January, 1919, to December 31st, 1919, during which it was alleged the Fort Frances company has charged and collected prices in excess of those allowed by the paper control board to a total of $122,136.

It is intimated by Mr. Hellmuth, K.C., who appeared for the company, that the decision of the tribunal would be carried to higher court since the company challenged the jurisdiction of the paper control board.

British Columbia Electric Railway Company.—Application for the privilege of putting in force a seven-cent fare in Victoria will probably be made to the Board of Railway Commissioners in the near future. A. T. Goward manager of the company, intimated this much before the city council recently. As the city council, under existing legislation, has no authority to give the company the right to charge more than six cents, it is unlikely that negotiations can be carried on further between the city and the company with any promise of a satisfactory agreement resulting.

The British Columbia Electric Railway Company applied last year to charge a six-cent fare, believing that the general improvement in conditions at Victoria, expected at that time, would enable the street cars to be operated satisfactorily on that basis. Events have shown, however, that a six-cent fare, even accompanied by elimination of jitneys, would be an expedient of little value. The seven-cent fare some months ago seemed to be inevitable if the company was to make both ends meet.

Collingwood Shipbuilding Co.—Shareholders of the company are in receipt of a letter announcing the terms upon which it is proposed to enter the British Empire Steel Corporation and calling a special meeting for July 27, for ratification. Under the agreement the Collingwood Shipbuilding Co. agrees to sell all its undertakings and assets to a concern described in the circular as the "Collingwood Shipbuilding Corporation, Ltd.," which would appear to be a new link between the operating company, which is being acquired, and the British Empire Steel Corporation. The purchaser assumes and undertakes to pay, satisfy, discharge, perform and fulfil all the debts, liabilities, contracts, engagements and obligations of the company, whatsoever. The consideration is as follows:—

"(a) First mortgage 10-year 6 per cent. serial bonds, upon the property of the corporation, of the par value of $1,950,000, unconditionally guaranteed as to principal and interest by the British Empire Steel Corporation, Ltd.

"(b) Seven per cent. cumulative preference stock of British Empire Steel Corporation, Ltd., of the par value of $1,040,000.

"(c) Seven per cent. cumulative second preference stock of British Empire Steel Corporation, Ltd., of the par value of $1,040,000.

"(d) Common stock of British Empire Steel Corporation, Ltd., of the par value of $1,040,000."

Montreal Tramways Co.—A decision of the Montreal Tramways Commission given against the company last year, was upheld by the Quebec Public Service Commission at a sitting in Montreal last week. On August 25, 1919, the Tramways Commission deducted the sum of $534,055 from the amount of the company's working capital; the judgment of the commission of first instance reading:—

"It was resolved that of the amounts of working capital for which interest at the rate of 6 per cent. per annum is claimed by the Montreal Tramways Co., from February 10th, 1918, to June 30th, 1919, the amount of $534,055, representing the reproduction cost of stores in hand, included in the valuation schedule 'A,' of the contract, be deducted." It was from this ruling that the company appealed.

Col. Hibbard, chairman of the Public Service Commission, who wrote the judgment, pointed out that the first thing to consider is whether this amount of $534,055 was or was not included in schedule "A," referred to, and part of the contract, as sanctioned by the legislature, and believes that it is quite clear from the evidence of Mr. Sauret, engineer of the Tramways Commission, that this sum was included at the book value of stores in hand as per the inventory of June, 1917, and this sum is entered in the total sum of $36,286,295, the allowed capital value of the company's system. The company contended that the sum of $534,055 should have been allowed it as working capital.

Ontario Steel Products Co., Ltd.—A successful year's business is reported by W. W. Jones, president of the company, in his statement for the year ended June 30, 1920. The net profits amounted to $315,900, as compared with $198,770 in the previous twelve months, an increase of $117,130.47. And this result was achieved in face of a substantial reduction in the price of articles.

In addition to paying the regular 7 per cent. dividend on the preferred stock, which consumed $52,500, arrears to a total of $15,000 were paid out. All the arrears on the preferred stock have now been overtaken. The directors have, in addition, declared a dividend of 7 per cent. upon the preferred shares for the full year ending June 30th, 1921, payable quarterly at the rate of 1¾ per cent., on November 15th, 1920, February 15th, May 16th, August 15th, 1921, to stockholders of record October 30th, 1920, January 31st, April 30th and July 30th, 1921, respectively. The directors have also authorized a dividend of 8 per cent. upon the common shares for the full year ending June 30th, 1921, payable quarterly at the rate of 2 per cent. on August 16th, November, 15th, 1920, February 15th, May 16th, 1921, to stockholders of record July 31st, October 30th, 1920, January 31st, April 30th, 1921, respectively. The amount transferred to the sinking fund was $15,708; a year ago it was $12,000. Bond interest consumed $32,292; a year ago it took $36,000. In his report the president said:—

"Notwithstanding a substantial reduction in our prices during the past year, our output in value and tonnage was the largest since incorporation. Earnings from specialties show an encouraging increase, and sales of old or obsolete stock omitted in previous inventories contributed substantially to the profits as shown. Since the first of January, domestic shovel business has been brisk, and an extension to this work is in contemplation. Export trade is still being outlined, but in smaller volume than last year. All our original factories have been employed to about capacity during the year, and manufacturing was commenced in the Central Springs Works, Oshawa, early in April. Necessarily, our output at that point has been small up to the present time, but it is expected that a satisfactory tonnage will be produced during the coming year."

Dominion Steel Corporation.—As was briefly mentioned in *The Monetary Times* last week, shareholders of the company have unanimously accepted the proposals of the directors to enter the British Empire Steel Corporation. The only remaining large company to vote on the merger proposals now, is the Canada Steamship Lines, Ltd.

After the preliminaries at the special meeting, which was held on July 15, Roy M. Wolvin, president, moved the formal resolution ratifying the agreement. Sir Clifford Sifton, speaking as a member of a committee appointed by the recently elected board of directors, to investigate the proposition of the Empire Steel Corporation, stated that there was no need to enter into a discussion of all the details of the proposed consolidation. The shareholders generally relied upon the wisdom and loyalty of the directors to safeguard their interests, and in this case, and speaking in the light of a careful investigation of all the many matters involved, he was happy to say that the interests of the shareholders had been amply protected. There were no other speakers and the motion being put, carried unanimously.

President Wolvin, in his remarks, spoke enthusiastically as the future of the new consolidation. "The British Empire Steel Corporation," he said "will possess the largest individual holdings of iron ore and coal of any company in the world. To my mind its properties [illegible] for the cheap manufacture of steel products [illegible] most advantageously located for world trade. [illegible] railroad difficulties and congestion [illegible] for export trade we need place no [illegible] railroad service, and with a water [illegible] miners are able to work every day [illegible] instead of being idle on account of [illegible] similar difficulties.

"The steel and coal industry of Nova Scotia [illegible] varied experience. Undoubtedly the [illegible] took this work were men of vision [illegible] everything [illegible] done with the [illegible]. [illegible] have always found it difficult to get capital. They have depended upon government assistance and upon domestic trade, but the situation in the world has changed and the industry is now what [illegible] will imply—an export proposition and a world proposition. Our plans include the bringing into the [illegible] of twenty [illegible] million dollars of new money to be spent upon the development of our properties, and with the money we hope to get at least part of our plants into a position where the cost of production will be such as to compete with any other plant in the world.

"In Toronto business is largely operated on the banking and trust company idea. Montreal operates in a broader field, but when you get to the Maritime provinces one finds the trader who is in touch with West Indian [illegible] and foreign trade, and who has a different outlook. We are naming our new company the British Empire Steel Corporation. We hope to give it the world vision such as has made Great Britain. We have the necessary money, and I expect we will have sufficient vision and proper British enterprise and nerve to go into the world's markets and obtain sufficient profitable business for all our plants. Let me say here that in my judgment the possibilities of the corporation are unlimited."

At a meeting of the directors of the company, during their visit to the maritimes on their inspection trip, two new members were elected to the board. The new members are D. H. McDougall, president of the Nova Scotia Steel and Coal Co., and Dr. W. L. McDougall, president of the Century Coal Co., of Montreal.

CO-OPERATIVE PROFITS ARE GOOD

The Co-operative Union of Canada, with headquarters in Brantford, Ont., has just published statistics of the progress made last year by the organized co-operative movement in Canada. The societies affiliated with the union are scattered from Cape Breton to Vancouver Island. The [illegible] retail societies which furnished information did an aggregate turnover of $2,1[illegible]2,72[illegible], showing an increase for the year of $611,18[illegible]. The share capital investment was increased by $49,698; the same amounting to $21[illegible]. The net surplus or profit, made was $1[illegible]6,870, or an average of [illegible] per cent on the share capital employed. Of this amount, however, $138,215 was returned to the consumers as dividends on their purchases, an increase of $2[illegible] over the previous year, reducing the cost of living to the members and other customers to that extent; only $18,[illegible] being required to pay interest on capital and for allocation to reserve funds. The purchase dividends paid range from [illegible] per cent to [illegible] per cent.

Separately tabulated are the statistics of [illegible] Growers, Ltd., also an affiliated organization, which while principally engaged in the marketing of grain [illegible] does, in addition, a large distributive business. For the year it recorded the handling of [illegible] 22,20[illegible],017 bushels of [illegible] trade of $6,180,[illegible]. It has a [illegible] investment of [illegible] a net profit of [illegible] people. It [illegible] Rochdale plan, [illegible] and sales, but [illegible] of the members.

[illegible] South American Trade [illegible] title of a book [illegible] the National City Bank of New York. It [illegible]

WHEAT ACREAGE DECREASED TEN PER CENT.

(Continued from page 36)

been well sustained, owing to the excellent condition of the grass. Peel remarks that while the milk flow has been keeping up well, butter-fat tests have been responsible for several "shut-offs" during the week. Bacon hogs are being marketed at from $19 to $20 a cwt., but do not appear to be in such numbers as in recent years. The demand for farm labor is increasing now that grain cutting has joined with the belated harvesting of hay.

Nova Scotia Needs Rain

All correspondents in their reports to the Secretary of Agriculture of Nova Scotia, refer to the inadequate rainfall to date, and state that the crop outlook is serious if the drouth continues much longer. With a moderate rainfall during the next few weeks, however, present conditions are such as to warrant the expectation of at least a good average harvest of practically all farm crops. Hay, which looked very unpromising three weeks ago is now averaged at 85 per cent. of last year's bumper crop. Last year's hay crop, by the way, was about 25 per cent. larger than that of the previous year. There are some local areas, such as North Inverness, where rainfall has been unusually light, and the hay is consequently in a very poor condition. Even with the most favorable weather from this out, little more than two-thirds of a crop can be expected in these areas.

Oats and other cereals, potatoes and root crops are reported to be, in the main, well up to the average. With favorable weather conditions during the remainder of the season, these will yield bumper crops. The apple prospect is variously estimated in different districts from 45 to 90 per cent., with a general average of 65 per cent. as compard with 1919. It will be remembered that the apple crop of last year was about double that of any previous year for some time back. With respect to apples it may be well to point out that there is sure to be a heavy drop in yield, with smaller fruit, should there be long continued dry weather.

Pastures are reported slightly below last year's quality, averaging 90 per cent., with some districts giving a much lower estimate. Notwithstanding this, creamery managers report an increase of 40 per cent. over last year's business. While some of this gain is due to an enlarged patronage, there is also a marked increase of output from former patrons. Taking it all in all, present crop reports must be regarded as reasonably favorable, with a very great deal depending upon weather conditions during the next month.

RECENT FIRES

Chemical Fertilizer Plant at St. John, N.B., Sawmill at Maissoneuve and Garage in Vancouver are Large Losses this Week

MORE dry weather in some sections has again started forest fires. Some valuable timber has been burned during the past two weeks, but as yet the danger to towns and villages is not nearly as serious as during the dry spell towards the end of May. A report from St. John, N.B., dated July 18th, stated that the village of Upper Gagetown, on the St. John River, was threatened by a fire which had already burned five miles of timber, but on the 19th the danger was reported as being past.

Reports received on July 12th by the British Columbia department of lands stated that the Cariboo, Kamloops and Prince Rupert districts were the only ones really safe at that time. Nelson, Prince George, Vernon and Cranbrook were in a rather serious position. Subsequent rains relieved the anxiety, however. Over a thousand acres in the Brazeau reserve, in northern Alberta, were burned over during the first few days of July. The area was mostly covered with small spruce of considerable value.

Coaldale, Alta.—July 14—Warehouse belonging to J. B. Shimek was destroyed. Loss is estimated at $30,000.

Drumheller, Alta.—July 12—Barn belonging to the Premier Coal. Co. was destroyed. The loss was covered by insurance.

Hull, Que.—July 15—Hull Music Store damaged. Estimated loss is $3,000.

Kingston, Ont.—July 14—Home of George Loyst completely destroyed. Fire was caused by lightning. One fatality.

London, Ont. — July 18—Factory belonging to D. S. Perrin damaged. The loss is estimated at $2,000, and the fire is believed to have been caused by spontaneous combustion.

Maissoneuve, Que.—July 21—Sawmill and lumber plant belonging to J. P. Abel, Fortin and Co., Ltd., damaged. Estimated loss, $25,000, partly covered by insurance.

Manitou, Man.—Fire originating in the office of John Pollock destroyed several other shops in the town. The loss was covered by insurance.

St. John, N.B.—July 20—Chemical fertilizer plant, owned by R. D. Patterson, was destroyed. Loss is estimated at $100,000, partly covered by insurance. Cause unknown. The plant was built in 1891 by the owner.

Vancouver, B.C.—July 9—Garage belonging to the Continental Motor Co. destroyed. The loss is estimated at $25,000.

Winnipeg, Man.—July 15—McRae Building, at corner of James and King Streets, damaged by fire.

ADDITIONAL INFORMATION

Alvinston, Ont.—June 13—Planing and sawmills belonging to D. J. McEachern and Son, damaged. The total loss on contents and building is $6,000, with insurance of $1,500, in the Gore District Mutual Fire Insurance Co.

Halifax, N.S.—June 27—Barn belonging to J. A. Leaman and Co., also two dwellings destroyed. The fire is believed to have been caused by defective wire. There was a total loss of $9,600, with insurance of $2,000, in which only $900 can be collected.

New Glasgow, N.S.—July 7—Workshop of the Maritime Bridge Co. destroyed. The total loss was $120,000, with insurance of $65,000.

Warwick Township, Ont.—July 2—Two barns, owned by N. Herbert, were destroyed. The fire was caused by lightning. Total loss $3,000, with insurance of $900, in the Lambton Insurance Co.

Winnipeg, Man.—June 15—Hay belonging to the Carnefac Stock Food Co., Ltd., was destroyed. The fire was caused by smoking. The total loss was $12,000, with insurance of $15,000, in the following companies: Aetna, $1,000; Atlas, $250; Essex and Suffolk, $2,500; Fidelity-Phenix, $500; Glens Falls, $2,000; Guardian, $250; Law, Union and Rock, $600; New York Underwriters, $600; Northern, $600; North Empire, $500: New Hampshire, $1,500; Providence-Washington, $2,000; Truro, $600; Queensland, $500; Springfield Fair and Marine, $1,000; Western, $600.

Manitoba.—The fire marshal's report for May, 1920, shows that during the month there were 254 fires, with a loss of $96,901, on which $1,112,379 of insurance was carried, the value of the property being $1,343,057. The loss ratio per capita was $.158.

An analysis of the causes of fire during May shows that fires were caused by: Rubbish, 97; stoves and furnaces, 20; matches, 16; chimneys, 14; lightning, 6. Fifty-nine dwellings, 93 rubbish and grass, 30 farm dwellings and 4 stores were destroyed. The loss in Winnipeg was $644,639 and the loss in Brandon $25,069.

Union of Canadian Municipalities Convention

Ownership and Operation of Utilities and Municipal Activity in Housing Feature Discussions at Quebec Meeting—Incidence of Municipal Taxation—Recent Progress of Western Municipalities — Commission Government in Small Towns — Relations With Labor

THE 20th annual convention of the Union of Canadian Municipalities was held in the city of Quebec, July 27 to 29. Representatives from all parts of Canada were present. After a meeting of the executive on Tuesday morning, an official welcome to the delegates was extended by Mayor Samson, of Quebec, in which he emphasized the need for serious consideration of growing municipal problems, such as the operation of public utilities. Sir Charles Fitzpatrick, lieutenant governor of the province, formally opened the meeting in the afternoon.

Mayor Harold Fisher, of Ottawa, in his presidential address, stated that unless financial conditions changed, the housing problem was bound to become more acute. The question of handling municipal enterprises was admittedly difficult, and deserved a careful investigation.

The delegates were given ample opportunity to see Quebec, both as an industrial and as a tourist city. On Wednesday they inspected the police and fire departments, and were taken on a boat trip through the harbor. In the evening they were the guests of the city council, addresses being given by Mayor Samson; A. A. Pearson, of Point Grey, B.C.; Hon. Antonin Galipeault, minister of public works, Quebec; Ald. M. Fiset, Quebec; Mayor Fisher, of Ottawa; Arthur Roberts, K.C., Bridgewater, N.S.; Ald. Dixon, Montreal; Mayor Beaubien, Outremont, and Controller J. H. Ramsden, Toronto.

Bonuses to Industries Opposed

On July 28 the convention placed itself on record as opposed to the practice of bonusing industries; there was only one dissenting vote when this resolution was passed. J. N. Bayne, of Saskatchewan, remarked that if firms were not strong enough to stand on their own feet without the aid of bonuses it did not speak well for these firms. He did not believe there could be any strong argument in favor of granting bonuses. W. D. Lighthall, K.C., Montreal, said that although the principle of granting bonuses was a [illegible] one, there might be individual cases where it would be advisable to grant them. Mayor T. D. Bouchard, of St. Hyacinthe, was strongly opposed to municipal [illegible] and said a law should be passed to [illegible] them.

Ald. Dickson, of Montreal, expressed his [illegible] emphatically. He pointed to Montreal [illegible] that the annexation of smaller municipalities [illegible] Montreal to acquire their liabilities. A [illegible] business without a bonus was not [illegible] he said. Ald. Collier, of Quebec, [illegible] and likewise of municipal tax [illegible] were equally vicious.

Previous to the [illegible] of the [illegible] a resolution was passed accepting the [illegible] as assistant secretary [illegible]. It was decided to appoint a permanent [illegible] of $2,500 a year, the salary to be increased [illegible] finances of the union will permit.

At the opening of the afternoon session, J. [illegible] Saunders, city clerk of Camrose, Alta., and secretary of the Union of Alberta Municipalities, spoke on the recent progress of western municipalities. He said that until the West had a population commensurate with its vast areas, there was no [illegible] of talking of establishing industries. Mr. Saunders pointed out that the total population of Alberta was not as large as that of the city of Montreal, and dealt at length with the questions of inflated valuations, taxation systems and the lack of population.

President's Address

In his address President Fisher, of Ottawa, said in part:—

"About the union there is a great deal that might be said and certainly there is much that must be done if it is to be made the useful and efficient organization it should be. Under favorable conditions an association composed of all the municipalities of Canada, large and small, and separated in some cases by thousands of miles, must be a difficult organization. During the past few years the union had had to contend with exceptional conditions.

"Originally, the union was a fighting organization formed primarily to look after the interests of the municipalities in matters coming before the Dominion parliament or dealt with by the Dominion government. For several years there has been little fighting to be done before the Dominion parliament. The creation of the railway board, with its ever increasing jurisdiction, removed many matters from the political field where lobbying and other influences of a harmful character had long been felt. The war put an end for a time to private enterprise of the kind that took form in private bills, that were not always in [illegible] the public. The acquisition by the government of a great part of the railway system of the country has, [illegible] away with railroad [illegible] private [illegible] ever may be said otherwise of the [illegible] had the effect of removing a [illegible] seem feared [illegible] did raise a [illegible] railway property [illegible]

[illegible]

FEDERAL TAX COLLECTION MACHINERY IMPROVING

Busiest Department at Ottawa—Prosecutions are Invariably Successful—Burden of Increased Railway Expenses to be Shifted to Public

(Special to *The Monetary Times.*)

Ottawa, July 29, 1920.

THERE are evidences that there will be a political awakening in Ottawa shortly. Hon. Mackenzie King, the Liberal leader is preparing to make a nation-wide tour. From his standpoint everything depends upon this tour. With his following in the house, he has not made a great hit, and last session did not strengthen his position. However, if he can carry the fiery cross to the country with enough zeal to arouse the old-time Liberal spirit he will rehabilitate himself. He is young and will grow, and unfortunately for himself with his following in parliament always suffers with the very natural comparisan with Laurier.

The new Prime Minister, Hon. Arthur Meighen, if he can tear himself away long enough from his duties at Ottawa will also take to the stump. The country has a new ministry, a new party and a new platform, and the country would like to get better acquainted with all three. Mr. Meighen will make his first public appearance in Portage La Prairie, his home constituency, where he will be given a public reception. This will be followed by several other meetings, and then he will plunge into the coming bye-elections. Upon these bye-elections depends the fate of the government and his own future. Judging by the Nova Scotia results, Hon. F. B. McCurdy will not have easy sailing in Colchester. Colchester was carried by the farmers in the provincial fight. Altogether Mr. Meighen has a couple of anxious months ahead. The outlook ahead is enough to daunt one with less vigor and less courage.

Imperial Press Congress

Just at present Ottawa is chiefly interested in the coming Imperial Press Congress. In addition to the meetings of the conference itself, which promise to be of more than passing interest there are a whole series of functions and fetes, which so delight the heart of Ottawa, and this at a time when such events are not usually looked for.

It is a heartbreak to try to do business with Ottawa departments these days. All gocernment offices close at four o'clock, and there is no overtime. There is a grand scramble as soon as the clock ticks four and the chances are that the man you are looking for has slipped away ten to four. Then follows Ottawa's famous Sparks Street and Plaza parade. Fifth Avenue has nothing on riots of colors, gaiety of frocks and variety of costume.

Collection of Taxes

There is just one man in Ottawa who never seems to cease work, that is R. L. Breadner, commissioner of taxes. There is no end to taxation, so it is perhaps fitting that Mr. Breadner keeps up his eternal vigil. There is an all round tightening up in the enforcement of the act. Last month, he tells me, he prosecuted sixteen people for not making returns. He was successful in every case. The boast of the department, indeed, is that it has not yet lost a prosecution. When income taxation was first proposed, Mr. Breadner told Sir Thomas White it would take five years to build up an organization which would be at all efficient. It is now only three years since the income tax was first introduced, so that the commissioner of taxation naturally is well satisfied with the results. In two more years he claims he will have such an organization completed that, few, if any fish, will be able to slip through the net.

Certain Increase in Railroad Rates

There is much interest in Ottawa in the official announcement from Vancouver, made there by Hon. J. D. Reid. minister of railways and canals, that the Canadian National lines will accept the schedule of wage increases for railwaymen granted by the American Railway Board. There would seem to be no alternative for the government—having accepted all through the war the McAdoo award. However, incheased wages makes certain a jump in railway rates, both passenger and freight, the hearing for which will be heard shortly by the Railway Commission. Increased rates means increased cost of living and there you go.

In a statement made in the house, Hon. Dr. Reid pointed out that the wage bill for the Canadian National Railways—this was without the Grand Trunk—was in 1919 $73,000,000, having owing to the McAdoo awards, jumped from $54,000,000 in 1918. The minister made the rather startling statement that out of every dollar earned seventy-eight cents passed directly by way of wages to the employees. He also added that in 1914, the average wage per year of the railway employees was $700, and in 1919, on the National Railways, it was $1,447. The new award will increase these figures and for all this the poor public will pay.

Action by the Department of Trade and Commerce in regard to the increased freight rates between Halifax and St. John and West Indies points have been deferred pending the return to Ottawa of Sir George Foster, minister of trade and commerce. Some time ago the department had an application from the steamship companies concerned asking for an increase of 10 per cent. in the rates between points on this route. Now a protest against the increase has been received from St. John, N.B., city council, and it is expected that the city council of Halifax will join in opposing the increase. The matter will stand over, in any event, until Sir George Foster returns from his trip down the St. Lawrence.

Five Million for Highways

Five million dollars will be spent this year in making better the main highways of the country through federal and provincial grants. Of this amount, the Dominion governmeht will contribute two millions and the provincial governments three. This is the first year in which the road money has been available, and in view of the time taken in preparing plans the initial year's outlays will not be so heavy as in some succeeding years.

The improvement scheme, however, is general. Before the Dominion government makes any grant for the purpose the provinces have to file general plans, and every one of them, from coast to coast, has done so already. The detailed plans also need approval by the Dominion government, and this has been done in several instances, and work is already under way. While the provinces may improve whatever roads they choose to, the Dominion grant of 40 per cent. of the cost is restricted exclusively to main or trunk highways.

Messrs. W. E. Scott and Russell Wilson, who have been in the British Isles acting as a Selection Committee of the Soldier Settlement Board of Canada, have returned to Ottawa. They held eighty-three sessions in many parts of Great Britain and Ireland, and a large number of men who wish to settle on farms in Canada appeared before them.

Duplication in Income Taxes

Methods to obviate the duplication of income taxation are receiving consideration from the minister of finance. The present system is admitted to involve considerable hardship. In some provinces the individual is called on to pay three income taxes—federal, provincial and municipal. Two sets of income taxes is an ordinary process. There are hopes that, by means of negotiations with the different provinces, some understanding may be reached whereby income tax may suffice, this tax being under the auspices of the federal authorities. Some compensating process for the provinces will be necessary, and taxes on land values open up one possible avenue. Investigations which have been made are not favorable to the land tax as a federal institution, but as one operated by the provinces, if they are so disposed, the outlook is more favorable. Where the federal tax would be, inevitably on one common basis, such a tax, imposed by the provinces, could be governed by local conditions.

International Association of Fire Engineers

Many Canadians Attend Large Convention in Toronto—President Kenlon of New York Suddenly Resigns—Manual on Fire Fighting Presented—Adequate Fire Fighting Force Necessary to Efficiency

FOR the third time within two years a large international body engaged in fire preventive work held its annual convention in Canada, when the International Association of Fire Engineers met in Toronto, July 26-29. The meeting was scheduled to close on July 30, but business was completed on Thursday. In May, 1919, the National Fire Protection Association met in Ottawa, and last August the Fire Marshals' Association of North America held its convention in Toronto. While all three organizations are mainly American, they include many Canadians in their membership, the work of the National Fire Protection Association, especially, being international in scope. Once before, in 1894, the International Association of Fire Engineers met in Canada, in Montreal.

About 2,000 fire chiefs and other members attended the Toronto meeting this week, a special train bringing the delegates from New York and the surrounding district. Special features were the exhibits of fire fighting apparatus at the Canadian National Exhibition grounds, Toronto, where the meetings were held.

President Resigns

The president, Fire Chief Kenlon, of New York, resigned immediately upon his arrival in Toronto, because of the fact that the executive committee supported Fire Chief William Russell, of Toronto, who had charge of local arrangements, in his selection of an officiating clergyman not favoured by Chief Kenlon. The resignation was accepted by a vote of the delegates. It is understood that differences in policy, which arose between the president and the executive during the past year, are really responsible for the resignation of the former. The vice-president, Chief Healy, of Denver, Col., presided in place of Chief Kenlon. The other members of the executive committee are: Second vice-president, Chief Reynolds, of Augusta, Ga.; acting secretary, Chief Hoey, of New York; treasurer, Chief Carter, of Camden, N.J.; Chief Bywater, of Salt Lake City, Utah, Chief Magee, of Dallas, Texas; and Cheif Armstrong, of Kingston, Ont.

Pumping engines operating without any hydrant pressure were demonstrated on the water-front. Among the companies exhibiting engines were Seagraves, Republic, American La France, Ahren-Fox and Waterous. Chemical extinguishers, smoke masks, waggons, hose, life saving devices and other apparatus for use by fire departments and by private concerns were shown in a building set aside for this class of exhibits.

Manual on Fire Fighting

Advance sections of a new manual on fire-fighting in all its phases were distributed to the visiting fire chiefs. These sections, which are in the form of pamphlets, deal with, among other topics, the "Uses of Automatic Sprinkler Equipment," "Fires in Theatres," "Factory [illegible]," "Fires in Frame Tenements," "Fires in Department Stores," "Fires in Non-Fireproof Tenements, [illegible] and Apartment Houses." They are the work of various committees appointed for the purpose by the association. When completed, the entire work will fill a volume and will be almost encyclopædic in its scope. A paragraph from the [illegible] on apartment house fires advises the [illegible] when illuminating gas is escaping, not to [illegible] with streams of water, but to [illegible] and take necessary measures to [illegible] off the flow of gas. Otherwise, the escaping gas may [illegible] injure the firemen who inhale it.

After the registration of delegates on [illegible] a welcome to Toronto was extended by Mayor T. L. Church. Chief S. [illegible], of [illegible] replied. Chief Kenlon, in presenting his resignation, stated that there had been much [illegible] should be [illegible] some definite [illegible] position to [illegible] approved by the [illegible] the report presented by Chief Healy [illegible] dent, on this subject, [illegible] lish hard and fast [illegible] varying conditions.

Business Sessions

Chief Healy, in this report [illegible] the first presented at the business session, which commenced on Monday afternoon, advised the appointment of a fire commissioner to have full charge of the department and to be answerable only to the mayor. [illegible] in connection with rules to be observed by the [illegible] and the authority of the chief over his subordinates [illegible] are proposed in the report.

Fire Chief Wm. H. Murphy, of Philadelphia, read a report on the "Organization and Strength of Companies." Too many defects are due, he maintained, to the undermanning of fire departments, which should always have, after allowing for absences, a sufficient staff. The strength necessary for an average mercantile district, where there is a considerable life hazard, he defined as follows: [illegible] combination pump and hose wagon, 8 men; [illegible] pump and hose wagon, 9 men; tractorized steamer and hose wagon, 10 men; hose company, 8 men; high-pressure hose wagon, 11 men; engine company, capable of operating two streams, 7 men, with extra drivers [illegible] truck company, serving [illegible] life-saving and other service, [illegible] men; [illegible] company, [illegible] men; water tower company, [illegible] men; rescue squad, 11 men.

Other Reports Presented

The third report was by Fire Chief [illegible] of Norwich, Conn., on Fire Department [illegible]. This was followed by one on Drill Schools [illegible] and Training, by Chief John C. Moran, of Hartford, Conn., who [illegible] the best methods of [illegible]. These four reports were [illegible] [illegible] committee [illegible] vention. The [illegible] Manual [illegible] Building [illegible] partments [illegible] Lowther [illegible] by Chief [illegible] tions of [illegible] Baltimore, [illegible]

The [illegible] [illegible] [illegible] tive [illegible] [illegible] [illegible] [illegible] 25 Canadians [illegible] of the [illegible] come for the principal purpose of attending the convention of the Dominion Association of Fire Chiefs in St. Thomas, Ont., next week.

A proposal that all fire insurance agents be licensed, and placed to some extent under the control of the local fire chief, was discussed and received considerable support, although no action was taken. Incendiarism, it was pointed out, is fostered by over-insurance.

Danger of Incendiarism

John G. Gamber, president of the Fire Marshals' Association of North America, delivered an address before the convention, describing in a general way the work of a fire marshal. He said in part:—

"During the last year incendiary fires have been few. Business has been too good for incendiarism because of the high price levels. I need hardly tell you there are hundreds and thousands of firms and individuals who cannot stand a sharp break in prices. Their profits are built on inflation. They include many factories which were equipped during the war or since and thrived because commodities of every sort have brought unheard of prices. They include the speculating profiteers, who have hoarded the necessities of life on a rising market, despite the scorn that was heaped upon them.

"Many merchants are said to be overstocked also, and we know that warehouses are stocked to bursting with food and clothing. But information trickles out that speculators have overplayed their game. They will be victims of their own greed and will be obliged to disgorge at a loss. But will they? Fire insurance for a year past has been written on inflated valuation and insurance companies are frankly disturbed. Let us prepare to meet the emergency. Every suspicious fire should be scrutinized more closely than ever before. Conservation must be encouraged and the prison doors left open for those deserving them."

Election of Officers

The election of officers, held on July 29, resulted as follows: President, Fire Chief Healy, of Denver, Col.; first vice-president, Chief Reynolds, of Atlanta, Ga.; second vice-president, Chief Ringer, of Minneapolis. The voting for the office of second vice-president, for which there were four nominations, resulted as follows: Ringer, Minneapolis, 199; Bywater, Salt Lake City, 141; Armstrong, Kingston, 41; Houston, Cincinnati, 7. J. J. Mulcahey, of New York, was elected secretary, and Peter Carter, of Camden, N.J., was re-elected treasurer.

ONE FRATERNAL IS ACTUARIALLY SOLVENT

Nine Fraternals Comply With Dominion Regulations—Eight Others Fail to Do So, and Can Only Collect Premiums on Business Already in Force

BUT of seventeen fraternal insurance societies doing business in Canada, eight have now been prohibited from soliciting new business. One has proved itself to have adequate reserves, and the remaining eight have been granted conditional licenses, having shown that their rates for new business are sufficiently high. This information has just been given out by G. D. Finlayson, superintendent of insurance, Ottawa.

The amendment to the Dominion Insurance Act, 1917, representing fraternal benefit societies, passed at the first session of parliament in 1919, came into force on the 1st of January, 1920. The principal effect of this amendment is to bring within the jurisdiction of the Insurance Act certain fraternal benefit societies which have heretofore been exempt from its provisions. Foreign societies, heretofore operating in Canada under provincial jurisdiction, are hereafter subject to the Insurance Act. Many of these societies were actuarially insolvent. Some were not collecting adequate rates even from new members.

The amendment to the act provides that these foreign societies shall be entitled to a license thereunder provided they can furnish certificates of qualified actuaries that they are actuarially solvent. If a society cannot furnish such a certificate, and if it has operated in Canada prior to the coming into force of the act, provision is made for a conditional license, renewable until the year 1925, if it can establish to the satisfaction of the department that the contributions payable by new members are sufficient to provide for the benefits promised. Such license, however, cannot be continued beyond 1925, unless the society is by that time actuarially solvent.

Seventeen Societies Affected

The foreign societies heretofore transacting business in Canada which are affected by these provisions are the following: The Brotherhood of American Yeomen, Association Canado-Americaine, The Catholic Fraternal League, The Catholic Mutual Benefit Association of New York, The Catholic Order of Foresters, The Knights of Columbus, The Knights of Pythias, The Ladies' Catholic Benevolent Association, The Maccabees, The Modern Woodmen of America, The Polish National Alliance, The Royal Arcanum, The Order of Scottish Clans, The Western Mutual Life Association, The Women's Benefit Association of the Maccabees, The Women's Catholic Order of Foresters and the Workmen's Circle of New York.

Of these societies, one, The Knights of Columbus, has obtained an unconditional license based on a certificate of actuarial solvency.

Eight societies, Association Canado-Americaine, The Ladies' Catholic Benevolent Association, The Catholic Order of Foresters, The Macabees, The Royal Arcanum, The Women's Benefit Association of the Maccabees, The Workmen's Circle and the Western Mutual Life Association, have obtained conditional licenses based on the adequacy of rates charged new members, such licenses, however, to be inoperative after the year 1925, unless the societies are then actuarially solvent.

Others Cannot Write New Business

The other societies, Brotherhood of American Yeomen, Catholic Fraternal League, Catholic Mutual Benefit Association of New York, Knights of Pythias, Modern Woodmen of America, Polish National Alliance, Scottish Clans and Women's Catholic Order of Foresters, have failed to comply with the requirements of the Act, and are therfore prohibited under the Act from soliciting new members in Canada. They are permitted to continue the collection of premiums in respect of certificates issued prior to January 1, 1920, but these certificates have no protection furnished them under the the Insurance Act.

In the case of all the societies licensed, deposits are required to be maintained to cover in full the societies' liabilities in Canada, under certificates issued after January 1st, 1920. No deposit is required to be maintained in respect of the liabilities under certificates issued prior to that date.

Representatives of the societies which have not obtained licenses are subject to the provisions of the Criminal Code in the event of their soliciting new members in Canada.

COBALT ORE SHIPMENTS

Shipments of ore, in pounds, from Cobalt Station for the week ended July 23, 1920, are as ,follows: Coniagas 65,998; McKinley Darragh, 83,657; Northern Customs, 96,800; LaRose, 87,400; O'Brien, 129,795; total, 403,650. The total since January 1, is 13,394,787 pounds, or 6,697.39 tons.

The Provincial Bond Company was recently incorporated to take over the assets and business of the Ontario Bond Co. Kent Bldg., Toronto, and will handle municipal, government, provincial and industrial bonds, as well as high grade preferred stock.

CROP FINANCING A PROBLEM FOR BANKS

WITH an unusually large crop and high prices now practically assured, the credit situation amply justifies the action of the banks in strengthening their position in preparation for the crop moving period. The situation is further complicated, at least in the United States, by the freight congestion, which may mean that bank credit may require to be extended for a longer time than usual. The National Bank of Commerce, New York, summarizes the position in a circular, issued on July 21, as follows:—

"The crop moving season, during which the country's credit requirements reach their maximum intensity, is now close at hand. Because of the difficulties of transportation it may be expected that the volume of credit needed this year to finance crop marketing will be larger than usual. While the traffic movement has improved slightly, sufficient relief can hardly be expected to the extent necessary to permit of the clearing away of existing congestion and the resumption of a normal movement of [illegible] staples in the fall. The crops, to an unusual extent, may have to be held this year. Recent experience has demonstrated fully the effect of any interference with orderly [illegible] shipments in tying up an enormous volume of credit.

"This prospect enhances the importance of the credit situation which, during the current period of June 15 to July 15, has experienced no [illegible] from the [illegible] of the past several months. Since last November, the federal reserve institutions and member banks have been seeking to curtail non-essential borrowing, to limit [illegible] commitments and to reduce gradually the [illegible] credit. In the former of these aims they have in large measure been successful and there [illegible] of the underlying soundness of the present credit [illegible]. There has thus far, however, been [illegible] the aggregate volume of credit outstanding. The effect [illegible] simply limited further credit [illegible] credit at the beginning of July [illegible] at the close of 1919. The failure [illegible] liquidation before the [illegible] demands, has in large measure been due to transportation difficulties which have restricted the commodity movements and occasioned the [illegible] stringency which became pronounced earlier in the year."

BRITISH LIFE COMPANIES IN CANADA

BRITISH fire and general insurance companies have always played a leading part in the Canadian field. The life companies, on the other hand, have [illegible] and have been losing ground as compared with the Canadian and United States companies. [illegible] that there is no [illegible] reason for this is presented by "The Review," an insurance weekly, of London, England. "In our view," says the article, "the amount of business done by British [illegible] [illegible] [illegible] their [illegible] world. [illegible]

"[illegible]

and American companies in competition for Canadian life business.

"The Review" quotes the following expression of opinion from the manager of one of the large British life companies in Montreal: "British companies do not get more life insurance business because they do not go after it as Canadian and American companies do. British companies are content with an annual increase of about 12½ per cent. British companies that do a life and fire business prefer to push the latter as more profitable. The Canadian Insurance Act prevents outside companies doing two classes of business in Canada. An exception is made of companies that were doing both fire and life insurance prior to the passing of the new act."

The executive head of one of Canada's big life insurance companies also undertook to explain why British companies play such a small part in the life insurance business of Canada. He said: "It is due chiefly to the fact that they do not adopt their methods to suit the Canadian field. They get business at home in a rather desultory way, not having specialized sales forces, as in America, where the agents of the most vigorous companies write insurance and do little else. The consequence is that the British companies have been left far behind. I do not think Canadian or American companies on the whole paid larger profits. Indeed, I know of some British that do better in this respect than these of this continent. The British life companies seem to depend on their reputation to place policies, but this is not working out as it does in the fire business. There seems to be little chance now of the British companies catching up even if they should desire to do so."

THE DEFEAT OF MONEY BY-LAWS

PROPERTY owners' hostility to increased capital charges is echoed by the "Vancouver World's" comments upon the defeat of ten money by-laws, already mentioned in these columns. The "World" says:—

"There is no mistaking the meaning of so comprehensive a verdict. Had one or two of the by-laws passed, it might have been possible to ascribe to the ratepayers a disagreement with the authorities respecting the policy involved in the submission of those that were rejected. As it is, the property-owners have served notice, not for the first time, that until the basis of taxation is broadened, so that some part of the burden of the upkeep of various public utilities is borne by those who derive direct benefit from them, they do not propose to permit it to be increased, so far as they are able to prevent it.

"The returns may indicate even more than that. Time was when the property-owners voted for money by-laws as a matter of course and with as little discrimination in casting their affirmative ballots as they showed when they voted so overwhelmingly in the negative. In those days many owners held their property for speculative purposes, and almost all alike regarded a rise in property values as an unmixed blessing. There was little complaint that valuations for taxation purposes were too high, there was more than one agitation for a general raising of the level as the difference between the assessed and the market value, as settled by actual sales, tended to restrict realty operations. More schools, more paved streets, more improvements generally, seemed to have the effect of attracting population and so raising selling prices. The cry was "progress," and anything that appeared progressive was pretty sure of the sanction of the people who, in the end, would have to pay the bills.

"Since then certain economic discoveries have been made and property-holders have found that a paved street may be more of a liability that an asset to the lot saddled with the frontage tax, and that it depends on the commercial and industrial soundess of the community much more than on its educational and other instittuions, whether property pays or not. Having learned this it becomes a question whether a minority that looks primarily to its own direct interests, may not always be large enough in the future, to deny to the citizens generally improvements in civic services which are imperatively needed, except in so far as these can be provided out of revenue. Should this prove to be the case, it follows that the revision of the scheme of local taxation will also have to involve a revision of the scheme of popular control of capital expenditures.

"That things have come to this pass, that this sharp, and formerly almost negligible, opposition of the interests of those who pay for and those who make use of civic utilities has arisen, is the fault, not of the aldermanic board of Vancouver, but of the government and legislature of British Columbia. Proposal after proposal has been taken down to Victoria session after session, only to be rejected without any workable substitute being suggested. Only last year Premier Oliver asked a large meeting of representative ratepayers to refrain from reprisals, at least until a government commission had examined the situation and found the remedy. Vancouver waited expectantly and was rewarded with powers to impose two unpopular levies that the government feared to impose itself and which, even had the powers been exercised, would have been totally inadequate. This vote is the comment of the ratepayers on the ineptitude displayed at James Bay."

The statement that a maximum price for bituminous coal will be fixed in the United States, does not greatly encourage the Canadian consumer. We have had some experience with price-fixing here.

* * *

A report of the Dominion Bureau of Statistics showing the quantities of food in cold storage as at June 1 indicates increases in almost all commodities as compared with last year. This, coupled with the excellent prospects for production in 1920, explains the substantial reductions which are taking place in the prices of food products.

* * *

J. J. Morrison, secretary of the United Farmers of Ontario, says that if labor will help reduce the tariff, the farmers will endeavor to bring about the eight-hour day. Such a programme might be successful politically, but as economic measures they are not consistent. The lower tariff would reduce prices and production costs, but shorter hours will increase them.

* * *

The Nova Scotia Liberal government was returned to power in the election held on July 27. This is the first Canadian administration to succeed at a general election since the armistice, the war-time governments of Ontario, Prince Edward Island and Manitoba all having failed to secure a majority at the polls. The new parties made substantial gains in Nova Scotia, however, labor securing 5 seats and the farmers 7, in place of none before. The Liberals have 30 and the Conservatives 1 seat in the new house, compared with 32 and 11, respectively, in the former legislature.

* * *

"The feeling that the summit of high prices has been reached continues to depress certain markets and to exercise a restraining influence on buying," says the July "Review," issued by Barclay's Bank, London, Eng. "Even in the retail trade, there is evidence that purchases are being deferred for lower prices and that an increasing number of buyers are, for the moment, refusing to purchase anything they can do without. On the other hand, sellers are not inclined to cut prices where this step can be avoided, and it results that in many markets quotations are nominal with little new business passing." The bank points out, however, that "it is difficult to see anything in prevailing economic conditions, either at home or abroad, which justifies the assumption that a drastic and permanent fall in general prices is at hand."

Exports

A special Department of this Bank is devoted to the interests of the foreign business of its customers.

Exporters and others having business relations with foreign countries are invited to avail themselves of the very complete information which has been gathered by the Bank's Foreign Department. This may be done through any one of the Bank's many branches.

PERSONAL NOTES

R. H. Coats, Chief of the Federal Statistical Department, has been appointed to the Statistical Commission of the League of Nations, and leaves for Europe in September to participate in meetings of that commission.

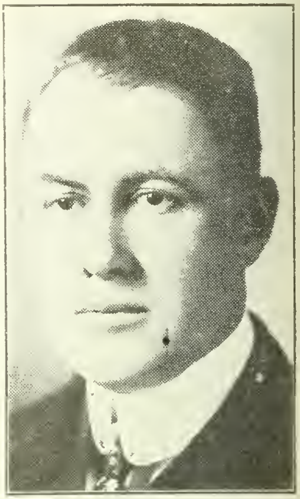
David Price, treasurer of the city of Belleville, Ont., handed in his resignation to the civic finance committee last week, and the same was duly accepted. Mr. Price, who is eighty years of age, and who has held the position of treasurer for nearly twenty years, will be succeeded by **E. P. Frederick**, formerly auditor and for some time acting treasurer of the city.

Sir John Aird and **Sir Thomas White** were appointed vice-presidents of the Canadian Bank of Commerce at a meeting of the board of directors on July 23. The former has been general manager of the bank since 1915, and the latter was elected a director last November. Sir Alexander Mackenzie, of Dio de Janeiro, president of the Brazilian Traction, Light and Power Company, was also elected a director. The promotion of Sir John Aird, who continues to hold the position of general manager, comes after 41 years' service with the bank, he having entered its employ in November, 1878, as a shorthand writer in the general manager's office. From 1888 to 1890 he was manager at the Seaforth branch. In 1890 he became assistant manager at Toronto, in 1899 manager at Winnipeg, in 1911 assistant general manager, and in 1915 general manager. His steady rise through the different grades of the bank's service is considered an encouragement to the younger men, as well as an achievement in itself.

Sir John Aird

There has been no vice-president of the Bank of Commerce since the death of Mr. Z. A. Lash, and either Sir John Aird or Sir Thomas White might be considered successor. Sir Thomas has made a number of other financial connections since retiring from the position of minister of finance, the most recent being his election to the board of the Brazilian Traction, a further evidence, along with the election of Sir Alexander Mackenzie to the Commerce Board, of the intimate relations between the two corporations. Sir Alexander has been in Toronto for some weeks in preparation for the annual meeting of Brazilian next week. His election to the Commerce board at a time when the bank is planning further branches in Latin America may presage its entrance into Brazil at an early date. Sir Alexander is one of Canada's international financiers, dividing his time between Toronto, Rio and London.

Simons, Day & Co., Chicago, have opened a branch office at 307 Royal Bank Building, Toronto. The firm deals in grain, provisions, cotton, coffee, stocks and bonds.



W. H. Van Winckel, of New York, vice-president of Chemical Products, Limited, of Trenton, Ont., is one of the prominent figures connected with the chemical industry on this continent. He was formerly sales manager of the Dow Chemical Company of Midland, Mich., and more recently he was vice-president of Aniline Dyes and Chemicals, Limited, of New York. The other members of the Chemicals Products, Limited, board are president and general manager, R. J. Copeland, Toronto, president of the Copeland-Chatterson Company, Limited, and vice-president of the Thermos Bottle Company; vice-president, J. C. Graves, Saginaw, Mich.; Henry Cockshutt, Brantford, Ont.; D. M. Sanson, Toronto; T. E. O'Reilly, Toronto; T. P. Birchall, Montreal; and R. J. Cluff, Toronto. The actual direction of the plant is in the hands of A. H. C. Heitman, who for ten years was in the research division of the Parke, Davis Company, Detroit.

CANADIAN BUSINESS FAILURES

The number of business failures in the Dominion, as reported by R. G. Dun and Co., during the week ended July 23, 1920, in provinces, as compared with those of previous weeks, and corresponding weeks of last years, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
July 23	4	1	2	0	1	2	0	0	0	10	12
July 15	4	4	2	0	2	1	0	0	0	13	8
July 9	6	7	3	0	0	0	2	2	0	20	8

Bradstreet's figure for the week ended July 22, 1920, is 13, compared with 20 in the previous week, 5 in the same in 1919, 13 in 1918, 18 in 1917 and 36 in 1916.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13¼ pm	13⅜ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.2650	$4.2750	....
Cable transfers	4.2750	4.2850	....

New York quotations of exchange on European countries, furnished by the National City Co., Ltd., Toronto, as at July 29, 1920, are as follows (all in cents per unit of foreign currency): Cable, London, 375, cheque, 374¼; cable, Paris, 7.68, cheque, 7.67; cable, Italy, 5.35, cheque, 5.34; cheque, Belgium, 8.20; cheque, Swiss, 17.10; cheque, Spain, 15.52; cheque, Holland, 34.35; cheque, Denmark, 15.90; cheque, Norway, 16.05; cheque, Sweden, 21.30; cheque, Berlin, 2.33.

RAINFALL OF INESTIMABLE VALUE IN THE WEST

Nearly all Parts of Prairie Provinces Benefit by Abundant Moisture—Storm Damage is Comparatively Small—Saskatchewan Wheat Yield Reduced by Drought, But Rainfall Prevented Absolute Ruin

SINCE the last crops reports were published in *The Monetary Times*, the western situation has changed materially and the outlook is much more cheerful in some parts. There have been beneficial rainfalls of inestimable value in nearly all parts of the west, and although in some places the storms were very heavy, the damage by hail, wind or lightning is comparatively small. In Alberta, the Red Deer, Lethbridge, Manton, MacLeod and Carmangy districts experienced heavy downpours. Grains were not suffering in these places, because about a week before, as already mentioned in these columns, there had been a fairly general rain in the province, but nevertheless the additional moisture was welcomed.

In Southern Saskatchewan heavy rains have fallen, which, according to experts, arrived just in time to save thousands of acres from ruin. While the rainfall varied considerably in different districts, it is believed that the dry spell has been broken. There are still some parts, however, which are badly in need of moisture. A rain, said to be worth millions of dollars to the growing crops, has fallen in Manitoba, extending to and beyond Brandon. Other districts also received benefit of this nature.

Storm Damage in Saskatchewan

Southern Saskatchewan where the storm was the heaviest is the only place, as far as known, where there was damage to any extent. Frobisher, Alameda, Benson, Lampman, Kronau, Edgeley, Edenwold and Avonhurst districts were affected the most, barns and crops in those districts being compleaely wrecked by winds and hail. In the first two places two deaths and many injuries are reported. At other points outside of those mentioned, the rain was so heavy as to result in the grain being lodged. Damage in the whole of Southern Saskatchewan is conservatively estimated at $200,000. This may be doubled in the final estimate.

British Columbia Fruit not so Good

Fruit crop conditions in British Columbia are not nearly as good as they were reported some weeks ago, the sudden change from cold to heat, following a late spring, having worked havoc among the berry plants, according to J. A. Grant, British Columbia fruit commissioner, following an inspection trip of the lower fruit lands of British Columbia.

The shortage of berries is explained by the fact that the berry crop will only be 60 per cent. of last year's crop, and that the growers can get as good a price from the by-products factories as they are getting from the prairie jobbers, with the result that tons of the berries never reach the prairie markets.

A prominent Ontario fruit grower estimates that the damage done to fruit in the Niagara district by last week's storm will aggregate not less than $500,000. The peach and apple crops, he said, suffered the most severely.

Saskatchewan Yield Reduced

Despite the valuable rainfall in the province of Saskatchewan last week, farmers have incurred very heavy losses in wheat as a result of the scorching heat and drought of the preceding ten days or so, according to Hon. Geo. Langley, who estimates the decrease in yield from this cause at between fifty and seventy-five million bushels. The minister of municipal affairs has returned from an extensive tour of the northern part of the province. He stated that with the information he already had of conditions elsewhere, and from what he had seen during his journey by rail and auto, he had formed the opinion that, in consequence of the drought, the wheat yield of Saskatchewan would be less from fifty millions to seventy-five millions bushels than was promised at the beginning of July.

In other places, the Minister had seen the crop ruined beyond redemption. "In the district fifty miles east, west and south of Saskatoon and twenty-five miles north, the average yield," said Mr. Langley, "could not possibly be greater than from five to eight bushels to the acre, and in the other parts visited where the crop was much more promising, such as the district north of Battleford, towards Turtleford and the Jackfish country, where the crop was really magnificent, I saw scores of fields where the young ears had been scorched by the sun, and will likely entail a reduction in yield of from 20 to 35 per cent.

"The recent ample rains would not to any material extent assist the above estimate," continued the Minister. "Had the heat continued for four or five days more the loss would have been more than double what it is above stated. The farmers have been saved from this calamity by the rains. The oat crop, which over large areas had become stagnant and was being dried up, will be greatly benefitted by the rain and will show a large increase, both in the threshable grain and bulk fodder."

NEW COMPANIES IN MANITOBA

Every sort of business in Manitoba is on the increase. More business has been done during the past eight months than during the whole of 1919, according to the books kept in the provincial secretary's office, showing new companies incorporated and increases in capitalization made by old firms. Letters patent and licenses were issued for companies having an aggregate capitalization of $60,000,000 during the eight months' period. The total for the whole of last year was $57,000,000.

METROPOLITAN LIFE AGENTS MEET

Representatives of the Metropolitan Life Insurance Co. met in Vancouver on July 20th at a company convention. Those present from head office included Haley Fiske, president, and F. O. Ayres, R. L. Cox, K. Frankel, James E. Kavanagh and Dr. Lee. Mr. Fiske described the enormous scope of the company's work, stating that it had a policy on the life of every eighth man, woman and child in Canada, and had $60,000,000 invested in this country.

CHARTERED ACCOUNTANTS OF BRITISH COLUMBIA

At the fifteenth annual general meeting of the Institute of Chartered Accountants of British Columbia, held in Vancouver, many items of interest to the profession were discussed. The report of the retiring president, W. S. Buttar, dealt with, amongst other matters, the proposed new by-laws and regulations, the raising of the membership subscription, the holding of the annual examinations in December instead of May, as heretofore, and the alteration of the end of the institute's financial year to 31st January instead of 30th June.

The following members were elected to serve on the council during the ensuing year, viz.: A. L. C. Chalk, H. C. Chiene, J. D. Forsyth, H. D. Christie, A. H. Edwards, A. F. Griffiths, G. F. Gyles, G. E. Winter and J. B. Woodthorpe.

G. E. Winter and G. Tansley were elected to represent the institute at the meeting of the Dominion Association of Chartered Accountants, to be held in Toronto in September next, and it was decided to invite the members of the Dominion Association to visit Vancouver in 1921 as the guests of the British Columbia Institute.

At a council meeting held subsequently the following officers were elected: President, J. B. Woodthorpe; vice-president, G. F. Gyles; secretary-treasurer, H. D. Christie.

BANK BRANCH NOTES

Five New Offices Announced During Past Week—Merchants Bank Will Erect Branch at Regina—Other Buildings Contemplated

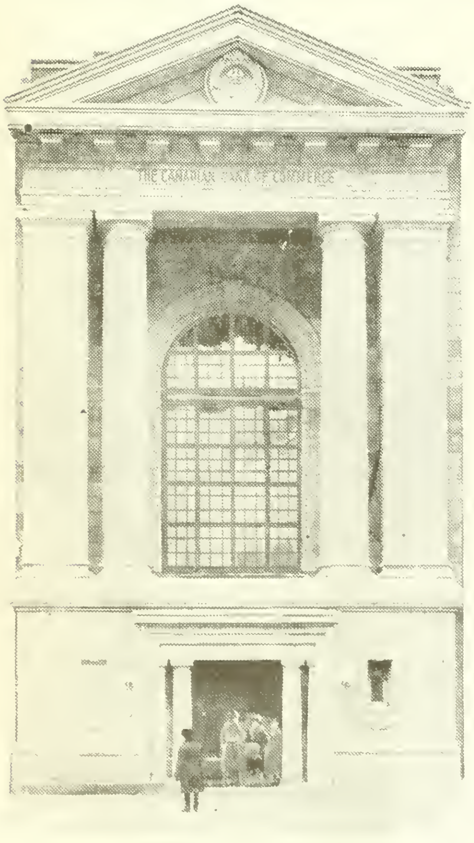
During the past week *The Monetary Times* learned of the opening of several new branches of Canadian chartered banks as follows:—

Banff, Alta. (C.P.R. Hotel)	Bank of Montreal
Ameliasburg, Ont.	Dominion Bank
Toronto, Ont. (685 Yonge St.)	Home Bank of Canada
Honeywood, Ont.	Home Bank of Canada
Horning's Mills, Ont.	Home Bank of Canada.

In connection with the opening of the above branches, L. G. MacHaffie has been appointed manager at the Banff branch of the Bank of Montreal. Hugh Hall is manager of the new office of the Dominion Bank at Ameliasburg.

S. D. Griffiths, who has been manager of the Union Bank of Canada at Barons, Alta., for the past year or so, has left that position to take up a new line of business at Boston, Mass. Mr. Ramsay, manager of the bank at Blackie, Alta., will succeed Mr. Griffiths.

The Bank of Montreal announces the following appointments: M. A. Johns, formerly manager at Grand Falls, Nfld., has been appointed manager at Curling, Nfld. C. Lonsdale, manager at Gaultois, Nfld., has been appointed his successor at Grand Falls, while A. R. Pye has been appointed acting manager at Gaultois.



BANK OF COMMERCE, PORTAGE AVE., WINNIPEG.
Opened to the Public, June 7th, 1920

W. A. Reid has been appointed acting manager of the bank's branch at Holstein, Ont. E. T. Lemaire has been appointed acting sub-agent at City Hall Square, Hull, Que. W. H. G. Phipps, manager at Curling, Nfld., has been appointed manager at Wolfville, N.S.

Proposed New Branches

The Bank of Nova Scotia has decided to erect a new building for its own use at Annapolis, N.S., and has purchased the vacant lot on the east side of Lower St. George St., for that purpose. Construction will be proceeded with as soon as possible. The building will be a one-story structure of brick or stone, and devoted altogether to the use of the bank.

The Standard Bank of Canada will shortly commence the construction of a new building for its branch at Coaldale, Alta. It will be situated on the best site in the village, on the corner facing the Lund store. The new building will be of brick and two stories high.

Permit has been granted to the Bank of Toronto to erect a bank building, which will be used as a new branch when constructed, at the corner of St. Clair Ave. and Christie St., Toronto, to cost $19,000.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended July 29, 1920, compared with the corresponding week last year:—

	Week ended July 29, '20.	Week ended July 31, '19.		Changes.
Montreal	$143,467,269	$114,909,507	+	$28,557,762
Toronto	90,091,603	77,592,038	+	12,499,565
Winnipeg	40,065,807	39,813,469	+	252,338
Vancouver	15,608,895	11,936,235	+	3,672,660
Ottawa	7,071,090	7,901,891	—	830,801
Calgary	7,265,252	5,791,112	+	1,474,140
Hamilton	7,279,492	5,806,973	+	1,472,519
Quebec	7,047,780	5,370,389	+	1,677,391
Edmonton	4,281,533	3,881,724	+	399,809
Halifax	4,422,472	4,680,765	—	258,293
London	3,308,991	2,155,547	+	1,153,444
Regina	3,374,742	3,551,472	—	176,730
St. John	3,610,058	2,889,518	+	720,540
Victoria	2,442,271	2,571,201	—	128,930
Saskatoon	2,028,502	2,258,015	—	229,513
Moose Jaw	1,600,916	1,518,043	+	82,873
Brantford	1,354,507	921,149	+	433,358
Brandon	820,353	858,738	—	38,385
Fort William	897,219	760,653	+	136,566
Lethbridge	574,848	1,047,149	—	472,301
Medicine Hat	430,445	416,028	+	14,417

Succession Duties in Ontario

The rates of Succession Duty having been increased at the recent session of the Ontario Legislature, we have prepared a Booklet entitled "Succession Duties in Ontario." This Booklet contains schedules of the new rates, together with a summary of the main provisions of the Act. For readers of *The Monetary Times* we shall be pleased to send a copy free on request.

Bank Loans and Deposits again Move Upward

June Bank Statement Reflects Expansion in most Accounts—Call Loans in Canada Decline, but those elsewhere are Increased—Loans to Municipalities nearly 50 per Cent. Ahead of Last Year

	June, 1919.	May, 1920.	June, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 605,927,027	$ 645,957,229	$ 659,622,583	+ 8.9	+2.2
Deposits after notice	1,139,569,570	1,229,073,515	1,243,700,977	+ 9.1	+1.1
Current loans in Canada	1,043,712,932	1,349,079,981	1,365,151,083	+30.9	+1.2
Current loans elsewhere	132,525,550	183,986,222	184,328,464	+39.3	+ .5
Loans to municipalities	52,349,349	73,901,635	76,410,676	+46.2	+4.1
Call loans in Canada	95,852,728	119,114,493	115,272,587	+21.1	—3.5
Call loans elsewhere	167,236,015	213,961,182	219,214,431	+31.2	+2.8
Circulation	222,712,991	235,085,179	238,088,555	+ 7.2	+1.3

THE above are the principal changes in the summary of bank statements to the Dominion government as at June 30th, 1920, compared with the statements for May and for June, 1919. It will be recalled that the May statement showed decreases in demand deposits, in circulation and in current loans outside of Canada. These accounts all increased in June. The reduction in call loans in Canada is continued, however.

No changes in authorized capital are recorded for the month, but additions have been made to other liabilities to shareholders as follows:—

Banks.	Capital subscribed.	Capital paid up.	Reserve.
Merchants	$1,332,800	$1,132,800	......
Union	....	270	......
Home	....	89	......
Provincial	....	....	$100,000
	$1,332,800	$1,133,159	$100,000

The Dominion government is rapidly using up its credit balance at the banks, the total having been reduced from $261,044,115 to $216,098,321 during May, and again to $183,913,852 during June. Balances due to the provinces increased during June from $20,691,300 to $23,955,524.

As the following thirteen months' comparison shows, the movement of savings deposits has been steadily upward, interrupted only by the 1919 Victory loan, while demand deposits have wavered considerably:—

	Deposits payable on demand.	Deposits payable after notice.
1919—June	$605,927,027	$1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,277,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977

The course of the deposit accounts during the past six years is shown in the following table:—

June.	On demand.	After notice.	Total.
1915	$349,057,351	$ 683,761,432	$1,032,818,783
1916	428,117,340	767,598,130	1,195,715,470
1917	449,689,670	900,510,552	1,350,200,222
1918	549,327,078	905,934,556	1,515,261,634
1919	605,927,027	1,139,569,570	1,745,496,597
1920	659,622,583	1,243,700,977	1,903,323,560

Deposits outside of Canada show the substantial increase of over $15,000,000 during June. Amounts due to banks in the United Kingdom are decreased from $9,534,525 to $6,792,662, those due to banks in Canada are slightly higher, while in the case of banks elsewhere the total is practically unchanged.

With the exception of gold in Canada, holdings of coin and notes increased, as the following table of changes for the month shows:—

Gold and sub-coin in Canada	—	$ 148,563
Gold and sub-coin elsewhere	+	914,245
Total	+	$ 765,682
Dominion notes in Canada	+	$1,647,111
Dominion notes elsewhere	+	287
Total	+	$1,647,398

Deposits with the minister of finance for the security of note circulation increased slightly, while those in the central gold reserve dropped from $108,050,000 to $100,400,000. Notes on other banks are decreased by $3,400,000, while holdings of cheques decreased by $8,600,000. Loans in Canada for the past thirteen months have been as follows:—

Loans.	Current in Canada.	Call in Canada.
1919—June	$1,043,712,932	$ 95,852,728
July	1,014,387,206	93,587,497
August	1,011,785,424	95,899,836
September	1,058,572,202	96,912,709
October	1,104,940,160	100,549,390
November	1,189,408,423	121,754,469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,030	128,233,310
April	1,347,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587

The following is the course of the principal loan accounts during recent years:—

June.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	$ 759,934,154	$ 39,273,120	$ 73,628,187	$124,604,875
1916	747,470,541	60,081,584	86,776,474	182,757,015
1917	839,355,782	93,150,083	76,085,220	159,309,133
1918	897,226,012	103,033,289	76,970,920	170,034,476
1919	1,043,712,932	132,525,550	95,852,728	167,236,045
1920	1,365,151,083	184,328,464	115,272,587	219,214,431

Balances due from banks in the United Kingdom have [illegible] during the month by $2,300,000, while those due from banks elsewhere have risen by over $11,000,000. Holdings

of securities show no notable changes. Advances to the provinces are slightly lower, while those to municipalities are increased.

The current loans in Canada continue to move upward, while call loans in Canada have been steadily reduced since January. Call loans outside of Canada have reached a new high record, as shown in the following comparison:—

	1917.	1918.	1919.	1920.

HOUSING LOANS IN MANITOBA

Federal and provincial appropriations for housing have been successful in their object of assisting people to build homes, according to Hon. Edward Brown, provincial treasurer. He announced on July 19 that no further funds will be available for suburban municipalities, as the remaining money will be needed to round off work now under construction, and to meet demands from outlying districts.

Out of $1,580,000 federal appropriation, and $1,000,000 provincial, only $250,000 remains, W. J. Ptolemy, deputy provincial treasurer, said. It is expected that further applications amounting to $150,000 will soon be received. In giving a rough estimate of the manner in which the money has been distributed throughout the province, Mr. Ptolemy quoted the following figures:—

Assiniboia, $1,230,000; Charleswood, $2,000; Fort Garry, $280,430; Killarney, $1,700; East Kildonan, $93,610; West Kildonan, $60,413; Morris, $1,200; Russell, $14,088; St. Vital, $50,028; Selkirk, $3,000; Transcona, $64,037; Virden, $27,800; Wawanesa, $3,500; Winnipeg, $400,000. Total, $2,231,807.

You Should Make a New Will—if

you have married, your family has increased,
members of your family have married or died,
your own circumstances have materially changed. (Some men make a new will every year.)

In any case, your estate and heirs should have the exact knowledge, business organization, experience, financial responsibilities and permanency of the UNION TRUST COMPANY which is sure to attend whenever your estate affairs need attention.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

DOMINION BANK HALF YEARLY STATEMENT

Several interesting points of progress are shown in the half-yearly statement of the Dominion Bank for the six months ending June 30. An item of significance is that of $2,624,423, "liabilities of customers under letters of credit," compared with $170,434 a year earlier. This is evidence of the expansion of the bank's foreign business during the past year through its new London and its New York connections. In the course of the year current loans advanced by almost $14,000,000, to $69,000,000, showing further participation in the country's business. Deposits went up by $6,700,000 to $102,852,000 in the course of the year. Total assets advanced nearly $17,000,000 to $140,000,000. Quick assets are slightly less than a year ago, owing to the greater demands for loans.

Taking the six months' period by itself, the profits were $664,729, compared with $610,048 in the same period last year, and $1,256,053 for the whole of 1919. Dominion government taxation, amounting to $60,000, was deducted, as against $30,000 a year ago, and provincial government's taxation $38,500, against $26,350. With a balance carried forward at the end of 1919 amounting to $495,707, there was available for distribution $1,061,936. Two dividends of $180,000 each were paid, the same as last year, and the balance carried forward is $701,926, compared with $640,201 one year ago.

A statement of the Sun Life of Canada for the first six months of 1920, shows that during that period nearly $53,000,000 new business was written and paid for, while in 1919, for the same period, $31,000,000 was secured.

GOVERNMENT CURRENCY

Dominion note circulation at the end of June, 1920, amounted to $292,016,290, compared with $309,142,651 at the end of April. Gold held by the minister of finance at the end of the month totalled $99,619,182, from which must be deducted $4,080,992, being the amount of reserve to be held on savings banks deposits, leaving $95,538,190 for the redemption of Dominion notes.

The following is the June statement of all government currency:—

BEAUBIEN AND CO. EXTEND SCOPE

Messrs. G. L. Beaubien & Company, stock and bond brokers, and members of the Montreal Stock Exchange, announce that a separate department for the selling of municipal, provincial and industrial securities will be established at the Quebec city branch, which office hitherto dealt in stocks only. When the Montreal office of the company was first established it was for stock purposes only, but later a bond department was added. The company's bond business has grown so lately, that it was thought necessary to establish a similar department at the Quebec branch. L. T. DesRivieres, who was formerly manager of the stock business at the Quebec office, will take under his care the new department.

COMMERCIAL UNION ASSURANCE CO.

The annual report of the Commercial Union Assurance Co., for the year 1919, some figures from which are given elsewhere in this issue, indicates a good year of progress. The net premium income was $68,784,245, an increase of over $6,000,000 as compared with 1918. The net premium income for the separate departments for 1919 are: fire, £6,032,826; marine, £855,925; accident, £5,362,159; life £854,950; life (West of England Life Fund), £7,981; life (Hand-in-Hand Fund), £133,778; life (Union Life Fund), £156,479; life (Liverpool Victoria Life Fund), £33,716; life Edinburgh Life Fund), £294,482. Consideration for annuities in the Commercial Union totalled $591,350 and interest from investments, etc., $6,326,820.

The position of the company has been materially strengthened by additions to the funds during the year. These now total $173,493,360. British government securities predominate among the investments. The profit and loss account shows the following results:—balance from 1918, £554,699; interest and dividends not carried to other accounts, £538,031; transferred from fire department, £300,000; transferred from marine department, £350,000; transferred from accident department £450,000, transfer and other fees, £1,096; a total of £2,193,827. The sum of £501,500 was paid out in dividends, and after deducting other items a balance of £682,363 is carried forward to 1920 account.

The Commercial Union has been writing business in Canada since 1863, two years after it was established, and at the end of 1919 had $150,827,965 of business in force in Canada, making it fourth in the whole list of fire insurance companies in Canada. The head office for Canada is in Montreal, W. S. Jopling being the manager.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Dominion government demand deposits of the Montreal City and District Savings Bank and the Caisse D'Economie de Notre-Dame de Quebec, which have been decreasing steadily for the past few months, showed a still further reduction in the June statement of those institutions of $197,793. This is a much larger reduction than in any month previously. Loans on bank stocks and other securities advanced some $280,000, while holdings of municipal securities were reduced by about $370,000. Miscellaneous assets also showed a decrease. Total assets of the two institutions at the end of the month were $60,164,108, and liabilities, $55,116,289, compared with $60,316,945 and $55,252,063 at the end of the previous months. Complete returns as at June 30, 1920, are as follows:

"Tested by the fires of two centuries"

Two Hundred Years Ago

A.D. 1720 **A.D. 1920**

IF time were made for slaves, the philosophy of time was made for Metaphysicians. We talk casually of aeons, and in the few years of the great war some of us seemed to live an eternity. So two hundred years are a speck in the history of the world; and in the development of insurance signify the growth from infancy to maturity.

The course of the London Assurance has been calm and steady, prosperous in itself and beneficial to those who dealt with it, and has not been marked by many exciting incidents or by lively controversy

When people speak of the "romance of business" they usually refer to startling vicissitudes, to millionaires who began with half a crown, and so forth. It would seem, however, there is a truer romance to be seen, if we have eyes of imagination to see it withal, in the mere steady persistence of a business institution through such a long period as this. As the mind travels down these two hundred years and notices all the changes in ideas, in manners, in habits, even in dress, and thinks of one institution going steadily on its course through them all, it surely perceives a romance in it all. There are many older, much older, institutions in our ancient Empire, but only a very few older institutions of business even in the ancient city of London. The London Assurance had flourished for nearly a hundred years before the first Rothschild was established in England. It has survived many political "revolutions," many great economic changes, and celebrated its Bi-Centenary on June 22nd this year

The progress of **The London Assurance** has been a steady forward movement since its inception, conducting its business at all times in a dignified, honorable manner

We cannot help but feel proud at this time, when we pause and realize that The London Assurance has weathered the storm of two centuries

So to-day one may look back over the pages of history with a feeling of approval and confidence

CANADIAN-AMERICAN FISHERIES CONFERENCE

Report Advocates Complete Reciprocity between Two Countries—Provision for Protection and Renewals of Resources

IMPORTANT recommendations are made in the report, made public on July 26th, of the Canadian-American Fisheries Conference, appointed to consider a settlement of outstanding fishery questions between Canada and the United States. The questions submitted and considered by the conference were: Privileges to the fishing vessels of either country in the ports of the other; rehabilitation and protection of the sockeye salmon of the Fraser River system; protection of the Pacific halibut fishery; fishing by United States lobster wellsmacks off Canadian coasts; protection of the fisheries of Lake Champlain; requirements imposed on Canadian fishing vessels passing through territorial waters of Alaska; protection of the sturgeon fisheries; protection of whales.

Abolish All Duties

On the first question the report traces the history of the controversy back over one hundred years. It expresses the belief that the question can never be permanently removed from the field of discord unless the markets of both countries are available to the fishermen of both on the same terms. The commissioners recommend that the Canadian duty on fish and fresh frozen fish, not including shell fish, be removed, and, with a view to assuring stability in the industry, that the two countries enter into an agreement by which such fish shall be admitted customs duty free from either country into the other, and that such arrangement remain in force for fifteen years, and thereafter until two years after the date, when either party thereto shall give notice to the other of its wish to terminate.

They recommend that Article 1 of the treaty of October 20th, 1818, be amended so as to make available in either country, to the fishing vessels of the other, the privileges covered by the instructions of the United States Secretary of Commerce to collectors of customs of that country, dated February 21st, 1918, and by the Canadian order-in-council, dated March 8th, 1918, in substance as follows:—

1. That the fishing vessels of either country may enter from the high seas any port of the other, and clear from such port back to the high seas and the fishing grounds.
2. That the fishing vessels of either country may dispose of their catches and purchase bait, ice, coal, nets, lines, oil, provisions and all other supplies and outfits in the ports of either country.
3. That the repairing of fishing implements in the ports of either country be allowed to the vessels of the other country.
4. That the fishing vessels of either country may dress, salt and otherwise prepare their catches on board such vessles within the territorial waters of the other country.
5. That the fishing vessels of either country may ship their crews and tranship their catches in the ports of the other country.
6. That the fishermen of either country may sell their catches in the ports of the other country, subject to the local tariff, if any.

To Rehabilitate Sockeye Salmon

With regard to the rehabilitation and protection of the sockeye salmon of the Fraser River, the commissioners express the opinion that a treaty or convention for the proper regulation of the fisheries should be entered into by Canada and the United States. Commisisoners should be appointed under this treaty to study the situation, inspect the hatchery operations, and also the sides of the river, to ascertain where slides which might bar the ascent of the fish might occur. They append a draft of a proposed treaty for the restoration and protection of the fishery, the adoption of which, subject to such modifications as responsible officers of the two governments may consider necessary, is urgently recommended.

Developing Canada's Wealth of Natural Resources

MINING, lumbering, farming, stock-raising, fisheries,—the fundamental industries on which all of Canada's varied activities of business are built—have received the practical co-operation of Bank of Montreal for more than a century.

IN 1920 our desire is as it was in 1817, to be helpful in every possible way in the development of every kind of Canadian business.

This co-operation extends through and beyond the large business enterprises to the men and the women who make those enterprises possible—to the miners, lumbermen, farmers, stock raisers, fishers, merchants, clerks, workers of every kind, to whom we are rendering an intimate, understanding, personal service through our Branches in every part of the Dominion.

Whatever your banking needs, consult our nearest Branch Manager and thus be in touch with our entire organization, which is working for the upbuilding of Canada.

Direct wire service maintained between Montreal, Toronto, Winnipeg, Vancouver, New York, Chicago and San Francisco.

CANADIAN-AMERICAN FISHERIES CONFERENCE

(Continued from page 26)

With regard to the halibut fishing industry on the Pacific coast, the commissioners recommend a close season for both the United States and Canada from the 16th of November to the 15th of February during a period of ten years. They suggest that the commissioners appointed to investigate the Fraser River fisheries be charged with supervision of the halibut close seasons.

The difficulty regarding lobster fishing off the Canadian coasts by United States fishermen was adjusted previous to the issuance of the report of the commissioners. This was also the case with that arising over requirements imposed on Canadian fishing vessels passing through territorial waters of Alaska.

Recommendations for the protection of the sturgeon fisheries, and a suggestion for an international conference to consider action designed to save the whale from extinction, are made.

SASKATCHEWAN BOARDS OF TRADE

Organization of the Saskatchewan Boards of Trade was completed at a meeting of representatives of the different boards of the province, held in Regina on July 21st. Over fifty boards were represented. The following officers were elected for the ensuing year: Thos. Reynolds, of Saskatoon, president; Major F. J. James, of Regina, vice-president; Charles Claire, Prince Albert, second vice-president; W. E. Dennison, of Assiniboia, third vice-president; Gerald Graham, of Saskatoon, secretary-treasurer. Members of the executive —J. P. O'Leary, Weyburn; J. Wood, Swift Current; Peter McAra, Regina; R. Farquharson, Moose Jaw; R. Barbour, Yorkton; G. G. Blackstock, Kindersley, and H. G. Dawson, Melfort. Battleford was not represented at the conference, and the executive member of that district will be appointed at a later date.

The proposed general increase of 30 per cent. in the freight rates was discussed at some length and a resolution that a thorough investigation be made for the purpose of ascertaining where increases were necessary was adopted. The meeting also decided to secure the services of an expert to take care of the interests of the province in all matters coming before the Railway Commission. Other resolutions were passed asking that the federal authorities provide that the provincial authorities handle the resources of their own territory; that the Hudson's Bay Railway be completed; that an investigation be made of the way transportation companies handle the exchange rates on imported goods; that a mail car be placed on the Kerrobert line; that the names of the various grades of wheat known under the Canada Grain Act as Manitoba grades should be changed to Canada Western grades.

Hon. Chas. Dunning gave an address on "Industrial Development Policy for Saskatchewan." An executive meeting was held, at which the assessment of the various boards was fixed on a scale according to the population.

WILL ENFORCE GAS SUPPLY

Companies supplying natural gas to Essex and Kent counties, Ont., will be forced to keep up the supply, regardless of rates and difficulties of production, according to orders issued on July 27th by Hon. H. Mills, minister of mines for Ontario. A conference of mayors and reeves with representatives of the companies will be held shortly to decide upon an equitable rate. The Union Gas Co., which sells gas to the Windsor Gas Co., the distributors, wishes to increase gas prices on the border from 30 cents to $1 a thousand. The company had declared that it would cut off the gas supply August 1st, following the refusal of the municipalities to pay the increase, and the decision of the governmnet was reached after an interview with representatives of the municipalities.

WHEN BENEFICIARY DIES BEFORE THE ASSURED

Life Insurance is Exempt from Succession Duties if Payable to Preferred Beneficiary, But is Taxable if Payable into Estate

WHEN succession duties can be collected on life insurance was the point involved in an important case decided on March 19, by the Supreme Court of Alberta. It was held that an insurance policy in favor of a wife who dies before the maturity of the contract, becomes, under the Life Insurance Beneficiaries Act one for the benefit of the children of the assured and forms no part of the estate of the assured, but if the policy is payable to the wife if living and if not, then to the insured's executors, administrators or assigns, such insurance goes to the executors of the will of the assured, and forms part of his estate.

Beneficiary Clauses Varied in Policies.

The facts as stated by his Lordship were as to whether the money payable on two policies of insurance on the life of the deceased was or was not to be taken into account in deciding the question of the liability of his estate for succession duty. The Canada Life policy for $5,000 was upon its face made payable to his wife. The Conferation Life policy for $10,000 was upon its face made payable to his wife if living, and if not, then to his executors, administrators or assigns. His wife predeceased him and he did not marry again. He never made any other declaration with reference to this insurance money and these policies stood at the time of his death as they had always done. He left but one child surviving him.

Assured made no Declaration

In his written judgment, Justice Walsh decides:—"(1.) That as the Life Insurance Beneficiaries Act provides that if a sole beneficiary dies before the maturity of the contract the assured may by declaration provide that the policy shall be for the benefit of himself or of his estate, or of any other person or persons whether or not such person or persons belong to the class of preferred beneficiaries. In the absence, however, of any such declaration, a policy in favor of a wife who dies before the maturity of the contract becomes one for the benefit of the child or children of the assured, and that is his case. The money payable under the Canada Life policy is upon the facts and by virtue of the statutory revisions, the property of the son of the assured, and as a preferred beneficiary. It therefore, forms no part of the estate of the assured and it is only on the property of the deceased that succession duty is payable.

Second Policy not Exempt

"(2.) That the Confederation Life policy is different. Though his wife was the original beneficiary under it, upon her death it was to be paid to the executors, administrators or assigns of the assured. It was quite competent to the assured to thus direct. He could have done it after her death, and I see no reason why he could not do it in advance of and conditional upon her death. I do not see how the son can possibly claim this money as a preferred beneficiary. It must go, I should say, to the executors of the will of the assured, and form part of his estate. It, therefore, was not wholly kept up by him for the benefit of one of the class to which exemption is given by sec. 6 (g) of the Succession Duties Act, (husband, wife, child, grand child or mother of the deceased) and is therefore dutiable."

According to a cablegram from London, the privy council of Great Britain has decided, on the appeal in the case of the explosion at the Curtis-Harvey powder plant near Rigaud, Que., that the fire insurance companies are responsible only for the loss caused by fire, and not for the loss due to explosion.

APPLICATION FOR HIGHER EXPRESS RATES

Increase of 1918 Insufficient for Present Expenses—Actual Return is 61 Per Cent. of What it Was in 1911

APPLICATION was made to the Board of Railway Commissioners an July 23, by the Express Traffic Association of Canada, for an increase in rates. The application is made on behalf of the express companies doing business in Canada, of which the chief are the American Railway Express Company, British American Express Comapny, Canadian Express Company, Central Canada Express Company and the Dominion Express Company. The application reads in part as follows:—

"Previous to the year 1911 our board made an exhaustive investigation into the express business in Canada. The investigation resulted in certain concessions to the public by the express companies, increasing the operating expenses of the companies and reducing the express rates. In 1913 a further reduction in practically all the express rates was ordered. The express companies unavailingly protested against these reductions.

Costs Up 100 Per Cent.

"In 1918 an increase was granted. What has actually happened shows that the increase in rates, instead of amounting to 37 per cent, east of Sudbury and 23 per cent. west of Sudbury, amounts to less than 23 per cent. on the whole traffic. The result is that the tolls as increased were not sufficient to take care of the actual operating expenses. The cost of living has gone up 100 per cent., and the operating cost of the express companies has gone up proportionately. The Canadian railways have received freight rates increases of (so called) 15 and 25 per cent. respectively. These increases in reality represent a natural advance of about 31 per cent., which, if granted, will entail a further substantial cost to the express companies, and narrow the spread between express and freight rates. The result is the express companies are operating on less than 61 per cent, of what the board in 1911 declared to be a fair and reasonable tariff. Reviewing the increased costs, the companies submit that they are entitled to further protection.

"When granted, this will still leave the totals 15 per cent. below parity of those put in force by the board in 1913. The companies claim a loss of $2,800,000 for one individual company, and a continuing loss."

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labour report that the Dominion and provincial offices of the Employment Service of Canada for week ended July 10, show an increase in placements as compared with the returns for the preceding week. The offices reported that they have made 7,853 references to regular positions and 7,108 of these received employment. This represents an increase of 1,382 when compared with the previous week when 5,726 placements were reported, but the smallness of this number is due partly to the Dominion Day holiday. In addition 1,818 casual jobs were supplied as compared with 1,887 during the week ended July 3.

During the week 8,639 applicants were registered of whom 1,063 were women and 7,576 were men. This is an increase of 1,670 in registration when compared with 6,969 applicants reported during the preceding week. The number of vacancies notified by employers to the Service during the week totalled 9,427 of which 1,406 were for women and 8,021 were for men. This represents an increase of 2,007 when compared with the 7,420 vacancies reported during the week previous. Of the placements in regular employment 708 were of women workers and 6,400 were of men.

News of Industrial Development in Canada

Spanish Representative Looking Over Canadian Timber and Pulp—Canadian Government Merchant Marine Will Start Operations on The Pacific in September With Increased Service at Later Intervals—Dominion Steel Corporation Will Commence Manufacturing Bricks Shortly for Its Own Use

AUGUSTO RAMONEDA, of Barcelona, Spain, who was in Montreal some weeks ago, and who arranged for two shipments of pulp from the province of Quebec to the country which he represents, visited British Columbia last week. He has already opened an office in Montreal and intends to stay in Canada for some time, with a view of cementing trade relations between this country and Spain, in regard to timber and pulp. Mr. Ramoneda was impressed with the timber of British Columbia, and it was his opinion that it is larger in size and better in quality than any he had seen in the Scandinavian countries. He was favorably impressed by his visit to the larger pulp and paper mills of the province.

"I am hoping to be able to make arrangements while in British Columbia for regular shipments of pulp from the mills in the province," said Mr. Ramoneda. "Spain is in a position to be a regular buyer of pulp and large timber. Previously to and during the war, Spain drew her pulp supplies from the Scandinavian countries. Since the war ended the world's competition for pulp has been so intense that Spain can no longer obtain sufficient pulp for her paper mills. She has been importing at the rate of about 60,000 tons per year, and would like to make arrangements for regular shipments from Canada."

United States competition for pulp is very keen in the Canadian market, but Mr. Ramoneda thinks the wisdom of extending their market to Europe should appeal to the Canadian pulp producers. He states that, that financially, Spain is flourishing, and that the country's commercial progress is very rapid.

Merchant Marine and the Orient

A trade route on the Pacific side of Canada from Vancouver, B.C., to the Far East, has been announced by R. B. Teakle, general manager of the Canadian Government Merchant Marine. The route starts from Vancouver to Shanghai, thence to Hong Kong, Singapore, Colombo, Calcutta and ending at Rangoon. It is expected that the first ship will be dispatched from Vancouver early in September and the vessels employed will be of the largest type of 8,300-ton vessels being built on the Pacific coast. At least one ship a month will be placed on the route.

The Canadian Government Merchant Marine will not undertake a service between Vancouver and China and Japan for the present, according to the decision of the executive council of the C.G.M.M., which held a special meeting in Montreal last week. It has been decided to continue the present Australian service with five steamers, and to inaugurate a service between this port and Straits Settlement, with an extension to India if conditions warrant. Seven steamers will be required for this service, according to present plans.

Boats on the Australian run will be the "Canadian Importer," "Canadian Exporter," "Canadian Inventor" and "Canadian Prospector," now in service, and the "Canadian Winner," now being completed at Victoria. In the Straits Settlements service will be the "Canadian Traveller," now completing at Victoria; the "Canadian Highlander" and "Canadian Skirmisher," building at the Wallace yards at North Vancouver; "Canadian Freighter" and "Canadian Transporter," now building at the Coughlan yards; and the "Canadian Reaper" and "Canadian Thresher," under construction at Prince Rupert.

Quebec Province Industrial Expansion

Speaking recently regarding the industrial expansion of the province of Quebec, Hon. Rodolphe Lemieux, said: "Our province is expanding industrially at a rapid rate. The value of the province's industrial products has grown from $219,861,648 in 1905, to $387,900,585 in 1915, and to about $500,000,000 in 1919. The development of our water powers has in a very large measure contributed to this great industrial expansion. The province is eminently adapted for all kinds of industries. We have the natural resources, we have the power, we have transportation facilities by rail and water, and we have, too, an industrious and contented population, which in these days is a great asset. Great progress has been made in the pulp and paper industry, and this has been largely due to the action of the provincial government in prohibiting the exportation of the raw material, and so forcing the Americans to erect factories in the province for the manufacture of pulp and paper. One reason why there has been such industrial progress in the province is to be found in the fact that labor conditions are good."

Pulp and Paper Prospects in B.C.

A campaing conducted recently by the "Prince George Citizen," Prince George, B.C., for a joint pulp and paper proposition to be located there, generating power at the hydro-electric site on the Nechaco River, appears to be materializing, according to that authority. The "Citizen's" aim was to make it possible for industries to become established with reasonable assurance of growing up with the city. The absolute lack of industries there is attributable to the limited and costly electric service now provided. According to an article in the "Citizen" recently, many pulp concerns are approaching the local authorities with a view of developing the timber and pulp areas, particularly from the American side, but in view of the heavy export of pulp from Canada to the American consumers and of the outcry raised by Canadian papers threatened with extermination owing to the newsprint shortage resulting from this export, American capital is not so welcome in this industry as British.

With regard to the prospects, the article goes on to say: "Here at Prince George there may be found an excellent site for pulp mill purposes. Being situated down stream from the whole of the Fraser and Nechaco valleys beyond this point, and at the radiating point of the railways through this country, this would form an ideal site for a large pulp and paper mill. Power may be developed within five miles of this city on the Nechaco River, where from 5,000 to 10,000 h.p. can be produced by a dam of from 10 to 20 ft. in height, which can be constructed on an ideal location."

Build Brick Plant

Work is to be started this summer by the Dominion Steel Corporation, in the quarrying of silica deposits at Leitche's Creek, Sydney, N.S., for the purpose of manufacturing brick. Delay in obtaining the necessary machinery for the work is all that now holds up operations and as soon as it can be obtained workmen are to be placed upon the ground at once to extract the material.

The silica deposits at Leitche's Creek. development of which has now been decided upon by the company, were purchased last fall. The cost of opening up the quarry, together with the price of the property containing the deposits will be in the vicinity of $50,000. A huge brick plant, which is costing the company in the vicinity of $250,000 is now in course of erection and is already nearing completion. The silica extracted at the Leitche's Creek holdings is to be transported to the plant and there manufactured into brick.

When the new brick plant is in operation it will turn out brick at the rate of 15,000 a day. Employment will be given to over fifty men. About 8,000,000 bricks are used each year by the company at present in the various departments on the plant and they are obtained mostly from the

United States. The price paid at present is in the vicinity of $70 a thousand. By manufacturing the brick required on the plant in this city the officials estimate that many thousands of dollars will be saved yearly.

Manufacturing Notes

The contract for the construction of a $3,000,000 drydock on Burrard Inlet, B.C., has been let to Coughlan and Sons.

Loans aggregating $1,063,063 have been recommended by the advisory council of the Provincial Department of Industries of British Columbia, during the year in which the department has been in operation. Within the past month or two, loans aggregating $359,000 have been passed upon by the council and recommended to the government.

Assets, including the goodwill of the Williams, Greene and Rome Co., Ltd., Kitchener, Ont., have been transferred to Cluett, Peabody and Co. of Canada. The local management will continue with the new company, which will also continue buiness under the old name. Extensions to the present plant are contemplated in the near future.

Nineteen hundred and twenty acres of tar sand rights in the province of Alberta have been leased to Gen. William Lindsay upon specified terms and conditons. From the tar sands of Alberta—which are known to exist by billions of tons along the Athabaska River—it is estimated that great quantities of gasoline, kerosene, naptha, bitumen, tar, lubricating and fuel oils can be obtained.

At the special general meeting of the shareholders of Canada Foundries and Forgings Co., held at Brockville, Ont., on July 24, approval was given to the recommendation of the board of directors of the enterprise involving the acquisition of the Mann Axe and Tool Co., of St. Stephen, N.B. If certain negotiations now being conducted with the municipality of St. Stephen are carried to a satisfactory conclusion, the Mann plant at that town will be rebuilt without delay. The business will be conducted under the name of the Mann Axe Co., in which Canada Forgings will own a controlling interest.

Ament Brothers, of Brussels, Ont., who do a large stave, heading and sawmill business, are now constructing an addition to their sawmill to be utilized in connection with their own flax output. John McDonald, of Walton, Ont., another sawmill owner, is erecting an up-to-date flax mill.

Ontario Gets New Industries

A new automobile manufacturing plant is projected, to be located in Weston, Ont. The flotation of the company is proceeding, and Weston people are being approached to subscribe. It is understood that the new company is to manufacture its own car, and will not be a branch factory for an American car.

Extensive operations involving the outlay of almost $500,000, and the maintenance of a big fishing fleet are planned by the Mackenzie Basin Fisheries, who are establishing a cannery at Black Bay, Athabasca, Alta., equipped with modern machinery that will employ over one hundred helpers, according to Captain Baxter, of Cannin, N. S., who is at Peace River, in charge of the supplies that will be used in the construction of the factory.

The Universal Tool Steel Company has disposed of its property and machine shop on the east side of Dufferin street, north of the Exhibition grounds, Toronto, Ont., for $155,000, to a United States firm, whose identity has not been disclosed by Robins, Ltd., who negotiated the transaction.

Negotiations have been completed whereby the Orton Motor Co. Ltd., will locate at Petrolea, Ont., and commence operations just as soon as the necessary machinery can be imported and installed. The Orton Company has taken over the large building formerly occupied by the Stevenson boiler works, lying between the M. C. R. and G. T. R.

Collection of Alberta's 1920 wool crop commenced on July 12, in Calgary, where the raw product is collected and prepared for shipment to the east. It is estimated that approximately 300,000 pounds of wool will be sent from Alberta, through the central collecting station at Victoria Park this year This estimate is based on the annual production of the last few years, when from 250,000 to 300,000 pounds were handled annually. In former years the wool growers themselves attended to the grading of their crop, and a definite date was set for the sale of the same, when buyers from all parts were notified to attend at Calgary.

NEW INCORPORATIONS

Midwest Development Company, Limited—Iroquois—Kirkland Mines Company, Limited—United Trading Corporation, Limited—Firestone Park Housing Company, Limited

News of Municipal Finance

Former City Treasurer Suggests Working Capital for Toronto—Taber May Face Double Tax—Winnipeg Hydro Has Surplus—Regina Operates at a Loss for First Six Months—Increase in Collection of Vancouver's Tax Arrears

Halton County, Ont.—A tax rate of 6½ mills on the dollar has been struck, as compared with 7 mills last year.

Calgary, Alta.—Up to July 20, the end of the first discount period, a total of $1,525,000 was taken in in taxes. Most of the taxes paid were current, the proportion of arrears being small.

Chatham, Ont.—The tax rate for 1920 has been set at 31¼ mills, as compared with 32 mills last year. Assessment, which was $10,094,195 last year, has been increased $2,000,000.

Vancouver, B.C.—Tax arrears collected for six months ending 30th June, 1920 amount to $645,406, as compared with $468,809 for the same period last year. This is considered all the more satisfactory in view of the fact that arrears outstanding at the first of the year for collection were approximately 10% less than at the 1st January, 1919.

City Solicitor Jones has given his legal opinion that there can be no objection to the council authorizing expenditures of funds for which no provision was made in the estimates. Mr. Jones makes the proviso, however, that in no case should expenditures exceed the total amount of expected revenue. He also points out that it is the duty of the comptroller when funds for any particular project are exhausted to notify the person, committee or department concerned.

Regina, Sask.—The city public utilities were operated at a total loss during the first six months of the year, according to a report prepared by the auditors. The loss on the street railway for the period was $34,014, and the electric light and power department were behind to the amount of $27,739. The only utility to show a surplus was the water works department, the profit being $1,295.

The operation of the general government of the city for the first half of the year shows a deficit of $43,793, as compared with the proportion of the estimated expenditure for the whole year, but it is pointed out that some of the departments spend less the second half of the year, and this may be made up before December 31.

Taber, Alta.—After conferring with bondholders of the municipality recently at Calgary, presented a report of the meeting to the council. The mayor submitted the report of the commission on municipal finances on the affairs of the town, the gist of which was that improvements were being made at a time when expenditures ought to be reduced, even though the town was reducing its liabilities by the sum of $4,000 to $5,000 a year. He pointed out at the meeting of the commission, that the town according to the last two annual statements, had improved its position by the amount stated, but the chairman wished him to pledge himself that the town would return to the tax both on buildings and land which he declined to do. The increased cost under present conditions, of running the town, had offset the saving, and he reported to the council, that should the town default, which it had not done, in paying the debentures, the bondholders, in his opinion, could force matters, and the town would have no other course than to return to the double tax. He had pointed out to the bondholders that the town had no other source of revenue, but he thought that the council should under the circumstances, take the matter into serious consideration.

Winnipeg, Man.—A good record was made by the city's hydro-electric department last year. The surplus earned was $182,283 in spite of liberal increases to all employees of the department. Besides providing for sinking fund levies and spending $100,000 on plant renewals, some $200,000 was added to the contingent reserve account. The gross earnings which were $545,644 in 1913, had increased to $1,279,469 for 1919, and the 22,015 customers for light and power in 1913 have now increased to 39,877.

The statement for the year ended April 30, 1920, compared with the estimates for the current year, is as follows:—

Revenues.	Estimate for 1920.	12 months end.Apr. 30.
Commercial lighting	$201,000	$ 310,053
Domestic lighting	322,500	516,165
Lighting city buildings	15,100	21,390
Street lighting	43,200	54,971
Outside municipal lighting	6,800	8,543
Commercial power	205,000	284,113
Power for city buildings	15,100	20,490
City waterworks	30,200	24,100
Outside municipal power earnings	3,000	4,234
Tramway earnings	3,000	7,486
Non-operating revenues	5,100	27,920
	$850,000	$1,279,469
Surplus for 1919-1920		180,279
Surplus at beginning of year		104,262
Profit and loss account adjustments		2,002
Surplus April 30, 1920		$ 282,539

Statements showing the development and progress of the system are to be circulated by the department throughout America for the purpose of inducing business establishments to locate in Winnipeg and to boost the city's cheap power.

Toronto, Ont.—Need of working capital for the city, is pointed out in the last annual report of the former city treasurer, Thomas Bradshaw. "A considerable portion of the year's revenue," he said "is not received within the fiscal year, and yet it is apportioned and treated as though it were available. Such a condition necessitates heavy borrowings which could be avoided if a working capital were provided. Furthermore" he continues, "practically no revenue is received during the first five months of the year, owing to the first installment of taxes not being payable until June, in spite of the fact that the year's expenditures, commencing January 1, are going on all the time, and must, of necessity, be provided by further borrowings in the early months of the year, which puts an additional strain upon the city's credit. These conditions emphasize the necessity of providing a liquid surplus or reserve fund in order that the city may have working capital to carry the revenue expenditure while revenue is unavailable, and further, of placing the date for the collection of taxes as early in the year as possible in order that the borrowing period may be shortened and the amount borrowed be minimized."

Mr. Bradshaw suggests that the difficulty could be overcome by placing in the 1921 estimates a sufficient sum to meet a portion of the temporary borrowings, and that like sums could be spread over succeeding years until a large enough fund had been created to carry the treasury department over the lean months.

Mr. Bradshaw's report shows that the capital assets at the end of 1919 were $147,531,041, apart from reserve for depreciation. This includes sinking fund assets of $27,863,995 and permanent properties, improvements, etc., to the extent of $114,705,864. The report also brings out the fact that though there was a falling off in war expenditures during the year, there was an increase in general expenses exceeding those of the previous year by more than $2,000,000.

Government and Municipal Bond Market

Ontario Sells $5,000,000 More Bonds, Bringing Total Borrowings of That Province This Year Up to Nearly Twenty-Five Millions—Winnipeg and Regina Issue Bring Favorable Prices—Four More Municipalities Propose to Sell Their Debentures Locally

THIS week the bond market was featured by the sale of $600,000 6 per cent. 20-year bonds of the city of Winnipeg to a Toronto syndicate, at a price which cost the city about 6.45 per cent. The bonds are now being retailed to the Canadian public on a 6¼ per cent. basis. The last loan made by the city was in April of this year, when the city paid 6⅛ per cent. for its funds, the bonds at that time being exactly the same kind as the present issue. In August a year ago Winnipeg sold 5½ per cent. 30-year bonds at 104.87, which was on a basis slightly less than 5.20 per cent.

The announcement that the province of Ontario had disposed of $5,000,000 bonds privately to the same syndicate which purchased the previous issue of $3,000,000 in June, and on the same terms, was somewhat surprising. The bonds issued in June bear interest at 6 per cent., mature in 10 years and were sold at a price of 98.317, which is on a 6.23 basis. The $5,000,000 issue was not sold all at once, but was disposed of in three blocks, and on terms exactly the same in every respect as the one in June. This latest loan brings the total borowings of the province for the present year up to $24,800,000. The last $8,000,000 were floated for disposal in Canada only, and as far as can be ascertained, have been practically disposed of at par.

Coming Offerings

The following is a list of debentures offered for sale, of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
London Tp., Ont. . . .	$ 24,000	6	15 & 20 inst.	July 31
Picton, Ont.	5,000	6	10-inst.	July 31
Alberta School Districts	132,135	7 & 8	Various	Aug. 5
Moncton, N.B.	300,000	6	10-years	Aug. 12
Goose Lake, C.S.D., Man.	50,000	6	20-inst.	Aug. 14

Township of London, Ont.—Tenders will be received until July 31, 1920, for the purchase of $15,000 6 per cent. 20-instalment debentures and $9,000 6 per cent. 15-instalment debentures. The proceeds of these two issues will be used for school purposes. Tenders close at noon.

Moncton, N.B.—Tenders will be received by the Board of School Trustees until noon, August 12, 1920, for the purchase of $300,000 6 per cent. 10-year debentures, in denominations of $500 each, dated June 1, 1920, and secured by way of mortgage upon the whole of the city. The official notice advertising the issue, points out that the debentures rank prior to any real estate mortgage and that no loss in municipal bonds has ever been made in the province of New Brunswick. A. O'Bunes, secretary.

More Local Selling

Four more municipalities have been added to the list of those who are selling their securities locally, as will be seen below. All these expect to obtain the desired amounts from their community. It is usually the case to offer the debentures at par, when disposing of them direct to citizens, but in the case of Penticton, B.C., the offering will be made at 90, which means, in that case, that the interest yield will be 6.85 per cent.

New Westminster, B.C.—At a recent meeting of the civic finance committee, the city treasurer was instructed to sell, locally if possible, $25,000 6 per cent. high school debentures at par.

Penticton, B.C.—The municipality will sell to local citizens $35,000 6 per cent. water debentures, in denominations of $100 and $500. The debentures will be issued at 90, to yield 6.85 per cent.

Cobourg, Ont.—An effort is being made by the finance committee of the town to dispose $50,000 of the town's debentures locally. It is contended that there is a saving of about $4,000 by selling the debentures this way, instead of selling through the usual channels, taking into consideration the brokerage commission, etc. So far the effort is meeting with success.

Moose Jaw, Sask.—There has been a good number of applications for the city's school debentures, which are to be issued in August. The city hopes to dispose of $64,000. An offer for the total issue has been received from the east, but the purchaser wished to buy at a discount. It is understood that the school board trustees are likely to reject the offer, as they feel that the debentures can be sold at par.

Debenture Notes

Yorkton S.D., Sask.—An option which was taken recently by Harris-Read and Co., Regina, on the $85,000 7 per cent. 20-instalment debentures, has not been exercised.

Prince Albert, Sask.—The city is considering the issuance of $65,700 debentures for extensions to waterworks.

Saskatoon, Sask.—Three money by-laws amounting to $62,234 have been passed by ratepayers.

Ottawa, Ont.—The board of control has agreed to issue the full amount of debentures asked by the public school board for new buildings and extensions. The school board at first asked for $757,000, but later increased this amount to $984,000.

Regina, Sask.—Ratepayers have approved of the following money by-laws: $4,400 for sewer work; $7,000 for waterworks; $6,400 for water meters; $34,353 for sewage disposal works; $59,000 for light and power plant.

Chatham, Ont.—The ratepayers will be called upon next month to vote on a by-law authorizing the city council to raise $35,000 for the erection of a civic garbage incinerator.

St. Vital, Man.—By-laws to raise $63,000 for the purchase of a new site and erection of a six-roomed school, and $22,000 to enlarge the present Woodlawn School, have been defeated by the ratepayers.

Wingham, Ont.—Town council has passed three by-laws which were voted on favorably by the ratepayers, providing for placing the waterworks department under a commission; $18,500 for building bridge and $6,500 for extension of waterworks.

British Columbia.—Certificates of authority to issue debentures have been issued to the following municipalities by the municipal department of the province: Prince George, $10,000 6 per cent. 10-years, for street improvements; Prince George, $15,000 6 per cent. 15-years, for hospital extension; Prince George, $60,000 6 per cent. 15-years, for school buildings; Point Grey, $33,230.50 5½ per cent., payable May 1, 1925, for schools.

London, Ont.—The city council at a special session on July 26, gave first and second readings to by-laws to issue $165,000 debentures for the public utilities commission, and directed that the Ontario Railway and Municipal Board be asked to ratify the loans. One issue will be of $85,000 for waterworks extensions and the other of $80,000 for the hydro-electric department's expansion program; both items were included in the city of London bill that met defeat in the legislature.

Victoria, B.C.—In an effort to make the bonds more attractive to purchasers, the council authorized an increase in interest from 5½ per cent. to 6 per cent. on debentures amounting to $420,000 in respect to the Johnson Street

To Purchasers of
1934 Victory Bonds

Some people who bought 1934 Maturity Victory Bonds have, for various reasons, sold them. The bonds thus made available can be bought at a price of 96 and interest. Although these bonds occupy a stronger position than they did when issued eight months ago they can, owing to market conditions, be bought to yield nearly 6%.

We recommend the purchase of Victory Bonds at existing prices. Full particulars gladly furnished upon request

Canadian Pulp and Paper Prosperity Well Founded

The increasing value of Canadian pulp and paper securities is not the result of temporary and artificial trade conditions. It is based upon the natural law of supply and demand.

The pulpwood reserves of the United States and other countries are becoming exhausted. It will be years before the Northern European forests are commercially workable. The only available commercial supply of pulpwood is now in Canada. And, as the demand continues and the supply grows less, the price will inevitably rise. This means larger earnings and greater profits to the holders of Canadian pulp and paper securities.

If you hold any pulp and paper securities, you should certainly read our bulletin *Investment Items*. It will keep you thoroughly posted upon the development of the industry.

Bridge, and $234,630 in connection with the local improvement by-law relating to the expropriation of Pandora Avenue property between Fernwood Road and McGregor Street. A similar increase was arranged for in respect to debentures on Fairfield Road widening, totalling $44,500.

Saskatchewan.—The following bonds have been authorized by the Local Government Board, from June 18 to 26, 1920: Sasman R.M., $8,500 for road improvements, 7½ per cent., 10-instalments; Baildon R.M., $10,000 for road improvements, 8 per cent., 10-instalments; Village of Lockwood, $1,000 for drilling well, 5-instalments, 8 per cent.; Town of Morse, $1,000 for purchasing hose, 7 per cent., 5-years annuity.

School Districts.—Beaver, $5,000 8 per cent. 20-years annuity; Hollington, $2,500, 10-years 7 per cent. annuity; Edward Grey, $12,000, 8 per cent. instalment; Quill Lake, $12,000 7 per cent. 10-years instalment; Lawrence, $2,500 8 per cent. 15-years annuity; Dee Valley, $1,100 8 per cent. 10-years instalment; Zealandia, $1,500 8 per cent. 15-years instalment; Briar Mound, $1,500 8 per cent. 15-years instalment; Elrose, $5,500 8 per cent. 10-years annuity; Lawson, $4,000 8 per cent. 10-years annuity; Darmody, $7,000 7 per cent. 20-years annuity; Alluvia, $1,500 8 per cent. 5-years instalment; Chambers, $1,000 7 per cent. 10-years instalment; Glenhurst, $1,200 8 per cent. 6-years instalment; St. Front, $2,700 8 per cent. 10-years annuity; Plunkett, $17,000 8 per cent. 20-years annuity; Colonsay, $3,900 7 per cent. 10-years annuity; Galloway, $4,000 7 per cent. 10-years annuity; Stenen, $16,000 7½ per cent. 20-years annuity; Bradley, $5,500 7 per cent. 20-years annuity.

Rural Telephones.—For 15-years annuity and bearing interest at 8 per cent., River Ayr, $4,800; Goldeye, $1,400; Richlea, $19,300; Bruno, $17,800; Mawer, $11,700; Pasqua, $10,500, Buchanan, $56,200.

British Columbia.—Hon. John Hart, minister of finance, has called for a further provincial loan of $3,000,000 worth of 6 per cent. five-year bonds, principal and interest payable in Victoria, Montreal, Toronto and New York, and the proceeds to be devoted to construction work on the Pacific Great Eastern Railway.

Bond Sales

Saskatchewan.—The following debentures have been reported as sold, by the Local Government Board, from June 18 to 26, 1920: Schools, Melville View, $5,000, Nay & James, Regina; Emmery, $7,000 and Truax, $4,500, Waterman-Waterbury, Regina; Dressler, $2,000. J. G. Hass, Shelmouth, Man. Rural Telephone: Shaunavon, $8,000, G. T. Brander, Regina. Village of Esterhazy, $1,000, W. L. McKinnon & Co., Regina.

Ontario.—The province has disposed of $5,000,000 6 per cent. 10-year bonds, the Messrs. A. E. Ames & Company, Wood, Gundy & Co., and the Dominion Securities Corp., at 98.317, which is on a 6.23 per cent. basis. The deal was the same in every respect as the one in June, when the province disposed of $3,000,000 bonds.

Regina, Sask.—Messrs. Wood, Gundy & Co. have purchased $102,153 6½per cent. debentures at 97.35. The debentures are in the following blocks: $4,400 and $7,000 maturing July 1, 1950; $6,400 and $50,000 maturing July 1, 1935. At this rate, the city pays about 6.75 per cent. for its money, which is considered favorable, in view of the prices received by other western municipalities. The city originally decided to sell the bonds locally, but on receipt of the offer from Wood, Gundy & Co., decided otherwise.

Winnipeg. Man.—An issue of $600,000 6 per cent. 20-year debentures was disposed of this week to a syndicate comprising the National City Co., Ltd., Harris, Forbes & Company, A. Jarvis & Company and W. A. Mackenzie & Company at 95.155. Another bid from A. E. Ames & Co., Wood, Gundy & Company and the Dominion Securities Corporation, art 95, was also submitted, but outside of these there were no other tenders. The bonds are payable in Canada only. The proceeds of the issue will be used for local improvements and waterworks extensions now under construction.

Hydro-Electric Issue Planned—Crop Reports from West are Optimistic

(Special to *The Monetary Times.*)

Winnipeg, July 29th, 1920.

WESTERN crop reports continue favorable. Rains of last week saved the situation in many localities. Alderman George Fisher, of Winnipeg, a prominent member of the Grain Exchange, has just returned from a sixteen-day trip through Alberta and Saskatchewan, and predicts a more than average crop in these provinces. Crop conditions in Manitoba also are highly gratifying, he said. While some of the prairie districts suffered somewhat from drought, he believed the recent rains had given at least partial relief, and in no part of the west would crops be a total failure.

National Railway Reports

Reports received by the Canadian National Railway from their local offices indicate splendid crop prospects in most parts of Alberta. Vermillion has "prospects of record crop." Other northern points say conditions are "excellent," "good," "ideal," "favorable," "bumper crop expected." Calgary and the southern district also send optimtstic reports. Many points say the wheat is heading out rapidly, and there seems to be plenty of moisture in most sections, with weather favorable for rapid growth and development. Some points in the Hanna district report damage from dry weather, which was not entirely overcome by last week's rains. Government report from Saskatchewan just received indicate fair to good prospects in most districts.

Winnipeg Bond Sale

The Hydro-Electric department of the city of Winnipeg are to institute an over-counter 6 per cent. $150,000 bond issue, offering the citizens one hundred dollar bonds. If the scheme is as successful as anticipated, bonds of other denominations will be issued. The department is willing to sell by this method bonds aggregating $500,000 or $1,000,000. The funds received will be used to reduce capital overdrafts at the bank.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in July:—

Canadian Pacific Railway

	1920.	1919.	Inc. or dec.
July 7	$3,773,000	$3,120,000	+ $ 653,000
July 14	3,854,000	3,325,000	+ 529,000
July 21	3,648,000	3,202,000	+ 446,000

Canadian National Railways

July 7	$1,932,961	$1,713,404	+ $ 219,557
July 14	2,000,993	1,659,083	+ 341,910
July 21	2,222,500	1,746,289	+ 476,211

Grand Trunk Railway

July 7	$2,008,354	$1,458,946	+ $ 549,408
July 14	2,138,945	1,688,850	+ 450,095
July 21	2,387,118	1,799,020	+ 588,098

"The progress of insurance has mainly consisted in replacing mere guesswork and the higgling of the market by a scientifically worked-out system of probabilities," says the London Assurance in its bi-centennial review. British companies have played an important part in the development of fire insurance as a systematic business.

JUNE 1920 PRICE $8.00 PER ANNUM

Corporation Securities Market

Light Trading on Canadian Exchanges—Most Stocks Close Weaker—British Empire Steel Sold on New York Curb—Lamson and Hubbard Offering Stock—Atlantic Sugar to Pay Arrears on Preferred—Additional Preferred of Spanish River Called on Montreal Exchange

UNCERTAINTY and weakness marked dealings on the New York market for the week ended July 28, 1920, although the sentiment was a little more cheerful towards the close, when call money eased a little. The credit situation continues to be the most important factor in the stock market, and although there will be slight easings occasionally, bankers hold out no hopes for easier money for an indefinite period. Emphasis which is being placed on the distinction between essential and nonessential loans, appears to be convincing the trading element that stock speculation on a broad scale is out of the question for the time.

It is noteworthy to mention that British Empire Steel Corporation stock is now quoted on the New York curb. During the week ended July 26, 8 per cent., preferred was quoted at 96 high and 94 low, with sales of 500; 7 per cent., preferred at 52 high and 50 low, with sales of 600; common, at 28 high and 25 low, with 800 sales. As none of this stock has yet been issued, it is apparent that these transactions take place pending the issuance of these securities.

Light Trading on Local Exchanges

Concurrent with New York, stocks on the Canadian exchanges were for the most part weak and uncertain, but towards the close on July 28, there was a moderate rally, following a similar movement in Wall Street. The gains made, however, were not sufficient to offset the losses, and consequently a large number of issues closed lower. Trading was of light volume in both Montreal and Toronto, in the former case Atlantic Sugar, National Breweries and the paper stocks being the most prominent, while in the latter case Brazilain and Atlantic Sugar were the only issues dealt in to any extent. As in New York, the credit situation may be considered a vital factor in the stock market here. Canadian bankers are continually emphasizing the need of deflation, particularly in view of the approaching crop-moving season, and according to the latest bank figures, their efforts appear to be meeting with some success.

Capitalization Increases

Companies registered under Dominion charter have been authorized to increase their capitalization as follows, the new shares to be issued in each case to have a par value of $100:—

	Former capital stock	Increased to
Tobacco Products Corp. of Canada, Ltd.	$400,000	$ 650,000
Geo. White and Sons Co., Ltd.	170,000	1,000,000

Under provincial charters the changes are as follows, the name of the province being indicated. The new shares to be issued in all cases are to have a par value of $100:—

	Former capital stock	Increased to
W. E. Woelfle Shoe Co., Ltd. (Ontario)	$ 40,000	$ 200,000
Elgin Coal Co., Ltd. (Alberta)	50,000	100,000
Ford Lumber Co., Ltd. (Alberta) ..	75,000	225,000

The Niagara Falls Victoria Theatres, Ltd., now operating under an Ontario charter, has been issued supplementary letters patent to change the name of the company to Allen's Niagara Falls Theatre, Ltd., and to change and increase its present capitalization. The existing 5,000 shares of common stock of a par value of $50, will be redivided into 10,000 shares of a par value of $25. The present capital of $350,000 will be increased to $400,000, by the creation of 250 shares of preference stock of a par value of $100, and 2,000 shares of common stock of a par value $25.

Lamson and Hubbard Offering

An offering of 8 per cent., cumulative convertible preferred stock of Lamson and Hubbard Canadian Co., Ltd., is being made by the Standard Bond Corp., Ltd., of Halifax, N.S., at par, with a bonus of 25 per cent., of common stock. The preferred stock is callable at $110 per share and accumulated dividends and is convertible at any time into common stock share for share. An annual sinking fund is to be provided, being 2 per cent., of a maximum amount of preferred stock issued. The Lamson and Hubbard company has an authorized capitalization of $1,500,000, of which $1,400,000 is outstanding. The authorized common stock is 33,750 shares (no par value), of which 18,000 are outstanding.

The company was incorporated under the laws of the Dominion of Canada on November 13, 1918. It operates 35 fur-trading posts, with auxiliary equipment, in the Athabasca, Slave, Mackenize and Peace River regions in the provinces of Alberta, Saskatchewan and British Columbia, with a large warehouse and head operating office at Edmonton; also a transportation system consisting of steamboats, gasoline boats, tractors, etc., enabling it to control the transport of its own goods from rail terminals to its various post locations. The business consists chiefly in the purchase at wholesale of merchandise which is distributed at the company's various trading posts and exchanged for raw furs. These in turn are sold in the leading fur markets.

Atlantic Sugar to Pay Arrears

At the annual meeting of the Atlantic Sugar Refineries, Ltd., in Montreal, on July 26 last, announcement was made by President McGibbon that the 28 per cent. accrued on the preferred shares of Atlantic Sugar refineries would be paid off on September 1 next, in cash. The announcement was accompanied by a further one that the common stock was to be placed on a 10 per cent. basis prior to a reorganization of the share capital of the enterprise, which now consists of $2,500,000 preferred and $3,500,000 in common.

The details of the latter process, Mr. McGibbon stated, would be announced at a latter date, presumably after the holders of the preferred have exercised their right to convert their holdings into common, a privilege which the higher dividend rate on the latter would seem to render advantageous, whether there would be a splitting up of the existing shares or a formation of an altogether new company to provide for such a readjustment, remains to be decided upon.

The action of the board was much in line with expectations in market circles, and the decision to pay off the preferred arrears in cash, finds ample warrant in the excellent position presented by the company in the last annual report which is reviewed on another page of this issue.

Additional Spanish River Stock

An additional issue of $3,143,000 of preferred stock of the Spanish River Pulp and Paper Mills was "called" on the Montreal Stock Exchange on July 24, bringing the total outstanding up to $8,842,100.

Of this amount 23,940 shares will be the new issue in payment of the 42 per cent. arrears on the preferred stock, 2,100 will be the issue in payment of the vouchers issued a year ago in connection with one year's dividend on the original capital, and 5,390 shares will provide for the dis-

CORPORATION SECURITIES MARKET

(Continued from page [illegible])

tribution of 2,896 shares to bondholders of the company and its subsidiaries, in accordance with the terms of various mortgages, which requires that the Spanish River Co. distribute ten per cent. of the amount available for distribution to shareholders by way of dividends and bonuses. The remaining 2,500 shares will be transferred to the North American Securities, Ltd., to assist shareholders to buy or sell fractional shares.

Other Capitalization Changes

Circulars are being mailed to shareholders of the Kipawa Co., Ltd., asking them to expand their holding of Kipawa Co. stock into the common stock of the Riordon Co., Lt., as soon as possible. The Kipawa Co., Ltd., was one of the companies which went to make up Riordon Co., Ltd. The stock will be exchanged in the proportion of 1 share of Kipawa Co. for 1½ shares of Riordon Co. stock. As neither of these issues are in a dividend basis at the present time no transfer or record dates have been set.

It is understood that preparations are under way to bring out an issue of $25,000,000 eight per cent. preferred and participating stock of the British Empire Steel Corporation, simultaneously in London and Montreal, with a possibility of a New York connection. After the meeting of the Canada Steamships Lines' shareholders on July 24, to ratify the deal, only a few of the smaller lines will remain to be swung into line, so that it is probable that the entire merger deal will be fully consummated early in August. In the meantime, preliminary steps are being taken for the flotations. If the issue meets with success an issue of common stock is expected to be brought out later.

Riordon Co., Ltd., directors have declared an initial dividend of 1¾ per cent. on the $10,000,000 7 per cent. cumulative convertible preferred stock and an initial payment of 2 per cent. on the $10,000,000 8 per cent. first preferred stocks of the company. The payments cover the quarter ending September 30 next, payable October 1 to shareholders of record September 24. In all $375,000 will thus be distributed, $187,500 of which will be paid into the treasury of the old Riordan Pulp and Paper Co., which holds $1,500,000 of the 8 per cent. securities and $9,000,000 of the 7 per cent. stock, in addition to $12,000,000 of common. The regular quarterly dividend of 1¾ per cent. was also declared on the $1,500,000 7 per cent. preferred stock of the Riordon Pulp and Paper Co., Ltd., for the quarter ending September 30, payable September 30 to shareholders of record September 24.

Two more paper stocks have been added to the unlisted department of the Toronto Stock Exchange. These are the Whalen Pulp and Paper Mills, Ltd., and the [illegible] Pulp and Paper Co., Ltd. The Whalem operates at Mill Creek, 32 miles from Vancouver, B.C. It has paid-up capital of $8,000,000 common, of $100 par, and two blocks of preferred, one of $2,000,000 at $100 par, and one of $102,500 at $1 par. There are also $3,500,000 6 per cent [illegible] bonds outstanding, bearing 6 per cent.

The Mattagami operates at Smooth Rock Falls, a short distance west of Cochrane, in northern Ontario. It has paid-up capital of $2,000,000 common, $100 par, and $1,500,000 preferred, $100 par. There are also outstanding $1 [illegible] $29,600 6 per cent. bonds.

Kaministiquia Bonds to be Offered

An offering of $500,000 7 per cent. [illegible] sinking fund gold bonds of the Kaministiquia Pulp and Paper Co., Ltd., will shortly be made by [illegible] Toronto. Common stock will likely be [illegible] amount of $650,000. Bonds of the Kaministiquia [illegible] are secured by a first mortgage on all [illegible] fixed assets and a floating charge on all [illegible] of the company. It is estimated that the [illegible] during the first year of operation [illegible] per cent. of the total [illegible] on an output of 7,000 tons of ground-wood pulp [illegible] servative price of $[illegible] per ton.

The Kaministiquia company was incorporated on June 4, 1920, under the laws of the province of Ontario. The pulp mill is located at Port Arthur, and it is the intention of the company to extend this mill ultimately into a complete pulp and paper mill having a full capacity of [illegible] tons of newsprint daily. At present the company will manufacture ground wood pulp and sell its product to the various pulp and paper mills for newsprint and manufacture

UNION OF CANADIAN MUNICIPALITIES' CONVENTION

(Continued from page [illegible])

now returning to a proper perspective and a realization of the fact that anything which helps to a larger breadth of view in municipal affairs is, in the long run, the truest economy."

Interest on Housing Loans

On July 29 the convention passed a resolution presented by Mayor Bouchard, of St. Hyacinthe, relative to housing for working men. The motion called upon the federal government to reduce by 1 per cent. the interest on the $25,000,000 voted for housing, and upon the provincial governments to make a like reduction in the interest charged to municipalities.

It was resolved to recommend to the federal government that grain shipped from the Canadian west to European markets be routed by Canadian instead of American ports.

At the final session on Thursday, Arthur Roberts, K.C., of Bridgewater, N.S., was elected president, and [illegible] W. H. Rondeau, Westmount, first vice-president, J. M. [illegible], Toronto, second vice-president and A. [illegible] Pearson, Point Grey, B.C., third vice-president. The selection of the place for next year's convention was left to the executive to decide.

Corporation Finance

Hudson's Bay Company Reports Favorable Progress — Outlook for Saguenay Pulp and Paper Company Promising—Last Year's Operations Satisfactory—Rapid Strides Made by Atlantic Sugar Company in 1919—Canada Steamship Shareholders Agree to Enter Merger

Granby Consolidated Mining, Smelting and Power Co.—During June, 1920, the company produced 2,079,000 pounds of copper, as compared with 2,131,219 pounds in May and 2,180,000 pounds in February, which month was a record for 1920. In June a year ago the figure was 2,637,184 pounds.

Canadian Pacific Railway Telegraph Co.—Wage increases of between 15 and 20 per cent. have been granted by the Board of Conciliation, which recently heard the demand of the telegraphers employed by the company. The present rates of pay for operators in Ontario are from $100 a month to $135.25. The schedule which the board dealt with included operators, printers, clerical staff and others employed in the offices of the company.

Collingwood Shipbuilding Co.—A meeting of the shareholders of the company was held in Collingwood, Ont., on July 27th, when 95 per cent. of the stock was represented, and it was unanimously agreed to sell all its assets to the Collingwood Shipbuilding Corporation, Limited, which Mr. H. B. Smith, president, stated was a part of the British Empire Steel Corporation. Conditions of the agreement appeared in this column last week.

Southern Canada Power Co., Ltd.—The June earnings statement of the company is as follows:—

	June, 1920.	Increase over last year.
Gross	$ 51,681	$ 5,719
Operating expenses and purchased power	28,917	3,365
Net earnings	$ 25,764	$ 2,354
Nine months ending June 30th, 1920:—		
Gross	$502,781	$62,431
Operating expenses and purchased power	253,773	20,420
Net earnings	$249,008	$42,011

Dominion Telegraph Co. of Canada.—Very little change is recorded in the annual report of the company for the year ended June 30th, 1920. The balance at the credit of the profit and loss account at the end of the year was $290,393, as compared with $290,978 a year ago. Cash on hand and in the bank totalled $18,901, against $22,914 in the previous period. Dividends paid on July 15th amounted to $10,000, while in 1919 the figure was $14,000. Directors report the payment for the past forty-one years of the guaranteed interest at 6 per cent. per annum on the capital stock of the company by their lessee, the Western Union Telegraph Co., which interest has been duly distributed quarterly to the shareholders of the Dominion company. The lease is for ninety-nine years, from July 1st, 1879, to June 30th, 1978, inclusive.

Officers and directors of the company were re-elected at the annual meeting, and D. B. Hanna, president of the Canadian National Railways, was added to the board, taking the place of the late Dr. Charles O'Reilly.

Winnipeg Electric Railway.—Shareholders of the company, represented by I. Pitblado, K.C., made application to the Public Utilities Commission last week for an eight-cent car fare so as to give them a suitable return for money invested in the company. For the past five years shareholders have been receiving no dividends, according to Mr. Pitblado. A fair return of 8 per cent. is desired by these shareholders, with the result that the seven-cent fare being asked by the company would be inadequate for providing the necessary returns. A straight eight-cent fare, with special considerations for "strip" tickets, would give the necessary returns to the shareholders, Mr. Pitblado said. The hearing was adjourned.

E. Anderson, K.C., on behalf of the company, closed his arguments before Commissioner P. A. McDonald, stating that, although the seven-cent fare would only give the shareholders a return of 5.4 per cent., the company was not desirous of asking for a higher rate, in consideration of the hardships that might be worked upon the travelling public.

Canada Steamship Lines, Ltd.—After a very brief meeting, shareholders of the company, on July 25th last, decided to accept the agreement of the directors with the British Empire Steel Corporation. Represented at the meeting, either in person or by proxy, were 100,580 shares of the common stock outstanding, amounting to 120,000 shares, and 57,428 of preferred, of a total issue of 125,000, the latter securities being largely held abroad, the voting power of which not being exercised at the meeting.

The terms of the agreement with the new consolidation, as already published in detail, provided for the nominal leasing of the Canada Steamship properties for a term of twenty-five years, but actually entail the absorption of the company by the British Empire Steel Corporation. Holders of Steamship common are to receive 100 per cent. in 7 per cent. cumulative second preference stock of the new consolidation and 45 per cent. in common, while par and 10 per cent. of the respective securities go to the owners of Steamship preferred on exchange. The latter is optional, the British Empire Steel Corporation guaranteeing the 7 per cent. dividends in both instances.

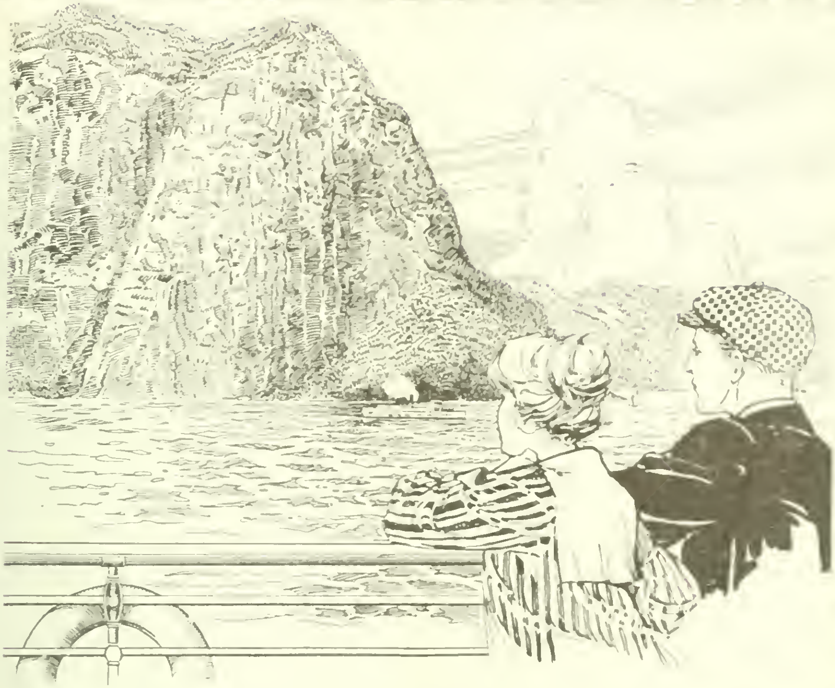
Mr. J. W. Norcross, president of the company, recently speaking of the present business of the Steamship lines, stated that the present season is proving a record one, so far as traffic on the Great Lakes is concerned. "There is really more passenger business offered than we can take care of," he said, "while freight earnings are well in excess of those of a year ago. Operating expenses, owing to the increased price of fuel and higher labor costs, are in excess of those of last year, but I feel confident that when the net of the season's operations is available it will compare well with that of 1919, when our results in this respect reached their high-water mark."

Atlantic Sugar Refineries, Ltd.—Rapid strides were made by the company in the year ended April 30th, 1920, according to the annual report just issued. The volume of sales of refined sugar during the year amounted to over $25,000,000, an increase over the previous year of about 133 per cent. Net earnings on the 35,000 shares of common stock, after allowing for the year's dividends on preferred, indicate 14.14 per cent., against 8.70 per cent. in 1919 and 0.91 per cent. in 1918.

With the larger business handled there has been a substantial increase in the profits, the profit and loss account showing refining profit for the year of $1,594,888, as against gross profits for the previous year of $986,343. This year profits from other sources are reported amounting to $1,199,012. This evidently represents transactions in raw sugar, of which the company has very large supplies. There is also an item this year of profit on investments of $9,009, making a total of $2,802,910.

This amount was distributed as follows: Bond interest for year, $81,450; bank interest and exchange on trade paper, $131,325; depreciation, $721,031; contingent reserve, $1,199,012, making a total of $2,132,819, and leaving net profit for the year of $670,090. From this amount dividends of 10½ per cent. were paid on the preferred shares, amounting to $262,500, leaving an amount to be carried forward of $407,590. This, added to the balance carried forward from the previous year, brought the total of profit and loss up to $1,106,362.

The general statement of assets and liabilities shows that total assets of the company stand at $13,186,347, as



A World-Famed Trip Through Canada's Finest River Scenery

A GLORIOUS boat trip—through a wealth of magnificent scenery that even the wonderful beauties of the old world cannot excel, is the trip called

"Niagara to the Sea."

You may satisfy your every desire for beauty, thrills, and interesting sights and supreme comfort.

The trip down the Upper St. Lawrence will never be forgotten by anyone who has once seen those green clad Thousand Islands that Nature has strewn like a necklet of jewels over the broad channel of this mighty river.

Would you thrill to a new experience? Come "shoot" the tossing, tumbling waters of the St. Lawrence Rapids; it will exhilarate and charm you.

Are you interested in [illegible]? Then quaint, old Quebec will [illegible] entertainment.

Finally, the [illegible] through the impressive canyon of the Saguenay, [illegible] mighty Capes Trinity and Eternity [illegible] than the Rock of Gibraltar.

Send 2c. postage for illustrated booklet, map and guide to
JOHN F. PIERCE, Passenger Traffic Manager, Canada Steamship Lines, 208 R. & O. Building, Montreal, Canada

CANADA STEAMSHIP LINES, LIMITED

compared with $10,561,478 at the end of the previous year. Of this amount, current assets reach a total of $4,988,723, against total current liabilities, in which is included provision for profit tax for 1920 of $1,188,881. This compares with current assets in the previous year of $3,400,000 and current liabilities of $2,148,417. Current assets contain cash, $1,438,041, compared with $30,908 at the end of the previous year; accounts receivable, $922,569, as against $451,305; bills receivable, $1,117,519, compared with $249,864, and inventories, $1,453,465, as against $2,498,098.

Saguenay Pulp and Paper Co.—The first annual statement of the company is now in the hands of shareholders. Previously, the statement was issued by the North American Pulp and Paper Co., but in June, 1919, that company and its subsidiaries, together with the Saguenay Power and Light Co., were organized under the above-mentioned name, and in view of this, a proper comparison of this year's financial results with last year is not possible. The progress made by the new organization last year was good, however, and, according to F. L. Beique, president, the prospects for this year are very promising. He estimates that net earnings for 1921 will be about $3,000,000, based on the business to date, as compared with $1,415,000 in 1919. The last statement, which is for the year ending December 31st last, shows gross revenue from sales of $5,416,544, less sales expenses of $55,257, leaving the net amount from sales $4,861,287. The total operating expenses amounted to $3,538,022, leaving the net amount from production $1,323,264. Other receipts total $311,857, making total revenue $1,635,122. General expenses amounted to $214,945, which left the net revenue $1,415,176. From this amount is deducted: Interest on bonds required $690,134, and interest on bank loans, etc., $260,405, or a total of $950,540, leaving an amount of $464,636. From this amount was deducted reserve for limits, $263,000; a special appropriation, due to the high cost of coal, of $149,067, and an item of further allowance of $18,916, making the total of new appropriations $430,985, leaving the net balance to profit and loss of $33,651.

The general statement of assets and liabilities shows total assets of $25,197,483. Of this amount, current assets amounted to $4,204,085, and current liabilities, $3,954,108. The principal items in current assets are bills receivable, $659,520; stocks of pulp in hand, $1,119,440; wood pulp, $904,694. In current liabilities the principal amounts are: Loans from banks on supplies, $1,793,365; bills payable, $764,560; accounts payable, $627,244; interest on bonds, $355,200; sinking fund, $227,531. Of the total assets, the limits, plants and railways of the company are placed at a value of $18,521,555.

Hudson's Bay Co.—A copy of the company's financial statement for the year ended May 31st, 1920, has just come to hand. According to the figures submitted, the company's business in "saleshops and other trading" continues to produce favorable results. Farm land sales for the year ended March 31st last comprise 276,629 acres for £970,878, an average of £3 10s. per acre, compared with 285,561 acres for £1,023,072, an average of £3 12s. for the preceding year.

There was a profit of £203,857 on the fur trade and £198,669 on general trading after making provision for excess profits, duty and other contingencies. Dividends on the 5 per cent. cumulative preferred shares are paid out of the profits of the trade. An interim dividend of 10 per cent. was paid on the ordinary shares in January last, and a further distribution of 5 per cent., together with a bonus of 10 per cent., less income tax, is now recommended, making a total of 25 per cent. for the year from the profits of trade, being the same rate as in the previous year. The committee has also recommended a distribution of 15 per cent., on which income tax is not payable, in respect of the receipts of the land department. This compares with 20 per cent. paid for the year ended May 31st, 1919, a reduction which is due to the increased disbursement for taxes. The total distribution on the ordinary capital for the year is, therefore, 40 per cent., as compared with 45 per cent. last year.

On March 31st, 1919, the unsold lands in the possession of the company amounted to 3,253,198 acres. During the year 276,629 acres were sold, 23,753 accrued to the company under the "deed of surrender," and 5,886 reverted to the company.

RECENT FIRES

Six Large Fires Last Week Involve Loss of $375,000—Many Other Conflagrations Reported—Number of Buildings Damaged by Lightning

Barriefield, Ont.—July 26—St. Mark's Anglican church was damaged. The loss is estimated at several hundred dollars.

Burnaby Lake, B.C.—July 16—Chicken-houses and chickens of H. J. Herolz, Douglas Road, were destroyed. Cause, upsetting of oil lamp. Estimated loss, $2,000.

Calgary, Alta.—July 21—Residence of E. B. Burns, Tuxedo Park, was destroyed by lightning. Estimated loss on building, $2,000; on contents, $1,000. No insurance was carried.

Cobalt, Ont.—July 24—Sawmill of the Moose Lake Lumber Co., in Firstbrook township, west of Cobalt, with 5,000 feet of this season's lumber, was destroyed. The loss is estimated at $10,000, partly covered by insurance.

East St. John, N.B.—July 20—Plant of the Provincial Chemical Fertilizer Co. was destroyed. Estimated loss, $100,000, partly covered by insurance.

Estlin, Sask.—July 23—Elevator of the Security Elevator Co. was struck by lightning and completely destroyed.

Galt, Ont.—July 26—Two barns on the McAllister farm, on the Preston Road, just north of the golf links, were destroyed. Cause stated to be incendiarism. Estimated loss, $2,000, partly covered by insurance.

Halifax, N.S.—July 25—Wooden garage and Chevrolet car of W. E. Sandford, 16 Beach Street, was destroyed. Estimated loss, $2,000, and no insurance.

Ladner, B.C.—July 25—Store of Currie-Williams Cannery, manager's residence and forty houses, occupied by employees, were destroyed. Estimated loss, $100,000.

Lorneville, Ont.—July 26—Barn of A. McMillan was struck by lightning and destroyed, with a number of hens and farm implements. Insurance is carried to the extent of $1,500.

Medicine Hat, Alta.—July 23—Building, occupied by the Saskatchewan Bridge and Iron Co., was entirely destroyed. Estimated loss, $75,000. The building is owned by the Dominion Glass Co. Contents were insured for $50,000 and building for $7,000.

New Glasgow, N.S.—July 20—Robertson Brothers' woodworking factory on McLean Street was damaged. The loss will be heavy.

Niagara Falls, Ont.—The Incline building at the Whirlpool Rapids was destroyed when struck by lightning. Estimated loss on building, $10,000, and on contents, $20,000.

North Sydney, N.S.—July 25—Warehouse, six cars of flour and a great quantity of miscellaneous merchandise were damaged. Estimated loss, $60,000, covered by insurance.

Pembroke, Ont.—July 25—Residence of W. H. Williams, Main Street, was destroyed.

Simcoe, Ont.—July 25—House of A. Ryerse, Kent Street, was damaged. Cause, defective heater.

St. Thomas, Ont.—July 29—Two-story brick building, containing the pattern storage department, the pattern-room and storeroom of the Canada Iron Foundries, Ltd., was destroyed in addition to material sheds and shipping-room at the Domirion Brake Shoe Co., Ltd. The total loss has been estimated at $100,000. Patterns worth thousands of dollars were destroyed.

Toronto, Ont.—July 26—Building at 112 Wellington Street West was damaged. The estimated damage, which is $850, is suffered by the several occupants, as most of the damage was on the contents.

July 27—Home of J. G. Arnold, a one-story frame cottage at Stop 6½, Lake Shore Road, was destroyed. Insurance is carried to the amount of $700.

West Chinguacousy, Ont.—July 26—Barn of M. Laidlaw and contents were destroyed. Estimated loss, $4,000, of which $1,200 was on contents. Insurance carried, $1,800.

Winnipeg, Man.—July 25—Fruit and confectionery store of J. Hargle at 791 Portage Avenue, was destroyed. Estimated loss, $1,000.

Niagara District Industrial Association Congress

Delegates Are Shown Power, Transportation and Other Facilities of Towns and Cities in the Niagara Peninsula—Progress of Hydro-Electric Power Development—New Welland Ship Canal Is Immense Undertaking—District Organization Will Likely Be Permanent

FACTORY sites, power and transportation facilities contained in the Niagara peninsula were shown to delegates to the first conference of the Niagara District Industrial Association, held August 2nd to 4th. The more important points visited were the cities of Niagara Falls, Welland and St. Catharines, and the towns of Bridgeburg, Fort Erie, Chippawa, Port Colborne, Humberstone, Merritton and Thorold. The district is one of the most populous in Canada, and, in addition to the attractions to manufacturing industry, has also excellent soil for agricultural and fruit-growing purposes.

Assembling at Niagara Falls on Monday, the party, which included not only delegates from the district, but also visitors from other points in Canada and from the United States, were entertained by the Niagara Falls Park Commission and by the Niagara Falls Chamber of Commerce. In the afternoon they were shown over the power plant of the Ontario Power Co., and over the Queenston-Chippawa Power Development, now under way, by the Ontario Hydro-Electric Power Commission. In the evening a "power" banquet was held, at which further information about the work and its importance was given. The principal speakers were W. M. German, M.P., president of the Niagara District Industrial Association; Senator Gideon Robertson, Canadian Minister of Labor; Mr. Acres, of the Hydro-Electric Power Commission, and F. W. Field, British Trade Commissioner in Ontario.

The Niagara Power Development will, when completed, be the largest Hydro-electric power plant in the world. There will be an installed capacity of 500,000 horse power, with a head of 305 feet. The capacity of each unit is 52,500 horse power. The canal is to be nine miles in length, the river section being four miles in length. The deepest cut is 145 feet, of which 75 feet is in rock. The width of the [illegible] water channel will be 48 feet, and the depth of the water section under operation will be 35 feet. Thirteen million cubic yards of earth are being excavated in connection with the work, and four million cubic yards of rock. A total of 500,000 cubic yards of concrete will be used. Seventeen bridges will be required to carry railroad and highway traffic over the canal.

The Welland Canal

On Tuesday the conference went to Bridgeburg, Crystal Beach, Port Colborne, Humberstone and Welland. Water transportation was the subject of [illegible] for the day. The problem was discussed by railroad, [illegible] men from various standpoints. The [illegible] of the Niagara district in particular and [illegible] in general were dealt with by the speakers, [illegible] Senator Gideon Robertson, Minister of Labor; [illegible], Industrial Commissioner of the C.P.R.; [illegible], general freight agent of the Michigan Central; [illegible] and J. J. Morsman of the Wabash Railway; Mr. Timmons of the G.T.R., and Major Alex. C. [illegible] of the [illegible] Deep Waterways and Power Association. The slogan "Bring the ocean to your doors" was [illegible] by Mr. Lewis as the [illegible] for both Canadian and American interests, regardless of [illegible] considerations.

Senator Robertson announced, in his address at a banquet in the evening, that highway development [illegible] proceeded with immediately in the Niagara peninsula, if the federal share of $2[illegible],000 is to be devoted to the building of the Queenston-Hamilton road. This will be pushed by the Ontario Department of Highways in the [illegible] future. He also declared that the [illegible] of the Welland-Port Colborne road would be [illegible] with [illegible] of delay on the portions still unfinished. He declared himself in favor of the building of a higher bridge over the Niagara River to relieve the present traffic congestion at [illegible], and would try to hasten that project. After dealing with the development of rail transportation under private ownership, Senator Robertson stated that service should be the basis of competition in the operation of the nationally owned lines, with C.P.R. standards in front of them. He declared the proposed freight rate increases were justified in view of the much higher operating costs, citing the tripling in cost of box cars, locomotives and passenger cars and the building of [illegible]. With regard to canalization of the St. Lawrence, he said federal aid was assured, and that for more than three years the Dominion government has been making surveys preparatory to making a start in that work of power development and deepening of the waterway to the sea.

Labor Developments

"There has been a gradual change in industrial conditions during the year," said Senator Robertson. "Twelve months ago [illegible]

Fire Losses and Fire Insurance Claims[*]

Some Legal Aspects of Fire Losses—Valuation of Property and Securing of Evidence — Statutory Conditions and what they Require—Notice of Loss, Statement of Claim and Adjustment

By J. ARMITAGE EWING, K.C.
Ewing and McFadden, Montreal

THE payment of fire losses is a very important feature of the business of fire insurance. In this consists the fulfilment of the company's obligations. A clear understanding, therefore, of the principles underlying the making of claims by the insured and the meeting of them by the companies is desirable.

Fire insurance is a contract of indemnity. In that respect it differs from life insurance, which is not always a contract to indemnify. A man may insure his own life in favour of himself, his wife, or his children for an unlimited amount, and the payment of the policy money when death takes place is not based upon any idea of indemnity. Where the loss is payable to a creditor under a life insurance policy the contract may be one of indemnity. In the case of fire insurance there is no question. It is purely a contract of indemnity. The loss must be direct and immediate and not be remote or speculative. The insured can only recover the extent of his own interest and his loss.

Valuation of Property

The sum insured does not constitute any proof of the value of the thing insured. This value must be established in the manner required by the conditions of the policy, and the general rules of proof unless there is a special valuation in the policy itself. In the province of Quebec, valued policies are recognized by the law. In such a policy the value of the property insured is not merely estimated, but the valuation of the loss itself is made and is equivalent to an assessment of damages in the event of the loss occurring. This valuation, provided there be no fraud or mistake is conclusive on both the company and the insured.

Fire insurance being a contract of indemnity, the claimant is not entitled to more than his actual loss, and anything he may recover in excess of that he holds in trust for the company which has paid him or for those on whose behalf he has entered into the contract; so where money is received by the insured after payment by the company, it inures to the benefit of the company, even where it is paid voluntarily by the party causing the loss; but not if it is received by way of a gratuity not intended to be as an indemnity.

Evidence of Value

It is a principle that the contract of insurance is one of the utmost good faith, and this applies with particular force to claims and the settlement of fire losses. In the majority of cases, the company is at the mercy of the insured. The object insured is destroyed or damaged; where it is a total loss its condition before the fire and value can only be established by evidence apart from the thing itself—often difficult to obtain—and so to protect the companies as far as possible, rules have been adopted which the insured must abide by in order that his claim may be valid.

In the province of Quebec as well as certain other provinces of the Dominion, the law has grafted onto insurance policies certain conditions called "statutory conditions," which form part of every contract. Many of these apply to losses, their proof and their settlement. The companies may vary them within certain limits. The object is to afford the companies all reasonable means of ascertaining the extent of the claimant's loss on the one hand, and to provide means for the insured to obtain proper redress on the other.

Notice Must be Given

When a fire occurs no primary obligation rests upon the company; but such obligation is incumbent upon the insured. His first duty is to give notice of his loss to the insurer. This is provided by statutory condition 13a.

The notice must be given "forthwith" after the loss. What does this mean? Article 2478 of the Civil Code requires the notice to be given "with reasonable diligence." It is necessary that the company should have the opportunity of inspecting the loss as soon as possible in order that it may arrive at a true estimate of its extent. Hence, while a reasonable time is allowed the insured, the notice should be given without any unjustifiable delay, under all the circumstances of the case. It has been held that the words "forthwith" and "immediately" have the same meaning. The law always takes, or tries to take, a reasonable view, and it is provided in the above article (2478), that if it be impossible for the insured to give notice within the delay specified in the policy, he is entitled to a reasonable extension of time.

The notice must be in writing. As to what constitutes written notice, this is covered by another condition, No. 23, which provides that any written notice to the company, where the mode is not expressly provided by law, may be by letter, delivered at the head office of the company in the province of Quebec, or by registered letter addressed to the company, its manager or agent at such head office, or by such written notice given in any other manner to an authorized agent of the company. From this it would appear that a written notice given to any authorized soliciting agent of the company will be sufficient, though I would not advise a claimant to rely upon this method. It is far safer to address the notice to the company at the head office in the province or at least to the general agent of a division.

Where it has been proved that notice has been duly mailed, and there is evidence of its non-delivery, the law will generally presume that delivery has been made, and so notice given.

Giving Verbal Notice

While the law requires the notice to be in writing, it has been held by the Court of Appeal in the province of Quebec that where verbal notice was given to the local agent, the policy requiring a notice in writing, this verbal notice was sufficient, when the company immediately on receiving it sent its expert adjustor to the scene of the fire with instructions to draw up a basis of settlement. But this decision must not be taken as holding that verbal notice is equivalent to written notice. Rather it is based upon the action of the company in acting upon the verbal notice as constituting a waiver of its right to notice in writing.

As to who must give the notice; the statutory condition requires this to be done by the person entitled to make a claim under the policy. While it is desirable for the notice to be given by the claimant himself, it would doubtless be held sufficient were it done by one who is in the position of the claimant for the purpose of exercising his rights, such as an official assignee in insolvency or a receiver or liquidator. This, perhaps, would be extended to an authorized agent, one

---

An address before the Fire Insurance Association of Montreal.

who had been acting as manager of [illegible] in connection with the property. It is possible that it would be held sufficient if the written notice were sent by anyone. Mr. Laverty in his work on insurance says: "It would appear not to be a matter of importance who gives the notice of loss so long as the company duly receives the notice."

Proofs of Loss

After giving the notice the next duty on the part of the claimant is to deliver to the company "as particular an account of the loss as the nature of the case permits." These are popularly called "proofs of loss," the requirements with regard to which are found in statutory condition 13 b, c, d and e. The claimant must also furnish with his account of the loss a sworn declaration establishing that it is just and true, the origin of the fire, that it was not caused through his wilful act or neglect, the amount of other insurance, all liens and incumbrances on the property, and if it is movable property, where it was at the time of the fire. The claimant must also, if the company requires and if practicable, produce his books of account and other documents tending to show the value of the property, and must also furnish evidence in the mode specified of his good character.

As to who should furnish these proofs: While Condition 13 requires the claimant to do so, Condition 14 permits it to be done by the agent of the insured in case the latter is absent or unable himself to make them and this absence or inability is satisfactorily accounted for.

Time for Sending Proofs of Loss

The statutory condition requires this to be done as soon as practicable after the notice. No unnecessary delay must occur in the sending of these proofs. They are exacted in order to afford the company every opportunity of ascertaining whether or not the loss has occurred, and, if so, the value of the property destroyed. The proofs are supposed to furnish the necessary information to the company for this purpose, and a prompt investigation, assisted by the required information, is essential to enable the company to come to its decision. No hard and fast rule can be established fixing the time limit within which proofs of loss must be sent. The circumstances of each case must be considered. The sending of such proofs is not a condition of liability but of recovery, and therefore should not be too rigorously enforced if there is evidence of compliance and good faith within a reasonable time.

The furnishing of proofs of loss is a condition precedent to recovery, and if they are not sent as required by law or the conditions of the policy as the case may be, the company is relieved from liability.

Like all conditions precedent to recovery after loss which require something to be done by the insured before he can recover, no affirmative action is required of the company. The latter can stand by in silence until the proofs of loss have been furnished; and this applies also to the notice. Its silence will not be construed as a waiver. Therefore, if no notice have been sent or proofs of loss furnished the company is not obliged to remind the insured of the conditions of his policy in these respects and to suggest that he comply with their provisions. It may adopt a passive attitude, and should the time allowed the insured to fulfil these conditions go by without his having done so, the company may then consider itself off the risk and repudiate all liability for the loss.

If the policy stipulates a specific [illegible] within which proofs of loss must be delivered, and [illegible] proofs of loss are sent to the company before the expiration of such [illegible] and no objection is made to them until [illegible] the company would likely be stopped from objecting to them and pleading that proofs of loss as [illegible] sent, as the defects might have been remedied in due time if the objection had been properly [illegible] to the attention of the insured, and particularly if the refusal to pay is also put upon other grounds.

[illegible] of [illegible] on the part of the company.

With regard to the [illegible] them, and to the company [illegible] to the requirements [illegible] by the [illegible] plied with, [illegible] of each case [illegible]

Waivers

As these and other statutory conditions are in favour of the companies and for their protection, they may release the insured from complying with all or any of their requirements. These releases are called waivers. The company waives or foregoes that which it is entitled to exact.

Waivers are not to be presumed, and [illegible] forfeitures are not favoured by law. They must be gathered rather from the intention of the company as inferred from its actions as a whole, and not as affecting the insured [illegible] from isolated acts. In the absence of statutory enactments it may be laid down as a principle that any affirmative act on the part of the company, which might reasonably cause the insured to believe that the company had excused him from the performance of a condition precedent to recovery, would be interpreted as a waiver.

In order that a waiver may exist, some positive act on the part of the company is required. Mere silence does not constitute a waiver. Thus, when there is a failure to give notice or furnish proofs of loss within the time [illegible] required, the omission to point this out to the insured is no wrong or prejudice towards him, and so it does not amount to a waiver of these important conditions.

On the other hand, positive acts by the company inconsistent with the exaction of the fulfilment of the conditions precedent to recovery will be interpreted as a waiver of its rights to require them. For example, where, upon receipt of informal notice of loss, the company offers a certain amount in payment, it may be deemed to have waived the more formal notice of loss which the policy might [illegible], and if before proofs of loss have been sent and before the insured is in default, the company refuses to pay upon some other ground, it would be stopped from successfully pleading that no proofs of loss had been sent.

Statutory condition No. 20 provides that "no condition of the policy shall be deemed to have been waived by the company either wholly or in part, unless the waiver is clearly expressed in writing, signed by an agent of the company." In policies governed by this condition there can be no parol waiver of a [illegible] condition; but the company may be, by its conduct, estopped from setting up the non-compliance with the [illegible] to successfully plead such estoppel, the conduct of the company should be [illegible] than that it intended to excuse the insured from [illegible] the condition [illegible]

WEST INDIES AGREEMENT MEETS WITH APPROVAL

Ratification by Parliament Expected—Some of the Provisions—New Minister of Agriculture—The Fuel Situation

(Special to *The Monetary Times.*)

Ottawa, August 5th, 1920.

ANNOUNCEMENT was made this week of the details of the agreement which has been reached between the Canadian government and the governments of the British West Indies as a result of the conference held in Ottawa. While the agreement was reached before the conference broke up delay in announcement was made in order to give time for the various governments to ratify the proposals. This has been done by the British West Indian administrations, while the Canadian cabinet has also ratified it, subject to the approval of parliament.

The new agreement is a most important one, not only on account of the development of business which is bound to follow between Canada and the British West Indian colonies, but on account of the wider adoption of the principle of preference within the Empire. It is believed in Ottawa that the approval of this agreement is only the first step towards a wide scheme of Imperial preference. The delegates evidently had this in mind, as they have inserted a clause to make certain that this agreement will not interfere with the adoption of any bolder project.

History of Negotiations

The man who is naturally most pleased over the new agreement is Sir George Foster. A great Imperialist, wider trading within the Empire has always been a desire of his heart. It was shortly after the return of the Borden government in 1911 that Sir George first opened negotiations with the British West Indies for some sort of a reciprocity agreement. A conference was held in Ottawa in 1913. Unfortunately, at that time the main island, Jamaica, stood aloof. However, an agreement was reached providing for a 20 per cent. preference and better steamship facilities. Before the agreement was well in force the war came with its almost complete interruption of business with the West Indies and the old agreement never had a fair chance to test its advantages and disadvantages. Sir George has again been the prime mover in this new conference, which this time was participated in by every colony. The preference has been this time extended to 50 per cent., with slight modifications for some of the islands. The free list is also extended. The agreement provides for an extended steamship service with a weekly service between the Canadian port and the eastern group of the British West Indies and a fortnightly service between the western group. This is to be started "as soon as possible and in any case within three years." It is understood that it is the plan of the Canadian government to put a public-owned steamship service on this route.

However, if it is found necessary to subsidize a line, the various governments will contribute proportionately. This is the plan as for the eastern group. As for the western group, if the service by the government lines proves unremunerative, the Bahamas, British Honduras and Jamaica will contribute 25 per cent. of the loss within certain restrictions.

The question of better cable service has not been overlooked, although it was found impracticable to do anything at the conference. The agreement recommends to the various governments involved the consideration of the laying of a British-owned and British-controlled cable service. The Canadian government promises to institute an inquiry.

Hon. Arthur Meighen may be handicapped by having bequeathed to him a cabinet not of his own choosing, some of whom, like Hon. Arthur Sifton, are far from well, others of whom were opposed to his selection and others are none too capable. However, he is fortunate in one thing and that

(Continued on page 12)

NORTHWESTERN LIFE ASSURANCE HOME OFFICE BUILDING

THE official opening of the new home office building of the Northwestern Life Assurance Company, Winnipeg, took place on July 15th, coincident with the celebration of the fiftieth anniversary of the entry of the province of Manitoba into confederation. The building, photograph of which is shown herewith, was erected at a cost of about $75,000, and is located in the heart of Winnipeg, just two and a half blocks from Portage Avenue, on Donald Street. The building is forty by one hundred and ten feet, and provision has been made for the erection of a larger building at some time in the future. It is equipped with all mechanical devices useful to a life insurance company.

The office now occupied by the Northwestern Life Assurance Company is the second largest head office of a life assurance company west of the city of Toronto.

THE DISTRIBUTION OF FIRE LOSSES

FIRE insurance is effected so that the insured shall be indemnified for the loss of property by fire up to a stipulated amount, in consideration of an agreed sum, called a premium, which he pays for the protection. Its value consists in relieving the individual from a hazard which might prove his financial ruin. This class of insurance has become so universal that it would be impossible to carry on modern business without it. Treasurer Gardiner, of the Fireman's Fund Insurance Co., in the June "Record" of that company, points out that certain forms of fire insurance existed among the Romans and that later it was an adjunct to marine insurance. He continues:—

"As early as 1635 efforts were made in England to establish it upon a separate footing, which, however, was not accomplished until after the London fire of 1666, which seems to have brought strongly to the minds of property owners that without insurance they could not be secure against fire.

"The great lesson of self-protection by insurance against fire loss was fully demonstrated in this country by the great fires of Chicago in 1871, Boston in 1872, Baltimore in 1904 and San Francisco in 1906, as well as by the enormous fire waste which is continualy eating up our resources. In this country and Canada during 1919 the fire losses amounted to $269,000,775.

"To distribute the great burden of this annual fire waste and relieve the communities in which it occurs from financial embarrassment, is the duty of the [illegible] companies, by collecting from the people in all sections of the country premiums for individual protection, which in turn become the resources of the company from which payment to the loss claimant is made; for no [illegible] depending upon its own local premium [illegible] survive a serious conflagration.

"It therefore becomes necessary for insurance companies to distribute their agencies in all sections of the country so that a continual flow of premiums is brought in to them in order that they themselves may not be [illegible] in case of a great fire in one or two localities. A wide distribution of risks insures a like distribution of the [illegible].

"No individual or community should feel because its particular risk has proven profitable to the company that the rate of insurance charged is higher than it should be. The company, to illustrate, [illegible] a risk on your property similar to the one it took on that of your neighbor, to whom it was called upon to pay a loss amounting to many times the premium paid by him, and before another day rolls around your particular risk or community may have to call upon the company for reimbursement for a loss.

"The same principle applies to the country as a whole. Fire insurance companies [illegible] large profits [illegible] period of years [illegible] service to the [illegible] the income and [illegible] Moreover, [illegible] conflagration [illegible] a premium [illegible] received [illegible]

"During the [illegible] during the [illegible] with great [illegible] realizing [illegible] for [illegible] [illegible]"

INDIVIDUAL RESPONSIBILITY MUST BE KEPT

SCARCELY a year passes which does not see some new extension of government activity. Services considered as necessary to human existence, for which the individual assumed responsibility in the past, are being thrust upon the shoulders of a willing but incompetent state. For a democratic government is only too ready to do what the electorate wishes it to, but its ability has fallen short of efficiently handling the vast business which it has assumed. The path of progress, however, is strewn with the wreckage of hasty experiments, but who is prepared to be a stumbling-block to progress on this account?

The state does not step in because the individual is not competent to look after himself. The nineteenth century, during which the most phenomenal economic progress in history was made, was the period when the spirit of individualism and the doctrine of *laissez-faire* reached its culmination. Success brought huge financial rewards, while failure meant certain elimination. The power of the state has now gradually been brought to the assistance of the weak. If he cannot work, he is supported from the public funds; if he is an inefficient worker, he is none the less assured of a minimum wage; even if he won't work, his claim to a livelihood is admitted. The lowest standard of living has been enormously improved, and nothing short of outrageous crime can deprive the citizen of his right to that standard; whether support is extended in the form of poor relief, old-age pensions, unemployment and sick benefits, workmen's compensation, the minimum wage, or any of the other devices of modern legislation, the purpose is the same.

Enormous sums are paid out annually by the governments of advanced nations for the support and assistance of the helpless and the inefficient. The cost is shifted to the shoulders of the successful through the agency of property taxes, succession duties, taxes on consumption, and graduated income and corporation taxes. While the necessities, and even the comforts, of life are being guaranteed to a vast number of incompetents, the annual output of goods is threatened by depriving the successful of a large part of their gains. If consumption is to be equalized by such a process, levelling up and down, then production, which in the past has been stimulated best by the prospect of individual gain, will fall. However far we may care to go in this direction, it is at least apparent that some measure of responsibility to exercise brain and hand must remain with the individual. Equality in distribution is still beyond the bounds of safety.

FACTS ABOUT DISAPPEARING FORESTS

THE forests of the United States are rapidly being depleted. The same is true of Canadian forests, so far as they are accessible to transportation, and the shortage across the border increasingly aggregates the situation in Canada, for the demands for Canadian pulp and other products is becoming more and more insistent. The American Forestry Association, in making an appeal for support of the movement to perpetuate forests, summarizes the situation as follows:—

"We are consuming lumber three times as fast as we are procuring it. Experts predict our saw log lumber will be gone in fifty years. The bulk of the original supplies of yellow pine in the south will be gone in ten years, and within seven years 3,000 manufacturing plants there will go out of existence. White pine in the lake states is nearing exhaustion, and these states are paying $6,000,000 a year in freight bills to import timber. New England, self-supporting in lumber twenty years ago, now has to import one-third of the amount used. It has $300,000,000 invested in wood and forest industries, employing over 90,000 wage-earners. Fire destroys over $20,000,000 worth of timber every year, and kills the reproduction upon thousands of acres of forest lands. Within fifty years our present timber shortage will have become a blighting timber famine. Forests can be protected from fire, regrowth can be encouraged, conservative cutting can be practiced, reforestation can be accomplished—but it takes from fifty to one hundred years to mature a timber crop. Forest devastation must be stopped, lands now in forest must be kept continuously productive, forest lands now devastated and idle must be put to work.

"Ten years ago the United States produced its entire supply of pulpwood, but now two-thirds of it is imported. This means freight rates to be added to the purchase price. Indications are that supplies of pulpwood timber in New England and New York will be exhausted in twenty years. In New York alone supplies will be gone in ten years. Dependence upon foreign supplies of pulpwood for news print means we will be at the mercy of foreign manufacturers as to prices. Ten years ago the United States produced its entire newsprint supply—now we import two-thirds of it. Only one-third of the newspapers issued in 1919 were printed on the product of American forests. High cost of pulp and paper mills prevent the manufacturing plants from following the timbers as do saw mills. Much pulpwood has now to be freighted 500 miles to the mills. We bought nearly 1,400,000 tons of pulpwood from Canada in 1918 and prices advanced from $10 a cord to as high as $25."

HIGHER DEATH DUTIES AND LIFE INSURANCE

THE value of life insurance for meeting succession duties and thereby avoiding a possible sacrifice of assets is recognized. These duties are now being raised to still higher percentages, and arguments for this insurance protection are thereby strengthened. A recent number of the "Great West Life Bulletin" says:—

"With the Dominion Government facing the serious problem of having to obtain sufficient revenue to pay interest on its debt of $2,416,531,088, and also meet its current expenditures, and the municipalities and cities desperately casting about for ways and means to carry on their respective programmes, it is small wonder that our provincial legislators are re-examining available means of taxation to see if their possibilities are sufficiently developed. Their problem is to find increased revenues without seeming to impose too greatly on an already long suffering public, and it is not surprising that the Succession Duty Act should be seized upon for revision. Saskatchewan, we believe, was the first province to submit its schedule for a substantial increase of estate levies. Next in order comes Ontario with 'anticipated increased revenue from the corporation tax, increased amounts from the insurance companies, banks and the Succession Duty Act," which last, according to Ontario's financial minister, the Hon. Peter Smith, is expected to bring in a good deal of extra money.

"The most striking feature of the new rates for Ontario is the way in which they deal with estates that pass on to one or two beneficiaries or to other than near relatives. Where the old act took from twelve to fifteen per cent. in taxes, the new legislation will give the province authority to impose duties for a maximum of 60 per cent. of the estate. Where the estate exceeds $25,000 and does not exceed $50,000, and goes to wife, husband, children, parents, etc., the tax remains at one per cent. On estates up to $150,000, the old rates have been increased one half of one per cent. On larger amounts the tax is practically the same, 10 per cent. being collected from estates of over $1,000,000."

The Leamington, Ont., merchant, who, by way of reprisal, imposes a discount of 10 per cent. on American money, may be comended for his patriotism, but his knowledge of currency is scarcely sound.

FOREIGN BUSINESS

Much attention is being directed at the present time to export business. This Bank has a number of foreign branches as well as close working arrangements with banks of the highest standing in many other countries which enable it to offer special facilities in the financing of trade with foreign points.

THE CANADIAN BANK OF COMMERCE

Capital Paid-up	$15,000,000

PERSONAL NOTES

H. F. Harman, whose appointment as land commissioner of the Hudson's Bay Company, was announced in these columns recently, succeeds James Thomson, who resigned from that position recently. Mr. Harman has been with the company for the past 18 years. He was born in London, England, and came to Canada in 1902, entering the service of the Grand Trunk Pacific Railway Company on survey work. Subsequently Mr. Harman was engaged in connection with management of townsite properties for the Canadian Northern Railway, leaving that company to join the Hudson's Bay Company land department in Winnipeg. Mr. Harman served in England and France during the war, with the 4th Canadian Casualty Clearing station. This appointment is further evidence of the desire of the Hudson's Bay Company to promote qualified officers from existing staff to senior positions in the company's service.

E. C. Macleod has been appointed manager of the London, England, branch of the Bank of Nova Scotia, which was opened to the public about the 1st of August. Mr. Macleod, who entered the service of the bank at Winnipeg, Man., has served in various important capacities. In 1911 he was manager of the Chatham, N.B., branch and from 1911-13 was manager at Peterboro, Ont. In 1913 he went to Kingston, Jamaica, as manager of the bank's office there, which position he held until June, 1919. Mr. Macleod is now in England arranging the necessary details for the opening of the new branch.

D. C. Wood, has been appointed general foreign freight agent of the Canadian National-Grand Trunk Railways, with offices in the Board of Trade Building, Montreal. The former position held by Mr. Wood, that of traffic manager of the export and import department, Canadian National Railways, Toronto, has been abolished. Other appointments announced are as follows: R. J. Foreman, to be foreign freight agent, Canadian National-Grand Trunk Railways, with headquarters at Montreal; F. R. Porter, to be foreign freight agent, with headquarters at Toronto; J. A. Wright, to be assistant foreign freight agent at Montreal; Geo. Pepall, to be assistant foreign freight agent at Toronto. A. F. Read, who has occupied the position of foreign freight agent of the Grand Trunk Railway System of Montreal since 1894, and that of foreign freight agent since 1911, having requested relief from his official duties on account of ill-health, has been granted leave of absence until December 31st next, after which date he will be transferred to the company's superannuation fund. Mr. Foreman, the newly-appointed foreign freight agent, will be succeeded as assistant to the traffic vice-president by J. M. Sparling, at present chief clerk to the vice-president.

WEST INDIES AGREEMENT MEETS WITH APPROVAL

(Continued from page 8)

is that he has handed to him as minister of agriculture a man who is on the job every minute of the day and knows his work from Alpha to Omega. I have seen now four ministers of agriculture at work at Ottawa and without casting any reflection on the capabilities of the others Hon Dr. Tolmie is easily the best of the four. Old-timers at Ottawa are a unit in saying that he is the best minister of agriculture Canada has ever had. He is an expert agriculturist from nearly every standpoint and in addition is a fine administrator. He does also what few ministers before him have taken the pains to do—kept in touch with farm life in every aspect. He has just returned from a western trip, where he attended every important agricultural exhibition on the prairie provinces. Perhaps the finest tribute was paid to him at a banquet at Brandon, where a political opponent said that if the government was beaten he hoped a new administration would retain the services of Dr. Tolmie as minister.

Here is an example of the way Dr. Tolmie works. While at Winnipeg he looked over the stock yards. He was pained and surprised to see a particularly scrubby lot of beef, which was bringing minimum prices. He made inquiries and found this beef came from foreign districts of the west. He discovered that these alien settlers knew nothing of the science of stock-raising; they were turning out inferior stock for the market through ignorance. Dr. Tolmie figured that this was a loss to the country of hundreds of thousands of dollars. So now he is investigating the feasibility of a plan by which some of the brightest of the settlers in each foreign district can be brought to Winnipeg or some other point and given a practical short course in stock-raising, with the idea that they will each teach their neighbors and ultimately the whole district.

Fuel Situation

The coal situation is giving the government much anxiety. Hon. Frank B. Carvell is wrestling with the problem, but is not making much apparent headway. There will likely be a fair supply of anthracite coal for this coming winter in central Canada, but the outlook for bituminous is far from rosy.

Government railways are so short that they are actually seizing stocks from industries in the maritime provinces. There has been an improvement in production in the Nova Scotia mines, but the production is still far short of a mark of a number of years ago. Dropping of the amount of work per man is given as one of the main causes.

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 30th:—

Dominion Reduction Co., 66,000; Nipissing Mine, 245,380. Total, 311,380 pounds. The total since January 1st is 13,706,167 pounds, or 6,853.08 tons.

NO CHANGE IN CROP OUTLOOK

Prospects Still Good as Harvest Approaches—Cutting Grain Now in Many Sections—Slight Damage to Western Crops

NOTHING has developed of late to affect the general crop outlook in Canada. Any damage from dry weather, wind, hail, or grasshoppers is reported as being slight.

The following is a summary of the weekly reports made by the agricultural representatives to the Ontario Department of Agriculture up to August 3:—

"Welland reports that oats, corn, etc., have recovered from the effects of the severe rain storm of July 23rd. The injury from Hessian fly has been serious in a number of the fall wheat counties in the southwest part of the Province. Norfolk reports that some fields suffered from 40 to 50 per cent. of damage from the insect. Some representatives are of opinion that the work of the fly may tend to limit the area of winter wheat planted this fall.

Barley and early oats have been cut in several counties. While well headed, the straw of the first-named crop is rather short; but oats (with more than double the acreage of all the other cereals) promises a generous yield of both grain and straw. Spring wheat has not done so well. Farmers are still drawing green peas to the Napanee canning factory, where some days as many as 30,000 cans have been turned out.

Corn is very uneven this year, and has not received as much cultivation as usual owing to long spells of broken weather. However, the main growing season is now on. Early potatoes are pouring upon the market. The yield has been good, and they are largely free from disease, although Frontenac speaks of considerable blackleg. Beans are doing exceedingly well as a field crop this season; the acreage, however, is comparatively small. Flax is said to have done well in Middlesex, where the crop is now being pulled, mainly by Indians. Owing to continued catchy weather a good deal of hay is still lying in the fields, which will mean a lot of poorly cured clover and timothy. The second growth of clover, however, is most satisfactory. New hay is selling at from $20 to $26 a ton. Grey reports that sweet clover is doing remarkably well both for fodder and seed. Alfalfa has also been an excellent crop so far, both first and second growth. The rain has forced the root crops ahead in fine style, and good returns are looked for, especially from sugar beets and turnips.

"The season will rank as a good season for fruit, generally speaking. Raspberries are large in size, and are yielding well. Apples are bearing fairly in most cases, especially the summer and fall varieties, and are freer than usual from work and spot. Early peaches are now on the market. Norfolk reports them as yielding well.

"Cattle are being marketed slowly. Calves for veal are selling at from 13 to 18 cents a lb. The milk flow is good for the time of the year. Frontenac reports a drop in the price of cheese during the week, sales on the board going to 25⅓ cents a lb. Prescott and Russell states that a number of cheese factories are now selling their products on a graded basis. Hogs are going to market regularly at from $19 to $21 a cwt. Brant reports little pigs selling slowly at $10 a pair."

Hail Damage in Manitoba

Two storms which struck Winnipeg on August 3 extended generally over Manitoba. One storm swept over the north, carrying hail and doing some damage through the wind. That which went over the southwest was slighter in its violence, but hail also fell. Roblin came in between the paths of both and got no rainfall. Ethelbert and Garland districts had their crops nearly wiped out by hail. Emerson and Glenboro' are cut off by telephone, and are supposed to have suffered. The city of Winnipeg welcomed the rain as a relief to excessive heat.

Grasshoppers in Saskatchewan are still doing some damage to the wheat in stock. The hoppers are chewing the twine, with which sheafs of rye are bound, and the winds are distributing the grain in all directions. The hot, dry weather recently has brought grain crops to maturity in the southern part of the province very rapidly, and cutting is under way at a number of points, including Trossachs, Estuary and Aneroid, and by the end of the week will be general in the south and southwest. While there is no shortage of twine, the rapidity of ripening has caught a number of farmers without a supply on hand, and some of them are finding it necessary to ship in by express enough to commence operations. In the Regina district cutting will be general about August 10 if present weather conditions continue.

Ninety-five per cent. of the crops in the district affected by grasshoppers have been saved by the prompt action on the part of the Manitoba Department of Agriculture, and the pest, in so far as it was a menace to this year's crops, has ceased to exist, according to an official communication from Dr. Norman Criddle, Dominion Entomologist. Some damage, he states, is still being done to the late crops. The infestation was the largest in the history of the province, and the crops endangered were valued at millions. Much of the damage done was due to the failure of the individual farmers to take the necessary precautions or report outbreaks. Prof. Criddle points out that egg-laying is now going on in the parts of the province affected, and that the destruction of these constitutes the next problem.

Manitoba Crops Early

In a report dated July 27 the Manitoba Department of Agriculture says:—

"The Manitoba harvest will be somewhat earlier than usual. Fall rye cutting has actually begun here and there, and will be general by the end of this week. Wheat cutting is expected to start at several points by August 10th or before, and the binders will be at work in almost all parts of the province by the middle of the month. Reports as to crop prospects are very mixed. For a month past the weather generally has been dry with waves of heat in many places. Several districts were relieved during that period by nice rains which carried the crop along, but other parts of the country were not so fortunate. Practically all over the province good rains fell last week. An area both north and south of the main line of the C.P.R. west of Carberry and extending into Saskatchewan has suffered very severely from the heat and drouth. This district extends about as far south as Reston, and takes in part of that very fine park-like country north and north-west of Brandon, which has mostly had good crops during recent years, such points as Rapid City and Hamiota being in this belt. Had it not been for last week's rains some of the grain fields in this belt would by this time have been used for pasturage. The rains will very greatly lengthen the oat and barley straw there, and will help fill the short wheat heads. Outside this area reports generally are very satisfactory. The heat did some harm, and in several places there are white tips on the heads; but in thousands of Manitoba's wheat fields the straw will be of at least average length with a really good crop of grain.

"At many places the difference between the area of very good and of very poor crops is quite sharply marked. According to the way in which showers passed over the country, most of southern Manitoba has fair to good crops, and the northern parts and the lake country are in good shape. Reports from Gladstone and Langruth, for instance, are very encouraging, and Portage Plains has a fine crop. At several points not covered in this report the crops are known to be good. No rust damage is so far reported. Several hail storms have occurred, with probably more damage than usual. Grasshoppers, now in the winged stage, are yet present in some places, and may do harm by eating off the heads of grain, but they have been fought very faithfully, and some reports tell of them dying as though attacked by some natural enemy. Potato bugs are reported plentiful from many places. Hay prospects are mostly fairly good."

BANK BRANCH NOTES

Bank of Commerce Plans Branch in Brazil—Bank of Montreal to Have Branch at Banff

THE Canadian Bank of Commerce has, it is understood, decided to open a branch in Brazil. Nearly two years ago the general manager, Sir John Aird, made a visit to South America, and this action on the part of the bank has been anticipated. E. B. Ireland is to undertake the organization of the branch. Mr. Ireland has for five years been manager of the Seattle branch, and prior to that was attached to the New York agency.

The Bank of Montreal is planning to build a new branch at the C.P.R. Hotel at Banff, Alta.

The following staff changes of the Canadian Bank of Commerce have just been announced:—

Head Office—Mr. A. E. Tayler, manager at Windsor, Ont., to be assistant general supervisor.

Windsor, Ont.—Mr. W. G. Lynch, manager at Medicine Hat, to be manager.

Medicine Hat, Alta.—Mr. C. H. Niles, manager at Grand Forks, to be manager.

Havana, Cuba—Mr. A. DuBoulay, assistant inspector at Sherbrooke, to be assistant manager.

On the 3rd of August the Bank of Nova Scotia opened its branch in London, England, at 55 Old Broad Street. Mr. E. C. MacLeod, who was formerly of the Kingston, Jamaica, branch, will be manager at London.

The Canadian Bank of Commerce announces the opening of branches at the following points: Campbell River, B.C., temporarily in charge of Mr. A. K. M. Roberts; Chemainus, B.C., sub-agency to the Duncan branch.

The Royal Bank has opened branches at Montreal (Park and Barnard); Toronto (Sherbourne and Queen); La Esmeralda, Cuba; Manguito, Cuba; and Langre Grande, Trinidad.

NIAGARA DISTRICT INDUSTRIAL ASSOCIATION CONVENTION

(Continued from page 5)

said he. "This can be pierced by a waterway to the seaboard so that shipments can be made economically and without transhipment." He urged that the interests of rail and marine transportation interests were one, and that constructive co-operation was necessary to bring about realization of the plans. No exception was made in the case of the New York barge canal, which, he said, would have more traffic than ever under the new conditions, by reason of the industrial growth that would follow the development of the water powers on both sides of the international boundary.

The congress finished at St. Catharines, after being shown through the adjoining towns of Merritton and Thorold, where large plants for the manufacture of paper, glass, metals and other products are located.

BUSINESS FAILURES

R. G. Dun and Co. report failures in Canada for the past few weeks as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
July 30	6	4	1	0	2	1	0	4	0	18	
July 23	4	1	2	0	1	2	0	0	0	10	12
July 15 ..	4	4	2	0	2	1	0	0	0	13	8
July 9	6	7	3	0	0	0	2	2	0	20	8

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	12⅞ pm	13⅛ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	4.02	4.09	....
Cable transfers ...	4.03	4.11	....

Rate in New York for sterling demand, $3.61¼.

Bank of England rate. 7 per cent.

The following New York quotations are furnished by the National City Co.: Cable, London, 3.61¼; cheque, London, 3.60¾; cable, Paris, 7.30; cheque, Paris, 7.29; cable, Italy, 5.08; cheque, Italy, 5.07; cheque, Belgium, 7.70; cheque, Swiss, 16.55; cheque, Spain, 14.90; cheque, Holland, .3305; cheque, Denmark, 15.25; cheque, Norway, 15.30; cheque, Sweden, 20.50; cheque, Berlin, 2.18; cheque, Greece, 11.95; cheque, Finland, 3.40; cheque, Rumania, 2.50.

BANK OF HAMILTON DISTRIBUTES PROFITS

Following closely upon the recent action of the Bank of Hamilton in presenting each member of its staff of more than one year's service with a life insurance policy, paid for by the Bank, under the group insurance plan, it is announced that a bonus to the shareholders of one-half of one per cent, has been declared to be paid on the 1st September next, this being in addition to the regular quarterly dividend of three per cent. also payable on that date. It is said that the half year of the Bank which ends on the 31st of August next has been prosperous and it was thought fitting by the board of directors that the shareholders should benefit.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended August 5, 1920, compared with the corresponding week last year:—

	Week ended Aug. 5, 1920	Week ended Aug. 5, 1919	Changes
Montreal	$145,321,010	$135,168,135	+$10,152,875

Succession Duties in Ontario

The rates of Succession Duty having been increased at the recent session of the Ontario Legislature, we have prepared a Booklet entitled "Succession Duties in Ontario." This Booklet contains schedules of the new rates, together with a summary of the main provisions of the Act. To readers of *The Monetary Times* we shall be pleased to send a copy free on request.

ALBERTA WORKMEN'S COMPENSATION BOARD

1919 Was First Complete Year of Operation—Expenditures Totalled Nearly $150,000—Investments are $237,947

CLAIMS paid by the Alberta Workmen's Compensation Board in 1919 totalled $94,216, in addition to which $13,558 was expended in administration and mine rescue work, and $38,181 in payment of expenses and equipment. These figures are given in the annual report of the board for 1919, just issued.

The Workmen's Compensation Act came into effect in Alberta on August 1, 1918, and practically all persons engaged in industries where manual labor is employed are now within the scope of the act, with the exception of those working in retail stores, the farming industry and those specifically mentioned in the act. During 1919, six assessments were made on the payrolls submitted by employers, and the total amount yielded in this way, with interest on the same, was $321,707, to which is added a balance of $70,904 carried forward from the year 1918.

Assessments in 1919

At the 1919 session of the legislature, an amendment was made to the act, whereby the board was given authority to require each employee who was not protected by a medical aid contract to contribute a certain amount per day to the board. The amounts required were two and three cents per day, according to the hazard of the industry, until August 1, 1919, when these amounts were reduced to one and two cents per day respectively. The amount collected by the board under this provision was $33,847, of which $10,522 was paid out, leaving a balance of $23,324, and a total balance of $269,980 for assessments and medical aid. Of this balance investments have been made in Victory bonds, provincial government saving certificates and provincial government debentures which brings the total investments as at December 31, 1919, to $237,947.

During the time the act has been in operation up to and including, December 31, 1919, there were 4,409 accidents reported to the board, and of these 1,956 were finally disposed of by payment of compensation, 1,257 on which no compensation was paid, leaving 1,196 to be finally disposed of.

The board in its annual report, expresses its appreciation of the manner in which it was given co-operation and assistance in its work, by practically all of those who came within the scope of the act. It was, however, necessary to take action against certain employers and others for failure to comply with the provisions, which action was not taken until warnings had been repeatedly given to the persons affected. In many of these cases the provisions of the act were complied with after action had been taken, and the action was consequently stopped. In this respect, information was sworn out against 202 employers, the charges against 77 being withdrawn. One hundred and twenty-three were convicted, and in two cases convictions were not obtained. One doctor was convicted for failure to comply with the provisions of the act regarding reports.

Statistics for the Year

The members of the Alberta Workmen's Compensation Board are: John T. Stirling, chairman; W. F. McNeil and J. A. Kinney, commissioners.

The following is a summary of statistics for the year ending December 31, 1919:

Number of employers within the scope of the act 2,153.

Number of accidents reported 3,466.

Number of claims finally disposed of by payment of compensation 1,594.

Number of claims disposed of without payment of compensation 708.

Number of accidents reported and disposed of for which no applications for compensation received 192.

Number of accidents reported which were disposed of by payment of medical aid only 73.

Number of claims on which further payments have to be made 237.

Number of accidents reported still under consideration, and on which no payments have been made 959.

Total amount of payrolls on which assessments were made $26,363,546.

Total amount of assessments made $356,174.

Total amount of asssessments collected $314,688.

Total amount of expenditure in connection with fatal accidents: Compensation paid, $3,477; funeral expenses only $619—$4,096.

Total amount of expenditure in connection with nonfatal accidents $90,119.

VANCOUVER ISLAND LIFE UNDERWRITERS

At the annual meeting of the Victoria and Island Life Underwriters' Association, held in Victoria, B.C., on July 12, the following officers were elected:—President, K. Ferguson (Imperial Life); vice-president, J. B. Warnicker (Mutual Life); secretary-treasurer, S. B. Johnson (Dominion Life); executive, Alex. Peden (New York Life), and J. W. Hudson (North American Life).

The retiring president, Mr. Bell, stated that during the past year nine general, one special and two executive meetings were held. A publicity campaign during the year resulted in the publication of several articles explaining the value of life insurance and the work of the underwriters' association. Mr. Bell said:—

"Our organization has fully lived up to its reputation of being a public-spirited body by the participation of its members in several campaigns for national and local advancement, the most important of these being the 1919 Victory Loan. In this campaign twenty-three life insurance men took part, their personal efforts resulting in the securing of 1,987 applications and the sale of bonds to the extent of $1,041,550. In March of this year, on a request from the directors of the Victoria (B.C.) Shipowners, Limited, a few of our members, in conjunction with other business men of the city, undertook the sale of about $80,000 worth of that company's stock. By persistent and untiring effort this stock was quickly sold. More recently our members have been asked to assist the campaign of the Canadian Jewish Relief Committee, and I feel it may be said that those who have given such time as they could to this work have met with satisfactory response to their appeal.

"My reference to insurance legislation passed by the provincial house during the last session must of necessity be brief, as little legislation of this nature was brought down. An amending Act to the 'Life Insurance Policies Act' was passed on April 14th, dealing with the issuing of 'Policies on the Lives of Infants.' This amendment is very similar to the present Ontario Act covering similar policies, with the exception that it would appear to give a minor greater latitude in the choice of a beneficiary.

"It is regrettable to notice that no law was enacted for the licensing of agents, as I know it is generally conceded amongst insurance men that for the protection of both public and agent alike some law would be beneficial. During the early part of this year I had considerable correspondence with the Vancouver association on this subject with a view to getting consolidated action in the matter, but I fear our joint efforts have not met with success."

The Canada Life Assurance Co. has recently purchased the Jarvis and the Times' buildings on Bay Street, Toronto, at a cost of about $500,000. These properties, together with the present Canada Life building and the Sterling Bank Building, which has been owned by the Canada Life for over ten years, rounds out a corner in the financial district of Toronto with a frontage of 159 feet on King Street, and 236 feet on Bay Street.

GREAT LAKES-ST. LAWRENCE CONGRESS

Canadians Take Prominent Part in Detroit Meeting—Deep Waterways Scheme Approved by Representatives of Thirty-Five States

A GREAT Lakes-St. Lawrence Tidewater Congress was held in Detriot, Mich., July 22-24. Many Canadians, including 15 aldermen, Mayor Church and Controller Gibbons, of Toronto, and representatives from Hamilton, London, and Windsor, attended. O. E. Fleming, of Windsor, president of the Canadian Deep Waterways and Power Association, was one of the prominent speakers. Referring to Senator Lenroot's remark that Canada and the United States should work in harmony on this project, he said:—"Senator Lenroot was right when he said that it was unthinkable that trouble could ever arise between the two great English-speaking nations which could not be settled by arbitration." Mr. Fleming presented a resolution from the Canadian delegates that all organizations in Canada devoted to the waterways movement were solidly behind the principles for which the Great Lakes-St. Lawrence tidewater stood, and that they would bring the matter prominently before the Canadian government with the aim of securing united action on the project.

Efficient Transportation is Desirable

"This is the most important matter which has faced Canada since Confederation," declared Mayor T. L. Church, of Toronto. "We must go ahead with the project; we must not stand still on a question of such international commercial importance. I hold the hope that everyone here will live to see the fulfilment of our visions of a waterway from the lakes to the sea. From every angle the project is desirable. It means cheaper transportation, greater production on our farms and more rapid and efficient handling of all the products of the sea, the farm, the forest and the mine.

"There will be no trouble between the United States and Canada. The Americans are our own people, and blood is thicker than water. You are one with us in these high democratic ideals of right, justice and honor. In all the 4,000 miles of border between the two countries there is not one permanent armed force and no fortifications except for one little old fort at the mouth of the Niagara River."

Endorsation of the deep waterways scheme was received from 35 of the states of the union before the congress closed on Saturday. Herbert Hoover, war food administrator of the United States, voiced his approval of it as follows:—"To-day both railways and waterways are far behind the productivity of our country on every hand. Agriculture and general industry are embarrassed by the lack of transportation; the margins between the producer and consumer are extravagantly widened by failure to secure proper distribution. As our country grows in its productivity it will be found that the outlet for the proper transportation of bulk commodities will lie rather by water than by rail between those points where such transportation is possible."

Resolutions Passed

The report of the committee on resolutions was received, and the congress passed resolutions calling on all civic, state and commercial bodies throughout the country to take up the work of spreading everywhere the merits of the canal proposal to the end that the demand will be made upon the government with such pressure as to bring about if possible an immediate undertaking of the plan. Another resolution declared that the proposed improvement was "not only physically feasible," but of "great utilitarian service to the nation," and still another recognizing that the St. Lawrence River was one of the world's richest and most potential power resources, and urged the "immediate development of this power for the enrichment of Canada and the United States, the lightening of human burdens and the conservation of 24,000,000 tons of coal a year."

CENTRAL ELECTRIC STATION INDUSTRY IN CANADA

Capital Investment on January 1, 1919, was $401,942,402—Income for Year, $53,549,133—Large Industrial Centres Now Served With Hydro-Electric Power

EVIDENCE of the extensive development of one of our imported fundamental industries is given in the second report of the census of central electric stations in Canada, recently completed by the Dominion Bureau of Statistics in co-operation with the Dominion Water Power Branch of the Department of the Interior. The census includes all stations which distribute or sell electrical energy for lighting, heating or general power purposes and excludes industrial organizations developing electrical energy as primary power for only their own direct use.

The report is complete to January 1, 1919. The statistics are given by provinces as well as for the Dominion as a whole and are so divided as to provide separate data for publicly owned and privately owned stations and for stations deriving their power from water and from fuel. The main features of the report are as follows:—

Capital and Employees

The total capital invested in central electric stations is $401,942,402, of which $356,547,217 represents the invesment in power development and transmission and distribution systems and $45,395,185 represents miscellaneous supplies and working capital. The commercial or privately owned stations reported 71.7 per cent. of the total capital investment and the municipal or publicly owned stations 28.3 per cent. The total number of persons reported as employed in the industry is 9,696 with salaries and wages amounting to $10,354,242.

The aggregate receipts from the sale of electrical energy for all stations amount to $53,549,133, of which the commercial stations reported $33,190,882, or 62 per cent., and the municipal stations $20,358,251, or 38 per cent. It should be noted that this revenue includes the income received from the re-sale of energy purchased in bulk by our central station from another central station. The re-sale of energy by a second station must obviously take care of the purchase price of such power and the distribution charges.

Power Installation

The total capacity of primary power machines is reported as 1,958,642 horse power, of which 1,841,114 horse power represents the installation in principal plants and 117,528 horse power, the equipment of auxiliary or stand-by plants. Of the total capacity of primary power equipment in principal plants the commercial stations reported 77.9 per cent. and the municipal stations 22.1 per cent. The capacity of the water wheel and hydraulic turbine installation is given as 1,682,191 horse power, or 91.4 per cent of the total capacity of all primary power machines in the principal stations and is 85.0 per cent. of all the primary power equipment of both principal and auxiliary or stand by stations: the steam reciprocating engines and steam turbines 145,637 horse power or 7.9 per cent; and the internal combustion engines 13,286 horse power or 0.7 per cent. of the principal station primary power equipment.

According to a recent census 72.7 per cent. of the total water power developed in Canada is employed in connection with the central electric station industry. Quebec, Ontario, Manitoba, British Columbia and the Yukon Territory, each derive over 95 per cent. of their total central electric station power from water. The capital invested in the Hydro-electric stations and the non generation stations which purchase their power from these hydro-electric stations is $364,477,961 or 90.7 per cent. of the total invesment of all central electric stations in Canada. Prctically every large industrial centre is now served with hydro-electric power and has ample reserves of water power within easy transmission distance.

WHOLESALE PRICES DECLINE IN JUNE

Index Number in that Month was Lower than in May—Sugar and Paper Register Increases

DECREASES in many commodities feature the June statement of index numbers, compiled by the Department of Labor. In wholesale prices the index number fell to 349.3, as compared with 356.6 for May, 284.1 for June, 1919, and 135.3 for June, 1914. There were increases in oats, barley, corn, cattle, cheese, sugar, cotton goods, iron products, coal, coke, gasoline, coal oil, bricks, chemicals and paper.

The index number of wholesale prices is based on the quotations for 261 commodities, and is the average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being, therefore, made equal to 100. The quotation for most farm products are obtained weekly and averaged for the month; the quotations of other commodities are taken for the middle of the month.

A comparative statement of index numbers of wholesale prices by groups of commodities for June, 1920, follows:—

(DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	Index Numbers			
		*June 1920	*May 1920	*June 1919	June 1913

CANADA'S IMPORTS SHOW NO ABATEMENT

Exports Decrease, However—Dominion is Selling Less to United Kingdom, France and Japan—Tendency to Buy More from Those Countries

FOR the twelve months ended June, 1920, Canada's trade statement shows no marked changes as compared with previous records. Imports continue to advance rapidly, while the increase in exports is small in proportion. There was a further falling away in exports to the United Kingdom and a tendency to buy more from that country. There appears to be no abatement in the flow of goods from the United States to this country, and if the advance continues at the same rate as it has been doing for some time past, Canada will soon be buying twice as much from her southerly neighbor as she is selling. Trade with the colonies and foreign countries does not appear to show such good results, there being a falling off in exports to many countries, notably in Australia, France, Italy and Japan.

The following table, prepared by the Dominion Bureau of Statistics gives the trade of Canada by countries for the twelve months ended June, 1920, as compared with previous years:—

	Twelve Months ending June		
	1918 $	1919 $	1920 $
Imports for Consumption			
Dutiable Goods	526,012,577	521,394,168	791,027,768
Free Goods	396,169,034	348,109,248	419,176,555
Total imports (mdse.)	922,181,611	869,503,416	1,210 204,323
Duty collected	157,551,535	154,696,691	204,801,866
Exports			
Canadian	1,468,212,741	1,201,867,125	1,232,632,099
Foreign	43,041,534	57,701,852	43,679,443
Total exports (mdse.)	1,511,254,275	1,259,568,977	1,276,311,542
Imports by Countries			
United Kingdom	72,228,121	75,091,775	177,494,102
Australia	2,324,028	4,954,257	1,356,064

MUTUAL UNDERWRITERS' FIRE PREVENTION PLANS

Efforts in Past Not Very Successful—Special Company for Windstorm Insurance Proposed—Progress of the Mutual Movement

"EDUCATING the people, as a whole, on the prevention of fires is hard, uphill work; in fact, it is very similar to many other ideas that would be of use and benefit to the people," said Stratton Whittaker, vice-president of the Western Canada Mutual Fire Insurance Association, at a meeting held recently in Calgary. Delegates from the three prairie provinces were present, and plans for fire preventive work were discussed in detail. "In these days," continued Mr. Whittaker, who represented the Portage la Prairie Farmers' Mutual Fire, "it seems that nobody has time to read any literature of the type that is issued by the Ontario Fire Prevention League, a booklet that is most interesting, chiefly so because of the many true statements that it contains. It certainly would appear from information obtained by the fire inspectors of the various provinces that practically no results have been obtained up to the present by the system of issuing booklets in limited quantities. If this is the case, then different methods should be used. I believe that an aggressive campaign could be started if the Dominion government and the various provincial governments could only see their way clear to provide a fund for this purpose, and no doubt, if the case was presented to them with some concrete line of action prepared, there would be no difficulty in obtaining some real help."

Suggested Methods

Mr. Whittaker suggested that in such a plan of action the city and rural districts be kept separate, as different methods would be needed. Moving picture films in theatres and the assistance of the education departments could be utilized to advantage in the cities. The same methods could be used to some extent in the country, but here the mutual companies could also be of great help, as they are in close touch with the people. In the rural districts fire extinguishers are very useful, and he suggested the association as a medium for obtaining a satisfactory extinguisher at a fair price.

John Evans, of the Saskatchewan Farmers' Mutual Fire, discussed the same subject, and expressed the opinion that many of the losses from "causes unknown" were due to smoking.

A. Van R. Schermerhorn, of the Royal Victoria Mutual Fire, presented the report of the committee on fire prevention, stating that moving pictures, card follow-up systems and other methods had been discussed. It was decided to recommend to the directors of the different mutuals that an additional charge be made in premiums in the case of farm buildings situated within 100 feet of a buildng within which fire is used.

Windstorm Insurance

Murray G. Doyle, of the Miniota Farmers' Mutual, stated that, from the experience of members of the association, a considerable loss was being sustained at the rates charged for windstorm and cyclone insurance. The Saskatchewan Farmers' Mutual Company last year had paid out more than its premiums for five years, and his own had paid out more than double the premiums for the year. "The accumulation of a reserve to take care of exceptional losses arising from windstorm appears to me to be absolutely necessary," said Mr. Doyle. "It is an established fact that we can, through experience such as some of our companies have had, arrive at a reasonable estimate of what our average annual fire loss will be, but with windstorm and cyclone losses this is not the case. Also through reinsurance we can distribute our individual loss and limit our liability on any one fire, but unless each company confines its liability under windstorm covering to a stated amount of insurances per township, for example, it is impossible to protect ourselves against possible excessive loss. To do this would entail plotting and mapping similar to that used by hail offices, and the expense would not, to my mind, be justified. This would incidentally react on our fire and lightning volume to a certain extent.

"After careful consideration of this subject from all angles, I have come to the conclusion that our existing fire mutuals should discontinue windstorm business entirely. Should it be thought advisable, a mutual company could be formed, as they do in the United States, to do a windstorm and cyclone business only, distributing the business over as large an area as possible so as to minimize the probability of too large a loss from any one storm. This company should be run on a purely mutual basis and not on a cash plan. Additional assessment should be made annually for the purpose of reserve in the good years, so as to provide for the emergency which will sometime, sooner or later, come. In this way the assessment could, to a great extent, be equalized."

Mutual Principles

An address on "Mutual Principles," by P. R. Reed, of the Western Mutual Fire, was read. The mutuals of the west had been very successful, he said, in carrying out their object of furnishing insurance at cost. They had their difficulties, however, in the form of excessive valuations, incendiarism and the collection of assessments. The agents sometimes laid too much stress on the low cost of mutual insurance, and should rather emphasize the fact that the business was for the benefit of all rather than of one. A campaign to impress the mutual spirit might produce good results. "I believe we are just on the verge of a great awakening of the masses to the advantages of co-operation. The mutual fire and hail organizations now in existence should be very careful if the fullest benefits of this are to be realized. Capital to-day is very unpopular with the masses everywhere in the world. In many cases this wave of criticism is unjust, yet it is here, and very likely will be for some time to come. Co-operation will alleviate the conditions which have prevailed, but we must have co-operation for construction, for bettering the world, and not for the purpose of destruction. We, whose hearts are with this movement, must use all our capabilities to see that an upbuilding tendency is fostered, and we can do so by educative propaganda in our own particular sphere—mutual insurance."

Officers elected for the coming year were as follows: Murray G. Doyle, president; Stratton Whittaker, vice-president; J. L. Brown (Western Mutual Fire), secretary-treasurer.

STOCK BROKERAGE FIRM SUSPENDS PAYMENT

Thornton Davidson and Co., members of the Montreal Stock Exchange, suspended payment on July 28th. The members of the firm are Hugh G. Davidson, L. A. Wyse and Colin O. Cameron, all three holding seats on the exchange. Mr. Cameron has been the active head of the firm in recent years. It was founded about twelve years ago by Thornton Davidson. The firm of Thornton Davidson and Co., Ltd., bond dealers, is not affected by the suspension of the stock firm.

This event was not entirely a surprise in financial circles, as it has been known for some time past that the firm has been having difficulty in meeting loan calls, which have been frequent in the market generally for months past. Their position was aggravated by the fact that collateral on which loans were passed were inactive stocks, and on which realizing was practically impossible at the present stage. The firm did not meet its clearing house obligations on Wednesday morning transactions, and no business was transacted on the floor by its representative on Wednesday.

With reference to this suspension, an official of one of the banks interested said: "This is one of those unfortunate incidents not always avoidable in a period of great stock market activity. The situation, however, is understood to be well in hand, and, apart from the delay which will necessarily follow in the liquidation of the securities, there is nothing of a very disquieting nature involved; on the contrary, it will tend to clear the atmosphere and put a stop to unwarranted and disturbing rumors. Any advances we have made the firm from time to time were, of course, secured by the customary stock market collateral."

No. 1

New Telephone Rates Are Necessary

OUR existing rates for telephone service are inadequate. The revenue is insufficient to pay our operating expenses and secure the fair return required to attract new capital for extensions and additions to the system.

It is not strange that this should be the case. Our revenues are not keeping up with our expenses. All telephone materials and supplies have increased enormously in cost; wages have gone up; during the twelve months ending 30th June, 1920, our payrolls increased over $3,100,000.

To meet the greatest demand for telephone service in our history, we have made extensive additions to the system which, under present day conditions, have involved an abnormal expense. Our 1920 expansion programme calls for an expenditure of over $10,000,000, and to meet the increasing demand for telephone service, we must continue to expend large amounts annually during the next few years.

The continued development of telephone service depends upon adequate revenue. Inadequate revenue means a repetition in the telephone business of what happened to the American railroads. You know their story. Inadequate rates stifled their development and every community in that country is suffering [illegible]. Inadequate telephone rates will produce similar results in the telephone field. [illegible] will be permitted. Adequate telephone service is of the utmost importance to the public; without it the business and social interests of every community must suffer.

The plain fact is we have reached a point where we cannot maintain a satisfactory and comprehensive telephone service unless we are assured of sufficient additional revenue.

It will be necessary to establish new rates for telephone service, and schedules, which we hope will furnish the needed relief, will be filed within a few days with the Dominion Board of Railway Commissioners. These schedules will yield only reasonable assistance. The facts regarding the necessity for the new rates will be given to the public through the advertising columns of the newspapers and through other channels.

Public sentiment and public necessity demand the maintenance of adequate telephone service. Business men particularly realize the fact that increases in telephone rates are necessary in these abnormal times to insure a continuance and extension of service.

We desire to keep our [illegible] [illegible] and we [illegible] know the [illegible] [illegible]

The Bell Telephone Company of Canada

THE UNDERWRITER'S MENTAL RESERVE

How Prospect's Mind is Influenced—Retail Merchants Turn Down Insurance Proposal—Other Developments at the Coast

(Special to *The Monetary Times.*)

Vancouver, July 27, 1920.

"THE Underwriter's Mental Reserve" was the title of a lecture given by G. J. A. Reany, of Edmonton, at the monthly luncheon of the insurance men of Greater Vancouver a few days ago. Mr. Reany went into the mental make up of man and showed the manner in which the objective mind draws upon the subjective mind, which is a sort of mental storehouse, for its arguments. The speaker stated that an insurance man who depends entirely on his objective mind will fail—that a man who is all subjective mind is insane—the equipose between the two produces a genius. When we sleep our subjective mind creates dreams, and if our objective mind takes hold of the dream just as we are waking, we remember the dream, otherwise we do not. Our subjective mind enables us to feel the presence of a person before we see or hear them. It is a sixth sense.

The Part-time Agent

In canvassing for insurance, the salesman who has a perfect mental equipment can, with his objective and subjective mind, meet every argument as it comes up, and convince the prospect that he should have insurance or more insurance. The great evil he has to contend against, however, is the fear of the spotter, the part-time man who steals the product of his brain to secure the risk behind his back. He believes that insurance companies should unite in eliminating the part-time man, which would elevate the profession. He claimed that if this was done, in ten years time the life insurance men would take their right place in the business social scale which they do not enjoy now, although the class of agents engaged in life insurance were 50 per cent. better men than those professing to be life insurance agents ten years ago, and it was largely due to the life insurance agents' associations of Canada and the United States which had brought this about.

Continuing, the speaker said that the salesman's mental reserve depended essentially on—first, sound knowledge of his business, for knowledge was power; secondly, a proper appreciation of business methods; and thirdly, a thorough consciousness of business ethics. Men, he said, must be honest as well as religious, and some men he knew who professed religion were not honest.

"The keenest and most successful business men to-day," Mr. Reany said, "are those who stand out for real ethics in business life—you cannot eliminate business ethics and be safe." He made a strong appeal for the professionalization of insurance work. He produced figures to show that those companies who eliminated the part-time man, which meant an actual reduction in the working staff, wrote far more business than when part-time men were engaged.

Insurance for Retail Merchants

J. F. Martin, of the Martin Agencies, of Seattle, addressed the members of the Retail Merchants Association of Canada, in session here on July 22, informing them that the Northwest Mutual Fire Insurance Company of Seattle was ready to amalgamate with the Retail Merchants Association for the purpose of giving them cheaper insurance. This is the same company who are claiming to offer cheaper rates to automobile owners for their insurance, provided they are members of the automobile club. It was suggested in reply to Mr. Martin that it might be better for the retail merchants to form their own company. A committee was appointed to report upon the whole matter the following day.

Mr. Martin was allowed thirty minutes to talk on insurance matters generally, and he took the opportunity, incidentally, to boost his own company, its method, and his own personal success in the field. As a result of the committee's report, it was recommended that no particular insurance company should receive assistance from the Retail Merchants Association, and that though every merchant should be free to insure where he chooses, it is considered that mutual companies should receive favorable consideration, and in any event, that a Canadian, rather than an American Company, should be chosen.

Vancouver Fire Protection

Some years ago the local press advocated that Vancouver should have a fire boat. The authorities paid no attention to the matter, and shortly afterwards a disastrous fire occurred in Burrard Inlet. The authorities woke up to the extent that numerous enquiries were made as to the cost of new and old boats which could be used for the purpose. The cost appeared very large and the idea of providing added fire protection for the water front was abandoned. Again, to-day, the press are urging the authorities to rouse themselves to the danger of a serious fire on the water front gaining headway with fearful results owing to there being no fire boats to fight the flames. Will the city again sidetrack the issue, and, if so, with what result?

PAPER CIRCULATION AND GOLD RESERVES

Canada Has Alternative of Building Up Reserve to Improve Currency, or Exporting Gold to Correct Exchange

By A. B. Barker

PROFESSOR LEACOCK advocates the paying out of the gold in the Canadian treasury at once in order to reduce the rate of exchange between Canada and the United States—in other words, voluntarily parting with our specie reserve. In thus utilizing the gold in the treasury, instead of keeping it as a reserve, he does not suggest abandoning the gold standard. On the contrary, he states emphatically that only by maintaining this standard can we hope to return to financial stability. It is merely a question of method, his theory being that the holding of this amount of specie out of actual circulation is an aggravation of conditions, and that by using it freely, so long as it lasts, a return to normal conditions will be more quickly assured.

Gold Reserves in Britain

The history of panics in London, in the early part of the last century, to some extent bears out his contention, as in every case the panic was controlled, and finally dispelled, by the Bank of England freely paying out funds far in excess of the legal limits, parliament suspending the Bank Act for the purpose. At the same time, however, it paid out notes, not gold, this being held as a reserve, though much below legal requirements. The cause of the panics was the fear that money of any sort could not be obtained on any terms, and, when it was realized that money could be had, at a price, the panic quickly subsided.

Professor Irving Fisher, of Yale, has also developed a theory, which he calls the "compensated dollar," by which the unit of gold in the coinage would be increased, or reduced each month, according to the fluctuation in the value of gold, measured by the prices of commodities.

It seems strange that suggestions like these can be made without rousing a storm of protest, but evidently we have come a long way since the free silver controversy of thirty years ago. Then the gold reserve, and standard, were a creed to be fought for, and not discussed. There was no middle ground.

After all, the gold standard is of very recent growth, barely a hundred years old, in fact, even in the case of its chief advocate, Great Britain. It came about through the draining of that country of silver at the close of the Napo-

leonic Wars. When, owing to the working of Gresham's law, the silver coinage of that country had found its way to other countries, the only coinage left was gold, and the commerce of the country had to be carried on with that medium of exchange, and with Bank of England notes, that institution having suspended specie payments for a number of years. In 1816 Lord Liverpool introduced his mono-metallic bill, and gold formally became the sole standard in Great Britain. A similar state of affairs exists to-day; the commerce of Great Britain is carried on through treasury notes, Bank of England notes and the subsidiary silver coinage, gold being entirely withdrawn from circulation. There is a gold reserve, but, as in Canada, it is held intact, and one is no longer able to demand gold at the Bank of England counter for notes presented. It is, in effect, a practical suspension of specie payments, and yet the business of the country goes on, not too smoothly, perhaps, but that, apparently, is due to labor difficulties, and not to any doubts as to the value of the currency.

Gold Reserve Not Adequate

Thomas Carlyle, in his "French Revolution," speaks of the "age of paper" during that movement, and with the comparatively small basis of gold for the enormous issues of paper money in circulation to-day, it might be said that this also is an "age of paper." The result of the French experiment of that time was alarming, but that was partly due to the fact that those in authority at that time believed in the system. To-day, no one does, except as a temporary expedient, and the absolute necessity of a definite measure of value and basis of issue is clearly recognized and worked for, whether it is gold or something yet to be decided on.

Economists have long realized the possibility of a change of, shall we say, fashion. Even the London "Statist" some years ago remarked, apropos of the demonetization of silver, that "the fall in the price of silver was not the result of an over-production of that metal, but of a change in the opinion of mankind.

It may be that we are on the eve of such a change in regard to gold. World-wide changes, as a rule, are not brought about through any process of human skill or deep planning. They come through force of circumstances, over which we have little or no control, and new conditions, necessarily, develop new lines of action and methods suitable to the altered circumstances. In this connection the terms on which the late railway strike in England was settled will be of interest. These were that, in future, the basis on which wages are to be fixed is the commodity index number. This standard is a modern idea, and one of which we are likely to hear much in the future. It is a device for keeping record of the variations in price of commodities as a whole by establishing a certain average figure, based on the prices of commodities in common use. Fluctuation in a commodity price affects the index number, thus affording a good record of one of the main factors affecting changing living conditions.

BANK UNABLE TO ENFORCE LIEN ON SHARES

Ontario Supreme Court Holds Union Bank Should Have Advised Lazard Bros. of Fact That it Had a Privileged Lien

FAILURE on the part of the Union Bank of Canada to disclose to Lazard Bros., who made large advances to a customer of the bank, on the security of shares of the capital stock of the bank which Lazard Bros. supposed to be held for them by a trust company, but which in fact stood in the name of the customer and on which the bank had a privileged lien under section 77 of the Bank Act for a debt due from the customer, disentitled the bank from asserting this lien over Lazard's title to the shares, since there was a clear duty on the part of the bank to disclose such facts. This is the substance of a recent decision of the Ontario Supreme Court in the case of Lazard Bros. v. Union Bank of Canada.

Briefly the facts of the case were that the late E. E. A. Duvernet, having arranged with Lazard Bros., of London, for a loan, promised to deposit with the Union Trust Co., as trustees for Lazard Bros., 500 shares of the Union Bank and 500 shares of the Union Trust Co. as security. The dispute arose over the ownership of 200 shares of the Union Bank which were held in trust for Lazard Bros. by means of a stock certificate The bank claimed ownership of the shares in question because of a debt owing it by Duvernet and because of section 77 of the Bank Act which provides:—

"The bank shall have a privileged lien, for any debt or liability for any debt to the bank on the shares of its own capital stock, and on any unpaid dividends of the debtor or person liable, and may decline to allow any transfer of the shares of such debtor or person until the debt is paid."

Bank Knew the Facts

The bank officials knew all the details of the loan by Lazard Bros. and the security on which the loan was made. Knowing these facts and knowing of their lien on Duvernet's shares which Duvernet was pledging as his own absolutely, the bank should have notified Lazard Bros.

The pertinent parts of his Lordship's decision are as follows:—

"Before discussing the law, I would point out that the certificate deposited with the Union Trust Co. afforded no protection to the plaintiffs. It in no way represented the shares. It was a mere statement that at its date the shares were standing in the name of Duvernet. The power of attorney would enable the holder to make a transfer on the books of the bank, but there was nothing to prevent Duvernet from dealing with the stock in the meantime. The production or surrender of the certificate was not necessary to the transfer of the stock, and there was nothing to prevent the issue of any number of certificates, each stating the same fact, that Duvernet's name appeared upon the register as the holder of so many shares.

"In this case I have no hesitation in finding that there was a duty upon the part of the bank to disclose its lien and that the failure to disclose was fraudulent, in the sense that it was intended to allow the plaintiffs to assume the liability incident to the acceptance of the bills without tbe security they thought they had."

The Capital Trust Corporation, of Ottawa, will open a branch office in Toronto on September 1st next, in the Temple Building, at the corner of Bay and Richmond Sts., where they have rented the offices and vaults formerly occupied by the Union Trust Company.

All the members of the fire department of Sarnia, Ont., resigned last week. The resignations were accepted by the city council on July 26, with the exception of that of Fire Chief Batty, which was left in the hands of the fire protection committee with power to act.

NEW PACIFIC TRADE ROUTE

R. B. Teagle, general manager of the Canadian government merchant marine, announced on July 16 the establishment of a trade route on the Pacific side of Canada from Vancouver to the far east. The route starts from Vancouver to Shanghai, thence to Hong Kong, Singapore, Colombo, Calcutta and ending at Rangoon. It is expected that the first ship will be dispatched from Vancouver early in September and the vessels employed will be of the largest type of 8,300 ton vessels, being built on the Pacific coast. At least one ship a month will be placed on the route.

NEW VICTORIA FINANCIAL ESTABLISHMENT

A new financial house is established in Victoria, B.C., under the name of R. P. Clarke & Company. Brig.-General R. P. Clarke, formerly of Gillespie, Hart & Todd, is president. The other members of the new company served in the Canadian army. Major G. G. Morriss, one of the original officers of the 5th Canadian Battalion (Western Cavalry) and latterly of the general staff, Candian Expeditionary Force, is in charge of the real estate, accident and sickness and life insurance branch of the firm. Major Morriss, who was born in Yokohama, Japan, has extensive connections with China, Japan and the Far East generally. Previous to the war he was in business in Saskatoon, but has now decided to transfer his interests to Victoria.

Bonds and stocks and fire insurance are under the management of C. E. Brown, whose overseas service dates from 1914, when he left Victoria with the 7th Canadian Battalion, and later took his commission with the Royal Berkshire Regiment, with which he served for about 12 months at the front.

ADVANTAGES OF ANNUAL PREMIUM PAYMENTS

The privilege of paying life insurance premiums semi-annually or quarterly is costly to the assured, points out the "Excelsior Life Banner" for July. Taking the case of a $100 premium payable to the Excelsior Life, it would work out as follows:—

"If paid semi-annually, it would be $51.50, or a total amount in the year of $103. The insured pays his first semi-annual premium at once, $51.50. He has the use of the balance, $48.50, for six months. He pays thus $3 for the use of $48.50 for six months, which is the same as $3 for the use of $24.25 for one year, which works out at 12.78 per cent. a year. In a similar manner it may be shown that if the insured pays his premiums quarterly, when the company adds 5 per cent. to the annual premium, that the interest charge is in excess of 14 per cent.

"It may be thought that the company is making an unreasonable charge for the privilege given to the insured of paying premiums semi-annually or quarterly. It must be remembered that the additional charge has to cover something in addition to the loss of interest to the company. There is the extra clerical work and postage. Instead of one record of premium payment each year, as would be necessary on an annual basis, four records have to be made in taking care of quarterly premiums, four premium notices have to be sent out, and if the policyholder is late in paying his premium, several notices are sent out each quarter. Four premium receipts have to be mailed instead of one, and not only the clerical labor, but the postage necessary is four times as great. The same remarks apply to semi-annual premiums. From the standpoint of the insured he is saved the annoyance of paying premiums every three or six months, as the case may be, and the chance of overlooking his payment, and of his policy lapsing, occurs but once a year instead of twice or four times."

News of Industrial Development in Canada

Research Institute Advocated in Report of Honorary Council—British Empire Will Spend $20,000,000 — Coal Shipments from Pacific Coast to Europe — Changes in steel Industry at Welland, Ont.

In the annual report of the Honorary Advisory Council for Scientific and Industrial for the year ended March, 1920, an important reference is made to the National Research Institute for Canada. "The establishment of a National Research Institute for Canada has been one of the matters urged by the Council," the report states. "This was placed before the House of Commons and was investigated by a special committee headed by Mr. Hume Cronyn. There are hopes, however, that it will be brought into force in the not distant future. Early in 1918 the Research Council presented an urgent recommendation to the sub-committee of the Privy Council for Scientific and Industrial Research and to the Reconstruction and Development Committee of the government asking that this institute be established at an early date, with the function of a Bureau of Standards and to provide facilities for research carried on and maintained by associations or guilds for research formed in the various lines of industry in Canada.

"The special committee of the House of Commons, formed April 24, 1919, held ten meetings at which the promotion of research was discussed. A report was made to the House of Commons in which the committee gave its opinion that the time had arrived for co-operation and national support of scientific research. The committee was reappointed in April, 1920, and since reported recommending the establishment of a National Research Institute for Canada, and that an appropriation be made of $600,000 to meet the cost of the site of the institute, of the construction of the building required, of the scientific equipment of the same, and of $50,000 for the salaries for the staff for the first year. This report was unanimously adopted by the House of Commons on May 7.

"Organization of the industries to promote research on the problems which they have to solve is a subject that has been given much attention both in Great Britain and the United States," the report continues. "It will be of special interest to all those promoting measures that will enable Canadian industry to keep abreast of the more progressive element in British and Canadian industry. The council now considers that a campaign of education should be undertaken in the various lines of industry with the object of promoting the right organization for this purpose."

Nova Scotia Development

As a result of the formation of the British Empire Steel Corporation, a sum approximating $20,000,000 will be spent in Nova Scotia upon the development of the coal, steel and shipbuilding industries. According to a budget prepared for the "Sydney Post," the money will be spent as follows: Dominion Iron and Steel Co., $6,250,000; Dominion Coal Co., and for new ocean terminal piers at Louisburg, $6,250,000; Nova Scotia Steel Co., Sydney Mines, $2,080,000; Cape Breton total, $14,580,000. Nova Scotia Steel Co., New Glasgow, $4,160,000; Halifax Shipyards, $1,250,000; grand total, $19,990,000.

Large development in other industrial lines are also expected to take place shortly. The Inverness Railway and Collieries, Ltd., a company formed through the efforts chiefly of M. E. C. Henderson, president of the H. D. MacKenzie Co., of Halifax, has acquired extensive coal and other property from the Mackenzie and Mann interests in Inverness county. This property consists chiefly of fifty-odd miles of coal area and sixty-two miles of railway running from Point Tupper to Inverness, with shipping docks at Port Hastings capable of handling the largest ships.

Though these coal properties are known to be very rich, their development has been more or less stagnant during the past ten years or so, owing largely to the handicap of absentee ownership, which will now be eliminated by the deal just consummated. Coal, however, has been shipped to several countries of Europe and to several of the New England States, as well as to all parts of eastern Canada.

Coal Shipped to Sweden

A shipment of coal was recently made by the Canadian Collieries (Dunsmuir), Ltd., amounting to 4,500 tons, from British Columbia to Sweden, via the Johnson Line. Confirmation of the shipment has been given by J. M. Savage, manager of the Canadian Collieries (Dunsmuir), Ltd. He states that at present prices of coal on the coast are lower than anywhere else in the world, that the shortage in Europe is so acute that the nations there are driven elsewhere to secure supplies, and that of late there has been a great inquiry from various countries for supplies. The company, he stated, is in a position to handle much more of that export business were it possible to secure tonnage, but the shipping is lacking at present.

The present order from Sweden is only the first of what, Mr. Savage believes, will develop into a promising export trade, always provided the facilities for shipment can be secured.

Manufacturing Notes

The Joliette Steel Co., Joliette, Que., is making arrangements to transfer all their interest to the Independent Steel Specialties Corporation. The latter concern intends putting up a steel oven and developing new industries.

T. J. Dillon, present of the Dillon Crucible Alloys, of Welland, Ont., has announced that the Atlas Crucible Steel Co., of Dunkirk, N.Y., has acquired a substantial interest in the Welland company, which will hereafter be known as the Canadian Atlas Crucible Steel Co. The American company is one of the largest independent manufacturers of high speed special and alloy tool steels in the United States, and its brand is highly regarded by the largest users of these steels.

Bradshaw and Co., overall manufacturers, have secured temporary premises in the old woollen mill at Markham, Ont., and have started operations. The Bradshaw Co. also operates in Toronto.

The mines of the King Coal Co., the Northfield Coal Co., and the A. D. Taylor Co., in the Grand Lake district at Minto, N.B., have been purchased by the International Pulp and Paper Co., at a reported price of $150,000. The first shipment of coal has been made under the new ownership to Van Buren, Maine, where the International Paper Co. recently purchased a new pulp mill.

The Dominion Steel Corporation is to spend $5,500,000 in its coal mine in Nova Scotia, Roy M. Wolvin, president, announced on July 30. The company is going to make an immediate effort to offset the coal shortage in eastern Canada, Mr. Wolvin said.

The Adams Wagon Company, Limited, of Brantford, Ont., a subsidiary of the Cockshutt Plow Company, Limited, Brantford, have secured the plant of the Petrolia Wagon Works, Petrolia, Ontario, and are fitting it up especially for the manufacture of sleighs and trucks. The plant is now in operation and will be working to capacity in a month's time. The present plant of the Adams Wagon Company and this new arrangement will enable the Brantford plant to devote its capacity to the production of farm wagons, dump wagons, drays, etc.

News of Municipal Finance

Montreal to Have a City Manager — Greater Winnipeg Assets and Debt Show Large Increases — Financial Statement of Esquimalt, B.C. — Meeting Obligations Due in New York Means Heavy Loss On Exchange

SOME Canadian municipalities are in an unfortunate position in regard to the payment of maturing debentures, as a result of the exchange situation. One instance is that of Calgary, Alta. If that city wishes to maintain its credit, it must remit funds to New York to pay off treasury notes which are held there, and as a result lose a large amount of money because of the exchange. Vancouver was in a similar position some months ago, although perhaps not so difficult, and would have been faced by the same problems which are now before Calgary, had it not been for what is now considered a wise piece of financing, although at the time the city was criticized for the stand it had taken. An interesting review of the situation by "Civicus" was recently published in the "Vancouver Sun," which reads in part as follows:—

"It may be recalled that there was some criticism of the city's course in remitting $900,000 in the closing days of last December to meet treasury notes maturing on January 1st. The criticism from some quarters directed at this course which was recommended by ex-Ald. Thos. H. Kirk, then finance chairman, was owing to the fact that the city was not only meeting its obligations in regard to some $300,000 of these notes, but was actually anticipating the payment of the other $600,000, which did not fall due until January, 1921 and 1922. To meet these notes on January 1st, 1920, with American exchange then about 8¼, it cost the city approximately $75,000 on the full remittance of $900,000, and it was on this score that some citizens thought the city was unnecessarily over-generous in meeting its payments so soon after war times. City Comptroller Pilkington points out that had the city asked and received an extension of time in making this payment to the next interest bearing date of July 1st, it would have then cost the city approximately $126,000 to make the remittance. For exchange on that date was about 14 per cent. This means that aside entirely from what the city gained morally in the way of establishing its credit as gilt-edged in eastern money markets, a heavy loss which would have resulted from a postponement, amounting to approximately $51,000, was avoided.

"As a direct result of meeting its financial obligations ahead of time, Vancouver is now in the fortunate position of having no treasury notes actually maturing until January 1st, 1923, the remittance of last January having retired all short-term notes to that date. The city has some funds on hand which it could remit to its eastern American fiscal agents under its option of retirement of these 1923 notes, if exchange was favorable. But with exchange as high as it is at present that would be about the last thing thought of.

"Another fortunate circumstance for Vancouver civic finances, as pointed out by Comptroller Pilkington, is that the city has the greater part of its interest-bearing debentures domiciled in England. It is a poor rule that won't work both ways, and that is where Vancouver benefits on the international exchange situation, as the city stands to obtain quite a a substantial advantage on exchange as it stands. Early in the year the city benefited to the extent of about $75,000 on the half-yearly interest on English domiciled debentures which fell due on the first of February last, and at present rates it is anticipated that the city will again benefit somewhere between $40,000 and $50,000 on the half-yearly payment falling due on August 1st. Altogether, owing to the greater proportion of its interest being payable in England, the city will more than break even on the matter of international exchange."

Niagara Falls, Ont.—First collection of taxes for 1920 amounts to $243,080, as compared with $200,000 last year.

Timmins, Ont.—A by-law to strike the tax rate for 1920, is being prepared by the city solicitor. The general and debenture rate to be 25 mills; public school rate, 19 mills; separate school rate, 20 mills. Taxes are payable on or before October 31st, 1920, and five per cent. penalty will be added to all taxes not paid by that date.

Moose Jaw, Sask.—The total amount of 1920 city taxes paid in by June 30th, the end of the first discount period, was $447,070, or 43 per cent. of the 1920 levy, according to a statement issued to-day by city treasurer W. C. Goudie. From this sum must be deducted a total of $19,826, which was allowed in discounts. In addition to the current taxes paid, a total of $57,083 in tax arrears was paid in by June 30th, making the total tax collections for the half-year $504,153, or over $4,000 more than the half-million dollars the city desired to secure by mid-year.

Halifax, N.S.—Expenditures and requirements of the works department have been submitted to the finance committee by the city treasurer as follows:—For water construction, $197,200 sewerage, $257,000; pumping station, etc., $25,000; estimated cost of streets under contract, $1,162,965; city's share thereof, $665,624; pavement, ordered but not in contract, $37,985; city's share thereof, $30.916; value of work being done by contractors, $456,166; paid contractors, $394,928.

It was decided that the water construction appropriation be increased by $100,000 to include $25,000, authorized for the pumping station and to increase the amount for sewerage by $100,000.

Greater Winnipeg Water Districts.—Total assets of the district, according to the annual report for the year ended December 31st, 1919, are $16,701,027, as compared with $10,625,943 in 1917. The bonded indebtedness at the end of last year was $14,294,588, as against $8,827,360 two years previous. The following is the comparison of the principal accounts from the two balance sheets:—

	1919.	1917.
Aqueduct	$13,604,451	$7,220,634
Railroad	1,423,545	1,430,961
Railroad equipment	170,964	187,261
Outstanding levies	988,563	....
Bonded indebtedness	14,294,588	8,827,360
Bank overdraft, etc.	2,052,735	1,042,995
Sinking fund	313,355	....

Montreal, Que.—The sub-committee of the charter commission has decided that Montreal shall have a city manager. A statement as to the powers of this new official, have been discussed and accepted as follows:—

"The manager to be the chief executive officer of the city, under the direction of the city council.

"The manager to be appointed by a majority vote of the whole council and that he be suspended by the council by a two-thirds vote for cause, and removed by the same vote, after a public hearing, if he applied for it within a week. He would have the supervision of all employees, with exceptions to be specified later, and all departmental heads would be appointed on his recommendation, a two-third vote of the whole council being required to reject such recommendation.

"The appointment of the manager to be based solely on his executive and administrative capacities without regard to race, language or creed.

"In dealing with the city manager, the council always to act as a body and individual members not to attempt to dictate to him while the council is not in session.

"The charter not to specify the salary to be paid the manager, but to specify a liberal maximum up to which the council may go if a man can be secured who is worth it.

Calgary, Alta.—While the term of the city's street railway bonds averages 30 years, the life of the assets will average less than 17 years, according to a statement made by F. M. Harvey, city auditor, before the city commissioners on July 23rd. He said that half of the bonds should have been for fifteen years and half for twenty. The peril of obsolescence Mr. Harvey also deemed to be great in that some other form of transportation might force the street railway out of business before many years, especially in view of the narrowness of Calgary streets.

The remarks of the auditor were made during a discussion with the commissioners relative to increasing the depreciation reserve of the street railway. Mr. Harvey contended that as the street railway assets must largely be replaced within the term of life of the bonds, it is necessary to establish in addition to the sinking fund a substantial depreciation reserve. Mr. Harvey said that the impression that the city is setting aside the full amount of sinking fund and depreciation is a misconception. Under the system now in vogue, by 1939, when the bonds come due, the city would have set aside only about 50 per cent. of the original cost of track and roadbed.

Hamilton, Ont.—The assessment of five of the eight wards has been completed, and the increase amounts to more than 37 per cent., or $18,800,490. The total assessment of the five wards is $67,382,260, as compared with $48,581,770 last year.

The civic gas committee, of which alderman McQuesten is chairman, has adopted a report recommending the City Council to offer the United Gas & Fuel Company $2,850,940 for its plant and franchise. The company wants $3,200,000. The price will probably be fixed by arbitration. The price the company may charge under its franchise is 90 cents a thousand cubic feet. Alderman McQuesten believes the city can sell at about $1.10 and give a dependable supply of gas. It was stated that the company would have a new unit of its artificial plant ready about October.

Toronto, Ont.—Whether retail stores operated by the Wm. Davies Co., Ltd., are to be assessed as retail stores or as part of their manufacturing plant is a question now before the city Court of Revision. The Assessment Act provides that the business tax on retail stores is to be based on 25 per cent. of the assessed value of the premises occupied, while in the case of a manufacturer the percentage is 60. Several other companies are interested in the decision.

Esquimalt, B.C.—A bright financial outlook and a successful record in the past six months, is presented in the semi-annual report of A. Lockley, reeve of the municipality. The tax levy for this year amounts to $97,379, and according to the statement $84,075 has been collected, or 86.33 per cent., of the total levy.

"Although the majority of municipalities found it necessary to raise their rates this year," said Reeve A. Lockley, in commenting on the showing of Esquimalt's finances, "we decided when framing our estimates to make a reduction. In doing so we were faced with two difficulties the fact that our school expenditure necessitated raising the school tax from 5 mills to 5¾ mills, and the circumstance of having to pay a heavy rate of exchange on the interest money forwarded to the New York holders of our municipal bonds. This amounted to an imposition of 1 mill, and was a situation that was impossible to foresee. All other municipalities with loans payable in the United States were affected in the same way. In spite of these things and by very careful revision of our expenditure budgets, our taxes were reduced from a total of 18 mills in 1919, to the present rate of 17 mills. That the policy of the council was justified is shown by the fact that this year's collection of current taxes has already amounted to 86.33 per cent. of the total, and practically equals the percentage for the whole of last year.

"With regard to our sinking funds," the reeve went on, "Esquimalt is in the enviable position of being one of the few municipalities in British Columbia to have a surplus on hand. At the end of last year it amounted to $2,570. The position has been further improved by the redemption of $26,000 worth of sewer loan debentures at a figure which will result in a substantial saving to the ratepayers.

"A tax sale will be held on September 10th, and it is confidently expected that the greater part of the arrears will be cleaned up, in view of the fact that all properties which have hitherto been protected by the War Relief Act will be sold, unless the owners will avail themselves of the provisions of the War Relief Act Further Powers Act. It is worthy of note that, although tax sales have been held each year since 1915, it has only been necessary for the corporation to buy in three lots. This in itself is an indication, we believe, of the excellent position of the municipality."

NEW INCORPORATIONS

Fifty Million Dollars Capital of New Firm—Number of Other Large Incorporations Listed During Past Week

The following is a list of companies recently incorporated under federal and provincial laws, with the head office and the authorized capital:—

Government and Municipal Bond Market

Important Provincial Financing Now Taking Place—British Columbia Makes Further Sale—Part of Quebec Issue Sold by Private Arrangement—General Condition of Market Is Quiet, with Few Municipal Issues

WEAKNESS in the stock markets has exerted its influence on the bond market during the past few days. The market is quiet and prices are easy. Few new municipal issues are coming upon the market, but there are plenty of outstanding issues available for purchase. Bonds of the provinces of British Columbia and Quebec were sold recently to syndicates of bond dealers.

The following is a list of debentures offered for sale, of which details are given in this or preceding issues:—

	Amount.	Rate %.	Maturity.	Tenders close.
Moncton, N.B.	$300,000	6	10-years	Aug. 12
Goose Lake C.S.D., Man.	50,000	6	20-instal.	Aug. 14
Kerrobert, Sask. ...	4,500	6	10-years	Aug. 17

Ontario County.—The county council is considering the issuing of $50,000 of debentures for bridges and roads. A by-law to borrow $12,000 temporarily was also passed.

Armbruster Rural Telephone Co.—Tenders are invited for $5,700 10-year 8 per cent. debentures of the company. Philip Piller, secretary-treasurer, Neudorf, Sask.

Kerrobert, Sask.—Tenders will be received until August 17th, 1920, for the purchase of $4,500 6 per cent. 10-year debentures. (See advertisement elsewhere in this issue.)

Cotswold Rural Telephone Co.—Tenders were invited up to July 31st for $9,500 debentures of the company, repayable in fifteen equal annual instalments of principal and interest, with interest at not more than 8 per cent. C. G. Bulstrode, secretary-treasurer, Qu'Appelle, Sask.

London, Ont.—The Ontario Railway and Municipal Board has written General Manager E. V. Buchanan of the Public Utilities Commission, asking for full information in regard to the application of the city of London for the ratification of an issue of $165,000 of debentures for water and electric lighting extensions in this city. Mr. Buchanan, upon orders of the Public Utilities Commission, has gone to Toronto to explain to the Railway Board the absolute need of the money to provide light and water for many homes in London, including fifty or more being erected by the Housing Commission.

Outremont, Que.—Sealed tenders are invited for the purchase of Outremont Board of Protestant School Trustees' debentures to the amount of $175,000, bearing 6 per cent. interest, payable half-yearly, for a period of ten years. Tenders will be received up to 6 p.m., August 9th, 1920. Tenderers to specify Canadian or American funds. Can be arranged in suitable denominations. This issue is for the purpose of extending school accommodation. Wm. F. Rowell, secretary-treasurer, Outremont.

Bond Sales

Brantford, Ont.—Out of $150,000 offered in city debentures placed on the local market, City Treasurer A. K. Bunnell reported that up to July 30th more than $100,000 had been sold, the district as well as the city purchasing. The bonds yield 6 per cent.

British Columbia.—British Columbia securities to the extent of $3,000,000 were acquired by a Victoria syndicate on August 4th at the rate of $98.91 for the whole issue. The new loan will be utilized solely for construction work on the Pacific Great Eastern Railway as part of the provincial government's program of railway extension to Fort George.

In the month of July two issues, totalling $2,800,000, were sold by the province.

Outremont, Que.—The Catholic School Board of the city has just sold, at 97, to a syndicate of four Montreal firms, its $400,000 6 per cent. 5-year bond issue, dated March 1st, 1920. The proceeds will be applied to the payment of $335,000 6 per cent. bonds, maturing in New York, and to the consolidation of floating debts. The new bonds are payable in Montreal and New York. The underwriting firms are: Versailles-Vidricaire-Boulais, Limitee, Le Credit Canadien, Incorporee, Beausoleil, Limitee, L. G. Beaubien et Cie.

Quebec.—Part of the issue of $5,000,000 of bonds of the province of Quebec, tenders for which were originally received in April, has been disposed of privately. In a statement to *The Monetary Times*, the provincial treasurer, Hon. W. G. Mitchell, says:—

"An issue of $5,000,000 was made, $2,500,000 10-year 6 per cent bonds and $2,500,000 5-year 6 per cent. bonds. Of the $2,500,000 10-year bonds, $1,000,000 was sold under special conditions, by which the purchasers bound themselves not to place the bonds on the market during the term of the loan, and the balance of the bonds, amounting to $4,000,000, were placed in the hands of our financial agents, the Bank of Montreal, to be disposed of to the public at par, they to be allowed a commission for this and brokerage of one point."

Cobourg, Ont.—At a meeting of the finance committee of the council, held July 31st, Wood, Gundy and Co.'s bid for $75,000 town of Cobourg debentures was accepted. The following is a list of the tenderers and bids submitted:—

Wood, Gundy and Co.	94.77
United Financial Corporation	94.58
A. E. Ames and Co.	94.09

The above debentures consisted of two blocks, namely: 1st Block $50,000, 20-year period, 6 per cent., issued on instalment basis, and dated from July 1st, 1920; 2nd Block $25,000, 15-year period, bearing interest at the rate of 6 per cent. per annum, and dated from July 1st, 1920.

WESTERN CANADA IRRIGATION ASSOCIATION

The fourteenth annual convention of the Western Canada Irrigation Association was held in Lethbridge, Alta., on July 28 and 29. Soil drifting, which caused millions of dollars loss to the crops this year, was the chief subject discussed. Irrigation is advocated as the remedy for this, and Professor Jardine of the Kansas State College of Agriculture gave evidence to the effect that land in a 66,000 acre tract in Kansas, which had been subject to drifting a few years ago, was now producing from 25 bushels of wheat per acre upwards. Delegates present from the three prairie provinces were taken through the Lethbridge-Coaldale irrigation block and shown fields of wheat which will yield 40 to 50 bushels per acre, and other excellent crops of hay, etc.

The convention passed a resolution urging the Dominion and provincial governments to adopt a policy of financial aid to irrigation projects in the semi-arid portions of Alberta and Saskatchewan which are capable of irrigation, and also asked that the Dominion Department of the Interior Reclamation Service continue to carry out surveys to establish the feasibility of irrigation schemes in these areas. Amendments to the Alberta Irrigation Act defining the word "owner" of land were also asked.

Deputy Minister Craig of the Alberta Department of Agriculture made the announcement that his department was beginning to see that it was better to help the farmers make good on their farms than to be continually providing relief in dry seasons, and therefore more attention would be paid to irrigation in the future.

Retain those Victory Bonds

Victory Bonds to-day are in the process of re-distribution. More than $100,000,000 of these bonds have been bought this year by owners who keenly appreciate their sterling value, and plan to hold them as a permanent investment.

This re-distribution has taken place on more favorable terms than the original issue price. This means that in a Victory Bond transaction, the advantage is with the purchaser—it is a "Buyer's Market."

The soundest advice that owners of Victory Bonds can consider is to retain their present holdings, and when possible, buy more.

FIRE LOSSES AND FIRE INSURANCE CLAIMS

(Continued from page 7)

validity of his entire claim. This is but giving effect to the general principle of our law of insurance as contained in article 2488 of the civil code that fraudulent misrepresentation or concealment on the part either of the insurer or the insured is in all cases a cause of nullity of the contract in favour of the innocent party.

If in making his claim, the insured is guilty of a deliberate false statement in reference to the claim itself, it nullifies the whole claim and not merely that for the particular property for which the falsehood is made. This principle was recently held by the Superior Court of this province and confirmed by the Court of Review. So in preparing proofs of loss and claims generally, the utmost care must be exercised so that no mispresentation shall occur with regard to any one item of the claim.

The fatal false statement must refer to the claim itself and not to any immaterial or collateral object of it.

The misrepresentation must be pleaded and must be proved to be wilfully false in order to nullify the claim The court will not infer it; and unless it should appear that the falseness of the statement is deliberately made knowing that it is false, the court will not deem it to have been fraudulent and so destroy the claim. It therefore frequently happens that an exaggerated value of a loss is not regarded as fraudulent because value is largely a matter of judgment, whether estimated before or after the loss. It is always a question for the jury or Court to decide whether, in arriving at this overvaluation, there has been fraud or false representation; and though the court may be dissatified with the value set upon the property by the insured, unless he appears to have valued it at too high a figure deliberately and not by error of judgment, it would not disturb the verdict in favour of the insured, or decide that the contract was void. I think it may be said that a certain amount of exaggeration in every valuation is always expected, so while an overvaluation is an evidence of fraud it does not amount to fraud where it expresses the honest opinion of the insured, due allowance being made for the exaggerated opinion he may have of the worth of his own property, which after the loss takes place is generally found to be, in the estimation of the insured, the finest property that ever was.

Degree of Overvaluation

As to what degree of overvaluation will be sufficient for a presumption of fraud, it is hard to fix a cast-iron rule. It has been held by the Court of Appeal in the province of Quebec, that where the amount demanded is over double the actual value, fraud will be presumed in the absence of clear evidence to the contrary; on the other hand, another judgment of the same court held that an apparent overvaluation of 20% is not necessarily fraudulent where the value of the property is not easy to determine. As a rule, each case must be judged by its own peculiar circumstances. In many cases fraud would be presumed where the overvaluation was considerably less than double the actual value.

Closely associated with fraudulent claims is the conduct of the insured with regard to the fire itself. Of course, if the insured wilfully causes the fire, he cannot recover anything and is fortunate if he escapes gaol. But by the rule of good faith, the law requires a stricter line of behaviour than mere absence of crime, and if the insured does anything to aggregate the loss, he will be held to have violated the contract and cannot recover. Thus, if he intentionally prevents the interference of others to save the goods threatened with destruction, or the working of the fire brigade to extinguish the fire, preferring to have the insurance money rather than the property itself, he commits fraud on the company which will relieve the latter from obligation. It is even maintained that if the insured deliberately refrains from and neglects to save the insured property without reasonable excuse, the company will be relieved from its contract. But the refraining from saving the property must be done with the fraudulent intention of causing it to burn, and throwing the loss on the company. Fraudulent intention could be inferred from the insured's refraining from the use of reasonable exertions and employing the means at hand to extinguish the fire.

Recovery of Money Paid

If the loss be paid by reason of fraudulent acts on the part of the insured, the money may be recovered back by an action at law. To succeed in such an action the company must show not only that there was misrepresentation, but that it caused a damage to the company. It must also show that it relied upon the statements furnished by the insured and made the payments by reason thereof.

Arbitration

Statutory condition 16 provides that in the event of a difference arising as to the value of the property insured, or saved, or the amount of the loss, the matter in dispute shall be submitted to arbitration. One arbitrator is chosen by the insured and the other by the company, and they appoint the third arbitrator, and if they cannot agree, he is appointed by a judge of the Superior Court. The award of the arbitrators is conclusive as to the amount of the loss, and the proportion to be paid by the company.

The rules of the common law governing arbitrations generally, as found in the Quebec Code of Procedure, apply to these insurance arbitrations. The provisions of the Code of Procedure as found in Article 1431, and following, must be strictly adhered to. The deed of submission to arbitration must fix the delay within which the award of the arbitrators must be given.

The arbitrators must hear the parties and their proofs or establish a default against them, and decide according to the rules of law, unless by the terms of the deed of submission they have been exempted from doing so; but if they have been appointed at the same time as mediators, or as mediators only, they are not required to decide according to the rules of law. The witnesses must be sworn before giving their testimony.

The arbitrators should be careful to observe the required formalities, otherwise their award may be nullified; for instance, it has been held by the Court of Appeal that failure by the arbitrators to notify the parties, or one of them, or the time and place of their proceedings, is a contravention of the law, and nullifies their award.

During the delay fixed for the rendering of the award the appointment of the arbitrators cannot be revoked except with the consent of all the parties to it. If the delay is not fixed, either of the parties may revoke the submission to arbitration at will.

Where more than one arbitrator is named, two at least must agree upon each item of the award.

The award of the arbitrators is made out in notarial form, or deposited with a notary, who then draws up an act of the deposit; and the award must be pronounced in the presence of the parties, or a copy left with them—all within the delay fixed by the arbitration submission.

The award is executed under the authority of the Court upon a suit brought for that purpose.

The court, when such a suit is brought, may examine into any grounds of nullity which affect the award, or into any question of form which may prevent its being homologated; but it cannot enquire into the merits of the contestation.

Arbitration may be availed of after action has been brought on the policy, and the award of the arbitrators is to prevail then over the finding of the court or jury as to the amount of the loss.

It must be borne in mind that such an arbitration is strictly limited to the matters provided for, that is the amount of the loss, the value of the property insured and saved, and the sum and proportion to be paid by the company.

Where the company demands an arbitration under this statutory condition, it could not set up the defence of

original error and avoid the policy where it had prior notice of such error; and it might not be able to set up irregularities in the notices and preliminary proofs of loss under such conditions. But a reference to valuators without waiver of the conditions of the policy will not deprive the company of the benefit of the condition that all claims under the policy shall be forfeited in the case of fraud in the claim or false swearing by the insured.

Notwithstanding the somewhat emphatic wording of the condition it is not intended to make arbitration a condition precedent to action; but when there is a submission to arbitration the proceedings are in the nature of an arbitration and not of a mere valuation. Arbitrators should act in the quality of judges; they should, therefore, be impartial and disinterested.

The submission to arbitration must be made within the time allowed for the recovery of the loss which by statutory condition No. 22 is placed at one year from its date.

Subrogation

Subrogation, which means the substitution of another person in place of a claimant to whose rights he succeeds in relation to the claim, applies to fire insurance losses. This is provided by article 2584 of the Civil Code, which is to the effect that the insurer on paying the loss is entitled to a transfer of the rights of the insured against the persons by whose fault the fire or loss was caused. This does not give subrogation *ipso facto* upon payment of the loss; there must be a transfer of the rights of the insured concurrently with the payment of the insurance money in order that there shall be conventional subrogation (that is subrogation by agreement). It must be express, and made at the same time as the payment. In the absence of such conventional subrogation, where the insurance company has paid the insurance money, it might have recourse against the wrong-doer under article 1053 of the Civil Code by which every person capable of discerning right from wrong is made responsible for the damage caused by his fault to another, whether by positive act, imprudence, neglect or want of skill. While the insured under this article has the right to recover the damage he suffered from the one who caused his loss, it is open to question if the insurance company has the same right, without subrogation, the judges holding different views on the question, though the weight of authority so far favors the opinion that the company can recover. It is recognized by our law that the insured cannot be indemnified twice for the same loss. Therefore, the insurer is not only substituted for the insured in respect to any damages the latter is entitled to from the one causing the loss, but it is entitled to recover from the insured, after paying him his loss, any indemnity over and above the actual loss the latter has received from the third party causing the loss, whether such indemnity be paid voluntarily or not.

Delays for Payment and Entering Action

Statutory condition 17 enacts that the loss shall not be payable until 60 days after the completion of the proofs of loss unless otherwise provided for by the contract. This being a provision in favor of the company, it has the right to stipulate anything less favorable to itself, but needless to say, this is seldom done.

It has been decided by the courts of Quebec that where the company has absolutely refused payment, the insured can sue before the expiry of the delay. As this condition fixes a time for the payment of the claim, interest will run from the expiry of the time thus fixed.

Should the company waive its right to have from the insured his statement of loss within a definite delay, it does not entitle him to disregard the condition giving to the company a certain time to pay the claim after production of proofs of loss.

Statutory condition No. 22 requires that every action or proceeding against the company for the recovery of any claim under the policy shall be absolutely barred unless commenced within one year next after the loss or damage occurred.

This condition is a complete bar to any suit or action instituted after the time mentioned unless the prescription has been interrupted by some act on the part of the company itself. But correspondence between the insured and the company on the subject of the loss without any admission on the part of the company would not constitute such an interruption. For all practical purposes it may be said that the rule is that the action must be commenced within the year following the fire.

Rebuilding or Repairing

Statutory condition 18 allows the company, instead of making payment, to repair, rebuild or replace, within a reasonable time, the property damaged or destroyed on giving notice of its intention to do so within fifteen days after the receipt of the proofs of loss.

This provision is seldom availed of by the companies, but it is a convenient right to have, should a claim be made which appears to be exaggerated and proof of value difficult to make.

If the company does not rebuild within a reasonable time after signifying its intention to reinstate, it can be sued on the policy.

It has been held in Quebec that if the insured refuses to accept a house rebuilt by the company, he is entitled to an expertise (reference to and report by experts), and so long as the company has not complied with the condition and made the repairs in a proper manner, he is not bound to accept the house, and the circumstances of his having, during reconstruction, made suggestions to the builders cannot be held to deprive him of his right to an expertise.

It appears that where the company agrees to pay, its election to reinstate is gone; and it has been held that the company, by exercising its right to repair, precludes itself from the right to insist upon arbitration. So where the repairing or rebuilding is done in an unsatisfactory manner, the insured will be entitled to sue for damages without reference to arbitration.

EFFECTS OF INCREASE IN WHEAT PRICE

The effects of the acton of the wheat board in raising the price of spring wheat by 35 cents a bushel, on May 8, is reflected in the May returns to the Board of Commerce, showing the cost of bread in different cities of Canada This was followed by an increase of $1.45 per barrel in flour prices; winter wheat flour also advanced about 70 cents per barrel.

The average cost of flour as used by bakers throughout the Dominion advanced from $12.04 in April to $12.71 in May, an average increase of 67c. per barrel, flour stocks on hand before the advance, evidently keeping the trade from feeling the full increased cost during the month of May. The total average cost per pound of bread for the Dominion for May was eight and three-tenths cents per pound, against eight cents in April, an increase of three-tenths cents per pound, due to the increased flour cost, and fractional increases in baking and delivery charges, caused by increased wages to bakers and delivery men.

The consumption of bread in May shows an increase of two and one-half per cent. over April, and the average yield for May stands at the same figure as for April, namely, 262 pounds of bread from one barrel of flour.

As the yield of bread per barrel is a material factor on the cost, the higher the yield the cheaper the bread, it is interesting to note from the returns that 16% of the reports show yields under 250 pounds, 27% run from 250 to 259 pounds, 34% report from 260 to 269 pounds, while 23% show 270 pounds and up. Efficiency, character of the bread produced, ovens used, etc., largely influence the yield.

The flight of a train [illegible] throbbing [illegible] enormous pulse in the arteries of the nation. To slow the beat is to slow the life of the country.

THE train in the picture is one of the eleven hundred freight trains in daily service in Canada.

It consists of one heavy-duty freight engine and 45 standard box cars. It can carry 2,000 tons of wheat.

In 1913 its engine could have been built for $34,700—to-day $81,000, its box cars for $1,138.85 each—to-day $3,797.50.

In other words, the rolling stock alone in the movement of 2,000 tons of wheat has increased in cost from $85,948.25 to $251,887.50 or 193.1%!

The labor bill of the railways has risen in the same period from $115,000,000 to $231,000,000,—101%!*

The cost of rails for a mile of track has gone up from $9,497 to $19,680—107%!

No cost has been unaffected by the general rise.

Operating expenses continue to rise more rapidly than Gross earnings. Net earnings are sinking at an alarming rate.

These are the facts that lie behind the application for increased freight rates for the railways.

Wabasso Cotton Reports 1919 as Best Year in its History—Position of Dominion Shipbuilding Company—First Annual Statement of Canadian Woollens — Earnings of Brazilian Traction in June

Winnipeg Electric Railway Company.—Officers of the Street Railwaymen's Union on Saturday evening signed the agreement with the Winnipeg Electric Railway Co., providing for a wage increase of approximately 10 per cent., as recommended by the Myers Conciliation Board. The agreement is for one year. As the award is retroactive to May 1, the men will receive back pay, aggregating $70,000, at the earliest possible moment.

Porto Rico Railways Co., Ltd.—The following is a comparative statement of earnings of the company for June, 1920:—

	1919.	1920.	Increase.
Gross	$ 89,191	$124,382	$ 35,190
Net	33,112	50,507	17,394
For six months ended June:—			
Gross	$567,969	$672,326	$104,356
Net	210,121	264,868	54,747

Brazilian Traction.—A net increase of 919,000 milreis for the month of June over the same month last year is shown in the combined earnings and expenses of the Brazilian Traction, Light and Power Co., Ltd. Total gross earnings amounted to 10,874,060 milreis, the operating expenses 5,078,000, net earnings 5,796,000, while the aggregate gross earnings from January 1 totalled 61,040,000 milreis, and the aggregate net earnings for the six months 33,057,000. The increase in gross earnings for the six months was 7,077,000, and the increase in net earnings 4,707,000.

1920	Gross (milreis)	Net (milreis)	Net inc (milreis)
January	9,655,000	5,110,000	827,000
February	9,381,000	4,984,000	1,120,000
March	9,900,000	5,310,000	297,000
April	10,245,000	5,595,000	499,000
May	10,985,000	6,262,000	1,045,000
June	10,874,000	5,796,000	919,000

Dominion Shipbuilding Company.—Assets valued at $3,500,000 and liabilities of $2,000,000 represent the position of the Dominion Shipbuilding Co., Toronto, which is now being wound up by Osler Wade, assignee, who was placed in charge of the affairs of the company by a group of creditors represented by A. C. McMaster of the firm of McMaster, Montgomery, Fleury and Co. "The information I have received is that there will be a surplus of $1,500,000. The assets are not liquid, and are locked up in the plant. The information I received to-day is six weeks old, and the position of the company may have changed in the meantime," said Mr. Wade on August 4. "A staff is going through the affairs of the company, and a definite statement will not be made for three weeks."

Wabasso Cotton Co.—There is unusual interest in the annual statement of the Wabasso Cotton Co., Ltd., Montreal, this year on account of the plans which are being worked out for the splitting up of the share capital of the company. The annual statement for the fiscal year ended June 30th, which has just been sent to shareholders, indicates that the company has enjoyed the best year in its history. The largest volume of business handled has enabled it to strengthen its financial position and to report a slight increase in profits over the previous year, which up to that time had been by far the best year the company had ever enjoyed.

The general statement of assets and liabilities shows current assets of $2,051,702, as compared with $1,205,054 a year ago. Current liabilities, which include provision for business profits tax for 1919 and 1920, amount to $1,211,332, as against $614,017 for the previous year. Included in current assets are cash on hand and in banks, $122,137, as compared with $106,989; Victory bonds and call loans, $550,321, up from $327,539; accounts and bills receivable, $560,951, up from $386,333, and inventories $818,242, as compared with $376,549.

Canadian Pacific Railway Co.—The June earnings statement of the company discloses a decline in net of $359,603, or about 12 per cent. from the level of June, 1919. Gross earnings were well up to previous records, but working expenses, as the result of the ever-increasing cost of maintenance and materials, together with higher wage requirements, rose to unprecedented figures. The following is the comparative statement:—

	1920.	1919.	Increase.
Gross earnings	$16,480,574	$13,577,273	$ 2,903,300
Expenses	13,849,757	10,586,852	3,262,904
Net	2,630,817	2,990,421	*359,603

Figures for the first half of the year are:—

	1920.	1919.	Increase.
Gross earnings	$92,057,586	$76,722,266	$15,335,319
Expenses	80,629,400	64,535,788	16,093,611
Net	11,428,186	12,186,478	*758,292

*Decrease.

Canadian Woollens, Ltd.—The first annual report of the company shows the results of the company's operations in the first twelve months of its existence, and indicates that the period has been a successful one. Profits from operations, after deducting all manufacturing, selling and general expenses, and providing for government taxes, but before making provision for depreciation, interest on bank loans and organization expenses, etc., amounted to $599,072. Provision for depreciation of buildings and machinery, $107,188; interest on bank loans, $25,999; organization expenses, $10,008; reduction of investments to market value, $12,650; and provision for employees' pension and insurance fund, $20,000; when deducted, left net income for the year of $423,227. After deducting preferred dividends, net earnings were $300,727, indicating over 17 per cent. earned on the 17,500 common shares.

The balance sheet shows the company in good financial position. Total assets aggregate $5,581,208. Current assets are given at $2,346,394, as against current liabilities amounting to $1,290,174, a surplus of current assets of $1,056,220.

Brazilian Traction, Light and Power Co.—No definite declaration in regard to a dividend on common stock was given at the annual meeting of the company in Toronto on July 28, although shareholders were given the assurance that attention would be accorded their claims at the earliest possible moment. The chairman, Sir William Mackenzie, referring to this question, said that the board was just as anxious to see a dividend as the individual shareholders. He pointed out that the matter would be taken up at the first possible opportunity, but that at present the future had to be considered, with a view to seeing where the money was coming from to keep its concession obligations in shape. Answering the question of how much of the earnings had been applied to capital account since the company ceased to pay a dividend, Vice-President E. R. Wood stated that the sum was approximately $33,000,000. This brought the remark from a shareholder that a stock dividend ought to be paid. Mr. Wood replied that if this was done it would have to be paid at par in new shares, and, if liquidated at present prices, would reduce its cash value, and, in addition, future dividends would have to be paid on the new stock at par.

Sir Alexander Mackenzie, the president, drew attention to some of the more salient features of the year's business,

Information [illegible] L. R. STEEL [illegible] LIMITED, CANADIAN EXECUTIVE OFFICES, [illegible] TORONTO [illegible] OFFICES, MERCHANTS BANK BUILDING, [illegible] recently made known in the annual report, which showed an improvement in conditions generally, and also the possibility very shortly of a change for the better in the exchange situation. His remarks showed that the property was in excellent physical condition and the earning position better than ever.

Touching on the increased demand for services, Sir Alexander said that they had absolutely no resourse but to spend the earnings of the company until they were able to raise money in the United States, but he hoped that the time was not very distant when the cheerful communication could be made of a resumption of dividend.

The retiring board of directors was re-elected without any change as follows: Sir William Mackenzie, chairman; Sir Alexander Mackenzie, K.B.E., president; E. R. Wood, H. M. Hubbard, R. C. Brown, E. R. Peacock, Miller Lash, vice-presidents; H. F. Marshall, Clarence Dillon, Sir Thomas White, K.C.M.G., D. B. Hanna, R. M. Horne-Payne, Sir Henry M. Pellatt, C.V.O., Hon. F. H. Phippen and William Bain.

CORPORATION SECURITIES MARKET

New York Market Lower—Montreal and Toronto also Weakened—Several Companies Secure Increases in Authorized Capital

POLITICAL developments in Europe exerted a strong bearish influence on the stock markets, both in New York and in Canada since last week. Coupled with high money rates and a general tightness in the market, this effected substantial losses in the quotation of many securities. Some improvement took place in the railroads, with the certainty that higher rates would be authorized without delay.

In Montreal there was rather heavy trading with prices tending downwards. Some of the securities which lost the most ground were Abitibi, Ames-Holden, Atlantic Sugar, Dominion Canners, Price Bros., and Spanish River. The papers were rather prominent in the downward tendency, although some issues stood up well. Among other stocks, Bell Telephone, Woods Mfg. Co., and Dominion Steel made gains. In the banks there was some activity, with no important change in price levels. Bond prices were firm.

Capitalization Changes

Increases in the capital of companies incorporated under Dominion charter have been authorized as follows:—

	Former capital stock	Increased to
De Laval Co., Ltd.	$1,000,000	$2,000,000
American Nitrogen Co., Ltd., (decreased)	1,000,000	3,000,000
Dominion Paint Works, Ltd.	50,009	500,000

The capital of the W. E. Woelfle Shoe Co., Ltd., incorporated under Ontario charter, may now be increased from $40,000 to $200,000. Changes have also been authorized in the capitalization of the Allen's Niagara Falls Theatre, Ltd., increasing the capital from $350,000 to $425,000.

RECENT FIRES

Village of Carp, Ont, Suffered Loss of $100,000—Currie-Williams Cannery at Ladner, B.C., Canadian Iron Foundries, Ltd., and Dominion Brake Shoe Co., Ltd., at St. Thomas Also Were Large Fires This Week

Burnaby, B.C.—July 17—Residence of Rev. A. C. Cameron on Mayne Avenue, near Kingsway, was destroyed.

Carp, Ont.—August 4—The village of Carp was destroyed, the estimated loss being $100,000. The following places were destroyed: Younghusband Block, occupied by Alfred E. Younghusband, hardware and grocery store, and Austen C. Younghusband, dry goods store, ice cream parlor and dwellings. Loss on building $15,000, and on stock $15,000, partly covered by insurance. The Daly Block, owned by James Daly, Ottawa; loss, $30,000, partly covered by insurance. G. A. Dawson's drug store; loss on stock $10,000, insurance $5,000. A. E. Evoy, Carp "Review" office and printing plant; loss $12,000, insurance $5,000. George Bishop, grocery stock; loss $10,000, insurance $5,000. Bank of Nova Scotia, fittings and equipment, $3,000, mostly covered by insurance. Masonic Hall, loss $3,000, no insurance. Mrs. Samuel Hempshill and Freiman Gibson, furniture in dwellings, loss $2,000.

Glace Bay, N.S.—August 3—Department store belonging to McArel Bros. destroyed by fire.

Ladner, B.C.—July 25—Currie-Williams Cannery, with 6,000 cases of salmon, was destroyed; also a store and about forty residences destroyed. The loss is estimated at $100,000. The plant was owned by the British Columbia Packers' Association.

St. Justine de Dorchester, Que.—July 25—Five houses and four barns, valued at $40,000, were destroyed.

St. Thomas, Ont.—July 29—Pattern storage department, pattern-room and a portion of the roof of the foundry of the Canadian Iron Foundries, Ltd., and the material sheds and shipping building of the Dominion Brake Shoe Co., Ltd., were damaged. Total loss is $100,000, partly covered by insurance.

Winnipeg, Man.—August 2—The Winnipeg civic light and power plant at Point du Bois was damaged by fire, which shut off the city's system for five hours.

ADDITIONAL INFORMATION CONCERNING FIRES

Sarnia, Ont.—The fire loss for the quarter ending June 30th was much greater than the loss during the first quarter of the year, according to the report of Chief Batty, which recorded twenty-seven alarms, seventeen fires and a loss of $11,876, $10,985 more than during the first three months of the year.

Fairville, N.B.—July 7—Storage of Ready's Beverages, Ltd., was destroyed. Estimated loss, $400. Insurance carried to the extent of $1,000 in the Canadian-Anglo Insurance Co.

Fleming, Sask.—House and contents of Harry Bowering were destroyed recently. Estimated loss on contents, $2,000; on building, $6,000. Insurance carried to the amount of $1,500 in the London Fire Insurance Co.

Golden, B.C.—July 3—Store of A. D. J. Marhuson was damaged. Estimated damage to contents, $4,000; to building, $2,750. Insurance to the amount of $2,000 carried in the Hudson Bay Insurance Co.

Loan Company Assets Exceeds Quarter Billion

Figures for 1919 Show Moderate Growth in Volume of Business—Deposits Increased but Amount of Debentures Outstanding is Almost Unchanged—Amount of Mortgages Held is Considerably Reduced—Net Profits Average 6.7 Per Cent. of Combined Paid Up Capital and Reserve

CANADIAN loan companies increased their business in 1919 in spite of the fact that money conditions were very tight. Deposits show a healthy increase for the year, representing net savings on the part of the Canadian people. The amount of debentures outstanding was substantially reduced, however, the discount of the pound sterling being one of the main factors bringing about these repayments. This scarcity of funds was offset by the heavy repayments of principal on mortgages, and an increasing proportion of loan company funds found its way into government and municipal securities.

Figures of loan company business for 1919, as compiled by [illegible], compare as follows with the figures for 1918:—

	1918	1919
Capital paid up	$ 65,934,070	$ [illegible]5,641,0[illegible]
Reserve	[illegible]	[illegible]4,673,758
Deposits	23,549,559	27,[illegible]4,060
Debentures outstanding	110,524,076	11[illegible],525,185
Mortgage loans	164,[illegible]27,[illegible]	156,072,06[illegible]
Total assets	247,[illegible]02,208	250,0[illegible]6,621
Net profits	[illegible]	[illegible],125,177

There were fourteen Canadian companies (leaving aside the Trust and Loan Company of Canada, the head office of which is in London, Eng.), which had a paid-up capital of $1,000,000 or over at the end of 1919. The results for these fourteen, compared with the results for 1918, are compared below. The statistics for these companies are practically complete, and the comparison, therefore, gives a good indication of developments during the year.

TRADE REVERSAL DUE TO EXTRAVAGANCE

Exports Have Held up Well, But Unusual Increase in Imports Has Again Resulted in Unfavorable Balance

THE abrupt reversal in the foreign trade position of the Dominion is of more than passing interest, but there is evident misunderstanding in many quarters as to the reasons behind the reversal. If the figures for the first half of the current year are taken—and because of varying conditions affecting markets and transportation for Canadian products it is not wise to generalize from the results of a shorter period—it may be accepted that the volume of exports has held surprisingly well. The half year's total is no less than 554 millions, which is only 10 millions less than in 1919, and 62 millions in excess of the average of four years of war, when the returns were swollen by munition exports.

It is on the import side that the showing is unsatisfactory. Imports for the half-year reached the unprecedented total of 680 millions, an increase of 270 millions over 1919 and of 295 millions over the average for the war period.

Heavy Imports Unexpected

Forecasts of the probable effect of the ending of the war on our foreign trade have, therefore, been upset in two ways. Sales abroad have continued in much larger volume than expected, but the advantage has been more than offset by the still greater and more unexpected increase in the volume of our buying. The net result, in so far as it has thrown the country abruptly back into the position of a debtor instead of a creditor in world trade, is for the time being at least decidedly unfavorable. In summary, the rise and fall of this trade balance as shown in the returns for the first six months of eight years presents itself as follows:—

	Exports	Imports		Balance
1920	$ 554,878,000	$ 680,004,000	−	$ 125,126,000
1919	564,566,000	410,231,000	+	154,335,000
1918	551,075,000	450,667,000	+	100,408,000
1917	639,798,000	528,606,000	+	111,192,000
1916	546,160,000	350,102,000	+	196,058,000
1915	230,133,000	205,732,000	+	24,401,000
1914	156,767,000	260,338,000	−	103,571,000
1913	167,754,000	340,267,000	−	172,513,000

Running Into Debt

To visualize the effect of the reversal in the net tendency of trade, it is only necessary to consider how a similar situation would affect an individual. The individual who spends more than he receives as income is running into debt. He may part with some of his belongings or he may borrow to meet the deficiency. In either case, he will be that much the poorer in the long run unless the obligations he has incurred are for the enlargement of a business that will ultimately show substantial profits.

It was not all loss, by any means, when trade balances were running heavily against Canada in a period of great activity in new development like the years 1910 to 1913. The national plant was being enlarged by the construction of new railways, new factories, and other facilities for the [illegible] business. Steel and other [illegible] for [illegible] work were bought abroad and paid for by the sale of Canadian stocks and bonds. Our credit was good, and investors in Europe were well satisfied to accept our obligations to pay. This balanced the account at the time.

When the war came on, it was [illegible] in a general thing the borrowing of the previous [illegible] had been profitable. The business capacity of the [illegible] to the greatly increased demand, and the country reaped the benefit of large profits on a large volume of sales. Sales of our products rose from 4[illegible]1 millions [illegible] in 1913-14 to 1,540 millions in 1917-18. As we were [illegible] from other countries, our previous position of [illegible] was [illegible]. The [illegible] is [illegible] to [illegible].

Extravagant Buying

An examination of the [illegible] [illegible] We [illegible] called for [illegible] of April [illegible] period of 1919 [illegible] an [illegible] in the same period [illegible] chiefly foods [illegible] total of $11,[illegible] at $2[illegible] [illegible] the increase [illegible].

The [illegible] in the direction [illegible] from [illegible] material from [illegible] products [illegible] in the [illegible] half [illegible].

In [illegible] standard of [illegible] penalty of a [illegible] per cent. [illegible] number of our [illegible] presition that [illegible] sents a [illegible] national [illegible]. The [illegible] the best period of [illegible] restraint on our buying abroad, the [illegible] the first half of the year can be [illegible].

DOMINION ASSOCIATION OF FIRE CHIEFS

Fire College at Ottawa Recommended—Uniform Phone Number to Facilitate Fire Alarms—Fire Departments to Become Preventive Organizations

THE 1920 annual convention of the Dominion Association of Fire Chiefs was held in St. Thomas, Ont., August 2 to 6. On the first day meetings of the auditors, of the board of directors and of the committee on fire college were held, the convention proper opening on the 3rd. President Berthiaume, of Quebec, in his opening remarks, stated that this was the first time the association had been presided over by a French-Canadian, and that the problems of fire chiefs were similar in all parts of the Dominion. F. Brinkman, mayor of St. Thomas, and E. A. Horton, president of the board of trade, welcomed the delegates to the city. Organization of a ladies' auxiliary to assist in fire preventive and educational work was completed during the convention, Mrs. G. W. Graham, of Ottawa, being elected president and Mrs. J. Keyes, of Galt, secretary.

The act passed at the last session of the Ontario legislature providing that every fireman should have one day in seven off was discussed, and it was pointed out that this would add substantially to the cost of fire departments, and that it would also do away with the double platoon system which has been adopted by many municipalities. This act is to go into force January 1, 1921, and a penalty of $10 per day is to be imposed on fire chiefs who do not carry it out. A majority of the chiefs were opposed to the act.

The convention unanimously approved a uniform telephone number for fire calls throughout the Dominion, and appointed a committee to bring this to the attention of the Board of Railway Commissioners for Canada. It was decided to adopt red and white lights for all fire vehicles, and a standard fire siren was approved. A code of traffic rules was discussed, but not adopted, as it was considered best to leave this to individual municipalities.

Standards for Fire Fighting

Fire Chief Healy, of Denver, Col., who, the preceding week was elected president of the International Association of Fire Engineers at Toronto, and Fire Chief Percy Hoyt, of Cheyenne, Wyoming, addressed the meeting. Mr. Healy stated that the view held by some chiefs of large cities that they could learn nothing at such conventions was wrong, as the chiefs in smaller cities, not having so many expert subordinates, had to give more attention to the different branches of the work, such as building regulations, etc. The International Association, he said, was now engaged in compiling a standard book of rules and information for fire chiefs. The standard must always have regard to the function of the department, which was to extinguish fires in the quickest way. In the United States the chief had to pass a civil service examination, and held his position for life or during good behaviour.

J. Grove Smith, Dominion fire commissioner, gave an address on fire prevention. "The fire chief of the future will," he said, "increase in importance, and will direct his attention more and more to the prevention of fires. Fire prevention is one of the most important questions before Canada to-day. This country is burdened with a debt of $2,400,000,000. Nine million people have to bear this debt. It is imperative that we be careful of our waste. We must be an economical nation if we are to carry on and pay off this gigantic debt. In the final analysis and from the very best point of view fire prevention should appeal to all patriotic citizens because it is a public service of the highest order. And to give to one's neighbor, to one's community and one's country is the very best thing that a man can do."

Fire preventive work was showing results, said Mr. Smith, as the 1918 loss of $33,925,000 had been reduced in 1919 to $24,000,000, and he felt confident that this year it would not exceed $20,000,000. It must go still lower if this country was to prosper. The speaker disapproved of the paying of commissions to insurance agents based on the premiums, as this did not encourage the agent to advocate the improvement of property and the removal of fire hazards, which would lessen the insurance premium and thereby lower his commission. Mr. Smith also pointed out that it was the duty of chiefs to urge the installation of sprinkler systems and to see that an adequate water supply was available.

The committee on fire college reported in favor of the proposal, and their report was approved by the convention. They recommend that the college be controlled by a board representing the Fire Chiefs' Association, the Dominion Fire Prevention Association, and the fire marshals of the provinces. Admission would be open to a fireman at his own expense, though some financial assistance might be extended.

RULING ON STOCK TRANSFER TAX

The expected ruling has been handed down by both the minister of finance and the provincial treasurer in regard to the transfer tax on "no par value" shares. Such stock is to be taxed upon selling price on each hundred dollars or fraction thereof at the rate of five cents per hundred dollars. For instance, one hundred shares of North America Pulp would sell at approximately $650, on which the tax would be 35 cents.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.

Rates in New York, sterling demand, $3.66⅝.

Bank of England rate, 7 per cent.

The National City Co. report exchange rates in New York, as at August 12, as follows: Cable, London, 3.66¾; cheque, London, 3.66; cable, Paris, 7.29; cheque, Paris, 7.28; cable, Italy, 5.05; cheque, Italy, 5.04; cheque, Belgium, 7.80; cheque, Swiss, 16.75; cheque, Spain, 15.15; cheque, Holland, .3350; cheque, Denmark, 15.20; cheque, Norway, 15.20; cheque, Sweden, 20.75; cheque, Berlin, 2.20; cheque, Greece, 11.80; cheque, Finland, 3.20; cheque, Roumania, 2.25.

BANQUE PROVINCIALE ANNUAL MEETING

The annual meeting of La Banque Provinciale was held in Montreal on August 11, and the financial statement for the year ended June 30 last was presented to shareholders. The statement, which was reviewed recently, showed an all-round improvement over a year ago. Deposits show an increase of nearly $8,000,000, while reserves of $9,264,000 were 25 per cent. of liabilities to the public, and total quick assets of $26,489,000 were 74 per cent. of liabilities to the public. Net profits last year amounted to $333,882, an increase of over $44,000.

During the year the bank raised its capital of $3,000,000 by the issue of an extra $1,000,000 of new stock, which was mostly fully paid up by July, 1920. Also during the year the bank raised its dividend from 7 per cent. to 8 per cent. The bank confines its operations to Quebec, Ontario, New Brunswick and Prince Edward Island.

The retiring board of directors were re-elected as follows. Sir Hormidas Laporte, P.C., president; W. F. Carsley, vice-president; Tancrede Bienvenue, vice-president; G. W. Bosworth, Hon. N. Garneau, C.L.L., J. O. Beauchemin, M. Chevalier. The retiring board of control was re-elected with Sir Alexandre Lacoste, president; Hon. N. Perodeau, N.P., and J. S. B. Relland.

PUBLICITY AND PRICES

WHOLESALERS and other dealers are finding it hard to convince the buying public that prices will go higher, or even remain at their present level. Consumers are still buying moderately but retailers appear to have reduced their purchases to a minimum, making an effort to dispose of their stocks while prices are still high. It is a common experience these days for commercial travellers to visit town after town without securing an order. It is not to be supposed, of course, that retailers have any grounds at present for cutting prices, except in the case of a few commodities, and the cut price sales so widely advertised in the United States during the past few weeks represent an effort on the part of merchants to dispose of their stocks with only nominal reductions, rather than a sound price reduction movement. Nevertheless, there is evidently a general feeling that prices must be shaded in order to maintain a sufficient volume of business.

Wholesalers, and to some extent manufacturers, are making an effort to postpone as far as possible the time when purchases will be drastically cut. An interview with Frederick H. Yapp, secretary of the [illegible] Manufacturers' Association, in New York, [illegible] trates the kind of opinion that is expressed. Mr. Yapp had just returned from a business trip to France and [illegible] and spoke in reference to his visit there. "In the textile districts of Great Britain," he said, "the mills are all operating at about 70 per cent. capacity [illegible]. The small decline in the raw [illegible] only. English manufacturers are [illegible]. At the London wool auction about [illegible] of the material was withdrawn because the [illegible] at prices offered. There seems to be [illegible] of wool, but the prices of the better grades will [illegible]

"The mills in England have [illegible] retailers, while in America [illegible] the English manufacturers [illegible] cancelled, but have [illegible] nothing returned [illegible] closely connected with the textile industry [illegible] constantly with several Germans. It is the general [illegible] that Germany need not be feared as a competitor during the present generation. She is trying to market paper goods for clothing at about four marks a yard. However, it is of little value for wear. Belgium is [illegible] a little in the textile line now, although she came back rapidly after the war."

QUEBEC AS AN ECONOMIC UNIT

FROM time to time [illegible] in Canada the desire, which [illegible] the population is [illegible] to bring about greater uniformity [illegible]. Unification [illegible] one of the greatest [illegible] craft, but the [illegible] intensify the [illegible] struggle [illegible] which has [illegible] lems of government. [illegible] in fact as well as in name, [illegible]

The [illegible]

This viewpoint comes to the surface from time to time, and is unfortunately made use of in some quarters to maintain ill-will between French and English Canada. It was not openly referred to at the National Conference on Character Education in Relation to Canadian Citizenship, held in Winnipeg last October, but it is a notable fact that not a French Canadian name is to be found among those constituting the executive committee. In opening the second session of the conference on October 20th, the chairman, Hon. Dr. Thornton, who is minister of education in Manitoba, said: "This conference comes at a psychological moment. As we address ourselves to the problems of peace this national consciousness may be emphasized and directed to educational matters. No single factor is destined to affect national thought so much as our common schools. Let us think and speak of Canadian schools. In Manitoba let us speak and think not of Manitoba schools, but of Canadian schools in Manitoba. In Ontario, of Canadian schools in Ontario. In Quebec, of Canadian schools in Quebec, and so of the other provinces." Mr. Thornton was speaking in a broad way and was not discussing concrete problems of school administration, but his remark was not in accordance with a liberal minded policy which has been found to be the most successful and the most desirable for this country.

Professor Carrie Derick, of Montreal, vice-president of the National Council of Women, was not entirely consistent. She remarked at one point: "I look forward to compulsory education throughout the Dominion on a much higher standard than anything we have now; I shall never be satisfied until every boy and girl in Canada is going to school until 18 years of age." Later, she said, in referring to the work of the school in moulding character, "This character does not need to be the same; the methods do not need to be the same; the teachers do not need to be the same; the greater diversity the greater richness in our life. Diversity does not make for disintegration. Diversity, combined with tolerance, is the one best rule for liberty and unity."

OUR FORTUNE IN PULP AND PAPER

FREQUENT references made by the imperial press delegates to their newsprint difficulties emphasize the fact that a shortage in this product, as understood abroad, is unknown in Canada. Sir Campbell Stuart, who represented the Northcliffe papers, stated in Toronto that one thing with which Canadian papers impressed him was their size. The output of newspapers and periodicals in this country is, in fact, very large in proportion to the population, and the cause is not an extraordinary demand for publications, but the remarkable supply of paper at comparatively low prices. Paper, however, is merely one illustration of the value of Canadian forests. These forests contribute upwards of $200,000,000 per year to the trade of Canada. They play an important part in our external commerce. They are a source of inestimable national wealth. Under proper management and control they can be made to contribute to the national wealth of the country indefinitely. Without such management and control they are doomed to diminish rapidly, and, within a comparatively few years, to become entirely extinct.

Proper forest control includes the enforcement of sensible cutting regulations under official superintendence, as well as adequate provision for a continuity of wood supply. The last is the more important. These can only be obtained through intelligent action on the part of the legislatures of the several provinces and through faithful administration by the governmental authorities. The means for adequate forest perpetuation must necessarily be supplied at public expense out of the revenues derived from the sale and utilization of the forest resources.

Public enlightenment on the subject is the first essential. The newspapers of Canada, in addition to the national interest involved, have a direct personal concern in the subject. Their raw material is dependent upon the continued and uninterrupted supply of pulpwood. The present high price of paper is due primarily to the high price of wood. To-day's paper prices, onerous as they may appear to the newspaper publishers, will fade into insignificance compared with what the future prices will be if Canada's pulpwood forests are allowed to be consumed indiscriminately and without provision for their replacement.

MORTALITY EXPERIENCE NOW FAVORABLE

HEALTH conditions are now excellent, according to reports from life insurance companies and from companies insuring against sickness. The Metropolitan Life Insurance Company states that the death rate among its industrial policyholders was 9.59 per 1,000 in June, compared with 9.28, both rates being comparatively low. Increases took place in the case of tuberculosis, and for external causes, especially automobile accidents. These increases were almost entirely offset, however, by pronounced declines in the mortality from influenza, pneumonia and other respiratory diseases. Public attention is now focused upon fatal automobile accidents. No less than 132 deaths from automobile accidents were recorded among Metropolitan industrial policyholders in June. This is an increase of 37 deaths, or 39 per cent., over the month of May. Automobile accidents are as important causes of death as are typhoid fever and scarlet fever combined.

Health conditions in the population at large were also very favorable during the month of June. The death rate in 49 of the leading cities of the United States for the month was 11.8 as compared with 13.8 for May and 14.8 per 1,000 for April. It appears that measles and malaria are now very prevalent, although not important factors in causing death. A serious outbreak of smallpox was reported from Texas in the beginning of June. Indiana and Kansas also reported many cases. The incidence of whooping-cough is generally declining, although a large number of cases were reported from Kansas, Massachusetts and Detroit. A number of cases of bubonic plague had been definitely reported from a number of centres on the Gulf, including Florida, Louisiana and Texas. In foreign countries it is important to observe that malaria has been made a notifiable disease in England as well as in Scotland, where large numbers of cases prevail because of the return of many infected soldiers. There has also been considerable smallpox in Scotland in recent weeks. Since June 8th all ports of Cuba, except Havana, have been closed against arrivals from Vera Cruz.

"Life insurance protects business and investments; it always matures; it never fails; it does not fluctuate; it creates an estate immediately; it does away with worry; it is necessary; it lengthens life; it solves all problems; it has saved many from ruin." These extracts, taken from an essay submitted to the Northwestern Life in a children's contest, may over-rate the value of life insurance, but they are at least true in many cases.

* * *

Canada, by reason of its relation to the United States as regards newsprint supply, has the power to force that country back, "so far as the printed word is concerned, almost to the dark ages," says a writer in the "Wall Street Journal." The United States also, through its control of the coal supply of the central provinces, could force them back to the age before artificial heat was discovered.

* * *

Dealers in foreign exchange report a large speculative demand in Canada. One firm, the A. Cordasco Steamship Agencies, of Montreal, reports that over 3,250,000 marks were traded in by their clients during the past few months. The rise in marks from .018 to .04 resulted in profits of over 100 per cent. French and Belgian francs, Italian lire and Roumanian leis are also in demand.

Australia and New Zealand

Every effort is being put forth to foster and increase trade between Canada and Australasia. The correspondents of this Bank include the principal banks of both Australia and New Zealand, and on the Pacific coast of both Canada and the United States it has branches in all the principal sea-ports. With many years' experience gained in transacting a foreign business, its services are at the disposal of Canadian exporters and importers.

PERSONAL NOTES

J. Fred O'Brien has been appointed manager for the Globe Indemnity Company in Manitoba and Saskatchewan.

E. Willans, managing director of the Imperial Guarantee and Accident Company has left for the Pacific coast on a month's business trip.

Sir H. Montagu Allan, and **D. C. Macarow**, president and general manager, respectively, of the Merchants Bank of Canada, have just returned from Great Britain.

F. L. Butler, general superintendent of the Winnipeg Electric Railway Company since May, 1918, has been appointed manager in charge of operations. W. E. Blodgett, of Salt Lake City, Utah, has been appointed comptroller and head of the accounting department; Mr. Blodgett is at present secretary treasurer and auditor of the Utah Light and Traction Company, Salt Lake City.

Mr. Jas. G. Ogilvy, managing director of the Kern Agencies, Limited, of Moose Jaw, Sask., has recently been appointed a director of the North West Adjustment and Inspection Company, Limited. Mr. Ogilvy is at the head of one of the most active agency and financial firms in the west. Kern Agencies, Ltd., are agents and managers for the British Empire Underwriters' Agency, the Fire Insurance Company of Canada, and the Merchants Fire Assurance Corporation of New York. They are also correspondents for Logan and Bryan, New York; Greenshields and Co., Montreal; and Osler and Hammond, Toronto, being connected by direct private wire with each of these firms. An extensive bond business is also conducted, Kern Agencies, Ltd., being a member of the Bond Dealers Association of Canada. The firm now issues a monthly bulletin entitled "The Kernal," which deals with insurance and other topics of current interest in connection with its business.

Arthur Pattison, who has been assistant to the comptroller of currency in charge of war loans, department of finance, Ottawa, has been admitted as a partner into the firm of A. J. Pattison, Jun., and Company, members of the Toronto and Montreal stock exchanges. Mr. Pattison has been connected with the department of finance for some years, and prior to that was with the Standard Bank of Canada.

Harry C. May has been appointed manager of the recently opened Toronto branch of Simon's, Day and Company, of Chicago. Mr. May went to Chicago in 1901, where he was employed on the Chicago Board of Trade, and later on the Milwaukee Chamber of Commerce by A. V. Booth and Company. He returned to Toronto in 1907, when he was connected with J. P. Bickell and Company for a number of years, and later with Tomenson, Forwood and Company.

Sir Lomer Gouin, former prime minister of the province of Quebec, has been elected a director of the Shawinigan Water and Power Company, his advent to the board of the power enterprise having been forecasted some weeks ago. Sir Lomer has for some years past taken a keen interest in the development of industries along the St. Maurice River, and was largely instrumental during his public career in improving conditions to facilitate the exploitation of its water powers. Several weeks ago he joined the board of the Laurentide Company, one of the pioneer concerns situated on the St. Maurice.

H. C. Samis, formerly inspector of the Union Bank of Canada resident at Regina, Sask., who has taken over the duties of his recent appointment as assistant manager of the main branch of the Union Bank of Canada in Vancouver, B.C., has been in the service of the institution for eighteen years. He entered at Winnipeg branch in 1902 and was transferred to Yorkton, Sask., in 1903. He was appointed accountant at Yorkton in 1906 and accountant at Virden, Man., in June, 1907, remaining there until March, 1909, following which he held the managership at the following branches: Maryfield, 1909, to December, 1910; Strasbourg, December, 1910, to March, 1913; Maple Creek, Sask., March, 1913, to January, 1915, and Swift Current, Sask., January, 1915, to February, 1919. Mr. Samis was appointed inspector with headquarters at Regina in February, 1919, and continued at this post until his latest appointment.

Arthur B. Buckworth has been appointed general manager of the Pacific Great Eastern Railway, succeeding George E. Macdonald. For the past two and one-half years he has been manager of the Spokane and British Columbia Railway. Born in Birmingham, England, Mr. Buckworth came to Canada with his parents at the age of twelve years and spent his early life in the city of Hamilton, leaving for the Kootenay district in British Columbia when 19 years of age. After spending two years in Rossland, B.C., Mr. Buckworth resided at Ymir, B.C., a small mining town, for the succeeding fifteen years. Going to Vancouver twelve years ago as representative for E. R. C. Clarkson Company, liquidaters, of Toronto, Mr. Buckworth has remained as their Vancouver representative since that time and during the last two years has officiated as manager of the Spokane and British Columbia Railway.

OBITUARIES

S. A. Gormeley, district agent of the Capital Life Insurance Company at Cornwall, Ont., was killed at Glen Nevis, Ont., when his automobile was struck by a freight train.

Chas. W. Sexton, vice-president of the Ryan Agency, Limited, of Winnipeg, President of Charles W. Sexton company, Minneapolis and Portland, Ore., director in the First and Security National banks, and Minneapolis Trust company, Minneapolis, and a national figure for 50 years in the insurance world, died in Minneapolis, Minn., on August 1.

Wheat Harvest Now Under Way in Canada

Crops in West Average Good—Those in Ontario, Quebec and Maritime Provinces are Fair, But Hay is Below Normal—Harvesting is Earlier Than Usual—Hail Does Some Damage, But Grasshopper Menace was Overcome

REPORTS of crop conditions as at the end of July, collected by the Dominion Bureau of Statistics, are summarized as follows:—

PRINCE EDWARD ISLAND: The hay crop below average. Has been practically all saved under very favorable conditions. Occasional showers have been very beneficial to cereals, roots and potatoes, which promise yield above the average. Pastures good. Small fruits a full crop. Large fruit about average. July weather favorable for all crops. NOVA SCOTIA: (Kentville): A rain during early and latter part of month improved crops greatly. Hay average crop. Cereals short but appearance of filling well. Potatoes good, corn making rapid development. Roots fair. Pastures fair. Fruit fair to good, probably below average in yield. (Amherst): July most part fine and dry. Seven showers reported, precipitation 2.63 inches. Hay making general by 19th. Grain, corn, sunflowers, potatoes and vegetables fair growth. Turnips, strawberries and raspberries poor. Currants fair. Apples medium and clean. Pasture fair. Cutworms bad. NEW BRUNSWICK: Fredericton: Frequent showers in July totalling slightly over two inches and favorable weather brought hay to average crop except in dry land. Weather favorable for hay and grain. Corn and roots growing well and promise average crop. Potatoes suffered from dry weather after planting, stand uneven. Prospects are for less than average crop.

Central Provinces

QUEBEC: (Cap Rouge): Old meadows only fair. New ones very good. All grain, potatoes, corn for silage and field roots good. Tree fruits good, small fruits very good. Vegetables good except cabbage, cucumbers and carrots, which are only medium. Ornamental plants good. (Ste. Anne de la Pocatière): First part of July was too dry to insure full success of crops. Beneficial rain of last two weeks improved all crops. Hay crop much below the average. Cereals short but fairly pormising. Potatoes are good. Small fruits abundant. Tree fruits fine; promise a good crop. (Lennoxville): The excessive amount of rain which has fallen on twenty days in July amounting to 7.64 inches has caused very rank growth of grain, which has lodged considerably. There is much hay yet to harvest. Swedes and potatoes average crop. Corn for silage very poor.

ONTARIO: From the Ontario Department of Agriculture: Hay crop light. Catchy harvest weather. Fall wheat harvest rushing. Fair yield rye. Good barley and oats, promise well. Straw long but soft. Spring wheat poorer. Corn looks late, but will improve. Early potatoes yielding well. Sugar beets and turnips look well. Mangolds poorer. Pastures good. Milk slow but good for season.

MANITOBA: From the Manitoba Department of Agriculture: Reports generally are satisfactory. Good rains fell practically everywhere about July 20. Condition of all crops fair to good. No rust damage so far. Grasshoppers being held in check. Harvest will be earlier than usual. Fall rye being cut July 31. Wheat cutting likely to commence by August 10.

SASKATCHEWAN: From the Saskatchewan Department of Agriculture: Heavy rains during week ending July 21 greatly improved crop conditions, especially late crops. With more rain and cool weather expect an average yield, although rain came too late to save crops in some districts. (Indian Head): Dry hot weather during first three weeks very hard on crops. Exceptionally heavy rain on 22nd and 23rd improved conditions. Crops generally about average. Grain filling well. (Rosthern): No rain in July till 22nd This drought has ruined 25 per cent. of crops. Two and one-quarter inches of rain on 22nd and 23rd have brought on late seeding. Estimate 60 per cent. crop in this district. No damage from hail or rust. Cutting likely to begin by middle of August. (Scott): Crop suffered from warm, dry weather during early July. Rainfall of over three inches on 22nd has improved situation. Prospects are now for fair to good crops.

ALBERTA: (Lacombe): During July one and one-half inch of rain fell. Grain on the whole good. In central Alberta some late crops suffered slightly from drought. Straw is short in some localities but head filling well. Damage from hail is not extensive. Hay short in this locality but good further north. (Lethbridge): Rain has been fairly general in southern Alberta during July, consequently districts not suffering from drought during June are in good condition. In Winnifred and Medicine Hat districts and south to border, crops light. Over balance of southern portion of province crops are spotted but generally fair and some excellent.

BRITISH COLUMBIA: From the British Columbia Department of Agriculture: Grains during middle of July greatly helped all field crops. Weather generally settled now. Crops in general look promising. Oat and wheat heading out well. Hay now being cut and yield better than at first anticipated. Alfalfa, potatoes, barley, mangolds, carrots and sugar beets good. Raspberries good. Other fruit prospects good. (Invermere): Hay and clover crop about average yielding 2¾ tons per acre. All grains good, turnips favorable. Hot weather during month bringing wind and thunder laid some barley flat, but wheat and oats stood up well. (Summerland): Apple crops fair. No change from last report. Peaches good, pears full crop, apricots patchy but good. Hay crops below average. (Agassiz): July very dry and hot. Weeds controlled more easily than in June. Most crops doing well. Some early barley harvested. Average crop hay saved in excellent condition. Floods of Fraser River did damage. Mosquitoes and flies troublesome to live stock on pastures. (Sidney, V.I.): Weather conditions were favorable. Good crop of hay harvested. Oats and wheat ripening. Corn and roots developing well. Orchard fruit and small fruit conditions satisfactory.

The Lethbridge Herald's fifteenth weekly crop report issued on August 3rd estimates the total amount of wheat which will be threshed on the Lethbridge railway division at 22,000,000 bushels. Coarse grains will add another 10,000,000 bushels, making a total of 32,000,000 bushels as against shipments of 39,000,000 bushels in 1915 and 32,000,000 bushels in 1916. Cutting of wheat had started at Burdett and other points in eastern south Alberta, and it was expected that wheat cutting would be general by the middle of the month, or about a week earlier than usual.

National Railways Report

A Canadian National Railway crop report issued on August 4 covering the entire country from Rainy River to the west boundary of Alberta shows that rains during the last week of July broke a protracted hot spell that was seriously affecting both early and late crops in almost every part of that extensive territory. The rye harvest began towards the end of July in the three prairie provinces, and a few farmers were already cutting their wheat. Wheat sown on summer fallowed land was maturing rapidly. Late sown crops give promise of fair yields. There are poor crops in a few localities, but average and bumper ones in most districts. Hail is the cause of most damage so far created. The alarm created over the hopper menace early in the summer does not now seem to have been justified.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning. Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

393 Branches in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents
London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager.
Bankers in Great Britain: The London Joint City & Midland Bank, Limited. The Royal Bank of Scotland

BANK BRANCH NOTES

Seven New Branches Announced this Week—Three Others are Under Way—Bank of Commerce Appoints Assistant General Supervisor

The following is a list of branches of Canadian banks which have been opened recently:—

Quebec, Que., St. Sauveur Branch	Bank of Montreal
Lenore, Man.	Bank of Hamilton
Montreal, Que., Peel and Sherbrooke Sts.	Royal Bank of Canada
Aurora, Ont.	Sterling Bank of Canada
Hull, Que.	Canadian Bank of Commerce
Kensington, P.E.I.	Canadian Bank of Commerce
Kapuskasing, Ont.	Imperial Bank of Canada

The Canadian Bank of Commerce is to open up a branch at Campbell River, B.C.

The Union Bank of Canada is to open the new building at the corner of Hastings and Seymour Sts., Vancouver, B.C., during the next few weeks.

The Bank of Nova Scotia is erecting a new building at Annapolis, N.S.

Fifty Branches in June

Fifty branches of Canadian banks were opened in June, distributed among the various banks as follows:—Montreal, 1; Nova Scotia, 15; Royal, 8; Imperial, 1; Sterling, 2; Merchants, 4; Hamilton, 1; Hochelaga, 6; Commerce, 3; Provinciale, 4; Nationale, 2; Union, 3.

The following is a list of branches of Canadian banks which were opened in June and have not already been mentioned in *The Monetary Times*: Albany, P.E.I., Nova Scotia; Athalmer, B.C., Imperial; Breadalbane, P.E.I., Royal; Brown's Rown, Jamaica, Nova Scotia; Calumet, Que., Nova Scotia; Campo Bello, N.B., Nova Scotia; Clarke's Beach, Nfld., Nova Scotia; Deer Island, N.B., Nova Scotia; Grand Harbor, N.S., Nova Scotia; Kagawong, Ont., Merchants; Lake Megantic, Que., Provinciale; Linstead, Jamaica, Nova Scotia; London, Ont., Merchants; Margaree Harbor, N.S., Royal; Middleville, Ont., Nova Scotia; Naicam, Sask., Commerce; Notre Dame de Rimouski, Que., Nationale; Oshawa, Ont., Union; Paquetville, N.B., Provinciale; Pointe-a-Pic Que., Nationale; Port Morien, N.S., Nova Scotia; Rife, Alta., Hochelaga; St. Amour, Ont., Hochelaga; St. Catharines, Ont., Royal; St. Cecile du Bic, Que., Hochelaga; St. Eusebe de Temiscouata, Que., Provinciale; St. Fabien, Que., Hochelaga; St. Ignace du Lac, Que., Hochelaga; Sacre Coeur, Que., Hochelaga; Tiverton, N.S., Nova Scotia; Toronto, Ont., Union; Unionville, Ont., Marchants; Westport, N.S., Nova Scotia; Wilno, Ont., Sterling; Winnipeg, Man., Nova Scotia.

The following five branches were closed in June: Bestville,) Sask., Union; Kyleville, Sask., Union; Mull, Ont., Standard; Port Greville, N.S., Commerce; Spalding Sask., Commerce.

Banking by Mail

Knowing the difficulty of banking in communities, where communications are poor and the matter of reaching a bank one of time and some inconvenience, A. H. Logan, manager of the Union Bank of Canada at Prince Albert, Sask., who is an advocate of the practice of banking by mail, has instructed the local staff, so that the entire facilities of the bank are available for out of town residents who find it inconvenient to make personal business. A general banking business by mail and savings account carried on by mail are part of this system.

The following is a list of some branches of Canadian banks which are now under construction: Listowel, Ont., Bank of Hamilton, costing $10,000. Walkerville, Ont., Bank of Hamilton. Guelph, Ont., Bank of Hamilton, costing $10,000. Taber, Alta., Royal Bank of Canada. Vulcan, Alta., Canadian Bank of Commerce. Penticton, B.C., Bank of Hamilton, costing $25,000. Bedford, Que., Molsons Bank St. John's, Nfld., Royal Bank of Canada, costing $230,000 Montreal West, Que., Royal Bank of Canada.

Tenders are being called for the erection of a new branch of the Merchants Bank of Canada at Regina, Sask., at the cost of $150,000.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended August 12th, compared with the corresponding week last year:—

	Week ended Aug. 12, '20.	Week ended Aug. 14, '19.		Changes.
Montreal	$139,417,500	$115,864,215	+	$23,553,285
Toronto	102,256,813	79,218,814	+	23,037,999
Winnipeg	41,163,138	39,715,315	+	1,447,823
Vancouver	18,290,502	12,483,287	+	5,807,215
Ottawa	7,788,325	10,217,931	—	2,429,606
Calgary	6,558,078	5,935,901	+	622,177
Hamilton	7,571,971	5,171,825	+	2,400,146
Quebec	7,009,590	5,633,402	+	1,376,188
Edmonton	4,470,920	4,050,836	+	420,084
Halifax	5,109,044	5,582,330	—	473,286
London	3,624,342	3,076,911	+	547,431
Regina	4,510,223	3,799,028	+	711,195
St. John	3,480,257	2,687,541	+	792,716
Victoria	2,494,144	2,804,153	—	310,009
Saskatoon	2,142,727	2,093,427	+	49,300

Succession Duties in Ontario

The rates of Succession Duty having been increased at the recent session of the Ontario Legislature, we have prepared a Booklet entitled "Succession Duties in Ontario." This Booklet contains schedules of the new rates, together with a summary of the main provisions of the Act. To readers of *The Monetary Times* we shall be pleased to send a copy free on request.

LIFE INSURANCE ON THE FARM

Protection For His Business Undertaking as Well as For His Family Now Necessary—Merits of Different Classes of Policies

WITH his growing financial prosperity, and the increasing complexity of farm work, the Canadian farmer is becoming a better prospect for the sale of life insurance. Discussing the possibilities in this field the August *Continental Life Line* says:—

"Obviously farmers are among the most important prospects of life insurance agents. Farmers are divided into four general classes: farm owners, farm renters, agriculturalists, and stock raisers—all of whom are popularly believed to have been making money fast during recent years. It follows, therefore, as a matter of course, that they all are more or less in need of insurance protection. The farm owners, most of whom carry mortgages, need more insurance to protect their mortgages from becoming a tax on the families' protection; for the renters life insurance is doubly necessary, for when one of these is called away his family, having no estate left them, are without the means of paying the rent, except through life insurance. Farmers often tell us that they have secured their barns with fire insurance, and stock breeders especially insure their cattle for large amounts, while some take out hail insurance to protect their grain crops. If they believe it necessary to insure their barns and stocks, and corn, is it not vastly more important to secure life insurance protection for their wives and children?

Is Head of a Business

"The farmer then can be appealed to largely upon the same argument as the business man in the city—love of wife and children. But, as our readers are well aware, the average farmer of to-day is a business man, who labors less with his hands and more with his head than ever. He not only reads his daily paper, but studies the best magazines, especially those published in his special interests. It follows, therefore, that the intelligent farmer—and probably his wife, too—will read life insurance literature, and is as amenable to the gentle influence of the insurance salesman, as any other prospect who insures his life from the same good motives which actuate nearly all policyholders. If the average insurance solicitor cultivated his field in the country as thoroughly as the average farmer cultivates his broad acres, the percentage of business written by agents would be vastly increased. The question with the farmer generally is, What policy in insurance plan appeals to him most?

Selection of Policy

"As we have already intimated, the up-to-date farmer operates upon a larger scale by business methods than formerly; he has more capital invested in his business, and therefore needs business insurance as much as the manufacturer or merchant. Further, the machinery employed in agriculture has become more extensive, and creates a deferred liability to provide for replacement and depreciation; to cover this a short-term endowment policy may be explained to the farmer. Owing to his several needs for sinking funds this plan of insurance should appeal to him, as it provides the means of replacing farm machinery, purchasing more land, or meeting various deferred obligations. For the purpose of retiring a mortgage a ten-year endowment, when properly presented, will appeal to many farmers; besides being an additional security when placing the mortgage, this plan has the effect of paying off the mortgage in ten annual payments, coupled with the guarantee that, should the insured die within the period, the encumbrance will be lifted. Many farmers borrow from the banks, to assist them in harvesting their fall crops, giving their notes on the general security of their property. In every case the farmer thus assumes an extra liability, to meet which provision must be made. To protect his interests, therefore, the banker generally encourages his farmer customer to take out business insurance, and in the country the banker often extends active assistance to the agent in placing such business. The agent, of course, should make clear to the farmer the practical utility of this form of insurance, to serve his particular purposes, and explain fully the difference between that form of protection and domestic insurance.

Monthly Income Policy

"For serving the family welfare it is questionable whether we should continue selling a small amount of insurance payable in a lump sum to him or his beneficiary; should we not rather present the monthly income service to him,—so that in event of death he can make sure of the pension for his widow, and daughters if any? Fine, valuable farms are often left to widows unable to manage them. The sons, if any, are attracted to the city, and the widow, depending upon hired help, and sustaining an occasional crop failure, with steady inroads of heavy taxation, finds her income much reduced. Then she sells the property, determining to re-invest the proceeds; at this point the unscrupulous money shark appears with his so-called investments. The new investment is too frequently made, and in a couple of years the widow is dependent upon her daily earnings for her support. Often, too, the farmer leaves the farm to his sons, and his daughters, if any, are inadequately provided for. All this shows the necessity of a monthly income policy as the only safe provision for the families of farmers."

TRAFFIC THROUGH CANALS IN JUNE

The transportation division of the Dominion Bureau of Statistics publishes the following on the traffic which passed through the Canadian canals during June:—

The total number of vessels through all canals was 4,251, with a net tonnage of 1,768,575 tons, a decrease from June, 1919, of 384,785 tons. Cargoes totalled 1,234,691 tons, a decrease of 295,626 tons. The main items of cargoes, compared with June, 1919, are: Bituminous coal, 395,261 tons, decrease 106,244 tons; wheat, 182,998 tons, decrease 60,318 tons; iron ore, 140,608 tons, decrease 76,015 tons; pulpwood, 110,554 tons, increase 44,109 tons; anthracite coal, 64,248 tons; increase 4,076 tons; sand, 80,391 tons, increase 12,379 tons.

Since the opening of navigation the cargoes through the canals are: Bituminous coal, 711,711 tons, decrease 131,250 tons; anthracite coal, 104,680 tons, decrease 34,381 tons; iron ore, 384,275 tons, decrease 1,090,864 tons; pulpwood, 135,793 tons, increase 47,637 tons; wheat, 436,189 tons, decrease 325,256 tons; oats, 84,137 tons, increase 39,175 tons; flour, 64,600 tons, decrease 51,715 tons.

The totals of the principal canals for June, compared with June, 1919, are:—

Sault Ste. Marie Canal—494 vessels, net tonnage 710,424 tons, decrease of 234,081 tons. Total cargoes of 297,185 tons, decrease of 225,369 tons, including decrease of 76,010 tons in iron ore, 73,835 tons in wheat, 35,260 tons in barley, 31,177 tons in bituminous coal and 12,975 tons in flour.

Through the United States Canal there were 2,143 vessels, net tonnage 7,486,339 tons, with cargoes of 10,350,625 tons, a total tonnage of 10,647,819 through both Canadian and American canals.

Welland Canal—482 vessels, net tonnage 375,964, decrease of 74,766 tons; cargoes, 340,711 tons, decrease 40,833 tons, including decreases of 22,729 tons of barley, 16,931 tons of bituminous coal, 13,064 tons of crude petroleum and oils.

St. Lawrence Canal—1,142 vessels, net tonnage 513,359, decrease 86,552 tons; cargoes, 443,975 tons, decrease of 62,117 tons, including decrease of 59,868 tons in bituminous coal, 25,205 tons in barley, 14,829 tons in crude petroleum and other oils, and an increase of 20,899 tons in pulpwood.

Trent Canal—930 vessels, net tonnage 30,309, increase 4,366 tons; cargoes, 11,514, increase 4,672 tons.

Ottawa Canal—245 vessels, net tonnage 41,604, decrease 9,428 tons; cargoes, 37,090 tons, increase 481 tons.

PUBLIC UTILITIES IN CANADA*

Private Ownership and Operation With Public Regulation is Most Promising Solution of Difficulty—High Operating Costs Cannot be Avoided Either Way—Winnipeg is Conspicuous Example of Municipal Success

By L. A. Herdt, D.Sc.,
Vice-Chairman, Montreal Tramways Commission

PUBLIC utilities stand face to face to-day with the greatest crisis in their history. In very few cases profits under the new scale of wages and with the old rates for service may still be sufficient, but a large increase in the cost of labor and the cost of material and supplies has placed upon the public utilities in Canada and in the United States a burden which it cannot properly be asked to bear.

In the larger number of cases it is unable to bear it. Public utility service is a necessity in small and large cities. We could no more do without light, power, transportation than we could do without bread. A public utility, as its name implies, is designed to render the amount of service which the public needs in the commodity or necessity which it supplies.

Extensions are Discouraged

The public utilities of Canada and the United States and particularly the street railway companies are clamoring for financial relief through increased rates and fares. The business does not pay. The great industry of transportation is staggering under the burden of increased cost of labor and material. Capital cannot be drawn to it, and capital is required to finance betterments and extensions. The whole structure of the franchise relationship between the public utilities and the various communities has broken under the strain of increases in cost of labor, material and supplies.

A public utility, within a given urban community is naturally a monopoly and its operation should be such as to secure to the people the best public utility service that is practicable, but the full cost of this service must in the long run be borne by the public.

If this service is given by a private company, this cost must be made up through the rates. If the service is secured by municipal operation, the cost must be made up through the rates, special assessments, or through subsidies from taxation.

Costs Cannot be Avoided

Whether the public shall decide to operate the public utilities themselves through the municipal authorities, whether it assumes control over these, or allows them to remain in the hands of private investors, the price at which their products are sold must be sufficient to operate the plants and give a sufficient return on the money invested in the enterprise, that is, the rates or fares must cover (1) operating costs and maintenance, (2) interest on money invested—whether this money is that of private investors or that of the municipality.

The question of the wisdom or policy of private or municipal ownership and management must be solved in each instance with reference to the problem as to under which policy will the public receive the greatest economic benefit, that is, which policy will bring to the public the best return for the moneys it will pay out for the service.

Successes in Public Ownership

Can municipal or governmental bodies meet the test of operating large public utility enterprises as successfully as it can be done through private initiative? It has done so in certain instances to my knowledge. The most prominent example of a public utility successful under municipal ownership is that of the Winnipeg light and power department controlling and operating a vast hydro-electric enterprise supplying light, heat and power to the citizens of Winnipeg at very cheap rates—but the success of this enterprise has been mainly due to the fact of the city having developed at low cost a water power of large potentiality. The whole enterprise was placed under the management of a trained business man and expert engineer without interference by the municipal authorities.

No General Conclusion

I am firmly of the opinion that at the present time, each separate case of public utility operation in a city has aspects peculiar to itself and it is impossible to solve all questions by some simple rule or formula. The public requires and desires to be protected against unreasonable rates—it also desires to see speculative profits eliminated from the financing of public utilities—that is all.

If the public was convinced that the government, whatever it may be, is fitted to undertake and carry out the management of all municipal affairs including public utilities, it will probably ask that this be done; but the large and important problem involved in the economic development and operation of light and power plants, urban, suburban and interurban railways require men of ability trained and fitted to handle such problems and whose tenure of service and standing is free from political influence.

Rates Under Municipal Ownership

Municipal ownership is urged by many as a panacea against the large increase of rates and fares which the public utilities have had to charge for their services. The public is under the impression that street railway enterprise particularly is operated solely for the benefit of the investors, that it is an usurper of the streets and that the business is conducted solely in the hope of securing profit and awarding loss to its owners. Let me say that there is not one street railway property in Canada to-day that is operating at a profit, and that the speculative element, both in Canada and the United States, is a thing of the past.

The whole complex financial structure of the public utilities, in Canada, is on the verge of collapse. I am firmly of the opinion that the best service which can be given to a community is by private ownership, with private management under regulation and control, with such regulation and control as will assure to the public fair and reasonable treatment in all matters of service, rates and safety. Regulation that will encourage and reward those supplying the energy, enterprise and capital without the highest development of public utilities is impossible.

MUTUAL LIFE AND CITIZENS ASSURANCE

Good results for the year 1919 were reported at the annual meeting of the Mutual Life and Citizens Assurance Co., held in Sydney, Australia, May 27. The chairman said in moving the adoption of the annual report: "This company and every one connected with it have reason to be well satisfied with the results disclosed in the report presented on this occasion. We have secured over £2,500,000 in sums assured (an increase of almost half a million over the previous year) in the ordinary branch; in the industrial branch we have added considerably to the sums assured and premium income; and while paying nearly one million to our policyholders in claims we have added just on £380,000 to our funds, which at the close of last year exceeded £11,000,000."

Some of the figures from the report are given elsewhere in this issue. The company's business in Canada was increased during the year, and there was a net amount of over $3,000,000 in force at the end of December. The Mutual Life and Citizens commenced business in this country under Dominion license in 1913, the chief agent for Canada being J. P. Moore, of Montreal. The net premium income in Canada in the ordinary branch was $49,929 compared with $27,620 for 1918, and in the industrial branch it was [illegible] compared with $56,740 for the preceding year.

July Bond Sales Total $19,380,733

Provincial Issues Total $15,800,000 Compared with $5,000,000 in June — Municipal Issues are Slightly Less — Only One Corporation Issue — Last Year's Figure was $21,942,108

SALES of Canadian bonds in the month of July totalled $19,380,733, compared with $13,758,711 in June, according to *The Monetary Times'* record. The following is a summary:—

Provincial	$15,800,000
Municipal	3,080,733
Corporation	500,000
Total	$19,380,733

The outstanding feature of the month is the large volume of provincial financing, Ontario, Quebec and British Columbia each placing large issues on the market. In June the provincial issues totalled only $5,000,000. Municipal issues are slightly less than in June, however, when they amounted to $3,758,711. There were no railroad issues, and only one corporation issue. Details are given below.

British Columbia's sales during the month totalled $2,800,000. One lot of $1,500,000 was sold to a local syndicate, composed of the British Columbia Bond Company, the Royal Financial Corporation, and Gillespie, Hart and Todd, all of Victoria. The price was 99.88 and interest. The second lot of $1,300,000 was sold to the same syndicate at par and interest. Both issues were of 5-year 6 per cent bonds, dated June 30th. These issues, together with that of $2,000,000 sold in June, were made to meet obligations on account of the Pacific Great Eastern Railway.

RETAILERS CONDEMN COMMERCE BOARD

The fifteenth annual convention of the Retail Merchants' Association of Canada was opened in Vancouver on July 22. In his presidential address, J. A. Banfield of Winnipeg suggested raising from $50,000 to $100,000 for an organization and legislation fund to fight any legislation the association considers unfair. The convention lasted until July 25.

At the concluding meeting Mr. Banfield contended that the activities of the Board of Commerce should be more constructive, rather than destructive. No action was taken on a resolution brought forward by the British Columbia branch that the Board be dismissed. Winnipeg was selected as the next convention city. Owing to a large number of complaints of the increase in smuggling, it was decided to request government officials to make a more rigid examination at the border ports.

JULY FIRE RECORD IS AGAIN SATISFACTORY

Loss About Same as in June, Which Was Lowest Month This Year—Seven Months Total Slightly Below 1919

FIRE losses in Canada totalled $1,426,850 in July, according to *The Monetary Times'* record. This is the lowest for the year, with the exception of June, when the figure was $1,424,319. It exceeds the July losses in 1917 and 1919, but is less than half the exceptional figure of $3,369,684 in July, 1918, when several large fires, including the business section of the town of Graham, Ont., and the Toronto warehouse of Sanderson, Pearcy and Co. took place. The fire loss for the first seven months of 1920 is $14,409,113, compared with $14,482,326 for the same period in 1919. The July loss is made up as follows:—

Fire exceeding $10,000	$ 885,000
Small fires reported	41,850
Estimate of unreported fires	500,000
	$1,426,850

The Monetary Times' record of the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February . .	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200
April	1,317,714	3,240,187	1,080,070	3,229,500
May	1,163,110	3,570,014	1,785,130	2,001,819
June	1,184,627	3,080,982	3,337,530	1,424,319
July	1,101,734	3,369,684	1,118,377	1,426,850
August	1,230,183	3,110,445	1,374,495	....
September . .	1,301,700	917,286	1,940,272	....
October	704,605	5,119,145	1,023,288	....
November . . .	959,049	1,059,580	2,339,870	....
December . . .	5,144,100	1,733,917	2,047,496	....
Totals . .	$20,086,085	$31,815,844	$23,207,647	$14,409,113

List of Large Fires

The following is a list of fires in which the loss was $10,000 or over:—

Niagara Falls, Ont., July 7, boarding-house, $35,000.

Calgary, Alta., July 5, Western Printing and Lithographing Co., $100,000.

St. Stephen, N.B., July 10, Mann Axe Factory, $100,000.

Toronto, Ont., July 11, L. G. Randle's Garage, $25,000.

Waterloo, Ont., July 11, Bauer's shoddy mill, $20,000.

Winnipeg, Man., July 10, Crescent Furniture Co., $50,000.

Coaldale, Alta., July 14, J. B. Shimek's warehouse, $30,000.

Maisonneuve, Que., July 21, J. P. Abel, Fortin & Co., Ltd., $25,000.

Vancouver, B.C., July 9, Continental Motor Co., $25,000.

St. John, N.B., July 20, R. D. Patterson's Chemical fertilizer plant, $100,000.

Cobalt, Ont., July 24, Moose Lake Lumber Co., $10,000.

Ladner, B.C., July 25, Currie-Williams Cannery, $100,000.

Medicine Hat, Alta., July 23, Saskatchewan Bridge and Iron Co., $75,000.

Niagara Falls, Ont., Incline Building, $30,000.

North Sydney, N.S., July 25, Warehouse, $60,000.

St. Thomas, Ont., July 29, two-storey building, $100,000.

While there were 16 fires with a loss of $10,000 and over, as against 8 in June, $100,000 was the largest estimated loss for July, whereas in June there were losses of about $200,000 each at Sault Ste. Marie and Ayr, Ontario.

Analysis of Causes

Among the causes reported were: Sparks, 1; oil lamps, 2; electrical storms, 9; spontaneous combustion, 1; defective heater, 1; bush fires, 2; gasoline, 1; incendiarism, 1; matches, 1; dry weather, 1.

The following structures were destroyed or damaged last month:—Residences, 13; office buildings, 8; factories, 7; barns, 8; sawmills, 6; stores, 5; garages, 5; churches, 2; farm buildings, 1; stations, 1.

Deaths From Fire

Sixteen deaths during the month were directly due to fires, the following being the circumstances:—

Kingston, Ont., July 14, struck by lightning	1
Winnipeg, Man., July 30, suffocation	2
Fleming, Sask., July 2, explosion	2
Welland, Ont., July 26, playing with matches	1
Edmonton, Alta., July 2, mother and four children burnt to death	5
Brandon, Man., July 5, explosion	2
Belleville, Ont., July 18, burnt in a burning house......	1
Mitchell, Ont., July 9, explosion	1
Hamilton, Ont., July 11, touched a high voltage wire....	1
Total	16

Comparison of Deaths

Fatalities this year will probably equal or exceed last year's figure, as indicated by the following comparative table covering the past 8 years:—

Month.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920
January	14	26	3	10	21	28	13	22
February	21	18	11	23	19	87	26	30

Totals	236	175	142	531	207	241	206	138

EMPLOYMENT CONDITIONS IN CANADA

Reports from over 5,100 employers to the Dominio Headquarters of the Employment Service of Canada, Depar ment of Labour, indicate that, disregarding loss of tim due to strikes, there was another increase in the volume employment during the week of June 26, as compared wit returns from the same firms for the preceding week. substantial increase had been anticipated, but the retur show that the actual increase exceeded that anticipate For the following week these firms estimated that they wou have a net decrease in staffs of 1,140 persons or two p cent., the anticipated decline being attributable chiefly estimated curtailment of operations in the iron and ste group because of a shortage of fuel. In comparison wit their returns for January 17, these firms reported that the had made very considerable additions to the number persons on their payrolls.

Prince Edward Island, Ontario, Manitoba, Saskatchew and Alberta reported increases as compared with the retur for the preceding week, while in all other provinces decreas were reported, that in Quebec being the most substanti For the succeeding week increases were anticipated Quebec, Manitoba, Saskatchewan and Alberta, while of t decreases expected in the remaining provinces that in O tario was the most noteworthy. In comparison with the returns for January, 17 firms in all the provinces report considerable increases to their staffs.

Equal Banking Service For Every Part of Canada

CANADA has many and diversified business interests. Each province and each community has its own local business problems, which are importantly related to the welfare of the Dominion. Many minds are working on these problems each contributing its talent to a wise solution.

OUR special talents—banking knowledge and banking service—are being devoted whole-heartedly to Canada's business development, general and local.

IN every important business community of the Dominion we have a Branch Office.

EVERY BRANCH knows the local man's problems, be he merchant, farmer, manufacturer or worker in any line of industry—great or small—and the officers in charge can be relied upon to co-operate in every proper way with those who ask for advice and banking service.

ALL of our service, all of our knowledge, all of our experience attained in over a century of banking, are dedicated to the interests of all of Canada.

Openings and Methods for Business Insurance

Valuable to any Kind of Concern, but for Different Purposes- May be used as Substitute for Sinking Fund to meet Bonds—Intimate Knowledge of Corporation Finance and Forms of Business Organisation is Useful to Successful Agent

EVERY year an increasing volume of business insurance is written in Canada. It is recognized that personnel as well as property is an asset which should be protected in the interests of the firm. Almost any kind of business can find some form of insurance suitable to it. Recent issues of the *Great-West Life Bulletin* showed how business insurance can be applied to various kinds of organization. "The form of the organization," it is pointed out, "determines, among other things, the degree of risk assumed by the persons interested in it. Of course, this has a direct bearing on business insurance as indicating specific need for protection. A member of a partnership, for example, may lose all the money he has invested in it, and everything he possesses besides, whereas in the case of a shareholder in a corporation his liability to loss will be limited to the amount of his subscription, except in the case of a banking business.

"The most common forms of business enterprises are sole propiretorships, partnerships and corporations. Each of these has some variations which affect, more or less, the liabilities involved. For instance, the joint stock company is a partnership with transferable shares. The limited partnership is one in which some of the members have a limited liability. The so-called 'close corporation' is one, the stock of which is held in few hands. Sometimes it is virtually a proprietorship or partnership in corporate form.

The Proprietorship

"The proprietorship is a business owned by one person, who is generally the sole manager. He may be operating on borrowed capital to an extent which transfers the financial control to other hands. Needless to say, under such circumstances, insurance should be carried for the protection of the backer primarily, but also in order to conserve the business for the owner's heirs.

"The one-man business is the most numerous form, and includes many concerns in which large capital is employed. The great majority of proprietors become first-class prospects for business insurance when its potential services are explained to them.

"The liability of the sole owner is absolutely unlimited. His private property may be attached by his creditors, and, under certain conditions, which the agent should ascertain by reference to the bankruptcy law, he may be compelled to realize the cash value of his life insurance for the payment of debts.

"The disadvantage involved in the combination of business and private liability is offset by the consequent combination of business and private credit. The indivdual proprietor can borrow more extensively, and, consequently, operate more extensively than he could if his liability were limited. This credit may be considerably enhanced by safeguarding it with business insurance against the consequences of death or permanent disability, which would be especially disastrous to an enterprise under one-man management.

The Partnership

"The partnership is similar in nature to the proprietorship, being a combination of two, or more, owners. In law the members of a firm are regarded as one person, so far as their acts are concerned. For example, all are liable to the fullest extent for a debt contracted by one within the scope of the business. Death, insanity, bankruptcy or the withdrawal of a member automatically dissolves a partnership. Firms are usually perpetuated by a new organization immediately following such an occurrence. Business insurance is the most certain and effective agency for assuring the continuance of a business under these conditions, just as it is the surest means of securing survival of a proprietorship after the owner's death.

"The unlimited liability of partners has a favorable effect on their credit, but this is more than offset by the danger of sudden dissolution and by the unrestricted power of one member to commit his associates, even without their knowledge. Insurance will generally act as a counterbalance of these disadvantages, and enhance the bank and trade credit of a firm.

The Corporation

"The corporation is an organization doing business under a charter granted by the government. Its ownership is represented by transferable shares and its management is under the control of a board of directors.

"Heavily capitalized and extensively operating enterprises are usually conducted under the corporate form. Great monetary interests are involved and exceptionally valuable men are employed in positions of responsibility. Hence, large policies of business insurance are generally issued for the benefit of corporations. Nevertheless, their need of insurance protection is relatively less than that of a partnership or of a one-man business.

Close Corporations

"The close corporation is peculiar only in the fact that its stock is held in a few hands. There are usually substantial reasons for this condition. Business insurance is especially serviceable to a close corporation as a means of perpetuating the restricted control. Reinforced by a subsidiary agreement, it will provide funds for enabling the survivors to absorb the stock holding of a deceased associate and so prevent its passing to alien, and, perhaps, objectionable hands.

"It may be said, in passing, that the agent should b able to draw up, in correct form, the subsidiary agreement which are frequently necessary to insure the full effectiveness of business insurance. It is inadvisable to have the lega adviser of the corporation or firm brought into the transaction. He is likely to create all manner of complications To forestall any questions on the part of the prospect a to the soundness of the agreement, and invariably when th least doubt exists in his own mind, the agent had better hav the agreement drawn or approved by a lawyer of repute.

"Consolidations and reorganizations frequently preser logical occasions for business insurance proposals. An amalgamation or a merger of two or more business enterprise almost invariably involves deferred liabilities, for the discharge of which provision may be made through busines insurance. Reorganization usually entails change of management and increased responsibilities. Frequently it i accompanied by enlarged capital, with correspondingly increased liability. A common feature of the transaction i extension of operation, which necessarily creates new hazards

"In case of consolidation or reorganization, it is probabl that the reconstructed enterprise will have a new head an perhaps other new officers, whose lives the concerns may b disposed to cover with business insurance.

"The bankruptcy law should be studied in so far as may affect a canvass of business insurance. In particula ascertain the precise status of business and domestic insurance carried by insolvent debtors.

"We will now take into consideration other importan matters which should be within the knowledge of an agen aspiring to write business insurance in connection with larg concerns.

"Good will is the patronage enjoyed by a business. I is derived from many different sources. Good-will is rarel a definite calculable asset. It is sometimes inserted in book

The Norske Lloyd Insurance Company

Some Notes Regarding its History, and Interesting Information Gleaned from the Annual Report of the Company for the Year 1919

HISTORY.

The Norske Lloyd Insurance Company is a Scandinavian institution which has built up a vast business in the foreign field. It was established in 1905 and entered the United Kingdom in 1911. The head office is in Christiania, Norway, the general manager being Alf. L. Whist. The capital is 10,000,000 kroner, of which 9,850,000 kroner is paid up (the kroner has a par value of $.268). The original paid-up capital was $55,555, which was increased in 1910 to $166,665, in 1914 to $205,450, in 1915 to $794,500 and in 1917 to $2,500,105. The stock issued in 1917 was sold at a premium of 35 [illegible] above par, the surplus thus realized being added to the special reserve fund of the company. The present capital affords ample security to the insured, which is further strengthened by the obligations of the stockholders for the amount of capital unpaid. The company writes fire, marine, accident, plate glass, burglary and all classes of reinsurance. It has a reputation for prompt settlement of losses. All assets are liable for payment of losses wherever incurred.

The Norske Lloyd operates particularly in Scandinavia and England, but has an organization extending over the world. License to write marine and fire business was obtained from the New York State Insurance Department in January, 1916. The management in the United States is in the hands of the International Fire and Marine Agency Corporation, New York, the United States trustee being the Guaranty Trust Corporation. Sterling Offices, Ltd., the managers of the company for the United Kingdom, have a branch in the Bank of Hamilton Building, Toronto, the special representative for Canada being H. Marshall Robertson.

ANNUAL STATEMENT

Rapid growth is illustrated in the statement shown herewith. Net premium income has increased from $12,240 in 1906 to $4,217,920 in 1919 (converting the pound sterling at $5 to the pound). During the same period of fourteen years the reserve for unexpired risks, including reserves for losses, has risen from $15,380 to $3,621,075, and the general reserve fund from $2,775 to $1,931,505. The growth of investments is shown by the increase in interest and dividends from $2,000 to $287,635. The subscribed capital has increased from $273,970 to $2,779,725, and the paid-up capital from $55,555 to $2,721,885. Payment of dividends commenced at the rate of 5 per cent. in 1908, and during 1918 and 1919 were paid at the rate of 12½ per cent.

A summary of revenue accounts for the year 1919 shows that net marine premium income was $1,[illegible], net fire premium income was $1,221,285, and net accident premium income $1,328,995. This makes a total net premium income of $4,217,919, to which was added $287,[illegible] of interest on investments, making a total net income of $4,[illegible]. The claims totalled $1,181,762, made up of marine $[illegible], fire $355,213 and accident $271,795. Commissions and management expenses totalled $1,591,331, made up of marine, $[illegible]763; fire, $382,126; accident, $465,930; taxes, [illegible] duty, rent, etc., $514,100; and depreciation of investments, loss on exchange, etc., $267,115. The balance between the income and the outgo as above was therefore [illegible], to which was added the insurance fund of $[illegible] brought forward from 1918, making a total [illegible] of $3,621,0[illegible] [illegible] 1920 to [illegible] and [illegible].

The premiums in the company's life reassurance department totalled $60,529. The fund at the end of 1918 was $236,595, and these, with other amounts from investments, etc., made a total of $300,17[illegible] of income in this department. The expenditures were: Claims by death, $[illegible],881, annuities, $1[illegible]; surrendered policies, $10; expenses, $19,241; and cancelled portfolio, $150,010. These expenditures totalled $181,291, leaving a balance of $118,881, of which $112,208 was carried to the insurance fund and the remaining $6,67[illegible] carried forward.

In the closing of the 1918 account there was a balance of $2,324,786, after paying all claims on marine, fire and accident account. Of this balance, $1,888,616 was carried to the insurance fund for 1920, and the remainder of $436,170 was profit. Dividends at 12½ per cent. required $337,[illegible]28, dividend reserve fund $68,493, directors' fees $28,972 and $1,[illegible] was written off furniture.

The balance sheet as at the end of 1919 shows assets totalling $11,540,767, the investments being well distributed as follows: Government securities, $1,816,501; municipal and industrial debentures and securities, $1,011,117; railway and other guaranteed stocks, $1,581,282; preference and ordinary stocks and shares, $951,862. The amount of cash on deposit at banks was $2,391,217, and $1,079 was kept on hand. The company's head office buildings in Christiania were valued at $254,791. Amounts due from insurance companies and others totalled $1,178,061, and agency balances and sundry debtors $2,462,727. All Russian bonds and securities held by the company have been entirely written off, and any other foreign securities have been taken into the balance sheet at their present market value.

The liabilities side of the balance sheet shows the paid-up capital to be $2,721,884, the general reserve fund $1,931,506, and the insurance fund, $3,[illegible]. Other liabilities are: Sundry creditors, $2[illegible]8,160; mortgages, $[illegible],616; directors' fees, etc., $28,972, unclaimed dividends, $1[illegible], dividend for 1919, $337,[illegible], staff pension and benevolent fund, $[illegible], and dividend reserve fund, $1[illegible]. In the life reassurance department there are the life reassurance fund, $140,[illegible], the reserve for claims, $841, and [illegible] carried forward.

The premium income, as will be noticed from the comparative statement, fell off slightly as compared with 1918. Other leading British companies [illegible] had the same experience. [illegible] their experience during the [illegible] [illegible] factory, but [illegible] the worst.

In preparing the [illegible] foreign [illegible] rates of exchange [illegible] other [illegible] change.

There [illegible] with [illegible] very [illegible] their [illegible] war. The [illegible] by the [illegible] it [illegible] it when [illegible]

OPENINGS AND METHODS FOR BUSINESS INSURANCE

(Continued from page [illegible])

of account at a specific valuation. Upon [illegible] hands good-will may be paid for at a [illegible] when its stability is apparent and the [illegible] can be shown to have been heavy. When a [illegible] from a firm, it frequently pays for his [illegible], that is to say, his connection.

"It may be that a [illegible] In the event of [illegible] considerable [illegible] indemnify for [illegible]

"Depreciation [illegible] expiration of [illegible] factor [illegible] be limited to the wear and tear of office furniture. In an industrial corporation it would extend to buildings, machinery and other equipment.

"Depreciation may be estimated and written off at a fixed rate annually against profits or dividends. Or it may be provided for by the establishment of a reserve account or sinking fund. This would bear interest, and would be debited with expenditures for replacements and maintenance.

"The estimates and depreciation in most large businesses are necessarily more or less arbitrary. But in some cases an approximation to precise calculation is possible. For example, auto delivery trucks of a standard type are estimated as depreciating 10 per cent. a year. That is to say, the life of this asset is calculated at ten years. A ten-year endowment policy would make exact provision for the replacement of such equipment.

"The average sinking fund is 5 per cent. yearly. The principal sum contemplated is, therefore, realized in twenty years, or such reduction of that period as may be effected by interest accumulation. A twenty-year endowment policy, at an average age, will require a premium payment of less than 5 per cent., and the accrued profits will operate as an offset to the interest on the sinking fund. Of course, the method of providing for depreciation by life insurance has the great advantage that the death of the insured may put the concern in possession of the principal sum at an earlier time and at smaller outlay than by the method of creating a reserve account. Moreover, the insurance may cover a valuable life, and so effect two important purposes. A proposition on these lines will often make a strong appeal to a corporation. And it must be borne in mind that every industrial concern requires to maintain a substantial sinking fund.

Sinking Fund for Redemption of Bonds

"A common method of providing working capital for a new business or for the extension of a going concern is by the issue and sale of bonds. The redemption of these is usually provided for by the creation of a sinking, reserve or redemption fund. This consists of money deposited in bank or conservatively invested in such periodical sums as will amount to sufficient, together with interest or other accretions, to discharge the obligation at maturity.

"Bonds are issued for varying periods, and sometimes as a serial; that is to say, an issue certain proportions of which mature in periods of varying lengths In any case, endowment insurance furnishes a substitute for the ordinary sinking fund, and will prove attractive to most corporations if properly presented. It has the advantages which were noted in connection with a similar recourse for anticipating depreciation. There is the additional consideration in the case of insurance taken to provide for the redemption of bonds that, if the policies are specifically taken and held in trust for that purpose, they contribute an element of strength to the bonds, which will unquestionably facilitate the sale of them.

"Capital, in a commerical sense, means all the property owned—not borrowed—and used in a business. The term, "invested capital," more exactly expresses this idea, whilst "working capital" implies the net amount of liquid funds available for the immediate operating expenses of a business. Working capital to tide over three or four months is usually considered sufficient for industrial concerns, but the need may be considerably increased by extraordinary circumstances. During a period of expansion a company will require a substantial increase of ready money or bank credit, because the cost of increased output will keep ahead of increase of income for some time. The manufacture of seasonal products demands a supply of working capital much greater at one period of the year than at another. Contract work extending over a long period, with payment deferred until completion, would involve the use of an exceptional amount of working capital.

"A business with little or no reserve funds is in a more or less precarious situation in times and under conditions which strain its resources of working capital. The death of an important person in its organization at such a juncture

Some of the Delegates at the Niagara District Ind might entail the worst effects unless provision for indemnity had been made through the medium of business insurance."

Study of Finance

Underwriters are urged again to study books on corporation finance. Such books "contain typical illustrations of articles of co-partnership, certificates of incorporation, promotion prospectuses, plans of consolidation, voting trust agreements, readjustments of capital account, financial statements, bond issues, mortgages, and other matters from which he cannot fail to gain numerous suggestions for the application of business insurance. If this is not done as a general preparation, recourse should be had to such a volume for preliminary information in particular cases. For example, the agent hears of a merger and forms an idea of making it the basis for a proposal of business insurance. He will do well to read the description of one or two consolidations, as given in a work of Corporation Finance, and then seek to learn the details of the case in view. In the same way, he may qualify himself to make an intelligent proposition for business insurance in connection with a bond issue, a mortgage, or other transaction of a corporation, involving increased liabilities.

"In many instances, such knowledge is necessary in order to formulate logical arguments in support of the proposition. The agent who is completely ignorant of the subject in question is bound to betray the fact in the most superficial discussion, and it can hardly fail to ruin the chances of success. A case in point was recently recounted to the writer by a member of a firm which had been approached by an agent with a proposition for business insurance on the strength of the concern having taken in a special partner. There was sound ground for insurance and it was written, but not by the agent in question. In the first and only interview he displayed a complete misunderstanding of the situation. He did not know the status of a special partner, nor the nature of his connection, and made a proposition which proved that he was ignorant of the real hazard in the case.

Agent Must Specialize

"The agent who aspires to writing business insurance in large amounts must make a specialty of it. He cannot hope for success unless he is willing to take the trouble to qualify for it. The agent should be able to read intelligently the financial statement, or general balance sheet, of a commercial concern. Its two main divisions are assets and liabilities. Each of these has several subdivisions, of which the following are typical examples:—

"Fixed assets embracing land, buildings, machinery and equipment, furniture and fixtures, good-will.

"Working and trading assets: materials and supplies, goods in process of production, goods ready for the market.

"Current assets: cash, accounts and notes receivable.

"Deferred charges to Expense: insurance prepaid, interest prepaid, advertising.

"Fixed liabilities: mortgage payable.

"Current liabilities: accounts payable, notes payable, dividends payable.

"Reserve funds: for depreciation of fixtures, of machinery, of auto equipment, of buildings, for doubtful accounts, for income and excess profit taxes.

"Capital: common stock outstanding, preferred stock outstanding.

"Surplus: profit and loss for year ended, etc.

"Whilst such statement shows the general financial condition of the company, several of its items may specially enter into a calculation of business insurance. General balance sheets are commonly published and generally obtainable from mercantile agencies.

"The Income Statement, which is a detailed account of income, profit and loss, throws even greater light upon the conditions of the business. Amount of capital and extent of assets are not the sole criteria of a company's strength. The ratio between current assets and current liabilities is highly important. A concern might have an ample margin of fixed assets, and yet be forced into receivership for lack of immediate resources with which to meet its material liabilities."

REPORT OF THE PRESIDENT AND DIRECTORS

For the Year Ending April 30th, 1920

To the Shareholders:

ATLANTIC SUGAR REFINERIES, LIMITED

Your Directors beg to submit herewith the Fifth Annual Statement of your Company for the year ended April 30th, 1920.

The profits for the year, as will be seen from the Profit and Loss Account, amounted to $670,090.67 after making deductions for Interest, Repairs and Depreciation, and Reserves for Business Profits Tax and Contingencies. The Balance of $698,771.68 brought forward from the previous year, added to the above, makes a total of $1,368,862.33, from which four quarerly dividends of 1¾% each on the Preferred Stock, in addition to 3½% on account of accumulated arrears have been paid, amounting to $262,500.00, leaving a balance of $1,106,362.35 at the credit of Profit and Loss Account.

Exchange on New York funds to pay for Raw Sugar purchases amounted to $976,302.90 as against $115,000 last year.

The sales of refined sugar of the Company for the year amounted to more than $25,000,000, an increase over the previous year of approximately 133%. This large increase in the volume of the Company's business contributed appreciably to the satisfactory results for the year.

The purchase of raw supplies for 1920 has been left to the discretion of the refiners, and there has been an open market since the finish of the 1919 crop. The world shortage of sugar, however, has made it necessary to conserve available supplies for home consumption and very favorable opportunities to obtain export business have had to be ignored.

Labor difficulties in the raw sugar districts and numerous delays in both water and rail transportation have operated to affect the continuous running of the Refinery, and have been the cause of slowing up and even shutting down on several occasions owing to lack of raw sugar. The shut-downs were only of a temporary nature, however, and your Refinery was operated 262 days out of a possible 312 days.

The efficiency of your Refinery has been maintained and improvements and betterments have been installed during the year. A new valuation of the Refinery has been made which shows a value of $5,181,444.52 for the land, buildings, and machinery and plant, being $1,061,184.94 in excess of the previous valuation. This increased value has been added to Capital Account, and a corresponding amount has been added to Depreciation Reserve Account, in addition to the usual yearly allowances for depreciation.

The Company has continued its advertising policy to a modified extent sufficient for the Company's purposes, and the excellence of the Company's products is well established with the consuming public of Canada. During the year machinery for making lump sugar was added to the equipment, and this grade has been called "LANTIC LUMPS," and found immediate favor with the trade. The Company now produces a complete line of all grades of sugar.

On July 1st, 1919, the Company redeemed outstanding Bonds amounting to $75,000, in accordance with the terms of the Trust Deed.

Owing to labor and other troubles in Cuba during the early months of 1920, the Company was unable to obtain delivery within the contract time of a portion of raw sugars purchased, and it became necessary to resell them, but as the quantity sold had to be replaced at higher prices for later delivery, your Directors have deemed it advisable to set up the amount of profit on the raw sugars so sold as a contingent reserve against possible loss on future contracts.

Respectfully submitted,
D. LORNE McGIBBON,
President.

July 12, 1920.

SELECTION OF A LIFE INSURANCE POLICY

No Question as to Need of Protection for Dependents, or as to Safety of Companies Licensed in Canada—Best Policy Depends on Assured's Circumstances

By C. Lear White
Sun Life Insurance Co.

LIFE insurance is a problem which presents itself to every thoughtful young man. In these days when the cost of living is mounting at such a rate, one would, perhaps, think that the amount of insurance being taken by the public might decrease, but it is well known that such is not the case. Life insurance companies were never before so taxed to handle the business which is coming in to them. In Canada last year $500,000,000 of new life insurance was written. A large amount of these life insurance policies are being taken by young men, returned men who have married and settled down, or are seriously thinking of doing so, and are re-establishing themselves in civil life.

What is the problem of life insurance for these young men? To a very few, perhaps, there is first of all the question of the need for insurance at all, but this type of thoughtless individual is not very often met with. No young man who has any self-respect can ask a girl (the finest one in the world) to leave her father's home, to care for him, to weaken her strength by bearing his children, and to destroy her earning power by having to care for them, and yet persuade himself that he is responsible for that girl only as long as he lives. His obligation does not cease at his death, but continues as long as she may live. Also, as he owed his support during childhood to others, he should now be willing to repay his obligation by rearing and educating his own children. A little honest thinking along these lines will easily convince any self-respecting man of the need for life insurance.

The next phase of the problem then present themselves—what company? What kind of policy? What amount?

What Companies are Safe?

A few days ago the writer met a young man who had actually obtained a copy of the government insurance blue book, and had attempted to dig out from that complicated volume a comparison of the leading companies. He laughed when asked what conclusion he had reached. It is not necessary to discuss the merits of different companies here, suffice to say that any company which has been licensed to write life insurance in Canada is absolutely safe. Banks, loan companies, trust companies, real estate ventures, and industrial enterprises of all kinds have failed, but the day has yet to dawn when a Canadian life insurance claim has not been paid. The young man need not worry about companies. Let him select a reputable insurance agent in the same way that he would select a firm of solicitors; then he may rest assured that the insurance advice and service which he receives will be the very best.

Term Policies

The next problem then is—what kind of policy? The development of life insurance has evolved many different so called "plans." The basic idea of all is, of course, protection against death. For the sake of clearness let us take a concrete example. A man wishes to insure his life for $1,000 for one year. He would buy a one-year term policy, similar in every way to a one-year fire insurance policy; this is the simplest plan of life insurance. The premium increases with the age of the applicant, because the risk of death is greater as man grows older. The term policy may be issued for any number of years, at the end of which time the policy ends. This form of policy has proved very unsatisfactory, as the insurance may cease just at a time when the man has the greatest need for protection. If he can pass a medical examination and is able to pay a much higher premium, he may take out another policy, but either of these conditions may present an insurmountable barrier.

To overcome this a policy known as the renewable term policy has been issued. This policy is renewable without medical examination. However, it does not contain the liberal privileges of life policies which have made insurance contracts so attractive. For example, there is practically no cash value to a term policy, no provision for non-forfeiture in case of non-payment of premiums, and no loan value. Term policies are to be recommended only in exceptional circumstances.

Life Policies

This brings us to the life policies, and, first of all, we have the ordinary, or whole life plan. On this plan the first medical examination serves for life and the premium is payable until death but does not increase.

The payment of premiums on the life policy may be limited so that the assured pays all his premium in 1, 5, 10, 15, 20, or, in fact, any number of payments. These are known as limited payment life policies, the most popular of which is the 20-payment life policy. Finally, we have endowment policies. A new feature is introduced in this form of insurance. In addition to protection of $1,000 against death, the endowment policy agrees to pay $1,000 in a given time if the assured be then alive.

Of these several different plans, naturally, the term policy is the cheapest, because it gives the fewest privileges, and similarly the endowment is the most expensive, because it contains the greatest benefit.

Which, then, of these various plans is the young man to choose? The plan selected must suit the individual need, and needs vary greatly, but let us take an example of the average young married man.

Calculating Needs of Dependents

Our average young married man is not rich. If he has $1,000 in the bank or Victory bonds, or invested in a home, and is earning $1,500 or $2,500 a year he is lucky. If this individual were to die suddenly he would leave to his wife and family $1,000—sufficient probably for his funeral expenses. Quite obviously then it is this young man's duty to carry sufficient life insurance to provide entirely for his family's needs, because he has nothing else to leave them.

If he decides that $50 per month would be sufficient for his family's needs, then he can easily figure that on a 6 per cent. basis they will need $10,000 capital to produce $600 per year or $50 per month. His next thought will be, how much will $10,000 insurance cost, and this brings us to the question of the plan.

If our young man could afford to pay for $10,000 endowment insurance he would not only be providing the necessary protection for his family, but he would be building up a competence to provide for his own old age. But $10,000 insurance on the 20-year endownment plan will cost nearly $500 per year, or on the 30-year endowment plan, about $335 per year. This expenditure is too much for our average family man. $10,000 on the 20-pay life plan will cost about $325, or, on the whole life plan about $225

Whole Life Policy Most Popular

Now, if our young man can afford to pay $325 per year, he should take the 20-pay life policy, but if he cannot afford so much then he should carry the $10,000 on the whole life plan; if he cannot afford even this he should carry $10,000 on a term plan which will allow him to convert it later to life plan. The main point is that we decided that he needed $10,000 protection and in average cases the plan will depend on the ability of the man to pay. Of course, there are other considerations which may influence the plan to be taken. A man who is in business for himself, or who can and does save and invest money outside of his insurance, should choose the whole life policy. This policy will give him protection, and his own investments will provide for his own old age. But to the professional or salaried man the endowment policy offers a very attractive combination of protection and savings.

SELECTION OF A LIFE INSURANCE POLICY

(Continued from page 34)

However, the average young married man will find the cost of the endowment policy prohibitive and the ordinary or whole life plan seems to be the most suitable for this class of men. This conclusion is borne out by facts. In past years the 20-payment life and endowment policies have been the most popular but recently there has been a great increase in the amount of insurance issued on the whole life plan. This plan has been misunderstood in the past in some respects.

Because the assured agrees to pay premiums for life does not mean that he has to die to win. If in 20 or 25 years' time, the policyholder wishes to stop paying premiums, he may take a paid-up policy for a substantial amount, or he may withdraw his cash value, which will have amounted to a very considerable sum. In fact, if his policy is on the participating plan and he has allowed the dividends to accumulate, he may be agreeably surprised to find that these dividends will have amounted to sufficient to pay his future premiums entirely. It would appear then that as life insurance becomes more thoroughly understood by the public, the whole life plan will become increasingly popular with the young married man.

EXTENT OF LIABILITY ON GUARANTEE TO BANK

Directors Guarantee Not Extinguished so Long as Loan Lasts—Limited Only by Total Amount Guaranteed, Holds Supreme Court of Ontario

IN a recent case of interest to bank officials which was decided by the Supreme Court of Ontario, it was held that a letter signed by directors of a company to a bank guaranteeing the indebtedness of the company to the bank for a limited amount was not merely a guarantee of a certain amount of the company's indebtedness, but a guarantee of the whole indebtedness, the guarantors to be called upon to pay the amount provided for in the guarantee, for the guarantee only applied to a certain amount of the company's indebtedness and payment by the company of that amount on account of its indebtedness, if still owing more than that sum, did not discharge the guarantors. It was held also that a surety does not obtain the rights of a creditor when payment is made by the principal debtor, and so long as any indebtedness exists, the surety is liable to make good any part of it, not exceeding the amount which he has guaranteed.

Company Directors Guaranteed Loan

The case was that of Mather vs. Bank of Ottawa, the facts being that the bank loaned to the company $250,000—that is, $100,000 on trade paper and $150,000 secured by a bond covering all the property of the company; by a pledge on wheat purchased (the company being a milling concern); and by a guarantee from the directors of the company. The bank loaned the amounts mentioned and then further amounts were advanced. Upon request the company paid part of its debt to the bank to the extent of $150,000, leaving a balance of some $95,000. The question then arose whether the directors' guarantee was redeemed or still applied to the balance owing.

The bank's contention was that according to the true construction of the bond, the directors were liable for the ultimate balance owing by the company as a direct debt to the bank, the amount they might be called on to pay being limited to $150,000. The contention of the appellants (the directors or their estates) was that the guarantee is one for $150,000, and that sum having been paid by the company and them, their liability was at an end.

Extended Over Life of Loan

His Lordship, in his decision on the case,, says in part:—

"The surrender of the guarantee is to take place when 'that debt is fully discharged,' that is, 'the direct debt of the company,' not the $150,000, but the direct debt of the company, which I take to mean what the company should owe the respondent apart from its indirect liability on trade paper; and this view is emphasized by the words which follow, 'only the trade paper will remain,' indicating plainly, I think, that the guarantee was not to be surrendered until the whole of the direct debt of the company, whatever it might be, should be fully discharged. With reference to the bond, in my view it is not a guarantee of $150,000 of the indebtedness of the company, but a guarantee of the whole of the indebtedness, the amount which the guarantors were to be called on to pay being limited to $150,000.

"The guarantors are liable for the whole of the direct indebtedness of the company, but are not to be called on for more than $150,000 in all.

"However, if it be assumed that the guarantee is applicable only to $150,000 of the indebtedness, it by no means follows that the payment of that sum by the company on account of its indebtedness, it still remaining indebted in more than that sum, discharges the guarantors.

"The importance to a surety of his guarantee being treated as applicable to a part only of the principal debtor's indebtedness is that, if he pays that portion, he has in respect of it all the rights of a creditor, and therefore, if the principal debtor becomes bankrupt, is entitled to the dividends on so much of the indebtedness provable against the bankrupt's estate, and, if the creditor holds other securities for his debt, to the benefit of a proportionate part of them.

"It is not, as I read the cases, payment by the principal debtor, but payment by the surety which gives him these rights; and as I understand the law, so long as any indebtedness exists, the surety is liable to make good any part of it, not exceeding the amount which he has guaranteed."

MAIL SERVICE TO ORIENT

United States mail for the Orient is to be carried by the Empress steamers of the Canadian Pacific Ocean Services, it was announced on July 29, if the Dominion Government approves the contract just concluded by the steamship line and the American postal authorities. A feature of the proposed arrangement is the transportation of American mail from Seattle to Victoria by airplane, thus cutting off many hours and possibly a whole day in delivery time between Seattle and the far east.

GREAT WEST BANK DIRECTORATE

Election of provisional directors of the Great West Bank on July 19 in Regina resulted in the appointment of Ald. J. K. McInnis as chairman, and ex-Mayor Henry Black as secretary. The remainder of the provisional directorate consists of: Dr. W. A. Thomson, Geo. Speers and Hugh Armour, of Regina; J. A. Sheppard and A. Del Garno, of Moose Jaw, and F. S. Wilbur, of Creelman.

Arrangements were made to institute a campaign to raise the $5,000,000 capital, and application has been made to the Local Government Board for the necessary authorization. As soon as this has been granted a prospectus will be issued and the work of securing subscribers to the stock commenced.

MUNICIPAL SECRETARY'S REPORT

W. D. Lightall, secretary-treasurer of the Union of Canadian Municipalities, referred in his report at the recent convention in Quebec to the fact that the amount of legislation relating to municipalities this year had been very small. "It is very important," he said, "that the provincial unions, fulfilling their own work, should not forget or lose connection with the general union. The constant changes in the personnel of elected municipal men, constitute a tendency towards disruption. The west and the east need to be kept together on some workable system, of which a part should consist in encouraging permanent officials to take part in the union.

"We have been constantly pressing for years for several special reforms. One of these is the establishment in every province of a municipal department of the government. It has now been established in most of the provinces. We hope Ontario will be the next. Two years ago it was Quebec. The splendid work done by the department of municipal affairs of this province merits our warmest praise. Oscar Morin and Mr. Marquis have taken great trouble to aid and back up every movement of municipal improvement. Possibly, they may solve the difficult problems of housing and town-planning. The annual reports of this department are models of their kind and deserve recognition and recommendation. We hope next that the much-needed reform of a Dominion-wide system of uniform municipal statistics and accounting may follow."

In all policies issued since July 1st, the Confederation Life Association is stating that a rate of interest not exceeding 7 per cent. on loans may be charged. All loans made on and after July 1st on policies issued previous to that date will be made at 7 per cent., unless the policy itself calls for a lower rate.

News of Industrial Development in Canada

Three American Companies now Looking for Sites in Canada—Ingersoll Reports Five New Plants during Present Year—Gurney Foundry Buys Canada Stove and Foundry Plant in Montreal — Port Moody Shipbuilding Company

NEW industries are still coming to Canada, although the total invested in this form in 1920 may not be as great as in the exceptional year 1919. According to a statement made by Alderman Bridge, of London, Ont., who has just spent several weeks in the United States, three large American firms are at present looking for sites here. The head offices of these concerns are in Michigan, Ohio and Indiana. One of them would capitalize its Canadian subsidiary at about $3,000,000, and would employ 1,200 men, while a second would employ at least 700.

Ingersoll, Ont., has secured fivv new industries during the present year. One of these, the Ingersoll Machine Co., now employs 80 men. Two others, the Ingersoll Knitting Co. and the Griffin Shoe Co., are just commencing to manufacture, and report plenty of orders. The plants for the Dominion Cone Co. and for the A. I. Root Co. are now being put into shape. The last-mentioned firm will manufacture supplies for apiaries.

The Hudson's Bay Co. has let the contract for the completion of its departmental store in Victoria. When in the city recently, Sir Robert Kindersley, governor of the company, stated that the cost of completing the building would be about 25 per cent. more than the cost of erecting the premises, which was in the neighborhood of $450,000, and on this basis the contract now let would call for an outlay of from $550,000 to $600,000. Actual construction will be started as soon as materials can be assembled. It is expected that the building will be ready for occupation next summer.

The construction of a large fireproof warehouse is contemplated by the Farquhar Company, North Sydney, to replace the one destroyed by fire on July 25th. To cope with the increased business of late years it is to be much larger than the wooden one originally used.

A shipbuilding yard has been started at Port Moody, B.C., by the Port Moody Shipbuilding Co. As soon as the plant is ready to operate work will commence on a freighter and a pleasure boat.

The little town of Unity, Sask., in the Battleford district, is experiencing a miniature oil boom. The discovery by a homesteader of oil on his property was followed up by the Imperial Oil Co., which sent in several carloads of equipment. By the end of July the company had leased a whole township and had expended $20,000 on its work. The main wells are six miles south of the town, where the loading will be done for the present at least.

Hydro Will Not Build Steam Plant

At a meeting of the Ontario Hydro-Electric Power Commission on July 30th it was decided not to proceed with the construction of an auxiliary steam plant. The tenders submitted showed that, owing to the high cost of materials and labor, the capital cost of a 50,000 horse-power unit would exceed $5,500,000, and the extra power to be made available could not be secured for a year and a half, the guarantees of deliveries by the various companies not permitting of the plant being ready earlier than December, 1921. The high initial expense and the high cost of operation due to the price of coal would, it was estimated, add at least $10 per horse power to the cost of power in the Niagara district.

The Elgin Milk Products Co., Ltd., is to erect a two-story concrete factory building in St. Thomas, Ont. The plant will be used for the manufacture of dehydrated milk, using the economic process, which is owned and controlled in Canada by the Appleford Milk Products Co., Ltd., with headquarters in St. Thomas. Two brands of powdered milk are to be manufactured, "Mealomilk" and "Cowlacto," the latter being made from the milk of pure-bred Holsteins. The plant will have a capacity of approximately 100,000 pounds of raw milk daily, or 20,000 pounds of the manufactured product.

Dominion Steel's Cement Plant

The Dominion Iron and Steel Co. has purchased outright the plants of the Sydney Cement Co. and the Sydney Pressed Brick Co., and as soon as the necessary preparations about the plants have been completed the manufacture of cement is to be started at once. The purchase of the plant was announced on July 29th by an official of the Dominion Steel Co., who likewise gave out that the plants when put in operation will give employment to about fifty men. The plants purchased by the company were operated during the early years of the war by a company composed of local interests, chief among whom was H. S. Burchell, formerly of Sydney and now of Windsor, N.S. This company operated the plants for several years, but was compelled to close down through conditions created by the war. It is possible that production of cement will be under way early in the fall. The daily output when formerly in operation was in the vicinity of two hundred barrels a day. When the proposed program of extension planned for the local steel plant has been undertaken, it is estimated that a quantity of cement nearly equal to the plant's daily output will be required. Any excess of cement which will be produced will be used to supply the local market. In the past years the amount of cement used by the company in construction and repair work has varied from 5,000 to 25,000 barrels a year.

The Dominion Iron and Steel Company has received its first foreign order for plates rolled in its new mill from shipbuilding firms in Australia and New Zealand. Shipment will be made shortly.

Paper Mill at Kapuskasing

Preliminary work has already been commenced in connection with the projected pulp and paper mill at Kapuskasing, Ont., and the final details are being arranged between the Ontario government and the Kimberley and Clark Company, of Neenah, Wis., for the enterprise to be started on the scene of the unsuccessful attempt of the province during the war to establish a soldier colony. Timber limits and suitable water power have already been secured, and buildings used in connection with the soldier colony are being purchased through an arbitration commission, to be torn down and the material used in the erection of a plant. The Kimberley and Clark Company will finance the undertaking without making a stock issue. A plant may also be erected at Niagara Falls, Ont.

Gurney Foundry Purchase

The Gurney Foundry Company, Ltd., of Toronto, have purchased the plant, including all of the machinery, equipment and patterns, of the Canada Stove and Foundry Company, Ltd., at St. Laurent, a suburb of Montreal. The growing business of the company has for some time taxed the capacity of the stove plant at Toronto. It was impossible to enlarge this plant further as no vacant land was available, and these conditions made it necessary to consider another location. The Canada Stove and Foundry Company have done a very large stove business in the province of Quebec, and this business will be added to the turnover of the Gurney Foundry Company. The Montreal plant also has a modern, well-equipped plant for producing white and colored vitreous enamel on iron and steel. The demand for the white enamel sanitary finish has been beyond question the greatest development in the art of producing stoves over the last decade, and the Gurney Foundry Company will now have unrivalled

facilities for supplying this finish with Gurney Oxford stoves. This enamel plant also does an important business in sanitary table tops, enamel signs, etc. In addition to the plant, an important tract of land has been secured around the plant to take care of further expansions. The head office of the company will remain at Toronto.

Sale of Kenora Power Plant

It is expected at Kenora, Ont., that the ratepayers will approve the agreement to sell the municipal power plant to the Backus interests. At a public meeting on August 3rd Mayor George A Toole stated that during the past six years the plant had lost $50,000, whereas, had the town been purchasing power for $20 per horse-power, as per agreement with Backus, for a like period, the profit for the lighting plant would have been $30,000. As there will be another power plant in Kenora, the town services will also be better protected, it was asserted. P. Heenan, M.P.P. for Kenora, told of the efforts to have the English River limit added to those of the Lake of the Woods, and the danger that if put up for tender they might be secured by speculators and held up for a number of years, thereby being detrimental to the town, a loss to the province, and also delay the time when western newspapers would be able to secure an adequate supply of print paper.

R. K. Neil, part owner of the Premier Mine, which is situated up the Salmon River, in British Columbia, about two and one-half miles on the Canadian side of the Alaskan boundary, stated in Vancouver on July 31st that, in conjunction with the operation of the claim on a more extended scale than formerly, the company will introduce the cyanide process of refining their ore, and are building a cyanide mill of a 100 tons per day capacity, the first of its kind to be erected on this coast. In this process the ore is reduced into gold and silver bars at the mine itself, instead of being shipped in its crude state to the smelter at Tacoma. The plant, which is being built at an enormous cost, is expected to be operating by the first of next year.

Ratepayers of the town of Midland, Ont., have carried a by-law granting tax exemption for twenty years to a new flour mill to be erected by A. E. Copeland and a company to be formed. The construction of the mill and equipment will cost a quarter of a milion dollars, and it will have an initial capacity of 1,150 barrels, and be so constructed that the daily output can be increased to 2,500 barrels with no expense. An acre of land adjoining the Midland elevator has been secured from the G.T.R., and the building of a seven stories concrete or brick structure will be commenced without delay. The exemption privileges do not refer to the land or the school rates. The company is negotiating for 400 horsepower from the local hydro commission, and the result of the vote is giving the greatest satisfaction.

NEW INCORPORATIONS

Oak Tire and Rubber Co., Ltd., $3,000,000—Universal Products, Ltd., $3,000,000—Progressive Gold Mines, Ltd. $2,000,000—Brant-Kenora Mining Co., Ltd., $2,000,000

News of Municipal Finance

Toronto Appoints Transportation Commission—London Taxes Coming in Earlier—Montreal has Assets Totalling $133,645,970, and Capital Surplus of $2,848,384 — Hamilton will require $4,400,940 for Gas Plant — Calgary Tax Payments up to Last Year's Figure

Russell, Man.—The town will offer 30 parcels of land at a tax sale to be held on September 7.

Grey R.M., Man.—The municipality will offer 35 parcels of land at a tax sale to be held at Elm Creek on August 31.

Regina, Sask.—By a decision of the city council on August 3, Regina street care fares were advanced on August 4 to 10 cents cash, two tickets for 15 cents, four for 25 cents and 17 for $1. A motion to establish a workingman's ticket was defeated.

Millbrook, Ont.—The town council has struck the rate for this year at 38 mills on the dollar. The levy for schools has been increased from 11 to 15 mills. The rate last year was 37 mills, of which amount 4½ mills went for gifts for returned soldiers.

Minnedosa, Man.—On August 14, a by-law will be submitted to the ratepayers to give approval for the construction by the Manitoba Power Commission of an electric plant at that point. The by-law explains that the power plant is to have a capacity of 150 kilowatts and that the charges for the first year are to be $21,600.

Victoria, B.C.—The city council on July 30 passed a by-law to enforce a license fee for overhead signs, gasoline and oil pumps extending on or over the city sidewalks. This "overhead fixtures" by-law, as first drafted, included porches, awnings, verandahs, water and air pumps, but these were left out before it was passed.

Richmond Municipality, B.C.—Two lots of bonds were sold on July 26 to a total of $168,230, as follows: $33,230 in five-year bonds at 5½ per cent., bought by Pemberton and Son at 95.78 and 1 per cent. commission. The second lot was $135,000 in 20-year bonds, also at 5½ per cent., which went at 84.29 to Pemberton and Son and the Royal Financial Corporation.

New Toronto, Ont.—The town tax rate for 1920 will be 35 mills on the dollar. Last year's rate was 42 mills, and it was only after radical paring that the council managed to keep the rate down this year. Had the council consented to issue debentures for $67,000 for school purposes, as the school board requested, the rate would have been six mills higher. The council decided that a new school was unnecessary, and only passed the account for current expenses, $16,300.

Hamilton, Ont.—In order to establish and put in operation the plant contemplated by the special gas committee, approximately $5,450,940 will be required. This includes the cost of the new plant to be erected at an estimated cost of $2,600,000, and the system to be purchased from the United Gas and Fuel Co. As there are bonds for more than a million dollars that can be assumed by the city, only $4,400,940 will be required in debentures. There is a general feeling among members of the city council that the report of the gas committee recommending the purchase of the company's plant should be adopted.

Edmonton, Alta.—In a discussion of the city's banking system on August 2 and 3, City Treasurer Barnhouse stated that the separate accounts were not being kept intact, as funds from one were sometimes applied to relieve another. The merging of the accounts, he said in reply to a question from City Commissioner Hadlow, was feasible but not desirable. Comptroller Mitchell expressed himself strongly in favor of having separate capital and current accounts. As a result of keeping accounts for different departments, the city's tax on overdrafts, payable to the federal government, may be $8,000 or $10,000 a year.

South Vancouver, B.C.—The city has completed the purchase of £5,600 of debentures of the municipality issued nine years ago and due in 1961 on a 7½ per cent. basis. Further negotiations are being made for an additional amount on the same basis. When complete the purchase will total £10,000, on which the municipality will obtain a reduction as against the face value of over $21,000. This reduction, representing profit, will help to make up the losses on sinking fund loaned on mortgage on the municipality some years ago, which loss it is expected will aggregate $40,000. The commission hopes making a similar deal next year, when the loss on mortgages alluded to will be wiped out.

Three Rivers, Que.—The city solicitor has secured permission from the courts to examine the following corporations and individuals as regards the part taken by them in the administration of a trust fund issued for debentures amounting to $200,000 and endorsed by the city of Three Rivers in favor of the Page Wire Fence Co. of Canada, Ltd., now in liquidation: The Montreal Trust Co., the Sun Trust Co., Ltd., the Credit Canadien, Incor.; William C. Heron, business agent; Joseph Grant, business agent; C. E. Arpin, employed by the Sun Trust Co., Ltd., and the Credit Canadien, Incor.; and W. S. Green, employed by the Montreal Trust Co., Ltd. The endorsement was given under authority of a by-law passed January 3, 1918, for the purpose of building a plant of the Page Wire Fence Co. at Three Rivers, and it is alleged that the plant was not built.

London, Ont.—The city is collecting its taxes two months earlier this year than formerly and may advance the date another month to May 15 next year. City Treasurer Bell approves of the aldermanic move towards framing a city budget in the fall in order that the tax rate may be struck earlier. A few more years, Mr. Bell prophesied, following the method already established, and the city would start the year with sufficient capital for yearly expenditures, making bank loans unnecessary. The treasurer, however, is not in favor of a drastic cutting of six months from the city tax collection date. "It would probably work too great a hardship on the majority of citizens," he stated. "At the present rate of reduction in the tax due date, London in five years will be collecting its taxes early in January. A two months' reduction in one year might later be possible, bringing the new order into effect a year or two earlier." Mr. Bell thought that the city council should early advertise in each year the probable date of tax collection. This would give citizens an early warning in order that they might "put aside" a fund for tax payment.

The city is arranging to borrow an additional $400,000 under the federal housing act. This will make a total of $800,000, of which $500,000 is required for buildings already under construction.

Point Grey R.M., B.C.—Councillor Capt. Stewart intimated on July 26 at the meeting of the Point Grey council that he intended testing the validity of the municipal act in regard to the penalty imposing 15 per cent. on taxes that are not paid by the stipulated date, explaining that the charges for interest and sinking fund on loans under bylaw were provided for in those by-laws. The question arose upon the reading of a letter from the inspector of municipalities, who wrote stating that he would refuse to pass any by-laws in future that did not provide for future councils having the power of taxing improvements as well as land. It was pointed out by Comptroller Floyd that if this were agreed to it should be made plain to the ratepayers that they were in danger of having their improvements taxed, which was not the case at the present time in the municipality.

Toronto, Ont.—P. W. Ellis, George Wright and Fred Miller were appointed by the city council on August 5 as a transportation committee to conduct the business of the city, taking over the Toronto Street Railway at the expiry of the company's franchise on August 21, 1921. The commission is to act without salary, this being requested by the trio when approached to allow their names to be put forward in this connection. Messrs. Ellis and Wright are members of Toronto's Hydro-Electric Commission and Mr. Miller is a contractor. The proposed appointment of a housing commission has been referred back to the board of control by the council. It was thought the housing scheme had not been properly matured. The scheme contemplated the erection of 150 dwellings of fairly cheap construction and a loan of $1,000 to every bona fide builder of a small home in connection with the scheme.

George H. Ross, city finance commissioner, pointed out at a meeting of the board of control on August 3, that expenditures since March last not included in the estimates submitted to council amounted to $318,447, almost one-half mill on the estimates. This he described as "almost alarming." To take advantage of the discount on sterling exchange Commissioner Ross was instructed to purchase sterling bonds payable in New York, and thus effect a considerable saving to the city.

Calgary, Alta.—City taxes to the amount of $2,023,000 were paid from July 1 up to July 26, or about the same as during the first period last year. In September, 1919, at the end of the 10 per cent. discount period, which occurred in that month, there was approximately $1,950,000 of taxes paid in, or about $75,000 less than during the same comparative period this year. None of the taxes paid in this year have been segregated yet, that is, apportioned to arrears of taxes, local improvement taxes, and the current taxes for 1920. The arrears paid are not expected to be a particularly large sum, and there is no way of estimating the total of local improvement taxes paid yet. On the whole, therefore, the indications are that people are paying their taxes in just about the same degree as in 1919, with the exception that they are being paid earlier this year, owing to the new arrangements of discount dates beginning with 10 per cent. up to July 20, and diminishing by 2 per cent. a month to the end of the year. Consequently, it is expected that there will be a considerable rush to pay taxes again just preceding August 20, to take advantage of the 8 per cent. discount date.

A report on the city waterworks system, just presented to the city council by Commissioner A. G. Graves, points out that the flat rate is unjust in many cases, as some use more water than they pay for, and others use less. For the year 1919 the total charges against revenue amounted to $410,982; and as this was the total cost of supplying the 3,650 million gallons, it might be stated that the average cost per 1,000 gallons would be 11.26 cents. The revenue for metered water in 1919 was $100,049, or 10.95 cents per 1,000 gallons; and the revenue from flat rate water during 1919 was $186,823, or 6.83 cents per 1,000 gallons. From the foregoing, said Mr. Graves, it would appear that there was a slight loss on metered water and a considerable loss on flat rate water, which, of course, is more than offset by the item of $110,000 for the frontage tax, and $30,000 hydrant rental, a detailed statement of which was presented to the commissioners. On December 31, 1919, said Mr. Graves, the waterworks department had 13,411 services in the city, of which 692 were metered, leaving a total of 12,719 flat rates. In addition they had 69 standpipes in use. The ratings on ehtse flat rate services are as follows: 69 public standpipes at $6 per year; 3,011 services under $12 per year; 6,511 at $12 and under $15 per year; 2,100 at $15 and under $18 per year; 685 at $18 and under $24 per year; 167 at $24 and under $30 per year; 143 at $30 and under $48 per year; and 102 at $48 and over.

Montreal, Que.—City Comptroller Pelletier has handed to the administrative commission his annual statement for 1919. It shows the city assets to amount to $133,645,970, divided as follows:—

Municipal real estate	$ 43,408,683
Tunnels and bridges	1,408,742
Improvements, expenses for which rolls on special tax have not been prepared	2,516,929
Special real estate contributions to be collected from owners for improvements made	4,749,090
Store account	279,264
Amounts to be collected	1,864,248
Expense account representing an equal amount of the consolidated debt	64,014,811
Securities and moneys held in trust for the sinking fund of the city	3,864,752
Securities held in trust for the sinking fund of the Catholic School Commission	359,558
Securities held in trust for the Protestant School's sinking fund	847,617
Accounts of administration 1917-1919 covered by collectable ordinary taxes	6,612.563
Deficit in the revenue of 1916-1917 covered by special collectable tax of 20 years	400,000
Cash account	319,728
	$133,645,970

Liabilities.

Consolidated debt	$ 82,165,370
Additional debt	33,795,123
Rolling stock capital	4,000,000
Floating debt	5,225,706
Sinking fund's reserve (city)	4,132,843
Sinking fund's reserve (school commission)	1,353,484
Rents due, conduits, etc.	125,058
Surplus on capital account	2,848,384
Total	$133,645,970

Montreal property owners owe the civic administration the sum of $1,000,000 in arrears of taxes covering the past two years, according to a statement issued on August 8, by Patrick Collins, city treasurer. A list of the delinquents has been sent to Quebec by Mr. Collins for publication in the official gazette. Those in arrears had still a chance to pay their taxes with but $10 additional for costs, if they do so before August 10. Since Tuesday, the costs are $20, after publication of the lists in the official gazette $30, and after publication in the Montreal press $50. But if taxes are left unpaid after October 15, the affected properties will be sold by the sheriff. The list of those in arrears with their property taxes includes 3,500 names, as compared with 17,391 names on May 1, so that it will be seen many owners have paid up during the past three months.

A by-law providing for the acceptance of $1,000,000 of the federal housing loan came before the city council on August 9.

BRITISH COLUMBIA FIRE UNDERWRITERS

At a meeting of the British Columbia Fire Underwriters' Association in Vancouver on August 3, the following officers were elected: President, R. S. Day, of Victoria; vice-president, T. W. Greer, Vancouver; secretary, W. L. Foster; district manager for Vancouver Island, D. A. S. McGregor. The interests of Vancouver Island will be cared for by A. E. Planta, Nanaimo, and James Forman, Victoria. The Victoria office will carry on the business for Vancouver Island in practically the same manner as heretofore.

The National Appraisal Co., Royal Bank Building, Toronto, has moved into new and more commodious offices in the Burnside Building, 9-11 Wellington Street East.

Are You Getting 6%?

If your savings are not earning fully 6% while surrounded by undoubted security, they are not fully employed.

Victory Loan Bonds not only afford the highest grade of security, but, in the case of the 1934 maturity, yield an interest return of almost 6%.

Furthermore, Canadian Victory Bonds are the most convenient form of investment, for, should there arise a necessity for immediate cash, they will be found the most readily saleable of all securities.

RSC INVESTMENT SERVICE

Built on Rock or Sand?

The development of the Canadian pulp and paper industry has been so rapid, and the corresponding rise in the values of pulp and paper securities so large, that many investors are puzzled by it.

And rightly so, because the movement is without parallel, and unless one knows the facts the reasons for it are mystifying.

To give you these facts we have published a searching financial analysis of the Canadian pulp and paper industry in the current number of *Investment Items*. It is of absorbing interest and will be of great service to investors.

Write for a copy before the edition is exhausted.

We expect a heavy call for it.

Government and Municipal Bond Market

Market Conditions Continue Quiet—Nova Scotia Sells Half Million Issue—Particulars of British Columbia Sale—Sherbrooke Rejects all Tenders—No Tenders for Moncton Bonds but Issue is Sold Privately—A Few New Issues Coming on Market

THE bond market continues quiet. The total sales during July, as shown elsewhere in this issue, were more than in June, owing to the unusually large amount of provincial bonds sold. In August there has already been sold $500,000 of the province of Nova Scotia, but it is not expected that many issues of either provinces or municipalities will be placed on the market. Bidding on issues recently offered has not been good, and direct to the public sales are meeting with only occasional success.

Coming Offerings

The following is a list of issues offered for sale, particulars of which are given in this or preceding issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Goose Lake, C.S.D., Man.	$ 50,000	6	20-inst.	Aug. 14
Bridgewater, N.S. ..	75,000	6	30-years	Aug. 14
Bridgewater, N.S. ..	10,000	5	42-years	Aug. 14
Toronto Twp., Ont. .	74,675	..	20-inst.	Aug. 14
Kerrobert, Sask. ...	4,500	7	10-years	Aug. 17
Ontario County	50,000	6	20-inst.	Aug. 27
Dauphin S.D., Man. .	50,000	6½	20-years	Sept. 2

Bridgewater, N.S.—Tenders are invited up to 5 p.m., August 14th, for $85,000 of bonds, as follows:—Forty debentures of $500 each, and fifty-five debentures of $1,000 each, dated August 1st, 1920, maturing in 30 years, with interest at 6 per cent., payable semi-annually at the town clerk's office, Bridgewater; ten debentures of $1,000 each, dated June 30th, 1919, payable in 42 years, with interest at 5 per cent., payable at the town clerk's office. These debentures are issued under authority of the legislature of Nova Scotia.

Sherbrooke City.—The city rejected all tenders on its issue of $392,500 5 per cent. 5-year bonds, tenders on which were invited up to July 26th.

Dauphin School District, Man.—Tenders are being invited up to September 2 for $50,000 6½ per cent. debentures, maturing in 20 years. (See official notice elsewhere in this issue.)

Kerrobert, Sask.—Attention is called to the fact that the interest rate on the issue of $4,500 of debentures, advertised in *The Monetary Times* last week, is 7 per cent., not 6 per cent.

Cranbrook, B.C.—The electors of the city will shortly be asked to vote on a by-law authorizing the purchase by the city of the plant of the Cranbrook Electric Light Co for approximately $58,000.

Waterloo, Ont.—At a meeting of the Waterloo Park Board, held on August 4th, it was decided to issue debenture to the amount of $3,500 to cover overdraft, caused by the excess cost of new buildings over the original estimate.

Delhi, Ont.—Ratepayers on August 2nd turned down by a small majority a by-law to authorize the purchase and improvement of the Dickeson block for a town hall and municipal office, and the issue of debentures therefor to the amount of $7,000.

Toronto Township, Ont.—Tenders will be received up to 2 p.m., August 14th, for $74,675.85 debentures, issued for Toronto Hamilton highway purposes. The bonds are payable in twenty equal annual instalments. J. K. Morley, acting clerk, Cooksville, Ont.

Ontario County, Ont.—Tenders are invited up to noon on August 27 for two separate issues of debentures, each for $25,000, with interest at 6 per cent., repayable in 20 annual instalments of principal and interest. E. A. McKay, county treasurer, Whitby, Ont.

Prince Albert, Sask.—Ratepayers of the city on August 12th voted on the proposal to issue $65,700 of bonds for additions and alterations to the city waterworks. The debentures would bear interest at 6 per cent., principal and interest payable in 15 equal annual instalments of $6,764.69 each.

Windsor, Ont.—To authorize a debenture issue of $150,000 for improvements to waterworks, a by-law will be submitted to Windsor electors on Tuesday, September 4th. The election is necessary because the brokers who purchased the bonds decided not to place them on the market until the ratepayers had approved the expenditure.

British Columbia.—The following certificates were issued by the municipal department of the province of British Columbia on the dates indicated:—

July 22, 1920.—City of Prince George—"The Waterworks Debentures By-law, 1919," No. 88, $3,000 payable in fifteen years, with interest at 6 per cent., payable half-yearly.

July 23, 1920.—The Corporation of the city of Courtenay—"The Courtenay School Building Authorization and Debenture By-law, 1920," No. 55, $30,000, payable in twenty years, with interest at 6 per cent., payable half-yearly.

July 30, 1920.—The Corporation of the city of Trail—"Corporation of the City of Trail Local Improvement Cement Sidewalk Construction Debenture By-law," No. 249, $9,000, payable in ten years, with interest at 7 per cent., payable half-yearly.

July 31, 1920.—City of Armstrong—"The City of Armstrong Memorial Hospital Loan By-law, 1920," No. 75, $5,000, payable August 1st, 1940, with interest at 6 per cent., payable half-yearly.

August 2, 1920.—Corporation of Point Grey—"Point Grey School Loan By-law, No. 19, 1920," $135,000, payable August 1st, 1940, with interest at 5½ per cent., payable half-yearly.

Bond Sales

Saskatoon, Sask.—The city has sold an issue of $100,000 20-year 5½ per cent. bonds to W. A. MacKenzie and Co., of Toronto, at 92.61 and accrued interest, in Saskatoon.

Moncton, N.B.—No tenders were received for the city's issue of $393,500 6 per cent. bonds, bids for which were invited recently. It was decided, however, to accept an offer received from I. M. Robinson and Sons, St. John, N.B. $190,000 of the bonds are serial bonds, and the remaining $203,500 mature in 20 years.

East Sandwich Twp., Ont.—A bond issue of $42,094.84 has been sold by the township, to Wood, Gundy and Co., of Toronto. The bonds are 6 per cent., fifteen instalments, and the price paid was 94.33. A. E. Ames and Co. bid 94.09. Last month East Sandwich rejected all bids for its bonds, but at that time it could have secured a better price, as A. E. Ames and Co. bid 95.83.

East Kildonan, Man.—$150,000 6 per cent. 30-year serial bonds of the town have been sold to Strang and Snowden of Winnipeg, at 89.50 and interest. About the end of June the firm secured an option on the bonds at 90.25, but before the option had expired they made a definite offer of 89.50. In view of the unsettled state of the market, the town decided to accept the offer.

CORPORATION SECURITIES MARKET

Canadian Stocks Break Sharply and Continue Downward Movement—Kaministiqua Pulp and Paper Co. Bonds Offered

FOLLOWING several weeks of buoyancy, especially in the paper stocks, securities on the Canadian exchanges took a sudden plunge downward on August 5th. This flight and collapse was an independent movement, as the New York market has continued bearish for some time past. Although there was a recovery on Friday, yet the general tendency during the week ended August 11 has continued downward. The following are some of the more substantial losses: Can. Forgings, 5 points; Dominion Textile, 5; Ontario Steel, 4; Price Bros., 10; Spanish River 5½; Wabasso, 5. Howard Smith and Riordon were both strong, however, Riordon gaining 5 points and Howard Smith 1. The latter stock held up well throughout the weak period, and it is rumoured that there will be a further readjustment of the capitalization. The bank stocks shared to some extent in the declines of the industrial market. Bonds registered practically no advances, with a few small recessions.

Kaministiqua Bond Offering

An issue of $500,000 bonds of the Kaministiqua Pulp and Paper Co. is being offered by A. E. Osler and Co., and Graham, Sanson and Co., Toronto. This company will erect a plant at Port Arthur, Ont., to manufacture ground woodpulp. Power has already been contracted for, and the essential machinery and other equipment has been purchased. It is expected that the plant will be in operation in about four months' time. The bonds are first mortgage bonds, with interest at 7 per cent., and are offered at par, with a bonus of 40 per cent. of common stock. The directorate of the company includes U. M. Waite (president), A. E. Osler, John Ball, C. D. Howe, F. R. Graham and Hon. T. W. McGarry. A good supply of timber is available, and the plant will be served by the Canadian National and the Canadian Pacific Railways. It is estimated, allowing a low price for newsprint, that earnings will, in the first year, amount to 40 per cent. on the bonded indebtedness.

Capitalization Changes

Increases in the capital of companies incorporated under Dominion charter have been authorized as follows:—

	Former capital stock.	Increased to
Saskatchewan Courier Publishing Co., Ltd.	$30,000	$50,000

Increases in the capital of companies incorporated under Ontario charter have been authorized as follows:—

	Former capital stock.	Increased to
Russell Gear and Machine Co., Ltd.	$ 100,000	$2,000,000
Premier Langmuir Mines, Ltd.	2,000,000	2,800,000
St. Mary's Milling Co., Ltd.	50,000	250,000
Christie, Henderson and Co., Ltd. ..	100,000	300,000

CANADIAN SECURITIES IN UNITED STATES

Canadian securities held in the United States as of July 1 of this year represented the enormous total of $524,248,313, according to a compilation published in the current issue of the Federal Reserve "Bulletin." Of this total, provincial and municipal issues accounted for $130,425,313, government issues $152,500,000, roalroad $121,328,500, public utility $80,095,000 and industrial $39,899,500. Included in the Canadian list in this compilation is a loan of $2,500,000 to the government of Newfoundland. The borrowings of Canada in the United States are tabulated as follows:—

Issue.	Interest.	Issued.	Amount.
(Gold bonds)			
5-yr.	5 %	Apr. 1, 1916	$25,000,000
10-yr.	5 %	Apr. 1, 1916	25,000,000
15-yr.	5 %	Apr. 1, 1916	25,000,000
10-yr.	5½%	Aug. 1, 1919	60,000,000
(Gold notes)			
2-yr.	5½%	Aug. 1, 1919	15,000,000

Among the provinces of Canada, Ontario is shown as the heaviest debtor of Uncle Sam, with a total borrowing of $[illegible]0,800,000 on the part of the provincial government. The province of Alberta is next with $11,150,000. Other provinces stand as follows: Manitoba, $7,848,000; Quebec, $7,500,000; British Columbia, $5,630,000; Saskatchewan, $3,720,000; New Brunswick, $3,170,000; and Nova Scotia, $2,000,000.

In the list of municipal borrowings the compilation places Toronto at the head of Canadian cities, with loans in the United States of $17,119,633, while the Toronto Harhor Commission is shown as having $5,000,000 of its bonds outstanding in the United States. Montreal has borrowed $7,000,000 and Greater Winnipeg Water District another $7,000,000. Other Canadian cities figure as follows: Calgary, $2,918,806; Vancouver, $2,810,000; Ottawa, $2,588,859; Quebec, $1,255,000; London, $1,246,056; Edmonton, $1,348,750; and Halifax, $1,025,170.

EXPORT OF COAL FROM CANADA

Since the embargo on coal went into effect on August 1, Hon. F. B. Carvell, chairman of the Board of Railway Commissioners, has been bombarded with requests for permits to export. As soon as the announcement was made of the embargo, shippers and mine-owners got hold of every type of craft that was available to load with coal. A number of these did not get away in time and the permits to export are asked on the ground that these are exceptional cases. Only in "very exceptional" cases is Chairman Carvell granting the permits asked for.

The first general meeting of the Canadian Society of Cost Accountants will be held in Toronto on September 15, at 8 p.m.

When You are Old

Who'll provide the money to keep you? Will you then be compelled to keep on working the same as some old men you know? Or will you be able to enjoy an old age of comfort and independence?

A moderate annual saving now—when you can spare the money—invested in an Imperial Endowment Policy will secure you a regular income in your old age; or it will provide for your family should death call you early.

GOVERNMENT AND MUNICIPAL BOND MARKET

(Continued from page [illegible])

Carleton County, Ont.—Debentures bearing 6 per cent., p to the amount of $150,000, were sold by the finance com ittee of Carleton county council on August 11 to R. C latthews and Co., Toronto, at a figure of 92.666. The bonds ere in two blocks of $100,000 of 40-instalments, and $50,- 00 of 20-instalments. Wood, Gundy and Co., Toronto, tendered a slightly higher figure for an option on the issue everal other requests for options were also received

Nova Scotia.—Bonds of the province to the amount of 500,000, being the remainder of an issue brought out pril, 1918, were sold on August 6th to the National City o. at 101.287 and interest. They are 6 per cent. gold bonds, yable in New York, and are due in April, 1928. They are ing offered for sale in New York at a price to yield 7¾ er cent. The tenders were as follows:—

National City Company	101.287
Harris, Forbes and Co.	99.98
Dominion Securities Corporation	99.70
A. E. Ames and Co., and J. M. Robinson and Son	99.59
Eastern Securities Co.	99.30
Wood, Gundy and Co.	98.867
United Financial Corporation	99.11

British Columbia.—As announced in these columns last eek, the province on August 4th sold $3,000,000 5-year 6 r cent. bonds at 98.91. The purchasers were a syndicate nsisting of the Seattle National Bank, Blyth, Witter & ., the B.N.A. Bond Corporation, Royal Financial Corporaon and Gillespie, Hart and Todd. The latter three houses e Vancouver ones, and the others American. The bonds ill be sold in the United States, and will have to be met maturity in New York funds.

Only the one tender was received by British Columbia the whole $3,000,000. Tenders on a portion of the offering re received as follows:—

Canada Bond Corporation, 87.11 in New York funds on .000,000.

A syndicate composed of Carstens and Earl, Price and ., Ferris and Hardgrove of Portland and Seattle, 99 on 700,000.

W. A. MacKenzie and Co., Aemilius Jarvis and Co., and e First National Bank, 99.95 for $1,700,000. This bid is made on the basis that the province would arrange for elf to realize 13 per cent. on New York funds, which the ovincial treasurer thought possible. The tender was real New York funds, and would probably work out at less an 99.95 if the actual exchange had to be procured.

The Dominion Securities Corporation, A. E. Ames and ., and Halsey, Stuart and Co., of Chicago, bid [illegible] on 000,000.

CANADIAN FAILURES

The number of failures in the Dominion, as reported by G. Dun and Co., during the past [illegible] compared with those of previous [illegible] week of last year, are as follows:

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	[illegible]	Total	[illegible]

BRITISH EMPIRE TRUST COMPANY

In spite of [illegible] British Empire Trust Company was still able to pay the usual dividends of 5 and [illegible] per cent. on the preferred and deferred stock for the year 1919. At the annual meeting, held on July 20th in London, Eng., the managing director, J. Davidson, also pointed out that there is a margin of £18-000 of assets over the capital [illegible]. "The only sound policy is to provide fully for depreciation in values," he said. This, of course, has the effect of reducing the amounts available for dividends, but, on the other hand, it maintains the company's credit. Mr. Davidson also referred to the demand for capital for existing and for new industrial enterprises. While the company is taking an active part in such new financing, he said, it is necessary to pursue a policy of caution owing to the inflated conditions now prevailing.

CANADIAN NATIONAL EXHIBITION

"Work and Prosper" is the motto adopted for the 1920 Canadian National Exhibition, Toronto, which will be held August 28th to September 11th, and the entire machinery of the organization has been turned to the task of making the forty-second annual event a striking exemplification of the appropriateness of the slogan. Unwilling to rest on the standard of previous expositions, the directors and management have utilized every resource of this Canadian institution in the effort to make the position of the enterprise more noteworthy. Early indications point to new records in every department, perhaps also in matter of attendance, which reached the magnificent total of 1,201,000 last year, a figure never attained even by the monster World's Fairs at Paris, London, Chicago, San Francisco, etc., in the same number of consecutive days.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of July:—

Canadian Pacific Railway

	1920	1919.	Inc. or dec.
July 7	[illegible]	3,120,000	[illegible]
July 14	[illegible]	[illegible]	[illegible]
July 21	[illegible]	[illegible]	[illegible]
July 31	[illegible]	[illegible]	[illegible]
	[illegible]	[illegible]	[illegible]

Canadian National Railways

	1920	1919.	Inc. or dec.
July 7	[illegible]	[illegible]	[illegible]
July 14	[illegible]	[illegible]	[illegible]
July 21	[illegible]	[illegible]	[illegible]
July 31	[illegible]	[illegible]	[illegible]

Corporation Finance

Canadian Woollens' First Annual Report Shows Assets Totalling $5,581,208—Net Income was $423,227—Atlantic Sugar Report for Year Ended April 30, 1919 — Exchange was Important Factor in Sugar Cost in Canada

Toronto Street Railway Co.—There is a prospect of further litigation between the city and the Toronto Street Railway Co., owing to the fact that the latter has not paid over the percentage of its earnings for the months of June and July, amounting to approximately $237,325, in accordance with the terms of the agreement governing the franchise. On August 9, Mr. Fleming, the manager, had an interview with Finance Commissioner Ross, when the whole financial situation of the company was under review. Mr. Ross is making a special report to the board of control on the matter. It is well known that the civic officials and controllers are averse to granting the company any special favors.

Atlantic Sugar Refineries, Ltd.—The report for the year ended April 30, 1920, submitted at the fifth annual meeting, shows the following items in the profit and loss account, compared with the preceding year:—

	1919.	1920.
Balance brought forward	$ 323,439	$ 698,771
Profit for the year	986,343	1,594,888
Profit on investments	......	9,009
Profits from other sources	......	1,199,012
	$ 986,343	$ 2,802,910
Less bond interest	85,700	81,450
Less bank interest and exchange	186,855	131,325
Less depreciation	164,397	721,031
Less reserve	69,892	1,199,012
Less betterments	104,166	......
Total deductions	$ 611,011	$ 2,132,819
Net profits	375,332	670,090
Preferred dividends	......	262,500

The balance sheet shows the following main items, in comparison with the preceding year:—

	1919.	1920.
Land, buildings, wharf, plant and equipment	$ 4,120,259	$ 5,181,444
Franchises, leases and goodwill	3,000,000	3,000,000
Cash	30,908	1,428,041
Accounts receivable	451,305	922,569
Bills receivable	249,864	1,147,519
Investments	170,329	27,127
Inventories	2,498,098	1,453,465
Total assets	10,561,478	13,186,347
Capital stock	6,000,000	6,000,000
Bonds	1,420,000	1,345,000
Accounts payable, etc.	2,148,417	1,188,881
Reserves	294,289	3,546,103
Profit and loss balance	698,771	1,106,362

The arrears on the preferred stock, amounting to $3\frac{1}{2}$ per cent. were paid up, and the regular dividend at the rate of 7 per cent. for the year was paid. The president, D. Lorne McGibbon, stated that during the year exchange paid on raw sugar purchases amounted to $976,302, as compared with $115,000 the preceding year. The report also gives "a few sugar facts," showing that prices in Canada, after making allowance for duty, extra freight and exchange, are lower than in the United States; how the company's sales expanded enormously in 1920, after a small decrease in 1919; illustrating the output of sugar in Cuba and in the world; and comparing the price of refined sugar in New York and Montreal.

Canadian Woollens, Ltd.—The first annual meeting of the shareholders of the Canadian Woollens, Ltd., was held on August 9 in Peterboro, Ont. The balance sheet, report and profit and loss account for the year ending June 30, 1920, was presented and adopted. The president, during his remarks, intimated that the business of the company was so satisfactory that a dividend on the common stock might be looked for in the near future. The following board was elected: A. O. Dawson, president; W. K. George, first vice-president and chairman of the board; F. B. Hayes, 2nd vice-president; L. Bonner, Wm. Hanson, G. D. Perry, F. R. Sweeney.

The report shows the results of the company's operations in the first twelve months of its existence, and indicates that the period has been a successful one. Profits from operations, after deducting all manufacturing, selling and general expenses and providing for government taxes, but before making provision for depreciation, interest on bank loans and organization expenses, etc., amounted to $599,072. Provision for depreciation of buildings and machinery $107,188, interest on bank loans $25,999, organization expenses $10,008, reduction of investments to market value $12,650, and provision for employees' pension and insurance fund $20,000, when deducted, left net income for the year of $423,227. After deducting preferred dividends net earnings were $300,727, indicating over 17 per cent. earned on the 17,500 common shares.

The balance sheet shows the company to be in good financial position. Total assets aggregate $5,581,208. Current assets are given at $2,346,394 as against current assets amounting to $1,290,174, a surplus of current assets (net working capital) of $1,056,220. The balance sheet is shown in full, as follows (comparisons in this first report, of course, being impossible):—

Assets.

Properties, etc.	$1,789,081
Trade mark, goodwill, etc.	1,440,038
Current Assets:	
Inventories	1,424,231
Victory bonds	265,248
Investments in other companies	5,000
Accounts and bills receivable	633,924
Cash on hand and in bank	17,991
	$2,346,394
Deferred Charges:	
Prepaid taxes	4,797
Total	5,581,208

Liabilities.

Preferred stock	$1,750,000
Common stock	1,750,000
	$3,500,000

Current Liabilities:	
Bank of Montreal	290,067
Tax provision	240,005
Accounts payable	352,340
Bills payable	190,243
Accrued wages, commission, etc.	25,661
Approximate provision for government taxes in respect of Canadian Woollens, Ltd., profits	191,858
	$1,290,174
Reserve for depreciation	465,307
Reserve for Emp. fund	20,000
Surplus	423,227
Dividend on preferred stock	122,500
	$5,581,208

BRITISH EMPIRE TRUST COMPANY (LIMITED)

DIVIDENDS MAINTAINED AND CAPITAL MORE THAN INTACT

INDUSTRIAL BANK BUSINESS.

The NINETEENTH ORDINARY GENERAL MEETING of the ritish Empire Trust Company, Limited, was held on Tues ay, July 20th, at the Liverpool-street Hotel, London, Eng ind.

The SECRETARY (MR. H. BOWER CLARK, A.S.A.A., .C.I.S.), read the notice calling the meeting and the uditors' report.

MR. J. DAVIDSON (managing director), who presided, id:—Gentlemen, the Chairman of the company, Mr. Horne ayne, regrets that owing to ill-health he is unable to be resent to-day. He has, however, sent me a speech which, ith your permission, I shall have much pleasure in reading: The year under review has been marked by a heavy and ersistent decline in the market value of securities gener lly. Nevertheless, I am glad to say that, after writing our ivestments down to the lowest market values and provid g in full for all depreciation, we are able to recommend you authorize the payment of the same dividends on the Pre rred and Deferred shares as last year—namely, five per nt. and seven per cent. respectively. I think the sharehold s will agree that it is satisfactory to receive these divi nds and to know that the capital of the company is intact ith a margin of over £18,000, notwithstanding the heavy ll in prices.

"The accounts are clearly stated and do not, I think, ll for any explanations. If you will turn to the profit and ss account you will see that the ordinary income of the mpany from trusteeships, registrarships and secretary ips, and from interest and dividends on investments, is ell maintained. It shows an improvement of £6,000 over at of the previous year and had it not been necessary to ovide the item of £12,647 on the other side of the account r depreciation, the proceeds available for distribution would ive amounted to over eight per cent. on the Preferred dinary and ten per cent. on the Deferred Ordinary ares. The only sound policy, however, is to provide lly for depreciation in values. The effect of so doing is, course, to restrict for the time being the amount avail le for dividends: on the other hand, the credit of the com iny, which is so important from the point of view of obtain g and carrying through future business, is maintained on i unquestionable basis. Another advantage which results om writing down of investments is that, while the intrinsic lue of the securities remains unimpaired, the lower values aced upon them increases the yield proportionately, thus creasing the company's revenue. I can confidently assure e shareholders that the position of the company is stronger -day than it has been at any time since 1914.

Financing of Industrial Undertakings.

"At an annual meeting some years ago I ventured to recast that on the conclusion of hostilities there would sult a tremendous demand for capital for industrial pur ses and your company, in anticipation of this demand, de led to adopt as part of its programme the carrying on of e business of an industrial bank. My forecast has proved be correct. During the past 12 months we have been oded with financial proposals from industrial undertakings many and diverse kinds. Your managing director has vestigated a large number of these proposals at an im ense expenditure of painstaking labor, and has taken and are financing those which, after careful consideration, peared to us to offer solid ground for safe investment and ture profit. This branch of our business is [illegible] satisfactorily, but present conditions are still far from normal, and it is necessary to proceed slowly and with great caution. We find that applications for capital which come under our notice may be divided into three classes, firstly, those for the recapitalization, frequently involving amalgamation of existing enterprises; secondly, those for the starting of new enterprises; and thirdly, those for additional capital for existing enterprises. With regard to the first class—viz., recapitalization and amalgamation, there are a large number of enterprises whose whole position has been changed by conditions arising out of the war, and which are justified in recapitalizing, but there are a still larger number which seek recapitalization upon the strength of large profits earned during the war or on an increase in the value of their assets, or on the two combined. I fear much money [illegible] inflated values, and that dividend expectations founded upon profits due to war conditions or exceptional opportunity can only result in disappointment.

"With regard to the second class—viz., the financing of new enterprises, our experience is that in many cases, the estimates of anticipated profits are based upon a level of prices obtainable only in consequence of scarcity arising from restricted output consequent in some cases on the interruption of the supply of raw materials from usual sources, and in others on the dislocation of industry in other parts of the world from which competition must sooner or later recommence. It is evident that the greatest caution is necessary in the financing of such enterprises. With reference to the third class—viz., the furnishing of additional capital for existing undertakings, there are many sound companies to whom further capital is an absolute necessity on account of the higher wages they pay and the higher cost of materials, apart from extending their business. It is to this class of enterprise that your company is devoting its attention and seeking to be of assistance, and in doing this we believe that we are making the best use of our resources in the interests of British trade. I am satisfied that for many years to come there will be no lack of opportunity of doing remunerative business of this class. I have no hesitation in encouraging you to look forward with confidence to the future progress and prosperity of your company."

No questions being asked, MR. DAVIDSON then moved "that the accounts for the year ended April 30th, 1920, and the reports of the directors and auditors thereon be received and adopted."

MR. T. BLUNDELL BROWN seconded the motion, which was unanimously carried.

The Dividends.

The CHAIRMAN then proposed: "That the payment of the dividends on the Five per Cent. Cumulative Perpetual Preference shares for the year be approved and that the following dividends, viz., at the rate of five per cent. and three per cent., making eight per cent. per annum on the Employees' Profit Participating shares from the date of allotment to April 30th, 1920, five per cent. per annum on the Preferred Ordinary shares, and seven per cent. per annum on the Deferred Ordinary shares, be and the same are hereby declared in respect of the year ended April 30th, 1920, payable [illegible]."

MR. N. S[illegible] seconded the [illegible].

On the [illegible] GENERAL F. [illegible] director [illegible] Sir W[illegible] were re-elected [illegible] and C[illegible] RIDGE S[illegible].

DR. S[illegible]

MR. [illegible] the [illegible]

Saguenay Pulp and Paper Co.—The 1919 and first annual report of the company and its subsidiaries, which company was formed a year or so ago to take over the several companies represented by the North American Pulp and Paper Companies Trust, has made its appearance. The report, which covers the year ended December 31 last, indicates an improved position of the new company over the old gross revenue in the period having amounted to $5,416,545, as compared with $4,268,368 as shown in the 1918 report of North American Pulp. After bond interest net earnings amount to $464,636, against $442,227 for the old company in 1918, while surplus of $33,651 compares with $38,005 for North American Pulp in 1918, the showing being lowered by way of creation of a reserve against depletion of timber limits of $263,001, and writing off of surplus of coal used in alterations of the Chandler mill, of $149,067.

Profit and loss account, Saguenay Pulp and Power Co. and subsidiaries, 1919, compared with profit and loss account, North American Pulp and Paper Companies Trust, 1918:—

	Saguenay, 1919.	N.A. Pulp, 1918.
Gross revenue	$5,416,545	$4,268,368
Ap. expense	4,093,280	3,283,199
	$1,323,265	$ 985,169
Other income	311,857	501,559
Total income	$1,635,122	$1,486,728
General expenses	219,945	287,198
Net income	$1,415,177	$1,199,529
Bond, etc., interest	950,540	757,302
Net earnings	$ 464,636	$ 442,227
Timber reserve	263,001	......
*Surplus coal	149,067	......
Miscellaneous items	18,917	......
Sinking fund	......	261,730
Amortization	......	142,492
Surplus	$ 33,651	$ 38,005

---

*Used at Chandler mill during alterations.

The balance sheet of the two companies is less easy to compare, but the report currently being dealt with shows general improvement in fiscal position. Total assets are given at $25,197,483, against $24,254,696 in the 1918 North American Pulp report. The working capital position of the Saguenay Co. is good, current assets of $4,202,086 exceeding current liabilities of $3,954,108 by $247,978, this amount representing net working capital available. In the 1918 report of North American Pulp current assets of $3,746,914 were exceeded by current liabilities of $4,687,099, by $940,185. Working capital compares as follows:—

	Saguenay, 1919.	N.A. Pulp, 1918.
Current assets	$4,202,086	$3,746,914
Current liabilities	3,954,180	4,687,099
Net working capital	$ 247,978	*$ 940,185

---

*Surplus of liabilities.

Barcelona Traction, Light and Power Co.—Earnings of the company show continued improvement, according to the June statement just issued. Gross earnings from operation for the month totalled 2,523,998 pesetas, an increase of 551,386 compared with the same period last year. Operating expenses for June were higher than those recorded for the month of May, being 905,811, compared with 880,281 pesetas. The table is as follows:—

	Gross. (Pesetas.)	Net. (Pesetas.)	Net inc. (Pesetas.)
March	2,535,815	1,695,141	751,189
April	2,676,148	1,767,913	782,874
May	2,647,592	1,767,311	628,785
June	2,523,998	1,618,187	488,939

RECENT FIRES

Business Section of Town of Port Coquitlam, B.C., Suffere Loss of $100,000

Chatham, N.B.—August 9—The Northumberland Garage A. K. Cole's blacksmith shop, the Kerr House and a bar were damaged by fire. The total loss is $25,000, covered by insurance.

Life Underwriters' Association 1920 Convention

Canadian Association of Life Agency Officers Organized — Improvements Made in Insurance Legislation, But Many Defects Still Found — Association Has Played Its Part Better Than Has the Agent — Taxation, Succession Duties, Business, Group and Income Insurance are Discussed at Ottawa Convention

(Staff Correspondence.)

Ottawa, August 19, 1920.

LEGISLATION, taxation and other financial questions affecting life insurance and the work of the agent, were coupled with methods of organizing the field and selling life insurance, in the discussions at the 14th annual convention of the Life Underwriters' Association of Canada, held in Ottawa, August 18 to 20. Several papers were read at the meetings, some of which will be covered later in *The Monetary Times*. The customary reports of committees were also presented and discussed. Prominent visitors at the convention were Haley Fiske, president of the Metropolitan Life, of New York, who has just been making a tour of the Canadian west along with several other officials of the company; Phillip Burnet, president of the Continental Life, of Wilmington, Delaware; Sir Henry Drayton, minister of finance; and G. D. Finlayson, Dominion superintendent of insurance.

On Tuesday, August 17th, a meeting of the executive committee of the association was held. Several companies, including the Metropolitan Life and the North American Life held conferences of their own agents on the same day for the discussion of subjects of special interest to them.

Life Agency Officers' Association

Field officers of companies doing business in Canada [illegible] met on Tuesday, and organized a "Canadian Association of Life Agency Officers," which has a constitution and objects similar to the "Life Agency Officers' Association" in the United States, which was organized in [illegible] and has grown rapidly since that year. The proposal to have a body of this kind in Canada was first discussed at a meeting held in Toronto on January 16, 1920, when the following committee was appointed to consider the basis and scope of such an organization: A. Gordon Ramsay, [illegible] superintendent, Canada Life; Geo. W. B[illegible], superintendent of agencies, Equitable Life; W. [illegible], [illegible] Canada, Standard Life; C. E. Robertson, superintendent of agencies, Dominion Life; and S. C. Tweed, superintendent of agencies, Mutual Life of Canada. This committee met on April 13, and it was decided to hold an organization meeting in Ottawa on August 17. A constitution was also drafted.

The Ottawa meeting, after hearing an address by Phillip Burnet, proceeded with the organization work. It was decided to adopt the name suggested by the committee, as above, though some alternatives were discussed. After one or two slight amendments, the draft constitution was adopted, and the delegates passed the following resolution:—

"Whereas the deliberations of those in attendance at the informal meeting in Toronto on the 16th January, 1920, indicated the desirability of forming an association of the officials of the legal reserve life insurance companies doing business in Canada, now therefore be it resolved that we do hereby form ourselves into a definite organization of agency officials of legal reserve life insurance companies, and we do hereby agree to be governed by the rules and by-laws to be hereafter adopted."

Constitution

The main clauses in the constitution as adopted are:—

"The object of this association shall be the consideration and interchange of opinions upon matters pertaining to the betterment of the selling department of life insurance, through the improvement in the quality of men who enter the business, through the elimination of those who bring discredit to it, through a study of methods of selection and training of life insurance [illegible], and through the [illegible] of the business which is placed on the books.

"The membership of the association shall be composed of legal reserve companies doing business in Canada [illegible] agency officers and such other officers as the company member may wish to have present shall be delegates at the meetings of the association. No company member shall have more than one vote.

"New members may be hereafter admitted to the association by vote of the executive committee.

"Any member shall be dropped from the roll of membership upon failure to pay dues [illegible] notice thereof.

"The annual membership dues of the association shall be twenty-five dollars, payable upon admission to membership, and [illegible] thereafter.

"There shall be [illegible] of the members of the association [illegible].

"The [illegible]

[illegible]

"[illegible]

"The [illegible]

ship a secretary-treasurer, who shall likewise hold office for one year or until his successor is chosen.

"The secretary-treasurer shall receive and carefully keep all the moneys of the association, and disburse the same as may be directed by the association or the executive committee. We shall keep the records of all the members of all meetings of the association. In case of special meetings, the business for which the meeting is called shall be stated in the notice.

"The executive committee shall appoint an auditing committee of three members of the association, to audit the expenditures and to report thereon at the annual meeting and at such other times as the association or executive committee may direct.

Meetings

"The annual meeting shall be held on call of the executive committee, written notice of which shall be mailed in due time to reach members not later than thirty days prior to such meeting. Eight members shall constitute a quorum.

"Special meetings may be called by the chairman or on the written request of eight members he shall issue a call for such meeting, and not less than ten days' notice thereof shall be given.

"Amendments to these by-laws may be made by a two-thirds vote of the members present at any meeting of the association, provided that a copy of such proposed amendment be filled with the chairman of the executive committee, who shall cause a copy thereof to be mailed to each member as provided in the call for the meeting."

The following executive committee for the Agency Officers' Association was appointed: A. Gordon Ramsay, president; C. E. Robertson, secretary; A. E. Corrigan (managing director, Capital Life); C. H. Carpenter (superintendent for Ontario, Great West Life); H. Kay (manager for Canada, Metroplitan Life); V. Archambault (of the La Sauvegarde Life). The question of meetings and subjects was left to the committee. Mr. Ramsay stated that nothing definite had as yet been planned, but one subject he had in mind was the keeping of business on the books after it had been secured. Phillip Burnet suggested semi-annual meetings, at which the papers and reports presented at the annual meetings could be discussed and criticized.

Life Underwriters' Meetings

The program of the Life Underwriters' Association commenced on Wednesday with a few words of welcome from Mayor Fisher, of Ottawa, and from W. T. Lamb, president of the Ottawa Life Underwriters' Association. These were responded to by T. J. Patton, vice-president for Ontario and by C. C. Gauvin, vice-president for Quebec. The president, E. S. Miller, spoke briefly, expressing his appreciation of the honor conferred upon him last year.

Committee Reports

J. B. Hall, reporting as chairman of the executive committee, reviewed the subjects which had occupied the attention of the executive during the year, including soldiers' insurance, the membership campaign, educational courses and taxation. J. H. C. Graham, general secretary-treasurer, stated that the membership is 1,927, with 41 local associations reporting. During the past five years, he pointed out, membership has increased from 757, with 3 local associations, to 1,927, and income from $2,500 to $18,000. John A. Tory, in submitting the report of the legislative committee, described the important developments which have taken place in Ontario. The Dominion government had proposed a federal licensing law, to which the underwriters had expressed objection unless provincial licenses were abolished; this legislation is still pending, however. He recommended a campaign in Quebec to obtain redress from the numerous taxes levied on companies and agents, by both the province and municipalities there. In Manitoba there is a movement on foot to license agents, and in the same province during the year the efforts of the association had prevented the inclusion of life companies' employees under the scope of the Workmen's Compensation Act.

F. T. Stanford, for the publicity committee, pointed out that their activities were limited by lack of funds.

D. E. Kilgour, actuary of the North American Life, spoke on behalf of the Life Officers' Association of Canada, and referred to the numerous occasions on which co-operation was useful. "The Life Officers' Association is not a close corporation," he said, "but is composed of chief executive officers of life insurance companies in Canada. Its aim is to promote the best interests of the business. This year, meetings of the medical directors and actuaries were held, with a view to the standardizing of sub-standard risks. We are trying to secure a uniform practice for this class of business, for we feel that every risk will some day be insurable." There is already such a uniform classification for occupational risks, he pointed out. "I am optimistic about the future of life insurance, but there are obstacles ahead," concluded Mr. Kilgour. There is always the possibility of government insurance, he said, but whatever happens the insurance man, from the chief executive to the humblest agent, must recognize the fact that he is first of all the servant of the policyholder and must live up to this obligation.

Responsibility of the Association

H. St. C. Clayton, of Sherbrooke, Que., led the discussion on "The Association's Responsibility to the Agent." It is responsible, he said, first for legislation affecting insurance; one example of room for action in this regard was the Quebec law which made it impossible for a married woman to insure in favor of her husband. A second responsibility is that of encouraging co-operation among agents, to eliminate rebating, switching, etc. J. E. Matthews, of Brandon, Man., speaking on "The Member's Responsibility to the Association," said that it was the duty of every one who carries a rate-book to become a member. Then he should not hesitate to report cases of rebating, etc., and the association should not hesitate to take action on points such as this. A standard of fitness or qualification for the agent was desirable, said Mr. Matthews. In Manitoba, he pointed out, there is now no one to refuse a license. "The greatest parasite on the insurance business at the present time," said Mr. Matthews, "is the bank manager in the small towns, who picks of the good business, sometimes using pressure to do so."

In a discussion of these papers, J. B. Hall, of Toronto, pointed out that in Ontario the new legislation which would go into force on September 30 would require a separation of licenses and the signing of a new application form. In this way all undesirables can be eliminated. Mr. Burke, of Quebec, stated that the association has lived up to its duty better than has the member to his. Many of the best agents would not have entered the business if the association had not raised the standard. Regarding licenses, he thought that the provincial superintendents should not issue a license to anyone who cannot get a bond from a guarantee company.

Status of the Modern Agent

"The Underwriter of the New Era," was the subject of an address by J. Stanley Edwards, president of the National Association of Life Underwriters of the United States. He compared the work done by the association there with that done by the Life Underwriters of Canada, and found much in the latter which could be copied in the United States. Much attention had been given there, he said, to education, and this was one of the factors which is raising the work to a new standard. Discussing the terms "business" and "profession," he found that the life insurance agent measured up to the latter standard. "In contrast to every other organization of workers," said Mr. Edwards, "life underwriters' associations aim to increase their members' income not by raising fees but by increasing production."

Methods of Selling

In his address entitled "Producing Persistent Policyholders," Phillip Burnet pointed out that in the growth of civilization occupations had become specialized, and services as a result had to be exchanged. "If the great moving principle at the core of civilization is the exchange of services between man and man, then it would follow that the more we strive to serve our fellow men, the more do we work with that great fundamental power and the less does it oppose our efforts." Applying this to the life insurance business, it becomes obvious that the community permits the agent to engage in his work primarily for the benefit which the community expects to derive from his specialized effort. The responsibility which is thus delegated to the agent is thus a great one, and yet there is a tendency on the part of the agent, as his skill increases and his renewal income grows, to make fewer calls and generally to slacken in his efforts. Speaking in reference to selling methods, Mr. Burnet said he had found good results from keeping a record of prospects' birthdays, and calling on them six months before the birthday, pointing out that the rate at which the prospect could obtain insurance would be higher thereafter. "If this is the best time to see a prospect," asked Mr. Burnet, "why should we visit them at any other time? Could not the business be so organized so that every call should be made on these days?" The names of all prospects could be arranged, he thought, so that they could be seen on the days when their rate changed because of age.

Taxation of Insurance Companies

In an address on "The Taxation of Life Insurance," W. B. Taylor, secretary of the North American Life, stated that this subject had not received proper attention from either the federal or the provincial governments. After describing the principles of equitable taxation as defined by John Stuart Mill and other economists, he stated that the present taxation of insurance in Canada was not in accordance with these principles. The fundamentals of the business were not understood by the taxing bodies. A tax on insurance, being passed on to the policyholder, is an indirect tax. Taxation of life insurance is therefore unjust, because the insured, in protecting his dependents, relieves the estate of a possible burden. Mr. Taylor suggested that the co-operation of policyholders might be enlisted in making representations to governments on this point. An eminent taxation authority, he said, had stated that life insurance taxes can be justified only on the ground of expedience.

Thursday's program included discussions of business, industrial, group and income insurance led by H. W. Manning, J. J. McSweeney, F. W. White and E. J. L'Esperance. John T. Cowan, of the Toronto General Trusts Corporation, gave an address on "Succession Duties and Life Insurance." The day concluded with the annual banquet, at which the speakers were Haley Fiske, president of the Metropolitan Life, whose subject was "The Soul of Life Insurance," and Sir Henry Drayton, minister of finance for Canada.

Friday's sessions are scheduled to include the following subjects: "Why I am a Life Insurance Agent," by O. B. Shortly, Toronto; "Histoire vue a vol d'oiseau de l'assurance sur la vie," by M. [illegible], of Quebec; "Producing Persistent Policyholders," by Phillip Burnet, president of the Continental Life Assurance Co., of Wilmington, Delaware; "Uses of the Blue Book," by G. D. Finlayson, superintendent of insurance, Ottawa; "What Life Insurance Agents Should Know," by W. Lyle Reid, Ottawa. Officers will also be elected and new business concluded.

A "Handbook of the Canadian Pulp and Paper Industry" has been issued by the Canadian Pulp and Paper Association. It describes the process of paper making, and discusses the position of the Canadian mills as regards timber supplies, power, markets and earnings.

HARVESTING IN FULL SWING IN WEST

Grain Yield Stated to be Best in Five Years—Manitoba Savings Office Opened For Business—Local Government Board Approves of Sale of Shares of New Bank of Saskatchewan

(Special to The Monetary Times.)

Winnipeg, August [illegible], 1920.

HARVESTING is now in full swing in all parts of Manitoba, Saskatchewan and some parts of Alberta. The grain [illegible] will, from all reports, yield a very generous return, the best in five years. [illegible] conditions have brought [illegible] that farmers thought three weeks ago would not pay for the seed and cost of planting, but which will now [illegible]. Late sown grains will also yield much better than expected, owing to showers and cooler weather of the past ten days. There are excellent crops in Saskatchewan and Alberta along the C.N.R. main line from North Battleford to Edmonton and particularly in the Lloydminster, Vermilion and Vegreville sections, says a recent C.N.R. report. Wheat standing on the fields four feet high is heavily headed, and yields of 40 to 45 bushels an acre will be common. Harvesting is general throughout the west this week. Conditions also continue to be favorable throughout south and along the Saskatoon-Calgary line from Rosetown westward. In the Saskatoon district, where the crops were despaired of during a very protracted dry period there has been a remarkable improvement during the past fortnight and fields that gave promise of but three to four bushels an acre at the end of July will now turn out eight to ten bushels.

Situation Highly Promising

Southern and eastern Manitoba are in the midst of a splendid harvest. Fifty per cent. of the cutting has been done and threshing is now in progress at several points. Portage la Prairie, Gladstone, Neepawa, Dauphin, Carberry, Rossburn, Swan River, Yorkton and [illegible] all report harvesting in full swing under favorable weather conditions. There will be fair to heavy yields of all grains in these famous grain growing districts. Prince Albert and the whole Carrot River country will also have bountiful crops. The general outlook would indicate that nature has again fooled the experts and pessimists by turning the unpromising conditions of a month ago into a highly satisfactory situation. New wheat of this year's crop has already arrived in Winnipeg; thirteen cars received today.

Manitoba Savings Office Opens

The province of Manitoba savings office is now open for business and already large amounts have been received on deposit upon which interest of 4 per cent. will be paid. The board of trustees comprises the following: [illegible] Fisher, Canadian manager, Scottish Co-operative Wholesale Society; J. R. Murray, assistant general manager, United Grain Growers', Limited; S. P. Coffey, [illegible] United Grain Growers', Limited; J. W. McQuat, [illegible]; [illegible] Weir, chairman and [illegible]. The offices are open in Winnipeg at [illegible]. [illegible] offices [illegible] throughout the province.

Sell Shares of Saskatchewan Bank

It is announced [illegible] Local Government Board [illegible] sale of the shares of the new Bank of Saskatchewan. [illegible] market [illegible] ment. [illegible] at a premium of 25 per cent. [illegible] of a [illegible].

BANK BRANCH NOTES

Four New Branches Opened by Sterling Bank—Merchants Bank is Building Large New Branch at Regina—Canadian Bank of Commerce Has Two New Buildings Under Erection in B.C.

The following is a list of branches of Canadian banks which have been opened recently:—

Eganville, Ont.	Home Bank of Canada
Toronto, Ont. (Stockyards)	Bank of Hamilton
Hamilton, Ont. (Gage and Barton Streets)	Bank of Hamilton
Vanderhoof, B.C.	Royal Bank of Canada
Queensville, Ont.	Sterling Bank of Canada
Phelpston, Ont.	Sterling Bank of Canada
Craighurst, Ont.	Sterling Bank of Canada
Minesing, Ont.	Sterling Bank of Canada

Proposed Branches

New buildings at Williams Lake, B.C., and West Summerland, B.C., are being erected by the Canadian Bank of Commerce.

A new building is being erected by the Bank of Nova Scotia on Charlotte St., Sydney, N.S.

A building, costing $175,000, is being erected at Regina, Sask., by the Merchants Bank of Canada.

The branch of the Standard Bank of Canada at Hillsdale, Ont., which heretofore has been a sub-office to Elmvale, has now been made an independent branch.

Personal Appointments

The Sterling Bank of Canada wish to announce the following changes:—

G. M. Phemister, formerly at the St. Williams branch, is now manager at Port Rowan, Ont. R. E. Mevison has been transferred from the head office to St. Williams as manager, in place of Mr. Phemister. J. A. Bush, another head office officer, is now acting manager at Auburn, Ont. F. Walton is appointed permanent manager at the Keswick branch. N. J. Stevenson, St. Catharines' branch, is now acting manager at Jordon Station. A. T. Smyth is now holding the position of acting manager at Kelvington, Sask., having been transferred from Winnipeg, Man. W. S. Cook, formerly at Uxbridge, is now manager of the Myrtle Station branch.

A. L. Windsor, for the past year and a half manager of the Ingersoll, Ont., branch of the Merchants Bank of Canada, has been transferred to Sherbrooke, Que.

G. A. Patterson has been appointed manager of the Sterling Bank at Stayner, Ont.

K. E. Brookes has been made manager of the Sterling Bank at Dungannon, Ont.

A. G. Clark has taken over the management of the Sterling Bank at the Fort Erie, Ont., branch.

E. W. Lamprey, former manager of the Bank of Toronto in Kitchener, Ont., has been appointed manager of the branch at Vancouver.

A. E. Taylor, for the last nine years manager of the Canadian Bank of Commerce at Windsor, Ont., has been promoted to the position of assistant general supervisor of the bank. W. J. Lynch, of Medicine Hat, succeeds Mr. Taylor as manager of the Windsor branch.

CANADIAN BUSINESS FAILURES

The number of business failures for the week ended August 12, 1920, as reported by Bradstreet's, is 14, as compared with 15 in the previous week, 6 in the same week in 1919, 5 in 1918, 13 in 1917 and 25 in 1916.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13½ pm	13⅝ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.1150	$4.1250	....
Cable transfers	4.1250	4.1350	....

New York quotations of exchange on European countries, furnished by the National City Co., Ltd., as at August 19, 1920, are as follows: London, cable, 361½; cheque, 360¾; Paris, cable, 7.15; cheque, 7.14; Italy, cable, 4.74; cheque, 4.73; Belgium, cheque, 7.65; Swiss, cheque, 16.65; Spain, cheque, 15.20; Holland, cheque, 3[illegible].00; Denmark, cheque, 15.00; Norway, cheque, 15.00; Sweden, cheque, 20.60; Berlin, cheque, 2.02; Greece, cheque, 11.50; Finland, cheque, 3.15; Roumania, cheque, 2.30.

OFFICER OF LIFE UNDERWRITERS' ASSOCIATION

The president's chair of the Life Underwriters' Association of Canada for the years 1920-21 will be occupied by Mr. O. B. Shortley, formerly manager of the Metropolitan Life Insurance Company in Ottawa, and now manager for the Metropolitan for Central Ontario, and resident in Toronto.

Election of officers resulted as follows:—Honorary president, E. S. Miller; president, O. B. Shortley; vice-presidents, S. E. W. Keenley, of British Columbia, W. L. McNeth, of Alberta, W. Underwood, of Saskatchewan, J. W. Scott, of Manitoba, T. E. Holmes, of Ontario, W. O. H. Percey, of Quebec, Robert Reed, of New Brunswick, F. G. Taylor, of Nova Scotia, J. O. Hyndman of Prince Edward Island, and J. A. McKenzie of Newfoundland; honorary secretary, W. T. Lamb, of Ottawa.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended August 19, 1920, compared with the corresponding week last year:—

	Week ended Aug. 19, '20.	Week ended Aug. 21, '19.		Changes.
Montreal	$130,360,498	$108,785,870	+	$21,574,628
Toronto	91,468,728	77,641,996	+	13,826,732
Winnipeg	45,668,369	33,110,928	+	12,557,441
Vancouver	17,240,712	13,205,128	+	4,035,584
Ottawa	7,664,925	8,345,944	—	681,019
Calgary	7,359,928	6,350,128	+	1,009,800
Hamilton	7,044,311	5,802,859	+	1,241,452
Quebec	6,793,174	5,315,871	+	1,477,303
Edmonton	5,174,856	4,849,398	+	325,458
Halifax	4,879,781	4,164,290	+	715,491
London	3,858,229	3,023,577	+	834,652

BRITISH LABOR'S CONSTITUTIONAL CHALLENGE

ORGANIZED labor in Great Britain has [illegible] unequivocal stand against war with Russia. On August 13 labor and trade union executives organized a "council of action" with power to call for [illegible] form of withdrawal of labor so far as necessary to prevent military or naval operations against Russia. J. H. Thomas, M.P., pointed out that this was a challenge to the whole constitution of the country. W. Adamson, chairman of the parliamentary labor party, said that [illegible] interference with the government of other people [illegible] tolerated. "We believe," he said, "in the [illegible] right of any nation to choose its own form of government."

The labor party's view of the political situation may be wiser than that of the government. Some of the principles which it upholds seem thoroughly in [illegible] the North American viewpoint. Secret diplomacy, [illegible] public opinion is so strongly [illegible] undemocratic government could [illegible] make mistakes only too often, [illegible] the judgment of a group to be [illegible] representatives of the nation as a whole.

What is significant, however, [illegible] the action of the British labor party [illegible] new authority, to which the members [illegible] port, in opposition to the government. [illegible] not only industrial but political [illegible] to enforce the nationalization of the [illegible] tion to the expressed wishes of the people, [illegible] economic action. Its industrial power [illegible] to prevent war with Russia; for [illegible] cut off France's coal supply if [illegible] to send coal to Russia. The purpose [illegible] political, and the "council of action" is, therefore, a [illegible] body, not subordinate to the constitution [illegible] with it and guaranteed the support of the labor party. "I tell you solemnly and seriously," said [illegible] British labor leader, "that you [illegible]

[illegible] the House of Commons [illegible] to act permanently as a [illegible] It is, therefore, the method rather than the view of labor which is now meeting with [illegible] The fact that the question of a war with Russia [illegible] settled in the negative [illegible] to take such a [illegible]

THE RAILROAD RATE CONTROVERSY

THE United States [illegible]

[illegible]

had to be met from the national treasury, and no return was deceived on the stock which was purchased at a considerable cost. The people of Canada in no uncertain voice demanded the acquisition of these lines. The whole resources of the country are pledged for their maintenance. Will this national road be allowed to go to pieces merely because the Canadian Pacific is still able to outpoint its rival? To meet the deficit from the national treasury is to admit that public ownership of the railways is a failure.

It is a strange camp which stands opposed to the railways in the present hearing. The west, the advocate of "fair play to all and special privilege to none," wants railway service below cost, boards of trade, who fail to see that the transportation service in which they are so vitally interested cannot be adequately given at present rates,—manufacturers who would make the railways, like themselves, the recipients of a bonus from the public,—and the public as a whole, regarding the railways as foreign institutions levying an annual tax upon the country, rather than a vital part of its organization,—all these are represented at Ottawa.

There are three methods of dealing with the situation. The first is to leave the rates as they are, meeting the deficits of the Canadian National to keep it in operation until such time as the Canadian Pacific is dragged down to its level of inefficiency. The second is to grant an increase just sufficient to cover the increase in wages just granted. The third is to raise rates to a level sufficient not to permit of extravagance, but to enable the Canadian National to pay operating expenses and fixed charges at least, and to enable all the roads to give such service as will be necessary to meet reasonable demands. The present situation is unbalanced. The railroads, like any other company which would offer to do business below cost, are swamped with business on which they are continually losing money. Far better to cut off a part of that traffic by raising rates, relieve the taxpayer of his present annual bill of several dollars per head of population, and place shippers in a position to demand good service, without an apology, knowing that it is good service they are paying for.

EARNING CAPACITY OF THE AVERAGE MAN

HOW the earnings of the average man rise and fall through his life, and just when he should be best able to make provision for his declining years, is shown in a chart recently published by the National City Company. Earnings are divided into three grades. First, there is the "line of dependency," which is passed shortly after the age of twenty, and down to which earnings again fall at about sixty-three. Second, there is the "line of comfortable living" extending during the ages twenty-five to forty, and fifty-two to sixty-three. Finally there is the "line of maximum earning power," which is reached from forty to fifty-two.

These calculations are, of course, only approximate. Variations will be found not only in the case of individuals, but also with groups of individuals occupying a similar section in life. The unskilled worker, for instance, attains to his maximum earning power much earlier than the average, because his earnings depend upon his physical ability. More skilled workers do not reach their maximum until somewhat later, when a certain amount of experience has been acquired, but before the physical powers are materially affected. Clerical workers may retain their greatest earning power until comparatively late in life. The highly trained business or professional man does not commence to earn until much later than other workers; for some time thereafter his earnings may scarcely equal those of a manual laborer, but so long as he retains fair health and physical power his earnings, being dependent upon practice and experience, should continue to increase.

It is obvious that those who wish to be independent during the later years of their life, if they are sufficiently fortunate to have later years, must make provision for them during the period when their earnings are above the line of dependency. This is, on the average, between the ages of twenty-three and sixty-three, a period of forty years during most of which there is a substantial margin between earnings and the cost of the "necessities" of life. Two forms of saving absorb the vast bulk of surplus earnings. The one is direct investment, whether in real estate for use or for revenue, in the bank for convenience and interest return, or in securities. The second is the more indirect form of life insurance, where an estate is created at once which is large in comparison with the initial investment, and where the total of the premiums, with accrued interest and after making deductions for the cost of carrying the risk and the expenses of operating a life insurance company, are returned at the end of the time specified in the contract. A combination of these forms of investment is agreed upon as the most desirable. Most of us have domestic obligations rather larger than our resources would meet, and for this purpose some life insurance is required. The bank, loan company or other depository is the most convenient for ready money, possibly we may wish to own some real estate, and securities in almost endless variety are available for the balance.

For the first time in three years the income of the United States government has exceeded its expenditures. A surplus of $291,227,547 is estimated for the fiscal year ended June 30, 1920. Canada's record is far from being so favorable.

* * * * *

Capital issues in the United Kingdom in June totalled $27,560,000, making a total of £241,000,000 for the half year. This exceeds the total for the whole year 1919, and is just one million less than the figure for the year 1913. War time expansion has developed into a mania of speculation, the eye being turned to the successes of the past rather than to the uncertainty of the future.

* * * * *

Hon. C. C. Ballantyne, minister of marine and fisheries, says that the government merchant marine will be a profitable investment again this year, and 63 additional ships are being built. Great Britain and the United States, on the other hand, are greatly reducing their ship-building work, as less traffic, lower rates and smaller profits are anticipated in shipping circles.

* * * * *

Premier Meighen says it is the financial policy of the Dominion government to go into debt no further, to raise revenue to equal or exceed expenditure, and to reduce the debt. Hon. Mackenzie King asks "what would be thought of any government or party that, under existing conditions, would propose anything different?" It may be that all parties will claim such a policy, but to carry it into effect will be a radical and desirable change in national government

* * * * *

Mayor Church, of Toronto, says that a provincial guarantee of the municipalities' bonds to be issued to purchase the electric railways in the province is not desired by the municipalities. He is assuming, however, that the Dominion government would accept unguaranteed bonds. The provincial guarantee saved the hydro municipalities many thousands of dollars on bonds sold in the open market, and this obligation gives the province the right to make a thorough investigation of any hydro-electric project.

* * * * *

The number of vessels under construction in the United Kingdom at the end of June was 3,578, compared with 3,394 on March 31, and with 2,524 on June 30, 1919. The number of vessels commenced during the quarter ended June 30 decreased, however. The corresponding figures for the United States were 2,106, 2,573, and 3,874; for Japan they were 251, 826 and 282. If shipbuilders in these leading countries fear to risk new capital under present conditions it is safe to conclude that ocean shipping will be duller in the near future.

International Trade

In the transaction of foreign business, knowledge and experience count for much. The experience gained by this Bank at its own offices in such centres of international trade as the following:

London, Eng.	Mexico City
New York	San Francisco

is available for extension of Canadian trade abroad. In addition it maintains a Foreign Department specially equipped to handle all foreign exchange transactions.

LONDON

LONDON, the heart of the Empire, is the centre of the financial world. All roads, all sea-lanes lead to that mighty city of distribution, of import and export, of bankers and financiers.

It is inevitable that Canadians having commercial relations overseas, require banking facilities linked up with Canadian finance. The Union Bank of Canada has two branches in London—at 6 Princes St., E.C., and at 26 Haymarket St., W.

Officers at all our 400 branches will gladly advise on the transaction of overseas business.

PERSONAL NOTES

Major-Gen. S. C. Newburn, K.C., has been elected to the directorate of the Mutual Life Assurance Company of Canada to fill the vacancy caused by the death of Mr. G. B. Ryan, of Guelph. Hon. Mr. Newburn is minister of militia and defence for Canada, and is a member of Newburn, Ambrose, Burbidge and Marshall, barristers and solicitors, Hamilton. He is also a director of the Tuckett Tobacco Company and the Mercantile Trust Company. He was born in Hamilton, Ont., December 4, 1863, called to the bar in 1885 and created K.C., in 1910. His military career includes long service with the volunteer militia in various capacities, starting as a private. He was appointed director-general of the Canadian Defence Force in March, 1917, and in October of the same year was taken into the Unionist Cabinet as minister of militia.

H. C. Samis, formerly inspector of the Union Bank of Canada, resident at Regina, Sask., who has taken over the duties of his recent appointment as assistant manager of the main branch of the Union Bank of Canada in Vancouver, B.C., has been in the service of the institution for eighteen years. He entered the Winnipeg branch in 1902 and was transferred to Yorkton, Sask., in 1903. He was appointed accountant at Yorkton in 1906 and accountant at Virden, Man., in June, 1907, remaining there until March, 1909, following which he held the managership at the following branches: Maryfield, 1909, to December, 1910; Strasbourg, December, 1910, to March, 1913; Maple Creek, Sask., March 1913, to January, 1915, and Swift Current, Sask., January, 1915, to February, 1919. Mr. Samis was appointed inspector with headquarters at Regina in February, 1919, and continued at this post until his latest appointment. The photograph reproduced in these columns last week was that of F. J. Willis, formerly manager of the Union Bank at Swift Current, who has been appointed inspector resident at Regina, Sask. Mr Willis has been in the service of the Union Bank since September, 1904. He commenced at Lumsden, Sask., and became teller-accountant at Pense, Sask., in June, 1908. In September, 1909, he was appointed to a similar position at Milestone, Sask., where he remained until August, 1910. Since the latter date he has been manager at the following branches: Lang, Sask., Watrous, Sask., and Swift Current, Sask.

C. E. Neill, general manager of the Royal Bank of Canada, is at present touring western Canada. He will be accompanied part of the time by Mr. Robert Campbell, supervisor of the bank for the west.

Arthur Barry, manager for Canada of the Royal Exchange Assurance, recently returned from London, England. Mr. Barry went to England a few months ago and while there was present at the bi-centenary banquet of the company which was held at the Mansion House, London, on June 22.

W. Moffat, general manager of the Imperial Bank of Canada, is touring the west for the purpose of the inspection of the bank's branches there, and other matters of importance. He is accompanied by Dr. W. Hamilton Merritt, vice-president of the bank, and Col. J. F. Michie, one of the directors.

INDEX TO BUSINESS ACTIVITY

Greenshields and Company's index to business activity in May and June, based on bank clearings and gross railway earnings, with 100 as the average for the same month in 1909 to 1913, is as follows:—

	1920.	1919.	1918.	1909-13.
June	238.8	188.3	165.5	100
May	239.7	200.1	168.9	100

WINNIPEG HYDRO-ELECTRIC SYSTEM

The annual report of the city of Winnipeg Hydro-Electric System for the year ending April 30th, 1920, will be found on another page of this issue.

A study of the report shows that the assets show a gratifying increase of about $1,500,000 as compared with the previous year. The number of consumers increased from 37,809 in 1919 to 39,877 in 1920, all of which goes to show that the service which is afforded by the System is fully appreciated by the citizens.

In spite of the fact that like all other public utilities operating costs must have gone up considerably, the report shows a surplus of $180,279 earned on the 12 months' operations as compared with $52,881 the previous year.

Since 1918 there has been expended on development and extensions the sum of $1,500,000, all of which has been drawn from the reserve fund.

The recapitulation which follows shows that the financial position of the System during the past year has been materially strengthened and reflects credit upon those who are responsible for its management.

For Year Ending April 30.	Total Assets.	Total Reserve.	Gross earnings.
1913 . . .	$ 6,623,663.56	$ 20,436.52	$ 545,644.18
1914 . . .	7,847,501.39	360,901.50	867,621.47
1915 . . .	8,181,372.78	640,213.72	976,347.50
1916	8,630,710.80	928,914.92	995,511.37
1917 . .	9,070,627.51	1,273,714.41	1,020,480.25
1918 . .	9,535,173.11	1,615,618.68	1,056,281.88
1919 .	10,243,773.63	1,996,604.79	1,097,196.99
1920	11,763,354.28	2,406,145.18	1,279,469.41

Crops Holding Up Well In The West

Wheat Harvesting Will Be General Next Week — Manitoba and Saskatchewan Have Already Commenced—Alberta a Little Backward—Rust and Hail Have Done Very Little Damage So Far, But There is Still a Possibility of Reduction in Quality From Those Causes

CROP conditions in the west are very satisfactory in view of the weather conditions which have prevailed during the latter part of June and nearly all of July, according to the fifth crop report of the "Manitoba Free Press." The report shows that in Manitoba wheat cutting is general at 22 points and will be general at the remaining 52 shortly; 22 points report average yields of 18 bushels or better, many of these quoting 25 and 30; the lowest yield mentioned is 8 bushels, the highest 40, so the range is sufficiently wide; 45 points need rain to finish filling late wheat and coarse grains, and more than half these points report the need as urgent and damage accruing from the intense heat.

With regard to rust, it is reported present at 41 points out of the 74; only ten points report any considerable damage from it, only one point reports the damage serious. It is evident the rust has come too late to be a serious menace, but will take toll of the late grain.

Hail damage is very slight, as only one point reports it serious and four as considerable. The query as to frost was put in to satisfy a number of inquirers who were apprehensive of some of the nights round the full of the July moon. Every point in Manitoba reported "no frost." Coarse grains are a very mixed assortment and the returns as to flax conditions not very bright. Large numbers of harvest hands are needed, the greatest number for any one point in Manitoba being 300. A number of points report that farmers will not pay the wages asked and are managing amongst themselves. This is possible to some extent this year as crops are not all coming in together as they do sometimes.

Wheat Harvesting General

Wheat harvesting in Saskatchewan is general and 46 out of 110 points report estimated averages of yield of 18 bushels and better. The highest estimate made is 30 and the lowest three; in regard to rain it is wanted at 46 points and practically all of them want it pretty badly for the filling of late wheat and coarse grains; only 16 points report rust and of these 12 report considerable damage already, especially to late wheat; a few points report rust on barley; hail damage is slight and appears to be confined to small areas in districts; one point reports slight frost damage. Coarse grains are similar to Manitoba and run all the way from very poor to excellent, but it is evident the oat and barley proposition in Saskatchewan is still very largely dependent on rain to help filling; flax is much in the same condition, quite a number of points reporting flax seriously injured by excessive heat. The demand for farm help runs very high and runs all the way from 20 to 2,000 at one point.

Wheat harvest will be slightly later in Alberta than in either Manitoba or Saskatchewan, and will hardly be general much before August 23rd. Estimate of wheat yield runs from five to 40 bushels, but 30 out of the 39 points heard from make the yield 18 bushels or better with the 25-bushel crops well in the lead Rain is badly needed, as 23 points out of 38 indicate that unless there is more the shrink in coarse grains will be serious. No rust is reported from any point in Alberta. It will be remembered that in 1916, when rust was bad in the other provinces, Alberta was largely immune.

There is slightly more hail damage in Alberta than in the other provinces, though it is not very serious even there. No frost. Conditions as to coarse grains and flax are very similar to the other provinces. Demand for labor is large and runs from 20 at one point to 1,500 at another.

All the provinces report winter rye as cut and in stock and at a few points it is threshed. There is a lot of the early barley cut and a small percentage of early oats.

On the whole, this is a mighty good showing on the sample of weather which has been furnished. To a very considerable extent the wheat crop is made as to quantity, though there is still the possibility of reduction in quality from heat, rust and hail.

Fall Wheat Yield

According to figures of the Dominion Bureau of Statistics based on conditions as at July 31 the preliminary estimate of the yield per acre of fall wheat for Canada is 23¼ bushels, as compared with 23¾ bushels last year and with 22½ bushels, the decennial average for the period 1910-19. The yield per acre is, therefore, ¾ of a bushel over average. The harvested area this year is 740,300 acres, as compared with 672,793 acres last year, and the total yield, in round numbers, is 17 million bushels, as against 16 million bushels last year. In Ontario the total yield for 1920 is 15,831,000 bushels from 688,300 acres, an average yield per acre of 23 bushels, as compared with 15,052,000 bushels from 619,494 acres, and an average per acre of 24.30 bushels last year. In Alberta the yield this year is 935,000 bushels as against 640,000 bushels last year, the yield per acre being 24.60 bushels as against 15¾ bushels. In British Columbia the yield is 357,000 bushels from 14,000 acres, as compared with 314,000 bushels from 12,699 acres last year, the respective yields per acre being 25.50 and 34.75.

The total yield of hay and clover in Canada is estimated at 1,2853,900 tons from 10,409,150 acres, an average per acre of 1.25 ton, as compared with last year's record total of 16,348,000 tons. Of alfalfa the total estimate is 388,700 tons for the first cutting, as compared with last year's final total of 494,200 tons.

Condition of Other Field Crops

For spring wheat the condition at the end of July has fallen by 8 points as compared with a month ago, the figure now being 92 per cent. of the decennial average, as against 100, or just average a month ago. The deterioration has been caused by continued dry, hot weather during the earlier part of July in Saskatchewan where more than half the spring wheat crop is grown. In many districts, however, good rains fell about July 22 or 23, just in time to save a large proportion of the crops. The good effect of these rains should be reflected in the next report. In Saskatchewan the condition both for wheat and oats is 89, as compared with 100 last month and 73 at the end of July, 1919. In Manitoba the condition for spring wheat is 94 as against 103 last month and 92 on July 31, 1919, oats being 92 as against 102 in June and 92 in July, 1919. In Alberta spring wheat and oats are 98, as against 100 for wheat and 98 for oats last month and 70 for both crops in July last year. In the other provinces the condition of wheat and oats is as follows: Prince Edward Island—Wheat 102, oats 94; Nova Scotia—Wheat 96, oats 97; New Brunswick—Wheat and oats 99; Quebec—Wheat 102, oats 105; Ontario—Spring wheat 95, oats 105; British Columbia—Spring wheat 95, oats 96. For all Canada the condition of other crops in percentage of the decennial average is as follows, the figures for last month and for July 31, 1919, being given in brackets: Barley 95 (98 and 85); rye 95 (98 and 88); peas 102 (96 and 92); beans 103 (95 in 1919); buckwheat 101 (94 in 1919); mixed grains 105 (99 and 89); flaxseed 93 (74 in 1919); corn for husking 95 (86 in 1919); potatoes 104 (98 and 88); turnips, etc., 95 (88 in 1919); fodder corn 86 (93 in 1919); pasture 96 (94 and 93).

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

Ontario Conditions

Weekly reports to the Ontario Department of Agriculture and summarized as at August 17, 1920, reveals the following results:—

The general success of the cereal crops is one of the leading features of the season. Barley and oats are spoken of by most representatives as being worthy of being classed as bumper crops, and the quality of both these grains is well up to the standard. Unlike fall wheat, the spring grains have plenty of straw. Waterloo speaks of some oats standing between five and six feet high and as thick as they can grow. Straw will be a most welcome commodity after last year's scarcity. Grain cutting started in the New Liskeard district on August 4th on the Demonstration Farm, where a field of O.A.C. No. 3 oats was cut that had matured in seventy-five days.

Fall wheat is threshing out better than was expected by some. Oxford reports, ranging from 25 to 35 bushels to the acre; Huron states that some are threshing from 30 to 40 bushels to the acre, while Welland places yields as running from 25 up to as high as 50 bushels to the acre. As against all this there have been yields running as low as 12 bushels in some parts of the province.

Sugar beets are likely to make a record for generous yield. Just now all classes of roots are making rapid growth under most favorable conditions. Potatoes will also give good results. Prices have already gone as low as $1.25 a bag in Grenville. Essex remarks that while wet weather has delayed threshing it has been good for the corn and tobacco crops. Hay is selling in older Ontario at from $20 to $28 a ton, but Kenora reports that in the north as high as $50 has been paid, while at Dryden $30 a ton was given for hay "right from the field." Dundas says that timothy kept for seed is yielding well. Grey states that buyers have been going through the county paying $15 a bushel for sweet clover seed. One man there with seventeen acres has been showing a stalk from a field seeded this spring that measures 3 feet 7 inches in height. Peterboro places the yield per acre of sweet clover, in that county, at from 10 to 12 bushels per acre.

Apples are plentiful, especially the fall varieties. Wentworth reports that the Hamilton market is being flooded with early apples. Huron says that buyers are now offering $1.50 a barrel for apples under the tree. Peaches are being marketed, and will be fairly plentiful. Lincoln states tomatoes as being a glut on the market. Live stock continue in good general condition owing to the favorable state of pastures. As an exception, Prescott and Russell reports a few young cattle lost from blackleg.

Waterloo says that a number of farmers are speaking of buying stockers as there is going to be a good supply of feed for carrying them over winter, especially of silage and spring grains.

The milk flow continues to be strong for the season; Essex claims that it is practically as good as in June, but Oxford states that many dairy cattle have about finished their lactation period. Cheese sold in Glengarry during the week at 25¾c. a lb. for colored and 26⅛c. for white. Hogs are being marketed steadily, many being rather light. Norfolk says brood sows are scarce.

In the counties where the Hessian fly appeared this season there is a disposition to sow less fall wheat—or, if not less, to sow later than usual. Elsewhere a normal acreage is likely to be put in, although a bigger area is expected in the Port Arthur district. Middlesex says that farmers will pay more attention than usual to the fields recently attacked by the fly, by plowing down the affected wheat stubble or burning it. Wentworth states that the local farm labor shortage is being further influenced by the western farm excursions.

The "New British Columbia District Telegraph and Delivery Co., Ltd.," has been formed to operate night watch and fire alarm, burglar alarm, fire protection and other services in the city of Vancouver. "Fire Patrols, Ltd.," is amalgamated with the new concern, the organization of which is the result of one or two serious fires in the city.

GROUP INSURANCE CONTINUES IN FAVOR

Business Not Heavy, but Several Important Contracts Closed During Past Month

ALTHOUGH the group insurance business has not been particularly heavy during the past month, several important contracts have been announced. The staff of the Bank of Hamilton have been presented with life insurance policies paid for by the bank under the group insurance plan, covering practically everyone in their service, under which those continuously in their employ for one year and over are insured in steadily increasing amounts until the maximum amount of $3,000 is reached. This insurance, which was arranged without cost to any of those covered, is, in addition to the pension fund, covering aged and disabled members of the staff, as well as widows and orphans.

Newfoundland Company Takes Policy

The Reid Newfoundland Company has covered all its employees by means of a group insurance policy in the Sun Life Assurance Company of Canada. This policy, amounting to over a million and a quarter dollars, is the first to be placed in any part of the British colonies outside of Canada. The Reid Newfoundland Company has specially provided that employees of the company who enlisted for service during the late war will be given full credit for the time of their service with the Empire.

Other Contracts

Insurance of all employees against death or total disability in amounts from $750 to $1,000 has been announced by the Port Arthur Shipbuilding Company. Through a Canadian company the shipbuilding firm has placed a group policy on the life of each employee who has been in the employ of the company for at least six month, is insured immediately for $750, which amount will, on the completion of an additional six months of continuous employment from June 30th, 1920, automatically be increased to a maximum of $1,000. Employees who have not yet been in the company's employ for six months, and all future employees, will receive insurance for $750 six months from the day employed, which amount will automatically be increased to a maximum of $1,000 on the completion of an additional six months' continuous employment. This life insurance is available to every employee, male or female, without physical examination and irrespective of age. It is furnished by the company at no expense to the employee, and does not, in any way, take the place of any payment for accidents under the workmen's compensation law.

P. B. Yates and Co., of Hamilton, Ont., are providing their employees with life insurance under the group scheme amounting to from $500 to $2,000, according to length of service. This insurance is entirely free from any expense so long as the employee remains in the service of the company. An employee is entitled to the minimum amount after six months' service. Jenkins Brothers, Ltd., Montreal, have established a similar scheme.

MONTREAL STOCK EXCHANGE SEAT SOLD

A membership on the Montreal Stock Exchange was transferred on August 7th for the sum of $31,000, the seller being the firm of Oswald Bros., and the buyer, Charles M. Black, of the brokerage house of Greenshields and Company. The price at which the transfer was effected represented a decline of $5,000 from the last recorded transaction, which took place early in the current year at $36,000, when the purchaser was L. A. Wyse, of Thornton Davidson and Company. This was the highest level ever reached in the history of the local institution, although two seats were disposed of at that price on the same day in January last. It was understood in market circles that the membership involved in the latest transaction was one of the three held by the firm of Thornton Davidson and Company, both seller and buyer, it was stated, acting in behalf of clients.

By V. Evan Gray, M.A., LL.B.,
Superintendent of Insurance for Ontario

IN the special fields with which the Ontario Insurance Department is concerned, nearly every separate interest is organized for the expression of the wishes of that interest. These associations are a prolific source of suggestions to the department both in the way of legislation and administration. The department also submits to these associations any suggestions of its own in similar matters with the purpose of testing out the practicability and advisability of any plans it has in mind, and the department will feel sure that, if its proposals have the concurrence of the organized opinion so expressed, they will be of practical value to the business.

I can assure you that the Ontario department intends to make the utmost use of these associations. I therefore urge upon you that you should make this association a genuine and effective instrument by thoroughly discussing here in your meetings any suggestions which a member has to make for the improvement of the business, or for the adoption of new ideas in legislation, and that they be communicated to the general executive and made the subject of a resolution to be forwarded to the department.

Expansion of Life Business

Brief reference must be made to the unprecedented development in the volume of insurance business during the war years. It is not for me to attempt to analyse the factors that have contributed to this phenomenon. It is sufficient to note its extent, and I will give you some figures just received from life insurance companies which indicate the amazing extent of this growth:—

Total amount of business in force in Canada,

End of 1919	2,187 million
End of 1918	1,785 million

Gross new business written and paid for in cash by all companies in Canada,

For 1919	524 million
For 1918	313 million

Increase, 67.45%.

1919 new business was more than half total business in force during the war.

Seven largest Canadian companies doing 75% of total Canadian business show:—

First five months, 1919	90 million
First five months, 1920	122 million

The Place of the Insurance Department

Some believe that the insurance department's duties are restrictive in character, that the department is formed to say what individuals and companies must *not* do. In part, of course, this view is a correct one. Through its restraint of improper investments by life managers, by insistence on adequate reserves, by periodic inspections of the companies to make certain they are solvent, by endeavoring to eliminate the abuses of rebating, misrepresentation, extravagant estimates, and so forth, and by prohibiting contracts of insurance which were not fair to the assured or to the company, the departments have served a great purpose and done a great work. The fact that there has not been a single life insurance failure in Canada at any time is another evidence of the efficiency with which the departments have supervised the life insurance business. But there is another purpose of the governmental departments which is organizing for constructive work and for leadership in the business. By co-operation with the companies and with the field man, and with other persons interested in the business, the department can assist in laying down lines of constructive policy, it can open up new avenues of development, it can assist in popularizing the business and in making even more firm the confidence of the public in the business and in persons who conduct it.

Federal and Provincial Administration

Just in this connection I want to say a word in appreciation of the Department of Insurance at Ottawa. Great credit is due it for its general attitude of co-operation toward the business and the broad lines of constructive policy which the officers of the department have been able to devise and make effective. Possibly the field men know the department best through the "Insurance Blue Book," but I can assure you that its constructive influence in the development of the insurance business has been tremendous.

Doubtless, many of you wonder at the existence of two departments and the apparent duplication of responsibility resulting. It is too long a story to detail historically, but it will perhaps be sufficient to point out that under the provisions of the British North America Act, which is the written Constitution of the Dominion of Canada and its provinces, distinct fields of authority were intended to be mapped out for the exclusive operation of the Dominion and of the provincial parliaments. The Dominion government has the authority to incorporate trading companies, in fact, any company which has for its object matters subject to exclusive legislative jurisdiction of the Dominion or of Dominion-wide character. Under this authority the Dominion is empowered to create life insurance companies and therefore necessarily to provide for the government of these companies. On the other hand, in addition to having a concurrent jurisdiction for the creation and government of insurance companies, the province has, within its sole authority, the regulation of matters of property and civil right within the province. This enables the province to legislate generally in regard to insurance contracts and insurance business, so long as that legislation does not encroach upon the constitution or status of the Dominion company.

Licensing of Agents

An aspect of this matter which particularly concerns the field man is the matter of licensing of insurance agents and the regulation of the business of the field man. It has been generally admitted that this is a matter within the exclusive jurisdiction of the provincial legislatures, and therefore a subject for regulation by the provincial department of insurance. The suggestion was recently made, however, that the Dominion department of insurance should undertake some responsibility in this connection, and a definite proposal was recently made by the Dominion superintendent of insurance that legislation should be enacted at Ottawa, requiring all agents who act for Dominion incorporated companies, to obtain a license or certificate of approval from the Dominion department of insurance. This suggestion has occasioned much discussion among the field men, and quite rightly so, because of its great importance to their business. I think the objections to the duplication of authority and of licenses are so obvious and so important that they were at once appreciated by all life underwriters.

Service for the Fee Paid

There is a very direct and powerful link which connects the field insurance man with the Ontario department of insurance that legislation should be enacted at Ottawa pocket authorizing him to conduct the business of an insurance agent, and the reciprocal part of the link is the fee of three dollars which he pays into the department of insurance to secure this certificate. By this transaction the insurance agent acquires a vested interest in the insurance department, and the department is bound to provide a service in return for the fee received. The licensing law has two distinct purposes:—

THE BOND BUYER
67 Pearl Street New York, N.Y.

First—It intended to confine the business of life insurance agencies and the receipt of commission for business placed to those persons who were giving actual service to the community in exchange for the commission paid. In other words, it was intended to free the business from the evil of the parasite and the rebater who has made the way of every honest life insurance man a difficult and unsatisfactory one.

Second—It was intended that the department should exercise a form of supervision over the business of the insurance man in order that complaints made, either by the public or by competitors, of fraud or improper conduct on the part of an agent in the way of splitting commissions, or misrepresentations, or twisting business, should be entertained by the supervising authority, and some remedy or penalty imposed where the facts of the matter warrant it.

Now I submit that the degree of success with which the department serves these two purposes in its administration of the licensing law is the degree of justification for the licensing system in the collection of the agent's license fees. There is no doubt whatever that the very existence of this licensing system in the province has been effective in ameliorating the situation by preventing the payment of commissions by insurance companies to persons who did not have an agent's certificate. On the other hand, there is no doubt whatever that its provisions have been abused, and that licenses or agents' certificates have been issued to persons who should never have received them. It is necessary, therefore, for the department to establish in its administration a test as to the right of a person to receive an agent's certificate of authority.

Qualification of Agents

That test is, that the agent must have given to the applicant for insurance (that is to the public) real service which entitles him to remuneration or commission for business written. If a person is actually giving valuable service to the public in the sale of life insurance, at expense to himself either in time or in money, so that he has earned his commission, then he is entitled to an agent's certificate; but the man who gives no service, the man who wants to receive a life insurance commission on his own life or on a policy written on the life of a friend, has no right to remuneration or to a certificate. *He* is the man whom the department wishes to weed out of its lists of insurance agents and to prevent from receiving a remuneration which properly belongs to some other legitimate insurance agent who has done the work and is giving his services to the community.

You will be interested to know that at the time of my appointment as superintendent of insurance, Dr. Frank Sanderson, F.I.A., F.A.S., was appointed consulting actuary to the department for the purpose of advising the department in all matters affecting its reconstruction. In general, he has that breadth of vision and matured judgment which only high intellectual attainments and wide business experience can give. It is unnecessary to assure you that these talents will be of splendid value to the department in its reconstruction problems.

As you probably know, it was only on the first of February last that the reorganization of our department was effected, but I can already report to you some changes that have been made in the practice of the department and in legislation.

Clearing the Field of Unlicensed Agents

In the first place, we were advised that many persons carry on insurance business and receive commissions for business written who do not hold a certificate of authority from the department. This condition has certainly been due in part to laxity in the department, and for that reason we do not think it is fair to begin our administration by strict enforcement of the penalties provided by the Ontario Insurance Act for this infringement. It seemed only right and proper such person should be given an opportunity to correct this failure before prosecution is begun or penalty imposed. Our first proceeding was to carefully review the lists of agents who had certificates in other years and to make a survey of these to see if any had, by inadvertance, omitted to renew their certificates. We next approached the insurance companies and secured their cooperation in completing our lists of agents. The companies have promised to send to the department a complete list of all persons to whom they paid commissions on insurance business in the past year. When these lists are received they will be checked up with the departmental list, and anyone who does not now hold a certificate will be given an opportunity of making application in the regular way, or, in the alternative, of being prosecuted for carrying on business without a license.

In connection with this same work, we are endeavoring to ascertain how general the practice has been of issuing a certificate or license to a person who writes only a single risk, in respect of which he has some special influence.

Changes in the Licensing System

Two very important changes were made at the last session of the legislature. The first was the elimination of all firms, partnerships and corporations. This will do away with the practice heretofore in vogue of having business written through the name of a firm holding a single license for many agents in order to escape payment of the license fee, and further, it will give the department an opportunity to better control the operations of the individual agent by threatening cancellation of his license upon charges of improper conduct. Most important of all, it will enable the department to insist on personal qualifications and training for an insurance agent before license can be issued or he can commence business.

The second of these changes was the division of the agents' license into three classes.

In future separate licenses will be issued for life insurance business, fire insurance business, and casualty insurance business, with provision made for the inclusion of a single class in two or more divisions if its special character requires; for example, automobile insurance will probably be included in both the fire and casualty business. The purpose of this change is obvious and largely the same as that before mentioned—namely, to enable the test of personal qualifications to be applied as a condition precedent to the issue of an agent's license.

No Increase in Fee for Life Men

This division of licenses indirectly affects the amount of fee which an agent will have to pay for his license. The fee remains as heretofore $3 for each certificate, but the man who wishes in future to do more than one division of the insurance business, for example, who wishes to do all three—life and casualty business—will be required to pay $3 for each of these licenses, making $9 in all. The matter of the fee to be paid by the life insurance agent has been a matter of great discussion in the departments. Very great pressure was brought to bear to have our department recommend the legislature to increase the amount of the insurance agent's fee, based on the belief that an increased fee would prevent many persons who had no right to an insurance agent's license from applying, and so help clear up the objectionable practice of the present time.

In answer to these representations, however, the department returned a negative answer, because we believe that there was a difference of opinion amongst the agents themselves, and because we believed that the purpose that they had in mind might be accomplished by a more efficient administration of the license law. A more careful scrutiny of applications for licenses and the careful investigation of complaints received from time to time should be effective in clearing up the situation and, until such time as the improved administration proves ineffective for this purpose, we have decided that there should be no increase in the license fee. I may say that there is likely to be an exception in the case of the fire insurance agency, and one of the department's reasons for the division of the insurance licenses into the three divisions was to make possible differentiation in the amounts of the fee charged for the fire business

Insurance Companies Secure Dominion Licenses

Licenses Have Been Issued For That Purpose—Northwestern Mutual Fire Presents New Policy in the Dominion For the First Time—Employers' Liability to Extend Scope

DURING the past month or more six companies, which are not already doing business in Canada, secured Dominion licenses. The Hartford Live Stock Insurance Co. was authorized to transact the business of live stock insurance. The Lumbermen's Mutual Casualty Co. was authorized to transact the business of automobile insurance. The Western Mutual Life Association was authorized to transact the business of life insurance. Various classes will be written by the Hartford Accident and Indemnity Co., including accident, automobile, burglary, guarantee, live stock, plate glass and sickness insurance.

Northwestern Mutual Fire Association

License has been issued to the Northwestern Mutual Fire Association, of Seattle, Wash., to transact business in Canada, and Mr. Norman S. Jones, of Seneca Jones and Son, Hamilton, Ont., has been appointed chief agent for the Dominion. A feature of the company, Mr. Jones points out to *The Monetary Times*, is that it offers for the first time in the history of Canadian insurance a policy which is non-assessable and carries a participating feature conditionally. Never before has a non-assessable, participating policy been issued for fire insurance in Canada. In fact, the Northwestern Mutual is the only company that issues such a contract in the United States. Their office is the largest mutual organization in the United States and has more assets in proportion to liabilities than any other stock company in the United States.

"The first efforts of the company," says Mr. Jones, "are directed towards inspection and fire prevention. Business is done direct with the owners of the property, no agents being employed. Business is selected and accepted only after inspection. The standard rates of insurance are charged and after expenses and losses are paid and a small appropriation made for reserve, the balance is returned to the policyholder at the end of the policy year. The company has been in existence for practically twenty years and the annual refunds on the various classes have amounted during the last few years to from 25 to 40 per cent. Needless to say, in view of the strength of this company, if a risk can measure up to the standard accepted by the company, insurance cost is very greatly reduced."

Grain Insurance and Guarantee

A Dominion license, authorizing it to write insurance in Canada, has been received from Ottawa by the Grain Insurance and Guarantee Co. This concern, which has just been organized by the grain trade, is to write insurance and bonds of all kinds for the trade. Its officers anticipate that within a short time it will handle practically all the insurance of the trade in western Canada. The company, with an authorized capital of $300,000, has opened offices in the Paris Building, Winnipeg, Man. R. T. Evans is president; W. H. McWilliams, vice-president and A. Thomson, secretary.

The Insurance Underwriting Co., Ltd., a Manitoba corporation which has received letters patent from the provincial government under the Manitoba Companies Act, is to act as manager of the Grain Insurance and Guarantee Co. The underwriters soon will have a corps of inspectors on the road inspecting the country elevators throughout the west.

Other Licenses

The National Provincial Plate Glass and General Insurance Co., Ltd., has been authorized to transact in Canada the business of fire insurance, in addition to plate glass insurance, for which it is already licensed.

License has been issued to the American Central Insurance Co., authorizing it to transact in Canada the business of fire, automobile, explosion and tornado insurance. This replaces a previous license for fire, hail and tornado insurance.

The Columbia Insurance Co. has been licensed to transact in British Columbia the business of fire insurance. Provincial head office is at Vancouver. F. W. Rounsefell, of Ceperley, Rounsefell & Co., general agents, Winch Building, Vancouver, is the attorney for the company.

The Railway Passengers Assurance Co. has been licensed to transact in British Columbia the business of fire insurance. Provincial head office is at Vancouver. P. H. Grant, branch manager, Vancouver, is the attorney for the company.

The Wawanesa Mutual Insurance Co. has been licensed to transact in British Columbia the business of fire insurance. The head office of the company is situated at Lumby, and Albert Quesnel, whose address is Lumby, is the attorney for the company.

The American Central Insurance Co., which already writes fire, hail and tornado insurance in the province of Quebec, has amended its license to include the following classes: Fire, automobile, explosion and tornado insurance. W. H. Mackenzie, Montreal, is chief agent for the province.

Insurance Notes

By the acquisition of the Clerical, Medical and General Life Assurance Society of London, Eng., the Employers' Liability Assurance Corporation is now in a position to cover all classes of insurance. The Clerical, Medical and General is an old and well-established company, having been founded almost one hundred years ago and having assets of nearly $40,000,000. While the provisional agreement by which the company is to be absorbed by the Employers' Liability Assurance Corp. has yet to be sanctioned by the shareholders, it may be taken for granted that the arrangement will be confirmed.

The National Benefit of London, Eng., which has hitherto limited its business to fire insurance in the province of British Columbia, is extending its operations to all the provinces, excepting New Brunswick. An additional license is also being taken out for hail insurance. The company is working its Canadian business through general agents. Messrs. Black and Armstrong, Winnipeg, have been made western managers and have the four western provinces in their control; Messrs. Reed, Shaw & McNaught, of Toronto, are the general agents for Ontario; A. M. Jack & Son, Halifax, are general agents for Nova Scotia; and the Prudential Trust Co., Montreal, for the province of Quebec.

Messrs. Dale and Co., Montreal, Que., known throughout Canada as one of the largest firms of insurance underwriters, announce the opening of a new branch office in St. John's, Newfoundland. For many years past, C. W. G. Tessier, of St. John's, has been acting as marine agent for the company, which has now taken over his insurance business, as from August 1st. Mr. Tessier becomes manager of the branch, jointly with O. P. Jones, who has been in the head office at Montreal during the past few years, prior to which time he was with the Toronto branch. This makes the fourth branch office of the company, while an associate office, Dale and Oliver, Ltd., maintains their interests in the city of Quebec.

The Maryland Assurance Corporation has notified the British Columbia department of insurance that it has ceased to carry on business in the province and has reinsured its outstanding contracts with the Maryland Casualty Co. The licence to the company under the insurance act has, therefore, been withdrawn.

BUILDING PERMITS INCREASE IN JUNE

Building permits issued in fifty-five cities showed an increase during June as compared with the preceding month, the total value rising from $12,155,879 in May to $13,295,041 in June, an increase of $1,139,162, or 9.4 per cent., according to figures of the Department of Labor, which are given below. Ontario, Saskatchewan and British Columbia reported decreases in this comparison, that of $887,137 in Ontario being the largest. On the other hand, Nova Scotia, Quebec, Manitoba and Alberta reported increases, those in Quebec and Manitoba of $1,165,655 and $813,786, respectively, being the most noteworthy.

As compared with the corresponding month in 1919, there was an increase of $5,717,695, or 75.5 per cent., the value for June, 1919, having been $7,577,346. In this comparison Saskatchewan alone reported a small decline in the value of the permits issued. In the remaining provinces large increases were recorded, that in Quebec of $2,483,568 being the most substantial.

QUEBEC'S SURPLUS OVER MILLION DOLLARS

Revenue for Year Ended June 30th, 1920, Was $26,529,861, and Expenditure $25,302,924—Funded Debt is $38,531,751 and Temporary Borrowings $5,778,661

Accounts of Quebec province for the year ended June 30th, 1920, show a surplus of $1,226,937 for the year. The total funded debt is $40,708,113, against which there is a sinking fund of $2,176,362, leaving a net funded debt, including increase of capital by conversion, totalling $38,531,751. There are also temporary liabilities amounting to $5,778,661 as follows: Temporary loans, $5,000,000; teachers' pension fund, $241,582; Protestant council of public instruction, $43,336; and security and trust deposits, $493,742.

Surplus on Current Account

Ordinary receipts totalled $14,472,650, including the following principal items: Dominion subsidy, $2,028,162; lands and forests, $3,033,587; mines, fisheries and game, $681,582; justice, fees, etc., $619,995; licenses, $1,554,079; taxes on commercial corporations, $1,581,759; succession duties, $1,786,930; motor vehicle law, $1,180,725. To the ordinary revenue is added receipts from temporary loans, $5,000,000; loan under 10 Geo. V., cap 3, $6,524,700; trust funds and deposits, $445,988, and other items, bringing total receipts up to $26,529,861.

Ordinary expenditures were $13,520,740, leaving a surplus or ordinary account of $951,910. The larger expenditures were as follows: Public debt, $2,029,721; administration of justice, $1,299,063; public instruction, etc., $1,673,561; roads, $1,336,366; lunatic asylums, $1,017,946; civil government, $809,097; agriculture, $887,400; public works, $758,205; charges on revenue, $618,665; lands and forests, $566,000; and legislation, $562,986. Other payments were $6,000,000 for redemption of public debt, $1,000,000 for payment of temporary loans, $3,413,108 under the Good Roads Act, 1912, and $408,904 for trust funds and deposits. The total expenditure was $25,302,924.

DUTCH LOAN COMPANIES AMALGAMATE

An amalgamation has taken place of two mortgage companies, both working in Canada—viz., the Netherlands Transatlantic Mortgage Co., of Amsterdam, Holland, whose managing directors are L. D. Fortuyn and J. Mees, and of the Rotterdam-Canada Mortgage Co., of Rotterdam, Holland, whose managing directors are F. H. Wachter and W. J. van Suylekom. The Netherlands Transatlantic Mortgage Co. has its Canadian head office in Winnipeg, under management of L. D. Fortuyn, and the Rotterdam-Canada Mortgage Co. worked through the intermediary of the Standard Agencies of Calgary.

The new company to be formed in Holland will be called the "United Transatlantic Mortgage Companies." The European office will be in Rotterdam, Holland, and the managing directors are L. D. Fortuyn, F. H. Wachter and W. J. van Suylekom, whilst J. Mees, one of the former directors of the Netherlands Transatlantic Mortgage Co., is retiring from the management and will take a seat on the board of control in Holland. The Canadian business will all be centralized in Winnipeg under the management of L. D. Fortuyn, and for this purpose a Canadian company will be formed, which will look after the interests of the United Transatlantic Mortgage Companies. The authorized capital of the new company is $2,000,000, of which $1,300,000 is issued and fully paid up, whilst the total amount of debentures issued amounts to $9,600,000. Both figures represent a total investment in mortgages in western Canada of nearly $11,000,000. The United Transatlantic Mortgage Companies are the largest Holland company operating in Canada, and the largest but one in Holland, operating in foreign countries.

CONTRACT RELATING TO MANAGEMENT OF ESTATE

Security Trust Co. Obtained Judgment Against Executors of Estate Who Are Held Responsible for Payment for Services

EXECUTORS are personally liable on their contracts so long as they have no relation to some obligation of the testator, according to a decision of the Alberta Supreme Court on April 22nd last. The case was that of Security Trust Co. vs. Wishart, in which the facts were that the company obtained $15,000 for services rendered Mrs. Wishart and William Breckenridge, two of the executors of the will of the late John Breckenridge. The two executors had made an agreement with the trust company whereby the company was to act as their attorney and agent whenever they might be absent from the jurisdiction. The agreement then witnessed that the trust company was to receive $250 per month for its services and that some question might arise later as to what extent such compensation might be chargeable against the estate. A later clause then set forth that in the event of Mrs. Wishart not receiving $300,000 and her daughter $75,000, or any legacies being diminished by reason of payments to the trust company, Mrs. Wishart was to be "personally liable for such proportion or amount of the said trust company's remuneration, as may be disallowed by the court on the passing of the accounts of the said estate," provided that if William Breckenridge received more than $5,000, "he shall to the extent of such excess contribute in equal shares with the said Irene Breckenridge (Mrs. Wishart) to such remuneration of the said trust company as may, on the passing of the executors' accounts, be disallowed by the courts."

This agreement was signed by the above two executors, but not by the third. The will of John Breckenridge provided that William Breckenridge and Mrs. Wishart would be amply compensated for their services by the legacies they would receive and that the third executor who was to look after much of the detail was to receive $250 per month, which he has received. At first it was thought that there would be a surplus, but it later developed that there was hardly sufficient to pay the debts in full. His Lordship's decision is briefly:—

Thought Expenses Would Come From Estate

"The parties all thought the estate was not only solvent but very rich. Hence the idea of much personal liability was not very prominently in their minds. Mr. Wishart agreed that what she had indemnified William Breckenridge against would come out of her share of the estate. They were really all thinking that everything would come eventually out of the estate or someone's very large legacy from it.

"I therefore think that we ought not to discover any implied undertaking of the plaintiff to look to the estate and the estate alone for the major portion of its remuneration.

"My point is that there never was any possibility of the plaintiff company being able to sue the estate in an action for their services. Even if the reference to 'personal' liability which is found in the agreement had never been there at all and even if Roach had signed, and although they were all described as executors, the plaintiff company could have sued executors personally, and them alone, for their agreed renumeration.

"There is nothing in the agreement specifically relieving the two signing executors from their ordinary personal liability, covering the whole amount agreed to be paid—the uncertain amount left after a fixed renumeration had been decided on for the two executors as well as the amount which might be allowed to them—i.e., the executors, as such remuneration. And I think therefore, the ordinary rule of full personal liability should apply.

"The appeal should be allowed with costs and judgment entered for the plaintiffs against the dependants Wishart and Breckenridge for $15,000."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station, for the week ended August 13th:—

McKinley Darragh Mine, 252,740; Nipissing Mine, 432,790; O'Brien Mine, 64,130; Hudson Bay, 60.260; Total, 819,920. The total since January 1st is 15,040,197 pounds, or 7,520.09 tons.

GREEK GOVERNMENT'S FLOUR ORDER

An order for $25,000,000 of flour has been placed with London brokers, according to cable advices, because of inability to obtain guarantee of delivery from any recognized agency in Canada. In view of the fact that Canadian flour is preferred in Greece, however, it is felt in Canadian milling circles that the orders will be placed here. The reason that the business was placed through a firm of English brokers, according to well-informed opinion, is that the Greek government desired to concentrate the responsibility for delivery of the flour to one agency, rather than distribute it among the several Canadian milling enterprises which will likely participate in the filling of the order. The London firm, in other words, simply replaces the abolished wheat board in the transaction, a development which millers here view with entire satisfaction.

FISHERIES OUTPUT IN JUNE

Although the total catch of sea fish in Canada during the month of June was 22,104 cwts. less than in June, 1919, its total value was $567,526 greater. The monthly statement issued July 29 from the fisheries branch of the marine department shows that the total catch of sea fish in Canada during June of the present year was 832,916 cwts., as compared with 855,020 cwts. in June last year. The total value of the June catch at the point of landing this year was $3,586,776, as against $3,019,250 in June, 1919.

The weather was generally favorable for fishing on the Atlantic coast and operations proceeded without hindrance during the month. The catch of cod and haddock amounted to 395,800 cwts., against 377,800 in June of last year. The weather on the Pacific was unfavorable, but in spite of this the catches of salmon, halibut and pilchards were considerably greater than those of June last year.

OPTIMISTIC VIEW OF BUSINESS

Greenshields and Co., in their June-July Review, says: "Natural conditions existing in the industries in which Canada is most concerned fairly presume a considerable measure of stability, even in the event of the present unsettlement in the United States extending into a period of business depression. There is no sound reason to expect such depression. We continue of the view expressed at some length in the last number of the *Review*, that there is too much work to be done in making good the shortage of goods throughout the world to allow of a period of acute depression. Unsettlement will be evident from time to time as supply begins to overtake demand in special commodities, but adjustments can and probably will take place within the industries affected without notable disturbance to the situation as a whole. The minor influence exerted on general business by stagnation in the big copper producing industry of the United States since the end of 1918 is in point. The progress of civilization has made world trade a firmly balanced structure in which special strain on certain parts may be taken up and relieved at others."

A party of 57 bankers, grain merchants and investors from the United States arrived in Winnipeg on August 9, on a trip through western Canada.

Record Sockeye Salmon Pack For British Columbia This Year—Canneries Are Marketing as Early as Possible to Get Highest Prices—Northcliffe Interests Take Over Quebec Paper Company—Ontario Company Purchases One Alberta Coal Mine and Takes Option on Another—Dominion Still Developing New European Market

THERE will be a record sockeye salmon pack in British Columbia this year, according to present developments. Capacity loads of these fish in cans are being received at Vancouver from northern British Columbia canneries on every trip of the coasting boats, and in many instances special steamers are being sent to the north for the purpose of bringing out the pack as soon as possible.

On the Fraser River a total of about 10,000 cases have been packed and near the close of the sockeye run the canneries were paying as high as 95 cents per fish which brings the cost of a case of fish for salmon alone up to about $14. To this must be added the packing, storing and marketing. A rough estimate of the packs from the northern canneries has been made by the fishing interests here as follows:—

On River's Inlet, where nothing but sockeyes ever run, it is estimated that about 100,000 cases have been packed; Skeena River has not produced to normal and is less than last year, showing about 60,000 cases, but pinks are running, and the canneries are now canning a number of these cheaper fish, Smith's Inlet pack is estimated to be 15,000 cases and Naas River 6,000 cases.

All the canneries are endeavoring to get their packs into the market as early as possible as the demand is strong and each operator expects to get a high price for his sockeye and gamble on the lower grades of fish. It is estimated that the pack this year will have cost each canneryman approximately 30 per cent. more than that put up last year, and in the majority of instances the packers do not anticipate that the cheaper grades will be able to stand the additional expense. About 150,000 cases of last year's chums are still in the market and with the low prices quoted on the United States market for pink talls and chum talls, about $2 and $1.50 per case, respectively, the prospect for this year's pack on these grades is very poor. They have only the advantage of being freshly packed in 1920.

Through the canneries announcing that they would pack only a limited number of pink fish a new industry developed. This is salting them for the Oriental market. Last year a number of small shipments of salt pinks and chums were made to Japan and the market took them up eagerly. This year a number of Japanese firms have gone in extensively for this class of packing and are taking all grades of fish which the canneries will not pack and salting them.

Like herrings this fish will take a $14 rate to Japan this year instead of the $20 which it cost last year and an extensive business is expected in the exportation of salt salmon as well as salt herring.

Pulp and Paper

An important deal in the pulp and paper field has just been closed as the result of the Northcliffe interests of London, Eng., having purchased a two-thirds interest in the Gulf Paper and Pulp Co., at Clarke City, below Quebec. This is the company owned by members of the Clarke family. Following their purchase, the Northcliffe interests have formed the Imperial Paper Mills, Ltd. The remaining one-third of the interest in the company is being purchased by other London people who are interested in the purchase of paper. The price, it is understood, was $3,000,000 United States currency. As soon as the deal was put through, a new board of directors was elected, consisting of Frank W Clarke, of, Quebec, J. Alex. Cameron, of Montreal, and Kenneth K. MacKenzie, of New York.

A by-law, selling the municipal power plant to the Backus interests, has been carried by ratepayers of Kenora, Ont., practically unanimously. In addition to the sale of the power plant the by-law fixes the present assessment of the Backus interests at $300,000 for ten years, and also grants exemption from all but school taxes for a like period on all additional lands, up to 125 acres, they may acquire for the purpose of the immense pulp and paper industry they propose to establish. The company agrees to sell power to the town for its utility service at $20 per horse power per year, it now costing the town $27. The agreement approved by the passing of the by-law is conditional upon the company securing the English River pulp limits.

A new company, under the name of the Standard Pulp and Paper Co., Ltd., has been incorporated in the province of Quebec, with a capital stock of $12,000,000 and head office at Quebec. The directors are: John Ball, New York City; W. S. Bullock, Rexton Pond, Que.; W. H. Bullock, Quebec. The charter of the company provides that the company may carry on the business of manufacturers, importers, exporters and merchants of sulphite, sulphate, pulp and paper and lumber and their composites and derivatives.

Lumber Situation Troublesome

In an attempt to cut expenses, the Canadian Puget Sound Lumber and Timber Co., Victoria, B.C., have acquired the best stand of timber on the Cowichan Lake Rd., from the Victoria Lumber and Manufacturing Co., of Chemainus, the area consisting of 991 acres, and is intersected by the road for three and a half miles, just before reaching the Cowichan River. A start will be made in the near future on the construction of camps and the actual work of logging off the tract.

The company has found it impossible, stated J. D. Kissinger, local manager of the firm, to compete for logs in the open market and operate the mill at a profit, and it will make no further efforts in that direction. It is estimated that a saving of $6 on every thousand feet will be made possible by the acquisition of these logging areas. Referring to the general situation of the lumber market at present, Mr. Kissinger remarked that while the difficulty of the past few months in getting contracts continues, the mill will always be faced with the possibility of closing down. The bulk of the output, apart from a few small export orders, has been divided between the Canadian and American markets. The shortage of cars is now making it impossible to continue the United States exports, and no relief appears to be in sight. As for the Canadian situation, while orders are not now numerous, an increase is expected with the general picking up of business incident to the harvest season, sufficient, it is hoped, to keep the mill on a daily working basis.

Two Large Coal Deals

The purchase of the Blue Diamond Coal Mines, Ltd., of Brule, Alberta, and the securing of an option on the Canadian Coal Fields, Ltd., in the same vicinity, by the McIntyre Porcupine Mines, Ltd., has been made known. It is further stated by J. P. Bickell, director of the McIntyre Mines, that an equal participation in deal would be offered to the Temiskaming Mining Co., Ltd., of which he is president. He stated that the shareholders of the Temiskaming Mine would be asked to vote on the matter in the near future.

The deal is an extensive one, Blue Diamond Coal Mines owning property of about 3,300 acres, which is producing over [illegible] tons of steam and coking coal daily. The Canadian [illegible] fields on which McIntyre has an option is a much larger

concern and is about thirty miles from the Blue Diamond. This latter mine is said to contain anthracite. The Blue Diamond Mine is capitalized at $1,500,000 and the Canadian Coal Fields at $10,000,000. The option on the latter is said to be for fifteen years.

Grand Lake, New Brunswick, coal areas of the G. H. King Coal Co., the Northfield Coal Co. and the A. D. Taylor Co. have been purchased by the Miramichi Lumber Co. for a price in the vicinity of $150,000, and the three areas will be consolidated and operated by the International Paper Co. for the purpose of building up a unit for increased production during the coming winter. At present the output of the three mines is about 100 tons daily, but the new owners will sink extra shafts and get an output of over 200 tons daily. It is stated that the double production would probably start within the next two months in order that a supply of coal might be at hand during the coming winter in case of a coal shortage.

Miscellaneous Trade Notes

Owing to the high cost and scarcity of building material, the Ames-Holden Rubber Boot Co. has decided to defer the erection of its new building at Kitchener, Ont., for a year or two. It is proposed to manufacture rubber boots in a portion of the Ames-Holden Tire Co.'s factory, which is in operation.

Geo. Melrose, proprietor of the Listowel Well Drilling Co., Listowel, Ont., manufacturers of drilling rigs for the past fifteen years, has sold his entire plant to the Canadian Farm Power and Machinery Co., which is capitalized at $1,000,000. This company will manufacture the Hvid oil engine, the invention of R. H. Hvid, of Chicago, beginning operations at an early date.

Prospects for the establishment of an automobile factory at London, Ont., are good. A committee representing the Service Motor Truck Co., of Wabash, Ind., have been inspecting the city and its advantages and a large plant is practically assured. This factory, as well as others which the city is endeavoring to obtain, will be located in the eastern part of the city, and as a result the Public Utilities Commission announces that it is planning a new power substation for the district.

An American firm has taken over the trunk factory at Palmerston, Ont., recently operated by Hyndman and Andrich, and is installing new and up-to-date machinery. The firm expects to employ many hands, and to be in operation at an early date. Complaint is made regarding the shortage of houses in town, and the firm has asked the mayor to do all in his power to relieve the situation.

The sale has been completed of the Dwyer elevator, on the Kaministipuia River, Fort William, Ont., to the Gillespie Elevator Co., of Edmonton, Alta. The figure at which the property changed hands is not given out. The property includes the elevator, with a capacity of 250,000 bushels, and 475 ft. water frontage, making a most desirable lake terminal elevator. The Dwyer Elevator Co. will retain their grain offices in Fort William. The Gillespie Co. already owns about fifty country elevators in the west.

It is announced that the new oil refinery and distributing plant of the Continental Oil and Refining Co., at St. Boniface, Man., is nearly completed and will be in operation shortly. Crude oil will be brought by tank cars from Texas wells and refined at the St. Boniface plant. From there it will be distributed for sale through western Canada.

The North-West Biscuit Co., Ltd., of Edmonton, Alta., is opening a wholesale distributing warehouse at Moose Jaw, Sask., and has leased suitable premises on High St. W.

Dominion Iron and Steel Co. is developing a new European market. A surplus of iron ore is being mined at Wabana, N.S., and 24,000 tons will be shipped to Middlesborough, England. A 6,000-ton cargo steamer is at present en route to Sydney for the first shipment and three others will follow. This is a new departure for the company, which previously had not sold any of the Wabana product.

NEW INCORPORATIONS

Consolidated Distilleries, Ltd., $5,000,000—J. H. Williams, $2,000,000—International Gypsum Corp., Ltd., $1,500,000

The following are the list of companies recently incorporated under Dominion and provincial laws, with the head office and the authorized capital:—

Souris, Man.—Box Brothers, Ltd., $75,000.

1870 —— OUR GOLDEN JUBILEE —— 1920
Co-Operative - Scientific - Successful

"How did the Mutual Life of Canada succeed in attaining its present impregnable position in the financial world?" It may be replied that the promoters of the Company did not organize it as a commercial undertaking, but that it might serve as a public benefactor giving the largest amount of genuine life insurance for the least possible outlay. Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built up on a scientific basis as an old line legal reserve life insurance company. The Mutual Life of Canada is a beneficent idea worked out on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders conducted by policyholders in the interests of policyholders, naturally became a great success.

Municipal Legislation in Alberta

Bond Holders May Suffer Some Loss, But Taxpaying Power is Sufficient to Meet Obligations in Most Cases—Province Will Continue to Exercise Control Through Board of Public Utility Commissioners

By ANGUS LYELL

AT the recent session of the Alberta legislature a good deal of time was given to the consideration of municipal problems; to matters pertaining to assessment, the levying of taxes, the disposal of property offered but not sold at tax sales; to the financial condition of cetrain towns and cities and the advisability, or otherwise, of provincial aid in meeting debenture indebtedness; to the degree of control the legislature should exercise over municipalities; to the extent to which rural districts can make advances to aid needy settlers in obtaining seed grain, and so on.

There are in the province six cities—Calgary, Edmonton, Lethbridge, Medicine Hat, Red Deer and Wetaskiwin, fifty-one towns, one hundred and eight villages and one hundred and sixty-eight municipal districts. Some of these are in a bad way financially, and the civic fathers are at their wits' end as to how to raise the necessary revenue. Athabasca and Macleod have defaulted in the payment of debenture interest and are likely to go into receivership during the year; and while the latter may finally meet its obligations, the freely expressed opinion is that the former is hopelessly insolvent. Wetaskiwim has been permitted—for one year only—to impose a tax on incomes, and Medicine Hat, after a good deal of manoeuvring, has obtained leave to levy a tax of ten per cent. on rentals. But the legislature decided not to bolster up the credit of any municipality by lending financial assistance.

Development Was Not Sound

The cause of the trouble in nearly every case is over-expansion, due to speculation in land in the "boom" days, and general incompetence on the part of those administering the affairs of the towns and cities. Had there been sane development in Calgary, for example, the city would have had, according to a statement made recently by one of its commissioners, about forty miles of street car tracks instead of seventy-five, with sewer and water mains and side walks, and grading in proportion, which would have meant a debenture indebtedness of about fifteen instead of twenty-three million dollars and a tax rate considerably less than forty-five mills. Had there been efficient management, the late mayor of one city would surely not have been permitted to make a trip to New York for the purpose of delivering debentures which had been sold, taking with him, if I remember correctly, the city treasurer to carry the bonds!

The basis of the valuation of property is an important factor in municipal government. If the assessment is not fair and uniform, according to the worth of the property, then not only may injustice be done to certain citizens, but the municipality as a whole may suffer financial loss. To ensure equalization of assessments, the legislature has enacted that in the present year, and every fifth year thereafter, there shall be a valuation of the lands in each municipal district. These valuations, made by local assessors, are subject to variation, if deemed unfair, by the Assessment Equalization Board of the Department of Municipal Affairs.

Hitherto the minister of municipalities has had power to dismiss and appoint councillors, should circumstances warrant these steps. Such authority has now been withdrawn; but if in any municipality the number of aldermen is less than that required to form a quorum, the minister can arrange for an election to fill the vacancies. This is a step in the right direction.

Control Through Public Utility Board

But while the minister of municipailties has been shorn of power to dismiss or appoint councillors, the legislature has tightened, rather than loosened, its grip on municipalities. It has vested the Board of Public Utility Commissioners with power to investigate the financial condition of any municipality and to plan ways and means of relieving financial pressure.

The Public Utility Commissioners, however, will not interfere in the affairs of any town or city unless requested to do so either by the minister of municipalities, the citizens of the municipality itself, or by debenture-holders representing at least one-fourth of the total of the bonded indebtedness. The commissioners will then consult with the electors and creditors or their representatives, and their recommendations will not become binding unless approved by holders of at least three-fifths of the bonded indebtedness and confirmed by the Lieutenant-Governor-in-Council.

Where a muncipality is unable to meet its financial obligations, the Lieutenant-Governor-in-Council has power to discharge the civic fathers and to appoint an administrator in their place. Such administrator would have full authority to levy taxes and to carry on the affairs of the town or city, doing anything which the elected representatives of the people had power to do.

Tax Paying Power is Measure

The revenue producing possibilities of a village, town or city constitute the determining factor in procuring capital for civic improvements or other purposes. Water mains, sewerage systems, or bridges may be valuable assets, but are not readily convertible into cash in case of liquidation. Debenture-holders look mainly to the tax-paying power of a municipality, and revenue is usually obtained by a levy on land, on buildings and improvements, on personal property and upon persons carrying on any trade, business or profession. While each village, town or city prepares its own budget, the assessments made must be in conformity with, and within the provisions of, the laws of the legislature and the terms of its own charter.

The big problem is the collection of taxes on vacant lots. This is really a serious problem in all of the cities and in many of the towns. Tax sales have now to be held annually, not later than the fifteenth day of December. But these are proving to be more or less a failure, and are creating new problems in municipal administration. Take the case of the city of Calgary. Last year it was unable to dispose of lands on which there were arrears of taxes of nearly one and a half million dollars. So far less than five per cent. of this has been paid. Title to the land will, of course, vest in the city if the taxes are not paid by the date specified. But what can the city do with vacant lots in "wild cat" subdivisions? Then taxes for the current year have been levied on unredeemed properties, which taxes are obviously uncollectible (unless paid by the city itself) but have been taken into consideration in planning the expenditures. This clearly is an error, perhaps even a serious mistake in municipal administration.

To assist settlers in obtaining seed and feed, municipal districts are permitted annually to make advances per quarter section of not more than $300, provided the total charge against any quarter section does not exceed $850. Repayment is guaranteed by the legislature. Where a lien cannot be obtained on the land, by consent of the owner, the bor-

rower must give as security a chattel mortgage on the crop and any goods or chattels he may own. Such charge remains in force until the loan is paid.

"Home Rule" Not Granted

The agitation for "home rule" for cities, sponsored by the mayor of Lethbridge, has not met with much success. It could hardly be otherwise while the affairs of our cities are being administered as at present. If there was a high degree of efficiency, the situation would be different. The legislature does not propose to assist needy municipalities financially, but it is aiming at uniformity of procedure, and evidently intends to retain the right to interfere, where necessary, in the affairs of any municipality. It apparently will act through the Board of Public Utility Commissioners, which has control over municipal expenditures and has already rendered useful service in advising on financial problems, in certain cases, and on the reconversion of some subdivisions into farm lands and on problems of assessment.

While in some cases, as in that of the town of Athabasca, the debenture-holders may, and probably will, suffer loss, yet the tax-paying power of all of the cities and most of the towns is sufficient to liquidate the bonded indebtedness. Substantial increases in the mill rate will, undoubtedly, be necessary, and, in some cases, it may even be necessary to appoint a receiver. Calgary, for example, now has a tax of about forty-five mills, with good prospects of an increase next year. Property owners, wherever possible, usually meet the extra taxes through higher charges for rent. The average man, in the final analysis, pays his share. Efficient municipal management, therefore, is a matter of moment to all citizens and not to any class in particular.

Government and Municipal Bond Market

Alberta Sells Two Million Bonds on Six and One Half Per Cent. Basis—Province Rejects Higher Bid Because the Offer, Although Legitimate, did not Come Under Specific Terms of Tender Notice—Prescott and Russell Counties Dispose of Debentures—Calgary May Offer Securities to Local Citizens

BOND dealers were somewhat surprised this week when the province of Alberta sold $2,000,000 6 per cent. 10-year bonds to the United Financial Corporation, Ltd., at 96.58, more than a point below the offer of R. A. Daly and Co., and W. A. Mackenzie and Co., who bid 97.597. The conditions in the Daly-Mackenzie tender which did not meet with the provincial treasurer's acceptance were that the tenderers should be protected in the New York market for thirty days, that is to say, no other issues were to be sold in that time payable in New York without the consent of these firms; also, that they have fifteen days in which to take up the first $1,000,000, and an additional fifteen days for the second $1,000,000. Nevertheless the offer was legitimate, and, in view of matters as they stand now, decidedly more acceptable to the province that any of the other tenders. "We consider these conditions were reasonable, and quite ordinary, and do not understand why the province should not have accepted them," said Mr. R. A. Daly, of R. A. Daly and Co. "So far as we know, the province was not in immediate need of money, and could well have afforded to await the time specified."

A few municipal issues were placed during the past week, but generally the bond market is quiet, and promises to be so for a month or more, when it is hoped there will be increased activity.

Coming Offerings

The following is a list of issues offered for sale, particulars of which are given in this or preceding issues of *The Monetary Times*:—

Borrower	Amount.	Rate %.	Maturity.	Tenders close.
Arnprior, Ont.	$ 33,200	5½&6½	Var.	Aug. 26
Ontario County ..	50,000	6	20-inst.	Aug. 27
Lachine, Que	154,000	5 & 6	Var.	Aug. 31
Calgary, Alta.	250,000	6	15 & 30-inst.	Aug. 31
Dauphin S.D., Man. .	50,000	6½	20-years	Sept. 2
Milton, Ont.	48,000	6	30-inst.	Sept 7

Arnprior, Ont.—Tenders will be received until August 26, 1920, for the purchase of $8,200 6½ per cent. 20-instalment debentures, and $25,000 5½ per cent., debentures due April 1, 1930.

Milton, Ont.—Tenders will be received until September 7, 1920, for the purchase of $48,000 6 per cent. 30-year, interest and principal payable annually. Purchaser is to prepare debentures at own expense.—G. A. Hemstreet, clerk and treasurer.

Calgary S.D., Alta.—Tenders will be received until August 31st, 1920, for the purchase of $225,000 6 per cent. 30-instalment debentures and $25,000 6 per cent. 15-instalment debentures. (For particulars, see advertisement elsewhere in this issue.)

Lachine, Que.—Tenders will be received until August 31, 1920, for the purchase of $154,000 debentures as follows, separate tenders to be made for each block:—

$8,000 dated 1st May, 1920, payable in Canada on the 1st of May, 1925, interest 5 per cent. payable at Montreal or Toronto the 1st day of May and November, denomination $1,000;

$61,000 dated 1st June, 1920, payable in Canada on the 1st June, 1925, interest 6 per cent. payable at Montreal or Toronto on the 1st day of June and December, denomination $1,000;

$15,000 dated the 1st June, 1920, payable in Canada on the 1st of June, 1950, interest 6 per cent. payable at Montreal or Toronto on the 1st of June and December, denomination $1,000;

$70,000 dated 1st June, 1920, payable in Canada within ten years of their issue in series of $7,000 per year, denomination $1,000; 6 per cent. interest payable at Montreal or Toronto on the 1st of June and December.—E. Leduce, secretary-treasurer.

Debenture Notes

St. Mary's, Ont.—A by-law providing for the expenditure of $15,000 on a new fire engine and motor truck, was defeated.

Surrey, B.C.—The school board is desirous of raising a loan of $138,000, and the council will be approached with this end in view.

Tilbury, Ont.—At a recent meeting of the town council the clerk was instructed to prepare a by-law authorizing the issue of debentures for paving.

Fort Erie, Ont.—Ratepayers will be asked in the near future to vote on a money by-law for the raising of $10,000 for various local improvements.

Saanish, B.C.—Money by-laws totalling more than $1,000,000 have passed the council, and on August 21 will be submitted to the ratepayers for approval.

Calgary, Alta.—The finance committee of the city council at a recent meeting decided to recommend the raising of $75,000 for gravelling by an issue of bonds at par to the citizens of Calgary in denominations of $50, $100, $500 and $1,000, bearing interest at 6½ per cent. This decision followed a lengthy discussion, in the course of which Comptroller Wood submitted a statement of what has been done by other western cities in the raising of local loans.

Victory Bonds a Bulwark

Just as the Great Silent Fleet was England's sure shield against the aggressiveness of German Kaiserism, so are Victory Bonds your strongest bulwark against misfortune and a "rainy day." The security is unrivalled. Interest is prompt and sure, and should necessity arise for immediate cash, your Victory Bonds can be readily sold. Furthermore, no other security maintains its value so well.

RSC INVESTMENT SERVICE

Built on Rock or Sand?

The development of the Canadian pulp and paper industry has been so rapid, and the corresponding rise in the values of pulp and paper securities so large, that many investors are puzzled by it.

And rightly so, because the movement is without parallel, and unless one knows the facts the reasons for it are mystifying.

To give you these facts we have published a searching financial analysis of the Canadian pulp and paper industry in the current number of *Investment Items*. It is of absorbing interest and will be of great service to investors.

Write for a copy before the edition is exhausted.

We expect a heavy call for it.

BANK OF TORONTO BUILDING
TORONTO

Edmonton, Alta.—The city has received enquiries from capitalists on the Pacific coast who are anxious to get certain bonds. From Victoria a buyer has asked for $1,000,000 7 per cent. one-year treasury bills, payable in Canada, while a Vancouver buyer would like to get $20,000 to $50,000 of bonds issued on tax arrears extension.

Deputy Mayor East has replied to the queries to the effect that the city has no one-year treasury notes on hand, while further sale of tax arrear debentures has been postponed. There are other bonds to sell, however, consisting of $947,037 long-term debentures, running from ten to twenty years. These have been hypothecated to the bank to cover a loan of $124,000, which matures September 1st.

Dundas, Stormont and Glengarry, Ont.—Tenders were called until August 18th, 1920, for the purchase of $400,000 6½ per cent., 10-year good roads bonds of the united counties of Cornwall. A few bids were received, but the finance committee has not yet accepted any, but has deferred action for a few days.

Bond Sales

Outremont, Que.—Messrs. Nesbitt, Thompson and Co., have been awarded $175,000 6 per cent. 10-year debentures of the Outremont Protestant School Commission. Interest of the bonds is payable in Canada and the United States.

Manitoba.—A syndicate composed of A. Jarvis and Co., Toronto, Halsey, Stuart and Co., and the First National Company of Detroit, are offering in New York, $1,250,000 of the province's 6 per cent. bonds, due August 16th, 1925, at 92.85 and interest, to yield 7¾ per cent. The bonds are a direct obligation of the province.

Toronto Township, Ont.—Messrs. Harris, Forbes and Co., and Nesbitt, Thompson and Co. have purchased $74,675.85 6 per cent. 20-instalment debentures at 94.87. Bids received were:—

Harris, Forbes and Co., and Nesbitt, Thompson and Co.	94.87
United Financial Corp., Ltd.	94.77
A. E. Ames and Co.	94.12

Prescott and Russell Counties, Ont.—Messrs. R. C. Matthews and Co. have been awarded $200,000 5½ per cent. 30-instalment debentures at 87.51, which is on a 6.75 per cent. basis. Tenders were as follows:—

R. C. Matthews and Co.	87.51
W. A. Mackenzie and Co., and the National City Co., Ltd.	86.57
C. H. Burgess and Co., option	88.50
Brent, Noxon and Co., option	88.00

Wood, Gundy and Co. offered to purchase $50,000 at 86½ on the condition that they were granted an option on the balance for the same price, or as an alternative, asked for an option on the whole block at 87.

Alberta.—The province this week disposed of an issue of $2,000,000 6 per cent. 10-year bonds to the United Financial Corporation, Ltd., at 96.58, Canadian funds, at which price the province pays slightly less than 6½ per cent. for its money. The bids in Canadian funds are:—

R. A. Daly and Co. and W. A. Mackenzie and Co.	97.597
United Financial Corp., Montreal	96.58
Wood, Gundy and Co., A. E. Ames and Co., Dominion Securities Corp., Toronto	96.29
Harris, Forbes and Co., the National City Co., New York	96.253
Æmilius Jarvis and Co., Toronto, Halsey, Stuart and Co., Chicago, Wells, Dickey and Co., Minneapolis, First National Bank, Detroit	96.24
Canada Bond Corp., Toronto	96.175

The bonds, which are payable in Toronto, Montreal, Edmonton and New York, will be sold partly in Canada and partly in the United States.

NEWS OF MUNICIPAL FINANCE

Tax Collections Good in South Vancouver—Colborne and Etobicoke Tax Rates Increased

Etobicoke Township, Ont.—A tax rate of 18.9 mills has been struck, being an increase of 2 mills over last year.

Colborne, Ont.—The tax rate this year has been fixed at 40 mills on the dollar, an increase of 8 mills over last year.

Sherbrooke, Que.—Just now the Sherbrooke Housing Co. is erecting a hundred dwelling houses under the government loan plan, while the city council has passed a resolution authorizing the formation of a second company and the borrowing of another $500,000 from the government for the purpose of building a second block of one hundred houses.

South Vancouver, B.C.—Collections made by the municipality from January 1st to July 31st this year shows decided improvement as compared with last year and previous years, the total being $918,147. In 1918 the amount was $821,543.

Regina, Sask.—As a result of the half-year's tax collections, the city sinking fund trustees have to their credit the sum of $100,000, according to an announcement by J. E. Snowball, city treasurer and secretary of the sinking fund trustees. Only a small proportion of this sum will be invested. Five-year plank sidewalk debentures sold in 1915 to the amount of $60,000 are falling due and will have to be retired out of the proceeds of the fund. Of the remaining $40,000 it is proposed to hold in reserve $35,000 in anticipation that the fund will buy up the $35,000 cyclone loan debenture issue, authorized recently by the council to meet payments to the provincial government due August 1.

For several years from now on, all the income accruing to the fund will likely be invested as there are no more city issues to mature until 1923.

Saskatchewan.—In nearly all of the municipalities where relief was granted last winter, good crops appear to be promised, and the minister of municipal affairs is hopeful that the larger part of the indebtedness incurred will be discharged soon after threshing operations are completed this year. A set of regulations governing the collection of this money has been issued under section 25 of the Relief Act. These regulations make it imperative for municipalities which distributed relief to appoint collectors, who, according to the regulations, may be paid by stated salaries or by commissions. The commissions must not in any case exceed five per cent. of the amount collected. It is understood that the amount of relief afforded by the municipalities last winter was in excess of $2,500,000. This figure does not include the relief extended through the provincial department of agriculture to the unorganized districts of the province.

Calgary, Alta.—The city's municipal street railway continued to go further behind financially during July, the deficit for that month totalling $10,603, according to the monthly report of the street railway accountant. This brings the total deficit of the street railway for the first seven months of 1920 up to $25,788, in spite of increased fares. Superintendent R. A. Brown has informed Mayor R. C. Marshall that the increased fares had made very little difference in revenue so far, as all the people were now buying tickets instead of paying cash fares. The mayor, together with the superintendent, favors raising the fares to the original recommendation of Mr. Brown, of 18 tickets, instead of 20, for $1.

Saanich, B.C.—The question of renewing certain insurance policies brought before the council recently the proposal from Clerk Cowper that the municipality insure its own buildings. While thousands of dollars had been paid out as premiums since 1906, said Mr. Cowper, only $500 in insurance had been received. He pointed out that legislative action will be required. The council is in favor of the plan but nothing definite has been decided in the matter.

Trading Dull and Price Movements Irregular on Canadian Exchanges—Issue of Western Canada Pulp Bonds to be Made Shortly—Beaver Motor Truck Stock Offering Announced—Additional Spanish River Stock Listed—Canadian Car Company Proposes to Issue Bonds

BUSINESS on the New York exchange for the week ended August 18th was dull and price movements irregular, with a tendency at the close to lower levels. Weakness in the commodity markets was responsible for declines in certain industrials, while the reports of the unsettled political situation in Europe also had some effect. The credit situation was the most important factor, however. Call loans, which were easy at 6 per cent. during the early part of the week, rose to 7 per cent and closed at 9 per cent.

Actions of Canadian stocks during the week ended August 18th were very much the same as those of New York. Business was comparatively dull, while the price movements were irregular. Most issues, however, in both Montreal and Toronto, retrieved to a certain extent the losses which they had sustained in the past two weeks. It is confidently thought in stock circles that the worst has been seen in the stock market. This does not mean, however, that there is no further need for caution or that the bull market will be immediately resumed, but that the bearish tendencies are excluded for the time at least, and that any change from present conditions might be for the better.

Beaver Motor Truck Stock

An offering of 8 per cent. cumulative retirable preferred stock of the Beaver Motor Truck Corporation, of Hamilton, Ont., is being made by Morgan-Dean, Harris and Mulveney, Ltd., Hamilton. The authorized capital of the company is $1,000,000, of which $400,000 is preferred and $600,000 non-retirable common. At the present time $260,000 of preferred and $426,500 of common will be issued. The offering is being made at $100 per share, with a bonus of one share of common with every two shares of preferred.

The plant of the company is capable of turning out one hundred trucks per month. Estimated net profits on a production of 1,000 trucks per annum is $250,000. The company will set aside 10 per cent. of its annual net earnings, after payment of taxes and preferred stock dividends, as a sinking fund for the retirement of its preferred stock.

Spanish River Stock Listed

Two additional blocks of securities of the Spanish River Pulp and Paper Co. were listed on the Toronto Stock Exchange on August 17th. They were $1,750,000 common and $3,143,000 of preferred. Of the preferred, $2,394,000 represents the 42 per cent. accrued dividends, $210,000 the 7 per cent. vouchers, $289,000 the bonds' share in the adjustment and $250,000 the adjustment of fractions. This brings the total preferred listing up to $8,842,100.

The common listing is in provision for the terms of the note issue of last September of $3,500,000. This issue was made to assist in the redemption of existing securities and provide new working capital, with the proviso that the underwriting firm could exchange half the amount of $1,750,000 into common at parity at any time during the following three years. For this reason the new listing has been made, for advantage may be taken of the offer at any time, although to date only a small amount has been so converted. It is pointed out that this provision applies to the underwriters only and not to the individual holders of the 6 per cent notes.

Capitalization Changes

A. A. Fournier, Ltd., have been authorized by an Act of the Ontario legislature to increase their capital stock from $100,000 to $500,000 by the creation of 1,000 shares of new stock, each share having a par value of $100.

The proposal to issue ten-year 7 per cent. income bonds in lieu of cash to retire the dividend arrears on the preferred stock of the Canadian Car and Foundry Co., which amount to 22¾ per cent., will be discussed by the board of directors at a meeting to be held in Montreal on September 2nd next.

A small stock issue is being made to the public this week which may ultimately result in the formation of a new and most valuable industry in Canada. Playfair, Paterson and Co., members of the Toronto Stock Exchange, are acting in a brokerage capacity. The stock in question is that of the Jackson Drier Co., Ltd., capitalized for $100,000, of which $40,000 is held by the syndicate and only $25,000 is being issued for public subscription. The company proposes to manufacture special drying machinery, which has been designed and patented by the company's president, W. S. Jackson.

The Montreal Stock Exchange official sheet of August 18th contained the announcement of the "calling" on August 21st of 65,000 shares of common capital stock of the Provincial Paper Mills, Ltd., of the par value of $100 each, and of 17,000 shares of 7 per cent. cumulative preferred stock of par value $100 each. This stock presumably represents the new stock of the reorganized Provincial Paper Mills Co., which in April voted a change in the company's capital whereby common shareholders would receive one and a half shares of new stock for each one of old held, and the preferred shareholders would receive share for share.

Western Canada Pulp Bonds

An offering of $1,000,000 7 per cent. serial bonds, maturing annually from February 1st, 1923, to February 1st, 1940, of the Western Canada Pulp and Paper Co., will shortly be made to the public by Messrs. Graham, Sanson and Co., Toronto, at par, with a bonus of five shares of common stock with each $1,000 bond.

The capitalization of the company is as follows: Common shares (no par value), 25,000 authorized, of which the total has been issued; 6 per cent. mortgage debenture stock, due February 1st, 1950, $1,200,000, all issued, and 7 per cent. first mortgage bonds of $1,000,000, which mature in annual series from February 1st, 1923, to February 1st, 1940. Application will be made in due course to list both bonds and stock on the Montreal and Toronto Stock Exchanges.

The company's plant is located on Howe Sound, about 25 miles from Vancouver, B.C. With the proposed additions and improvements, for which funds have been provided by the present company, the plant will have a minimum capacity of 40 tons per day, or about 12,000 tons per year, and will be capable of producing such result economically and in accordance with the latest practice. The company owns its townsite, which is located on navigable deep water, equipped with a dock 600 feet long, with sufficient depth in sheltered water for ocean-going vessels. The company has acquired a valuable asset in the water-power of Rainy River, the foreshore rights at the mouth of the Rainy River and 1,000 feet of waterfront on Thornborough Channel, Howe Sound.

The pulp mill of the company, it is estimated, will have a minimum capacity of 40 tons of pulp per day. It is the intention to work in conjunction with the pulp mill, sawmills and to extend their operations to the manufacture of shingles and wood products of all kinds. The company's timber areas contain a large quantity of superior quality red cedar, which is adapted for the manufacture of the best class of shingles.

The Russian Soviet government will shortly open an office in Montreal, under the care of J. G. Obsol, to take charge of commercial relations with the Canadian government.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after **Wednesday, the First Day of September** next, to shareholders of record of 31st July, 1920.

By Order of the Board
FREDERICK WILLIAMS-TAYLOR,
General Manager

Montreal, 20th July, 1920. 202

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 131

Notice is hereby given that a Dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st August next, and that the same will be payable at the Bank and its Branches on and after Wednesday, 1st September, 1920, to shareholders of record at the close of business on the 16th day of August, 1920.

By Order of the Board.
JOHN AIRD,
General Manager.

Toronto, 19th July, 1920. 200

DIVIDEND

IMPERIAL OIL, LIMITED

Notice is hereby given that a dividend of seventy-five cents per share in Canadian funds has been declared by the Directors of Imperial Oil, Limited, and that the same will be payable in respect of shares specified in any share warrant of the Company within three days after the Coupon Serial Number Four of such Share Warrant has been presented and delivered to the Royal Bank of Canada, Toronto Ontario, or at the office of Imperial Oil, Limited, Toronto, Ontario, such presentation and delivery to be made on or after the 31st day of August, 1920.

Payment to Shareholders of record and fully paid up at the close of business on the twenty-fourth day of August, 1920 (and whose shares are represented by Share Certificates), will be made on or after the 31st day of August, 1920.

Shares subscribed for in accordance with the Company's circular of January 12th, 1920, will rank for the above dividend pro rata in the proportion which the amount paid up on such shares from time to time bears to the full price at which such shares were issued, viz., seventy-five dollars per share, but no dividend will be actually paid by the Company to subscribers until their shares shall have been fully paid for and Share Certificates issued therefor.

The books of the Company for the transfer of shares will be closed from the close of business on the twenty-fourth day of August, 1920, to the close of business on the thirty-first day of August, 1920.

By order of the Board. [illegible]

THE OGILVIE FLOUR MILLS COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a quarterly dividend of one and three-quarters per cent. has been declared on the Preferred Stock of the Ogilvie Flour Mills Company, Limited, payable Wednesday, the first day of September, 1920, to Shareholders of record, at the close of business Monday, the twenty-third day of August, 1920.

By Order of the Board.
G. A. MORRIS,
Secretary-Treasurer

Montreal, August 12th, 1920. 210

Corporation Finance

Bell Telephone Company is Making Application for Higher Rates—New Schedule, if it Comes Into Force, will Affect Business Houses Chiefly—Company will be Strongly Opposed from that End—Wage Increase for Montreal Tramways Employees—Lake Superior Corporation had Satisfactory Year

Montreal Tramways Co.—The strike which has been threatening the company for the past two weeks is definitely off. On August 15th, employees, by a majority of 1,152, decided to accept the award of the Board of Conciliation. The new contract is until June 30th, 1921, and is retroactive to July 1st, 1920. It is quite clear that the union will make a further demand for increases toward the close of the present year's contract. They will now receive 45, 50 and 55 cents an hour for the first, second and third year men, respectively.

The increase to the men means an additional $800,000 added to the wage bill of the Montreal Tramways Co., which will in consequence within a short time make application to the Montreal Tramways Commission for an increase in fares so that this additional amount may be met.

Twin City Rapid Transit Co.—A comparative income statement of the company for June, 1920, shows the following results:—

	1920.	1919.
Total railway operating income	$996,120	$923,672
Total railway operating expenses and taxes	768,547	680,019
Operating income	$227,573	$243,653
Total non-operating income	2,643	1,181
Gross income	$230,216	$244,834
Interest on funded debt, etc.	90,453	91,906
Net income	$139,763	$152,929

Lake Superior Corporation.—At a meeting of the board of directors of the corporation in New York on August 14th, annual operating reports of subsidiary companies were submitted and approved. The directors declared the payment of 5 per cent. interest on the outstanding income bonds of the company.

Commenting on the past year's operation, President Cunningham said that a full detailed report would shortly be published and forwarded to the stockholders, showing a most satisfactory operation of the steel plants under the very trying conditions that existed throughout the year. The steel company's earnings, after all interest charges, but before reserve for general depreciation were $2,591,183, the net balance carried forward amounting to $1,570,314, making the total surplus at close of year $2,793,441, subject to taxes. The future held out encouraging outlook for steel operations during the present year. Coal and ore receipts to carry over winter months' operations were substantially assured by heavy arrivals in the past and present months.

Bell Telephone Co. of Canada.—Particulars of the application it is making to the Dominion Board of Railway Commissioners have been announced by the company. The company asks, if its application is endorsed by the board, that the new schedule of tolls be effective from September 16th, 1920. In a statement issued by the company it is shown that the estimated annual revenue will be increased by $4,571,815. Although an increase of 10 per cent. was granted by the Railway Commissioners on May 19th, 1919, on all tolls, rates and charges for exchange service, it has been found that the cost of labor and materials have advanced so rapidly that the additional revenue made possible at that time is not now sufficient for the company to carry on its business. In a statement based on the months of May and June, it is claimed that the annual revenue from all sources is $16,583,367, while the expenses of operation, maintenance, depreciation and taxes total $16,468,450. The net telephone revenue of $113,916, when compared with the valuation of the company's property of $55,025,342, is a rate of return of but .207 per cent. annually. The cost of materials is shown to have increased by 16.53 per cent.

The company, in presenting its case, states:—

"Owing to the increasing demand for telephone service in the territory served by the applicant it is essential, in order to maintain the service, that the applicant provide additional facilities and extend its present plant from time to time. In order to provide for this the applicant must arrange for further financing upon a large scale.

"The necessary moneys to meet this expenditure and for the applicant's operations cannot be raised unless the applicant is authorized to charge rates sufficient to provide a reasonable return upon the applicant's investment. In view of the cost of raising the necessary additional capital for the extension of the applicant's business in order to meet the continually growing demands for telephone service, the applicant submits that reasonable rates for telephone service should be such as to provide a return of at least 8 per cent. upon the value of the telephone property used in the service.

"The applicant has given careful consideration to the method by which the necessary additional revenue should be secured, and has revised its present rate for exchange telephone service and charges incidental thereto and its long distance and other tolls in such a manner as fairly to distribute the rates among the users of the applicant's service, as well as to permit a wider distribution of service by providing additional classes of service. The applicant has also endeavored in revising its rates to conform to the opinions expressed by the board upon the previous hearing by removing the discrimination in rates between different exchange areas which was the subject of criticism at the previous hearing. The applicant submits for the approval of the board changes in the following:—

(a) The tariff of rates for exchange service.

(b) The tariff of tolls for long distance service.

(c) The tariff of tolls for miscellaneous equipment and services.

(d) The tariff of tolls for private branch exchange service, and

(e) A charge to be known as 'Service Connection Charge.'"

The New Schedule

The company requests that the schedule of tolls for exchange service be changed so that the tolls be assessed according to the population of the various municipalities in which the stations are located. These are divided into seven classes, which, with the corresponding rates, are as follows:—

Group 1—Comprising stations having in excess of 70,000 stations and 400,000 population. The charge per individual phone for 100 messages per month to be $5 and each additional message to be charged 4 cents. The flat rate for residences would be $4 per month for individual lines and $3 for two-party lines.

Group 2 comprises 10,000 to 35,000 stations, and 100,000 to 150,000 population. This is made up of Ottawa, Hamilton and Quebec, and the business monthly rate (100 messages) are $4.50, with 3 cents for additional messages; and residence, $3.50 and $2.75.

Group 3, 5,000 to 9,000 stations and 40,000 to 60,000 population, includes London and Windsor, with flat rates for business phones $4.75 and $4, and residence $3 and $2.50. Group 4 includes 2,000 to 5,000 stations, 15,000 to 35,000 population, with rates at $4 and $3.25, and $2.75 and $2.25; Group 5, 900 to 2,000 stations, 8,000 to 25,000 population with rates $3.50 and $2.75, and $2.50 and $2; Group 6, 400 to 900 stations, 3,500 to 18,000 population, at $3 and $2.50 and $2.25 and $1.75; Group 7, generally less than 400 sta-

*Deficit.

tions and 6,000 population, at $2.75 and $2.25, and $2 and $1.75

Long distance calls would be classed for the purpose of charges as station to station, person to person, appointment, messenger and collect calls.

By the above arrangement the company claims that the users will pay for the service, and the subscribers who use their phones but a small number of times will not be bearing the cost of the larger subscribers. It is evident that if the new schedule goes into effect business houses will suffer the most, and the company will be strongly opposed from that end.

RECENT FIRES

Nanaimo Lumber Mill Destroyed With Loss of $85,000—Business Section of Morinville, Alta., Damaged—Other Conflagrations—Lightning Caused Six Fires

Belleville, Ont.—August 14—Barn belonging to Charles McCann, of Seymour Township, was destroyed with a loss of $1,500. The fire was caused by an electrical storm.

Brockville, Ont.—August 16—An unoccupied cottage, owned by Wm. Tindale, on the river opposite Butternet Bay, was destroyed by fire.

Charlo Sta., N.B.—August 7—A lightning bolt struck the residence of W. D. Miller and did considerable damage.

Darling's Island, N.S.—August 11—Barn belonging to James Henderson was struck by lightning and destroyed.

Ingersoll, Ont.—August 13—An electrical storm destroyed a barn on the farm of John Sheehan. The loss is estimated at $2,500.

Lanfine, Sask.—August 7—A hardware store and a bank building were destroyed by fire. The fire originated in a small oil warehouse.

Limoilou, Que.—August 7—Barn owned by L. Begin was destroyed. The fire was caused by an electrical storm. The loss is estimated at $5,000.

Morinville, Alta.—August 7—A fire caused by an explosion of an oil lamp caused the destruction of one of the business sections of this town. The loss is estimated at $100,000.

Nanaimo, B.C.—August 8—Lumber mill owned by Frank Beban was destroyed by fire. Estimated loss, $85,000. The fire was caused by bush fires in that district.

St. John, N.B.—August 12—Grist mill, carding mill, shingle mill and barn belonging to David McLean were damaged by fire. The loss is estimated at $10,000.

Scotstown, Que.—August 13—Residence and barn of E. Leblanc was damaged by fire. The loss is estimated at $5,000, with very little insurance.

Tabusintac, N.B.—August 12—Large barn owned by Mr. McNeill was destroyed by fire together with this year's crop. The fire was caused by lightning.

Toronto, Ont.—August 18—Four motor cars in Cleveland and Chandler's garage at Yonge and Wellesley Streets were destroyed. The loss is estimated at $5,000.

Vancouver, B.C.—August 11—Royal Canadian Mounted Police Barracks were damaged by fire with a loss estimated at $25,000.

ADDITIONAL INFORMATION

Sault Ste. Marie, Ont.—August 4—A stable, horses and equipment, belonging to the Lyon Fuel and Supply Co., Ltd., were destroyed by fire. The total loss is $7,500 with insurance of $500 in the Royal Exchange. The fire was started from a cigarette stub.

Winnipeg, Man.—August 2—The electric wiring and apparatus, belonging to the city of Winnipeg light and power dept., was destroyed by fire. The fire was caused by hot rivets coming in contact with axle grease. The loss is $25,000 with no insurance.

OF INTEREST TO CANADIAN FIRE INSURANCE COMPANIES

A company in Alexandria, Egypt, is anxious to obtain the agency for Egypt of a good Canadian fire insurance company. Those interested will please communicate with Jas. J. Salmond, president of *The Monetary Times.*

Four additional fire wardens and several building inspectors will be appointed in Vancouver, orders to this effect having been given on August 4 at a special meeing of the city council to consider Justice Morrison's report on the Balmoral apartments' fire on June 20.

Who Pays?

NATURALLY, big users of telephone service are concerned about the prospect under the message rate tariff.

They have never before realized how often they use the telephone.

It has never occurred to them that under the low flat rate small users might be carrying an unfair proportion of the cost of the service.

Somebody must pay for heavy use! Who should it be?

When the facts of the telephone rate situation have been made clear, there are few, we believe, who will question the fairness of a tariff for business telephones that fixes payment in proportion to use of the service.

Succession Duties and Life Insurance*

Comparison of Rates in Nine Provinces of Canada—Nova Scotia, Manitoba and Alberta Give Special Treatment to Life Insurance—Many Ways in Which Insurance Money Comes in Useful in Administration of Estate

By JOHN COWAN
Toronto General Trusts Corporation, Toronto

ACCORDING to our old friend, Benjamin Franklin, there is nothing surer than death and taxes. Both have been with us in many forms since the beginning of time, the great war especially having yielded an abundant harvest. This afternoon we are met to consider the relationship of one of the more recent forms of taxation, namely, succession duty, to that class of life insurance which makes provision for the dependents of the assured in the event of death.
